

TABLE 2 TO SUBPART HH—APPLICABILITY OF 40 CFR PART 63 GENERAL PROVISIONS TO SUBPART HH—Continued

General provisions reference	Applicable to subpart HH	Explanation
§ 63.11(a) and (b) .....	Yes	
§ 63.12(a) through (c) .....	Yes	
§ 63.13(a) through (c) .....	Yes	
§ 63.14(a) and (b) .....	Yes	
§ 63.15(a) and (b) .....	Yes	

**Subpart II—National Emission Standards for Shipbuilding and Ship Repair (Surface Coating)**

SOURCE: 60 FR 64336, Dec. 15, 1995, unless otherwise noted.

**§ 63.780 Relationship of subpart II to subpart A of this part.**

Table 1 of this subpart specifies the provisions of subpart A of this part that apply to owners and operators of sources subject to the provisions of this subpart.

**§ 63.781 Applicability.**

- (a) The provisions of this subpart apply to shipbuilding and ship repair operations at any facility that is a major source.
- (b) The provisions of this subpart do not apply to coatings used in volumes of less than 200 liters (52.8 gallons) per year, provided the total volume of coating exempt under this paragraph does not exceed 1,000 liters per year (264 gallons per year) at any facility. Coatings exempt under this paragraph shall be clearly labeled as “low-usage exempt,” and the volume of each such coating applied shall be maintained in the facility’s records.
- (c) The provisions of this subpart do not apply to coatings applied with hand-held, nonrefillable, aerosol containers or to unsaturated polyester resin (i.e., fiberglass lay-up) coatings. Coatings applied to suitably prepared fiberglass surfaces for protective or decorative purposes are subject to this subpart.
- (d) The provisions in subpart A of this part pertaining to startups, shutdowns, and malfunctions and continuous monitoring do not apply to this source category unless an add-on con-

trol system is used to comply with this subpart in accordance with § 63.783(c).

**§ 63.782 Definitions.**

Terms used in this subpart are defined in the Clean Air Act (CAA), in subpart A of part 63, or in this section as follows:

*Add-on control system* means an air pollution control device such as a carbon absorber or incinerator that reduces pollution in an air stream by destruction or removal prior to discharge to the atmosphere.

*Affected source* means any shipbuilding or ship repair facility having surface coating operations with a minimum 1,000 liters (L) (264 gallons [gal]) annual marine coating usage that is subject to this subpart.

*Air flask specialty coating* means any special composition coating applied to interior surfaces of high pressure breathing air flasks to provide corrosion resistance and that is certified safe for use with breathing air supplies.

*Antenna specialty coating* means any coating applied to equipment through which electromagnetic signals must pass for reception or transmission.

*Antifoulant specialty coating* means any coating that is applied to the underwater portion of a vessel to prevent or reduce the attachment of biological organisms and that is registered with the EPA as a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act.

*As applied* means the condition of a coating at the time of application to the substrate, including any thinning solvent.

*As supplied* means the condition of a coating before any thinning, as sold and delivered by the coating manufacturer to the user.

*Batch* means the product of an individual production run of a coating
