

**§ 803.27 Emergencies.**

In the event of an emergency requiring immediate action to protect the public health, safety and welfare or to avoid substantial and irreparable injury to any person, property, or natural resources and the circumstances do not permit a review and determination in the regular course of the regulations in this part, the executive director, with the concurrence of the chairperson of the commission and the member from the affected signatory state, may issue an emergency certificate authorizing a project sponsor to take such action as the executive director may deem necessary and proper in the circumstances, pending review and determination by the commission as otherwise required by this part.

**§ 803.28 Application/monitoring fees.**

The commission may, by separate resolution, establish and modify fees for the submission and processing of applications and for the monitoring of project compliance with this part.

### **Subpart C—Terms and Conditions of Approval**

**§ 803.30 Duration of approvals.**

(a) Approvals issued under this part shall have a duration equal to the term of any accompanying signatory license or permit regulating the same subject matter. If there is no such accompanying license or permit or if no term is specified in such accompanying license or permit, the duration of a commission approval issued under this part shall be 25 years. The commission, upon its own motion or that of a project sponsor, may modify this duration in consideration of such factors as the time needed to amortize a project investment, the time needed to secure project financing, the potential risks of interference with an existing project, and other equitable factors. Unless there is an accompanying signatory license or permit regulating the same subject matter and specifying a duration, the 25 year duration for projects previously approved by the commission under this part shall commence five years from the date on which such projects were initially approved.

(b) For projects that have been approved by the commission but not implemented, approval by the commission under this part shall expire three years from the date of commission action. Likewise, if the use of a project is discontinued for such a period of time and under such circumstances that an abandonment of the project may reasonably be inferred, the commission may rescind a prior approval for such abandoned project. In either case, an approval may be extended or renewed by the commission upon request.

(c) The sponsors of projects previously approved by the commission should apply for renewal of their approvals no later than six months prior to the expiration of their previous approval. Such applications for renewal shall be reviewed under the same procedures and standards as for newly proposed projects.

**§ 803.31 Transferability of approvals.**

Approvals by the commission are transferable to new owners of projects, provided that the transferors or the transferees notify the commission of the transfer either before or within 60 days after the date of the transfer and that the new owners, within 30 days of being requested to do so by the commission, submit in writing their intention to comply with all conditions of the project's docket approval and assume all other associated obligations. The commission may waive or extend any of these deadline periods for good cause.

**§ 803.32 Reopening/modification.**

Once approved, the commission, upon its own motion, or upon application of the project sponsor or any interested party, may at any time reopen any project docket and make additional orders that may be necessary to mitigate or avoid adverse impacts or to otherwise protect the public health, safety, and welfare or natural resources. Whenever an application for reopening is filed by an interested party, the burden shall be upon that interested party to show, by a preponderance of the evidence, that a substantial adverse impact or a threat to the public health, safety or welfare exists that warrants reopening of the docket. Before such

## § 803.42

application may be submitted to the commission for action, the executive director shall first determine that an interested party has made out a prima facie case favoring the reopening of the docket. The executive director shall inform the commission of any negative finding in this regard so that the commission is afforded the opportunity to over-rule his/her decision.

### § 803.33 Interest on fees.

The commission may, by resolution, establish interest to be paid on all overdue or outstanding fees of any nature that are payable to the commission.

## Subpart D—Standards for Review and Approval/Special Standards

### § 803.40 Purpose of this subpart.

The purpose of this subpart is to set forth standards that shall be used by the commission to evaluate proposed projects pursuant to §§ 803.4 and 803.5, and to establish special standards applicable to certain water withdrawals and consumptive uses irrespective of whether such withdrawals and consumptive uses are subject to project review pursuant to Section 3.10 of the compact. General standards applying to all projects and special standards applying to certain types of projects are set forth in this subpart. This subpart does not identify all the aspects of a proposed project that will be evaluated, nor should it be construed as a self-imposed limitation upon the commission's authority and scope of review. The special standards established pursuant to Section 3.4 (2) of the compact shall be applicable to all water withdrawals and consumptive uses in accordance with the terms of those standards, irrespective of whether such withdrawals and uses are also subject to project review under Section 3.10 of the compact.

### § 803.41 General standards.

(a) A project shall not be detrimental to the proper conservation, development, management, or control of the water resources of the basin.

(b) The commission may modify and approve as modified, or may disapprove, a project if it determines that the project is not in the best interest of the conservation, development, management, or control of the basin's water resources, or is in conflict with the comprehensive plan.

### § 803.42 Standards for consumptive uses of water.

(a) *Requirement.* (1) Compensation shall be required for consumptive uses of water during periods of low flow. Compensation is required during periods of low flow for the purposes set forth in § 803.2.

(i) *Surface water source.* Compensation in an amount equal to the project's total consumptive use shall be required when the streamflow at the point of taking equals or is anticipated to equal the low flow criterion which is the 7-day 10-year low flow plus the project's total consumptive use and dedicated augmentation. The commission reserves the right to apply a higher low flow criterion for a particular stream reach when it finds, as the result of evidence presented at a public hearing that it is needed to serve the purposes outlined in paragraph (b)(1) of this section.

(ii) *Ground-water source.* Compensation for the project's consumptive use of ground water shall be required when the stream flow is less than the applicable low flow criterion. For the purposes of implementing this regulation, the commission will identify the appropriate stream gaging station for determining the applicable low flow.

(2) Consumptive uses by a project not exceeding an average of 20,000 gpd for any consecutive thirty-day period from surface or groundwaters are exempt from the requirement unless such uses adversely affect the purposes outlined in paragraph (b)(1) of this section.

(b) *Method of Compensation.* (1) Methods of compensation acceptable to the commission will depend upon the character of the project's source of water supply and other factors noted in this paragraph (b)(1).

(i) The required amount of compensation shall be provided by the applicant
