

and assessments of all proposed excess property to establish the type and quantities of contaminants and then plan, direct and control the program to decontaminate and clean up the property. Following the completion of the decontamination clean up program, USATHAMA will prepare a clearance statement stating the property has been cleared of all toxic and hazardous materials reasonably possible to detect using present state-of-the-art methodology, and it will provide any exceptions or restriction for utilization of the property. Clearance statements which identify contaminations of ammunition and explosives will be submitted to the DDESB for review. Category Two items may include chemical munitions or agents, liquid propellants and pyrotechnics. The clearance statement will be forwarded through the Major Army Command (MACOM) to DAEN-REM.

(1) Decontamination of Category Two real property will comply with the requirements of TB 700-4 (Decontamination of Facilities and Equipment). The Bulletin provides general policies, responsibilities and procedures applicable whenever potentially contaminated facilities are disposed of to other Government agencies, qualified users in industry, or to the general public.

(2) The degrees of decontamination are designated in TB 700-4. Contaminated real and personal property excessed for disposal shall be decontaminated to XXXXX before it can be removed from the Government premises, or transferred to nonqualified Government or industry users.

§ 644.520 Contaminated industrial property.

(a) GSA may arrange to sell contaminated chemical or other industrial plants to a purchaser whose operations will result in the same type of contamination, or who agrees to perform the necessary decontamination. Any decontamination work required will be monitored by USATHAMA who will also review the completed program for adequacy of decontamination. If these arrangements cannot be worked out, USATHAMA will decontaminate the property at the request of the Office, Chief of Engineers (OCE), or the prop-

erty may be withdrawn from excess and returned to the using command for care and custody.

(b) A Statement of Clearance is required for industrial property to be declared excess in order to establish a qualitative and quantitative base line for the contaminants present. In the Statement, USATHAMA will provide an adequate description of the nature and extent of the contamination. The description furnished to the DE should include the following information:

(1) Name and location of installation.

(2) Date of final clearance.

(3) Reference to attached real estate map showing locations of contaminated, cleared and restricted areas. The map(s) will be attached to the description of contamination.

(4) Statement that the area has been cleared of toxic and hazardous materials reasonably possible to detect either by present state-of-the-art methodology or by a visual inspection.

(5) Recommendation as to whether the land or structures may be used for any purpose for which it is suited, clearly identifying any areas recommended for restricted use and listing restricted tract and building numbers.

§ 644.521 Limitations on clearance cost.

The following principles are established for determination of the financial limit of clearance operations at excess installations:

(a) *Government-owned land.* Clearance work will not be undertaken where the estimated cost thereof exceeds the value of the land after decontamination plus the estimated cost of keeping it security-fenced and posted for a period of 25 years.

(b) *Leased land.* Clearance will not be undertaken where the estimated cost, plus the cost of any other required land restoration work, exceeds the value of the land after clearance and restoration plus the estimated cost of keeping it security-fenced and posted for a period of 25 years.

§ 644.522 Clearance of military scrap.

Military scrap can contain or be contaminated with explosives, chemicals, and other hazardous materials. The
