

from those agencies obtain necessary security clearances to gain access to documents so they can comment on scoping or review the documents.

(b) Where the proposed action is classified and unavailable to the public, the Air Force may keep the entire NEPA process classified and protected under the applicable procedures for the classification level pertinent to the particular information. At times (for example, during weapons system development and base closures and realignments), certain but not all aspects of NEPA documents may later be declassified. In those cases, the EPF should organize the EIAP documents, to the extent practicable, in a way that keeps the most sensitive classified information (which is not expected to be released at any early date) in a separate annex that can remain classified; the rest of the EIAP documents, when declassified, will then be comprehensible as a unit and suitable for release to the public. Thus, the documents will reflect, as much as possible, the nature of the action and its environmental impacts, as well as Air Force compliance with NEPA requirements.

(c) Where the proposed action is not classified, but certain aspects of it need to be protected by security classification, the EPF should tailor the EIAP for a proposed action to permit as normal a level of public involvement as possible, but also fully protect the classified part of the action and environmental analysis. In some instances, the EPF can do this by keeping the classified sections of the EIAP documents in a separate, classified annex.

(d) For §989.25(b) actions, an NOI or NOA will not be published in the FEDERAL REGISTER until the proposed action is declassified. For §989.25(c) actions, the FEDERAL REGISTER will run an unclassified NOA which will advise the public that at some time in the future the Air Force may or will publicly release a declassified document.

(e) The EPF similarly protects classified aspects of FONISs, RODs, or other environmental documents that are part of the EIAP for a proposed action, such as by preparing separate classified annexes to unclassified documents, as necessary.

(f) Whenever a proponent believes that EIAP documents should be kept classified, the EPF must make a report of the matter to SAF/MIQ, including proposed modifications of the normal EIAP to protect classified information. The EPF may make such submissions at whatever level of security classification is needed to provide a comprehensive understanding of the issues. SAF/MIQ, with support from SAF/GC and other staff elements as necessary, makes final decisions on EIAP procedures for classified actions.

§989.26 Occupational safety and health.

Assess direct and indirect impacts of proposed actions on the safety and health of Air Force employees and others at a work site. Normally, compliance with Occupational Safety and Health Administration (OSHA) standards will mitigate hazards. The EIAP document does not need to specify such compliance procedures. However, the EIAP documents should discuss impacts that require a change in work practices to achieve an adequate level of health and safety.

§989.27 Airspace proposals.

The DoD and the Federal Aviation Administration (FAA) have entered into a Memorandum of Understanding (MOU) that outlines various airspace responsibilities. For purposes of compliance with NEPA, the DoD is the "lead agency" for all proposals initiated by DoD, with the FAA acting as the "cooperating agency." Where airspace proposals initiated by the FAA affect military use, the roles are reversed. The proponent's action officers (civil engineering and local airspace management) must ensure that the FAA is fully integrated into the airspace proposal and related EIAP from the very beginning and that the action officers review the FAA's responsibilities as a cooperating agency. The proponent's airspace manager develops the preliminary airspace proposal per appropriate FAA handbooks and the FAA-DoD MOU. The preliminary airspace proposal is the basis for initial dialogue between DoD and the FAA on the proposed action. A close working relationship between DoD and the
