

Environmental Protection Agency

§ 443.16

(c) The term "process wastewater pollutants" shall mean any pollutants present in the process wastewaters and rainwater runoff.

§ 443.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Except as provided in §§ 125.30 through 125.32, any existing point source subject to this subpart shall achieve the following effluent limitations representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT):

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
Metric units (kg/cu m of runoff)		
Oil and grease	0.020	0.015
pH	(¹)	(¹)
English units (lb/1,000 gal of runoff)		
Oil and grease	0.167	0.125
pH	(¹)	(¹)

¹ Within the range 6.0 to 9.0.

[40 FR 31191, July 24, 1975, as amended at 60 FR 33969, June 29, 1995]

§ 443.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
Metric units (kg/cu m of runoff)		
TSS	0.023	0.015
Oil and grease	0.015	0.010
pH	(¹)	(¹)
English units (lb/1,000 gal of runoff)		
TSS	0.188	0.125
Oil and grease	0.125	0.083
pH	(¹)	(¹)

¹ Within the range 6.0 to 9.0.

§ 443.14 [Reserved]

§ 443.15 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
Metric units (kg/cu m of runoff)		
TSS	0.023	0.015
Oil and grease	0.015	0.010
pH	(¹)	(¹)
English units (lb/1,000 gal of runoff)		
TSS	0.188	0.125
Oil and grease	0.125	0.083
pH	(¹)	(¹)

¹ Within the range 6.0 to 9.0.

§ 443.16 Pretreatment standards for new sources.

Any new source subject to this subpart that introduces process wastewater pollutants into a publicly owned treatment works must comply with 40 CFR part 403. In addition, the following pretreatment standard establishes the quantity or quality of pollutants or pollutant properties controlled by this section which may be discharged to a publicly owned treatment works by a
