

point and recreational site proposed within the area covered by that REDM. Noncontiguous areas planned for these purposes that are located beyond the limits of the REDM involved will be omitted therefrom. This procedure does not apply to areas authorized for fish and wildlife purposes. Lands authorized specifically for fish and wildlife purposes may be included either in a conventional REDM, along with other project lands or be submitted as a separate REDM, depending on convenience in preparation and size of the area. However, in either event, whenever practicable, the entire area proposed for this purpose should be covered in one REDM, as a unit.

(iii) For smaller projects, not involving an extensive real estate program, all real estate requirements, including those for public access, fish and wildlife, and recreation, may be covered in a single REDM.

(d) *Blocking Out.* The following are guidelines to be observed to the extent possible in preparing the REDM. These guidelines will be adhered to by the Division Engineer in his approval of the final real estate acquisition lines.

(1) Close blocking out will be accomplished in accordance with sound real estate practices.

(2) For land acquired in fee, the blocked out final real estate acquisition line will be established in such manner as to minimize costs and cause the least disruption in the use of the remainder of the ownership.

(3) Severance damages will be avoided to the extent possible consistent with real estate requirements for the project. In accordance with section 301 of Pub. L. 91-646, if the acquisition of part of a tract will render the remainder an uneconomic unit, an offer must be made to purchase the entire tract.

(4) It is conceivable that, in certain instances, acquisition of an easement will result in an uneconomic remainder and this requires application of section 301 of Pub. L. 91-646, as in paragraph (d)(3) of this section.

(5) A remnant without access need not be acquired if:

(i) The owner desires to retain the property and releases the Government from damages for lack of access, and

(ii) The obtaining of such release in lieu of acquisition is concurred in, in writing, by the local road authority, and the local road authority is released from damages due to loss of access.

(6) For lands to be acquired in fee or easements, close tangent will be used, generally following the acquisition line.

(7) When small portions of additional properties, not otherwise needed for the project, are within the acquisition line, they may be omitted if to do so will not materially affect the operation and maintenance of the project as determined by operational elements.

§ 644.7 Acquisition lines.

(a) *Tentative Acquisition Lines.* As indicated in § 644.6(c)(1)(iii)(K), tentative acquisition lines are shown on maps which are part of the REDM. However, at that time, the lines will, to some extent, be irregular and located without full regard to their effect upon fringe tracts. It will, therefore, be necessary to establish final acquisition lines, in accordance with sound real estate practices. Accordingly, fringe tracts will not be acquired until the final acquisition lines are approved by the Division Engineer.

(b) *Submission.* As soon as possible after authority has been granted to acquire the land and/or interest therein, the District Engineer will complete appraisals covering the fringe tracts. Thereupon, a map showing proposed final acquisition lines will be submitted to the Division Engineer, accompanied by justification and reasons therefor. This submission may be for an entire project or by segments or units. However, if the final map is submitted on a segment or unit basis, each segment or unit must be complete in itself and not be dependent on another segment or unit not submitted for approval.

(c) *Approval.* The Division Engineer is authorized to approve final acquisition lines, but shall not delegate this responsibility to District Engineers. This authority is subject to the following:

(1) Except for the addition or deletion of individual ownerships, or portions thereof, on the basis of the criteria contained in § 644.6(d), approval of any changes in the overall plan will be in compliance with ER 1110-2-1150.

(2) Estates in individual tracts may be changed if consistent with the overall plan. Approval, however, will be required from HQDA (DAEN-REA-P) if the estates are non-standard.

§644.8 Planning and scheduling real estate activities.

(a) *Normal Scheduling.* (1) The objective of a planned program is to provide for the early acquisition of land to avoid enhancement in land prices and a minimum of inconvenience to the property owners. Also, it is essential that there be adequate planning of the land acquisition program to insure that there is no interference with unacquired properties as a result of construction activities.

(2) It is essential that adequate funds be programmed on ENG Form 2213, Advance Engineering and Design Planning Schedule (PB-2B), to proceed with real estate planning; preparation of Real Estate Design Memoranda; determination of final project boundaries; and preliminary real estate work to the point where land acquisition can be started as soon as construction funds become available.

(3) Surveys and boundary monumentation and/or marking shall be completed prior to acquisition.

(4) Funds will be programmed for acquisition of lands for the construction area and/or other areas initially required within the first year, and for acquisition of lands for the other features of the project as rapidly as necessary real estate data can be assembled. For projects with major impoundment features and with scheduled construction periods of more than two years, funds will be programmed at a uniform level so that total real estate requirements will be covered by accepted offers to sell or declarations of taking filed in court by the end of two-thirds of the overall construction period.

(b) *Public Information.* (1) The real estate activities of the Corps are extremely sensitive, since they disrupt the lives of individuals and take their homes, farms and businesses. Therefore, the importance of keeping landowners and others having an interest in the land informed of the land acquisition program is emphasized. In order to avoid false rumors and to permit the

affected owners to formulate plans for the future, information concerning the land acquisition program, procedures with respect thereto, and the specific effect on the individual properties, will be furnished to the affected owners at the outset of the project.

(2) Section 302 of Pub. L. 86-645 (33 U.S.C. 597) is quoted, in part, for guidance:

Within six months after the date that Congress authorizes construction of a water resource development project under the jurisdiction of the Secretary of the Army, the Corps of Engineers shall make reasonable effort to advise owners and occupants in and adjacent to the project area as to the probable timing for the acquisition of lands for the project and for incidental rights-of-way, relocations, and any other requirements affecting owners and occupants. Within a reasonable time after initial appropriations are made for land acquisition or construction, including relocations, the Corps of Engineers shall conduct public meetings at locations convenient to owners and tenants to be displaced by the project in order to advise them of the proposed plans for acquisition and to afford them an opportunity to comment. To carry out the provisions of this section, the Chief of Engineers shall issue regulations to provide, among other things, dissemination of the following information to those affected: (1) Factors considered in making the appraisals; (2) desire to purchase property without going to court; (3) legal right to submit to condemnation proceedings; (4) Payments for moving expenses or other losses not covered by appraised market value; (5) occupancy during construction; (6) removal of improvements; (7) payments required from occupants of Government-acquired land; (8) withdrawals by owners of deposits made in court by Government; and (9) use of land by owner when easement is acquired.

(3) Within a reasonable time after initial appropriations are made for land acquisition or construction, including relocations, Division and District Engineers will conduct meetings with landowners. The United States Senators of the state or states and Members of the House of Representatives of the district or districts in which the project is located should be invited to attend. Normally, the public meetings should be scheduled prior to the commencement of the land acquisition program. The agenda for the meetings will include not only the nine specific items listed in section 302, Pub. L. 86-645, but all other items of a nature
