greater public or private investments (in the form of services and materials, as well as dollars).

(6) Degree to which the proposal provides potential coordination with other community, State and Federal programs of community development and those providing recreation to the target population (e.g., public and private non-profit, education programs, CETA for employment, HUD programs).

(7) Extent of improvement in the quality and quantity of recreation services as a result of the Innovation project.

(8) Degree to which the proposal ties in with goals, priorities and implementation strategies expressed in the local park and recreation Recovery Action Program.

(9) Degree to which the proposal leads to a transfer of a recreation role traditionally performed by a public entity, to quasi-public or private non-profit interests. This degree means the degree to which the private sector can take full responsibility, supplement, or fill the gaps in public recreation services, management or operation; either through a transfer of funding responsibility, or an exchange of technique or method approaches which may prove to be more effective under the private sector. This should in no way alter the public sector responsibility to continue to provide and/or monitor good quality recreation facilities and services.

(10) Degree to which a proposal benefits disadvantaged community populations and/or those areas within a distressed community which have the greatest recreation deficiencies.

NOTE: Innovation proposals for the adaptive reuse of non-recreation areas or structures, through rehabilitation for recreation should also address rehabilitation selection criteria, particularly the criteria covering Federal investment per person served and the degree to which the proposal would serve close to home recreation needs.
