

§ 180.1185

§ 180.1185 Coat Protein of Papaya Ringspot Virus and the genetic material necessary for its production; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of the biological plant pesticide Coat Protein of Papaya Ringspot Virus and the genetic material necessary for its production in or on all food commodities.

[62 FR 44575, Aug. 22, 1997]

§ 180.1186 Coat protein of cucumber mosaic virus and the genetic material necessary for its production; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of the biological plant pesticide Coat Protein of Cucumber Mosaic Virus and the genetic material necessary for its production in or on all food commodities.

[62 FR 44579, Aug. 22, 1997]

§ 180.1187 L-glutamic acid; exemption from the requirement of a tolerance.

L-glutamic acid is exempt from the requirement of a tolerance on all raw agricultural commodities when used as a plant growth enhancer in accordance with good agricultural practices.

[63 FR 682, Jan. 7, 1998, as amended at 63 FR 51303, Sept. 25, 1998]

§ 180.1188 Gamma aminobutyric acid; exempt from the requirement of a tolerance.

Gamma aminobutyric acid is exempt from the requirement of a tolerance on all food commodities when used as a plant growth enhancer in accordance with good agricultural practices.

[63 FR 679, Jan. 7, 1998]

§ 180.1189 Methyl salicylate; exemption from the requirement of a tolerance.

The biochemical pesticide methyl salicylate is exempt from the requirement of a tolerance for residues in or on food or feed when used as an insect repellent in food packaging and animal feed packaging at an application rate

40 CFR Ch. I (7-1-00 Edition)

that does not exceed 0.2 mg of methyl salicylate per square inch of packaging materials.

[62 FR 61639, Nov. 19, 1997]

§ 180.1190 Glyphosate Oxidoreductase [GOX or GOXv247] and the genetic material necessary for its production in all plants; exemption from the requirement of a tolerance.

Glyphosate Oxidoreductase [GOX or GOXv247] and the genetic material necessary for its production in all plants are exempt from the requirement of a tolerance when used as plant-pesticide inert ingredients in all plant RACs. *Genetic material necessary for its production* means the genetic material which comprise genetic material encoding the GOX proteins and their regulatory regions. *Regulatory regions* are the genetic material that control the expression of the genetic material encoding the GOX proteins, such as promoters, terminators, and enhancers.

[62 FR 52509, Oct. 8, 1997]

§ 180.1191 Ferric phosphate; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of the biochemical pesticide, ferric phosphate (FePO₄, CAS No. 11045-86-0) in or on all food commodities.

[62 FR 56105, Oct. 29, 1997]

§ 180.1192 Bacillus thuringiensis subspecies tolworthi Cry9C protein and the genetic material necessary for its production in corn; exemption from the requirement of a tolerance.

The plant-pesticide *Bacillus thuringiensis* subspecies *tolworthi* Cry9C and the genetic material necessary for its production in corn is exempted from the requirement of a tolerance for residues, only in corn used for feed; as well as in meat, poultry, milk, or eggs resulting from animals fed such feed.

[63 FR 28261, May 22, 1998]

§ 180.1193 Potassium dihydrogen phosphate; exemption from the requirement of a tolerance.

Potassium dihydrogen phosphate is exempted from the requirement of a

Environmental Protection Agency

§ 180.1200

tolerance in or on all food commodities when applied as a fungicide in accordance with good agricultural practices.

[63 FR 43085, Aug. 12, 1998]

§ 180.1194 Canola oil; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of the biochemical pesticide, canola oil, conforming to the following definition when used as an insecticide, in or on all food commodities: Canola oil, also known as low erucic rapeseed oil, is the full refined, bleached, and deodorized edible oil obtained from certain varieties of *Brassica Napus* or *B. Campestris* of the family Cruciferae. Canola oil contains no more than 2 percent erucic acid.

[63 FR 18329, Apr. 15, 1998]

§ 180.1195 Titanium dioxide.

Titanium dioxide is exempted from the requirement of a tolerance for residues in or on growing crops, when used as an inert ingredient (UV protectant) in microencapsulated formulations of the insecticide lambda-cyhalothrin at no more than 3.0% by weight of the formulation.

[63 FR 14363, Mar. 25, 1998]

§ 180.1196 Peroxyacetic acid; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of peroxyacetic acid up to 100 ppm in or on raw agricultural commodities, in processed commodities, when such residues result from the use of peroxyacetic acid as an antimicrobial agent on fruits, vegetables, tree nuts, cereal grains, herbs, and spices.

[63 FR 24955, May 6, 1998; 63 FR 34303, June 24, 1998]

§ 180.1197 Hydrogen peroxide; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of hydrogen peroxide in or on all food commodities at the rate of \leq 1% hydrogen peroxide per application on growing crops and postharvest potatoes

when applied as an algacide, fungicide and bactericide.

[64 FR 33025, June 21, 1999]

§ 180.1198 *Gliocladium catenulatum* strain J1446; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of the microbial pesticide, *Gliocladium catenulatum* strain J1446 when used in or on all food commodities.

[63 FR 37288, July 10, 1998]

§ 180.1199 Phospholipid: Lyso-PE (lysophosphatidylethanolamine); temporary exemption from the requirement of a tolerance.

The phospholipid biochemical Lyso-PE (lysophosphatidylethanolamine); is temporarily exempted from the requirement of a tolerance for residues when used on crops including: apples, citrus, cranberries, grapes, nectarines, peaches, pears, strawberries, and tomatoes. This temporary exemption from the requirement for a tolerance will permit the marketing of the food commodities in this paragraph when treated in accordance with the provisions of experimental use permit 70515-EUP-1, which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136). This temporary exemption from the requirement of a tolerance expires and is revoked on June 1, 2001. This temporary exemption from the requirement of a tolerance may be revoked at any time if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that the tolerance is not safe.

[63 FR 32134, June 12, 1998]

§ 180.1200 *Pseudomonas fluorescens* strain PRA-25; temporary exemption from the requirement of a tolerance.

A temporary exemption from the requirement of a tolerance is established for residues of the microbial pesticide, *pseudomonas fluorescens* strain PRA-25 when used on peas, snap beans and sweet corn and will expire July 31, 2001.

[63 FR 38498, July 17, 1998]
