

§ 341.10 Application of rates to intermediate points.

(a) *Applicability.* (1) A carrier may provide in its tariff that existing rates between points named in the tariff will be applied to transportation movements from intermediate origin points not named in the tariff to named destination points, and from named origin points to intermediate destination points not named in the tariff.

(2) A carrier must file a tariff publication applicable to the transportation movements within 30 days of the start of the service if the intermediate point is to be used on a continuous basis for more than 30 days.

(b) *Intermediate point commodity rate regulations—*(1) *Intermediate origin points.* The rate for service provided to a published destination point from an origin point not specifically named in the tariff, but located intermediate to published origin and destination points, must be the same as the published rate from the next more distant origin point. Application of this provision is subject to the following:

(i) If branch or diverging lines create two or more “next more distant” points, the carrier must apply the rate which results in the lowest charge.

(ii) If the intermediate point is located between two published origin points, the carrier must apply the rate which results in the higher charge.

(iii) If the intermediate point is between more than two published origin points due to branch or diverging lines, the carrier must eliminate all such points except that from which the lowest charge is applicable.

(iv) If there is in any other tariff a commodity rate from the proposed intermediate origin point that is applicable to the same movement, the carrier should not apply this rule from such intermediate point.

(2) *Intermediate destination points.* The rate for service provided from a published origin point to a destination point not specifically named in the tariff, but located intermediate to published origin and destination points, must be the same as the published rate to the next more distant destination point. Application of this provision is subject to the following:

(i) If branch or diverging lines create two or more “next more distant” points, the carrier must apply the rate which results in the lowest charge.

(ii) If the intermediate point is located between two published destination points, the carrier must apply the rate which results in the higher charge.

(iii) If the intermediate point is between more than two published destination points due to branch or diverging lines, the carrier must eliminate all such points except that from which the lowest charge is applicable.

(iv) If there is in any other tariff a commodity rate to the proposed intermediate destination point that is applicable to the same movement, the carrier should not apply the provisions of this rule to such intermediate point.

(3) *Intermediate origin and destination points.* Both paragraphs (b)(1) and (b)(2) of this section may apply in connection with the same rate. In this instance, both regulations should be used to establish rates from intermediate points of origin to intermediate points of destination.

§ 341.11 Rejection of tariff publications and other filed materials.

(a) *Basis for rejection.* The Commission may reject tariff publications or any other material submitted for filing that fail to comply with the requirements set forth in this part or violate any statute, or any regulation, policy or order of the Commission.

(b) *Numbering and notating tariff publications.* The FERC Tariff number assigned to a tariff publication that has been rejected may not be used again. The tariff publication filed in its place must bear the following notation:

Issued in lieu of [*identify the rejected tariff publication*], rejected by the Commission.

§ 341.12 Informal submissions.

Carriers may informally submit tariff publications or related material for suggestions of Staff prior to the filing of the tariff publications with the Commission.

§ 341.13 Withdrawal of proposed tariff publications.

(a) *Proposed tariff publications.* A proposed tariff publication which is not

yet effective may be withdrawn at any time by notice to the Commission, made by a letter addressed to the Secretary of the Commission with a certification that all subscribers have been notified by copy of such withdrawal.

(b) *Tariff publications that are subject to investigation.* A tariff publication that has been permitted to become effective subject to investigation may be withdrawn at any time by notice to the Commission, made by a letter addressed to the Secretary. Such letter must include a copy of the previous tariff publication to be reinstated upon withdrawal of the tariff publication under investigation. The letter must also include a certification that all subscribers have been notified by copy of such notice of withdrawal. Such withdrawal shall be effective immediately upon the submission of the notice, unless a specific effective date is set forth in the notice, and must have the following effects:

(1) Any proceeding with respect to such tariff publication shall be terminated;

(2) The previous tariff rate shall be reinstated; and

(3) Any amounts collected under the withdrawn tariff publication which are in excess of the previous tariff rate shall be refunded within 30 days of the withdrawal with interest as calculated by §340.1 of this chapter.

(c) *Numbering and notating tariff publications.* The FERC Tariff number assigned to a tariff publication which has been withdrawn may not be used again. The tariff publication filed in its place must bear the following notation:

Issued in lieu of [*identify the withdrawn tariff publication*] which was withdrawn.

§341.14 Special permission.

(a) *Procedure.* Applications for waiver of the notice and tariff requirements of section 6(3) of the interstate Commerce Act must be filed by the carrier concurrently with the tariff publication being proposed. The letter of transmittal must identify the filing as requesting a waiver under section 6(3) of the Interstate Commerce Act. The application must state in detail any unusual circumstance or emergency situation that supports the requested waiver.

er. If the application requests permission to make changes in joint tariffs, it must state that it is made on behalf of all carriers party to the proposed change. Tariff publications issued on short notice must contain the following statement on the Title Pages:

Issued on [*insert number*] days notice under authority of 18 CFR 341.14. This tariff publication is conditionally accepted subject to refund pending a 30 day review period.

(b) *Conditional acceptance subject to refund.* To permit short-notice filings to become effective as requested, the tariff publications filed concurrently with special permission requests for short (less than 30 days) notice will be deemed conditionally accepted for filing, subject to refund, until the Commission has had a full 30-day review period in which to process the filing. Refunds will be collected with interest as calculated according to §340.1 of this chapter. The refund obligation will automatically terminate with no refunds due at the end of the full 30-day notice period absent an order to the contrary issued by the Commission.

(c) *Granting automatic permission.* The special permission requested will be deemed automatically granted at the end of the full 30-day notice period absent an order denying such request.

§341.15 Long and short haul or aggregate of intermediate rates.

(a) *Requests for relief from section 4.* Carriers may file requests for relief from the provisions of section 4 of the Interstate Commerce Act in order to charge a greater amount for a shorter distance over the same line or route in the same direction, or to charge greater compensation as a through rate than the aggregate of the intermediate rates. Such request will be deemed granted unless the Commission denies the request within 30 days of the filing.

(b) *Information required to be filed.* A request for section 4 relief must contain the following information:

(1) The names of the carriers for which the relief is being requested.

(2) The FERC tariff numbers which contain the rates or charges referred to in the application, and identification of all the particular and related rates in question delineating origin and destination points.
