

(5) Remediation of hazardous waste disposal sites.

(i) Abbreviated Environmental Assessment. In special circumstances, when the potential environmental impacts of a proposed action are clearly insignificant (as documented on AF Form 813) and none of the CATEXs in attachment 2 of this part apply, the EPF can use an abbreviated EA to assess the action. At a minimum, the abbreviated EA will consist of:

(1) AF Form 813 with attachments analyzing the environmental impacts of the proposed action and reasonable alternatives.

(2) A concise description of the affected environment.

(3) A concise FONSI (see § 989.15).

(j) The Air Force should involve environmental agencies, applicants, and the public in the preparation of EAs (40 CFR 1501.4(b)). The extent of involvement usually coincides with the magnitude and complexity of the proposed action and its potential environmental effect on the area. For proposed actions described in § 989.15(e)(2), use either the scoping process described in § 989.18 or the public notice process in § 989.23(b) and (c).

**§ 989.15 Finding of no significant impact.**

(a) The FONSI (40 CFR 1508.13) briefly describes why an action would not have a significant effect on the environment and thus will not be the subject of an EIS. The FONSI must summarize the EA or, preferably, have it attached and incorporated by reference, and must note any other environmental documents related to the action.

(b) If the EA is not attached, the FONSI must include:

(1) Name of the action.

(2) Brief description of the action (including alternatives considered and the chosen alternative).

(3) Brief discussion of anticipated environmental effects.

(4) Conclusions leading to the FONSI.

(5) All mitigation actions that will be adopted with implementation of the proposal (see § 989.22).

(c) Keep FONSI as brief as possible. Most FONSI should not exceed two typewritten pages. Stand-alone FONSI without an attached EA may be longer.

(d) For actions of regional or local interest, disseminate the FONSI according to § 989.23. The MAJCOM and NGB are responsible for release of FONSI to regional offices of Federal agencies, the state single point of contact (SPOC), and state agencies concurrent with local release by the installations.

(e) The EPF must provide the FONSI and complete EA to organizations and individuals requesting them and to whomever the proponent or the EPF has reason to believe is interested in the action. The EPF provides a copy of the documents without cost to organizations and individuals requesting them. The earliest of the FONSI transmittal date (date of letter of transmittal) to the SPOC or other interested party is the official notification date.

(1) The EPF must make the draft EA/FONSI available to the affected public unless disclosure is precluded for security classification reasons. Before the FONSI is signed and the action is implemented, the EPF should allow sufficient time to receive comments from the public. The time period will reflect the magnitude of the proposed action and its potential for controversy. The greater the magnitude of the proposed action or its potential for controversy, the longer the time that must be allowed for public review. Mandatory review periods for certain defined actions are contained in § 989.15(e)(2). These are not all inclusive but merely specific examples. In every case where an EA/FONSI is prepared, the proponent and EPF must determine how much time will be allowed for public review. In all cases, other than classified actions, a public review period should be the norm unless clearly unnecessary due to the lack of potential controversy.

(2) In the following circumstances, the EA and draft FONSI are made available for public review for at least 30 days before FONSI approval and implementing the action (40 CFR 1501.4(e)(2)):

(i) When the proposed action is, or is closely similar to, one that usually requires preparation of an EIS (see § 989.16).

(ii) If it is an unusual case, a new kind of action, or a precedent-setting case in terms of its potential environmental impacts.

(iii) If the proposed action would be located in a floodplain or wetland.

(iv) If the action is mitigated to insignificance in the FONSI, in lieu of an EIS (§989.22(c)).

(v) If the proposed action is a change to airspace use or designation.

(f) As a rule, the same organizational level that prepares the EA reviews and recommends the FONSI for approval by the EPC. MAJCOMs may decide the level of EA approval and FONSI signature, except as provided in §989.14(g).

(g) Air Force staff must get permission to deviate from the procedures outlined in this part from SAF/MIQ in accordance with §989.30.

**§989.16 Environmental impact statement.**

(a) Certain classes of environmental impacts require preparation of an EIS (40 CFR Part 1502). These include, but are not limited to:

(1) Potential for significant degradation of the environment.

(2) Potential for significant threat or hazard to public health or safety.

(3) Substantial environmental controversy concerning the significance or nature of the environmental impact of a proposed action.

(b) Certain other actions normally, but not always, require an EIS. These include, but are not limited to:

(1) Public land withdrawals of over 5,000 acres (Engle Act, 43 U.S.C. 155-158).

(2) Establishment of new air-to-ground weapons ranges.

(3) Site selection of new airfields.

(4) Site selection of major installations.

(5) Development of major new weapons systems (at decision points that involve demonstration, validation, production, deployment, and area or site selection for deployment).

(6) Establishing or expanding supersonic training areas over land below 30,000 feet MSL (mean sea level).

(7) Disposal and reuse of closing installations.

**§989.17 Notice of intent.**

The EPF must furnish to HQ USAF/CEV the NOI (40 CFR 1508.22) describing the proposed action for publication in the FEDERAL REGISTER. The EPF,

through the host base public affairs office, will also provide the NOI to newspapers and other media in the area potentially affected by the proposed action. The EPF must provide copies of the notice to the proper state SPOC (E.O. 12372) and must also distribute it to requesting agencies, organizations, and individuals. Along with the draft NOI, the EPF must also forward the completed DOPAA to HQ USAF for review.

**§989.18 Scoping.**

After publication of the NOI for an EIS, the EPF must initiate the public scoping process (40 CFR 1501.7) to determine the scope of issues to be addressed and to help identify significant environmental issues to be analyzed in depth. Methods of scoping range from soliciting written comments to conducting public scoping meetings (see 40 CFR 1501.7 and 1506.6(e)). The purpose of this process is to de-emphasize insignificant issues and focus the scope of the environmental analysis on significant issues (40 CFR 1500.4(g)). The result of scoping is that the proponent and EPF determine the range of actions, alternatives, and impacts to be considered in the EIS (40 CFR 1508.25). The EPF must send meeting plans for scoping meetings to AF/CEV (or ANGRC/CEV) for SAF/MIQ concurrence no later than 30 days before the first scoping meeting. Scoping meeting plans are similar in content to public hearing plans (see attachment 3 of this part).

**§989.19 Draft EIS.**

(a) *Preliminary draft.* The EPF prepares a Preliminary draft EIS (PDEIS) (40 CFR 1502.9) based on the scope of issues decided on during the scoping process. The format of the EIS must be in accordance with the format recommended in the CEQ regulations (40 CFR 1502.10 and 1502.11). The CEQ regulations indicate that EISs are normally fewer than 150 pages (300 pages for proposals of unusual complexity). The EPF provides a sufficient number of copies of the PDEIS to HQ USAF/CEV for HQ USAF EPC review and to AFCEE/EC for technical review.

(b) *Review of draft EIS.* After the HQ USAF EPC review, the EPF makes any
