

Subpart J—Environmental Pollution Prevention, Control, and Abatement Report (RCS DD-I&L (SA) 1383)

GENERAL

§ 650.231 Purpose.

(a) This chapter provides reporting procedures to be followed within the Department of the Army to control environmental pollution from existing facilities as contained in section 3(a) (3) Executive Order 11752 of December 17, 1973, entitled, "Prevention, Control and Abatement of Environmental Pollution at Federal Facilities." This section of the Executive Order provides that "Heads of Federal agencies shall, with regard to all facilities under their jurisdiction in the United States: * * *

(3) Present to the Director of the Office of Management and Budget (OMB), annually, a plan to provide for such improvement in the design, construction, management, operation, and maintenance of existing facilities as may be necessary to meet applicable standards specified * * *"

(b) The report described herein will be the principal mechanism for identifying pollution control projects and those resources needed to effectively execute installation and major command Environmental Programs. Properly defined information presented in this report can be used as a basis for necessary programing and budget actions by DA and major commands.

(c) These instruction implement OMB Circular A-106, dated 31 Dec 74, which supersedes OMB Circular A-78 and A-81, dated 18 May 70.

§ 650.232 Explanation of terms.

(a) The terms used herein will be the same as those defined in chapter 1.

(b) The term "project" will mean an action to achieve needed corrective measures relative to identified environmental pollution sources.

(c) The term "cost" will mean the amount of funds required to install the necessary environmental protection measures. These funds include the capital costs of structures and equipment, irrespective of the appropriation chargeable, but not the annual maintenance and operating costs.

§ 650.233 Applicability.

Each active, semiactive and Army Reserve installation operated by or for the Department of the Army, and National Guard facilities/sites supported by Federally appropriated funds in the Continental United States; Alaska and Hawaii, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Panama Canal Zone, and the Trust Territories of the Pacific, whether Army-controlled or under jurisdiction of the Army by lease or similar instrument, where environmental protection measures do not meet the current requirements and/or standards established by appropriated Federal, State or local regulatory agencies are to be listed in the Environmental Pollution Control Report. Each installation identifying a new pollution source or environmental protection requirement will report through command channels in accordance with these instructions. Negative report will be rendered by responsible commands in the form of a listing of those installations where remedial measures are not needed to correct a source of pollution or where no additional resources are needed to meet the provisions of this regulation.

§ 650.234 Scope.

(a) The report described herein consists of one exhibit to be prepared at the installation or activity level and two exhibits to be prepared at the major command level. Reports are to be forwarded through channels to HQDA (DAEN-FEU) WASH, DC 20314, by November 15, and May 15, of each year. The exhibits will reflect information as of October 20, and April 20.

(b) Exhibit 1 is entitled—Proposed Project Report. Separate Exhibits will be prepared for each project or activity on an installation in each of the following categories:

- (1) Air pollution.
- (2) Water pollution.
- (3) Solid waste pollution.
- (4) Radiation pollution.
- (5) Noise pollution.
- (6) Pesticide and hazardous/toxic materials pollution.
- (7) Environmental management.

(c) Exhibit 2 is entitled—Status Report. It indicates the amount programmed, appropriated, or funded; the current working estimate (CWE); and the status of each active project. Separate exhibits will be completed by the major commands for each category or projects (i.e. air, water, noise, solid waste, etc.). After the initial report, marked-up copies of the ADP printout giving an update on all previously reported projects is all that is necessary. The ADP printout to be used for this purpose will be provided by HQDA (DAEN-FEU) WASH, DC 20314.

(d) Exhibit 3 is entitled—Narrative report. Major commands will provide a short explanation of the objectives that will be achieved, the elements of their environmental program that will be given particular emphasis over the short term, and the extent that statutory pollution control requirements and DA environmental goals and objectives will be satisfied by executing the projects or actions listed in the report. For any specific portion of the program that requires more than 12 months to complete, an identification of the major milestones for accomplishing the various actions are also to be included.

§ 650.235 Responsibilities.

(a) *Department of the Army Staff.* (1) The Chief of Engineers will compile the overall DA report based on submissions from major commands and the National Guard Bureau.

(2) The Chief, Army Reserve will monitor those reports by the major commands to ensure that Reserve installations for which they provide logistical support are included in the Pollution Control Report.

(3) The Chief, National Guard Bureau will submit a report to the Chief of Engineers including those projects for National Guard sites or installations which are supported by federally appropriated funds.

(b) *Major commands.* (1) Major commands controlling installations or activities, or providing logistical support to Reserve installations in the United States, District of Columbia, Puerto Rico, Canal Zone, Guam, American Samoa, Virgin Islands and the Trust

Territories will submit reports in accordance with this regulation.

(2) Major commands controlling installations or activities in overseas areas will submit reports identifying pollution abatement projects required for compliance with host nation regulations, international or Status of Forces Agreements.

(3) Commanding General, US Army Materiel Development and Readiness Command will submit reports on retrofit projects and programs to bring mobile sources (vehicles, aircraft and watercraft) into compliance with air, water and noise standards.

INSTRUCTIONS FOR THE PREPARATION AND SUBMISSION OF EXHIBITS

§ 650.236 Exhibit 1—Proposed Project.

(a) An Exhibit 1 will be prepared and maintained current for all known pollution control projects using the format in Figure 10-1 and for valid environmental protection resource requirements using the format in Figure 10-2. Exhibit 1's previously submitted on air and water pollution control projects which are still valid, but not yet completed, do not have to be resubmitted in the new format except when a significant change takes place to make the earlier Exhibit 1 obsolete. Exhibit 1's are not required for completed projects.

(b) Exhibit 1's for new or revised projects or requirements will be submitted semi-annually by November 15, and May 15, of each year to DAEN-FEU based on the latest information as of 30 days prior to the above reporting dates.

(c) Each project will be identified as to the category of pollution control needed (i.e., air, water, solid waste, radiation, noise, pesticides, and environmental management). Projects within a category will be assigned consecutive numbers by DAEN-FEU beginning with "1." Project numbers are for permanent identification and may not be re-assigned to new projects. Existing air and water pollution control projects previously numbered under RCS DD-I&L(SA) 1383 are to be continued under their originally assigned numbers. These project numbers apply strictly
