

Bureau of Land Management, Interior

§ 2812.0-9

by the Congress, or, where feasible, by using an existing duplicating road over which the Government has obtained road rights. In such circumstances, however, road cost and maintenance allowances made in the stumpage price of O. and C. timber will be required to be applied to the road which the Bureau has the right to use, and thereafter will not in any circumstances be available for amortization or maintenance costs of the applicant's road.

(g) When a right-of-way permit is issued for a road or road system over which the United States obtains rights of use for itself and its licensees, the authorized officer will seek to agree with the applicant respecting such matters as the time, route, and specifications for the future development of the road system involved; the portion of the capital and maintenance costs of the road system to be borne by the timber to be transported over the road system by the United States and its licensees; a formula for determining the proportion of the capacity of the road system which is to be available to the United States and its licensees for the transportation of forest products; and other similar matters respecting the use of the road by the United States and its licensees and the compensation payable therefor. To the extent that any such matter is not embraced in such an agreement, it will be settled by negotiation between the permittee and the individual licensees of the United States who use the road, and, in the event of their disagreement, by private arbitration between them in accordance with the laws of the State of Oregon.

(h) The authorized officer may in his discretion, issue short term right-of-way permits for periods not exceeding three years, subject to one-year extensions in his discretion. Such permits shall specify the volume of timber which may be carried over the right-of-way and the area from which such timber may be logged. The permits shall be revocable by the authorized officer, the State Director, or the Secretary for violation of their terms and conditions or of these regulations or if hazardous conditions result from the construction, maintenance or use of the rights-of-way by the permittees or those act-

ing under their authority. As a condition for the granting of such permits, the applicant must comply with §§ 2812.3-1 and 2812.3-3 of this subpart to the extent that rights-of-way and road use rights are needed to remove government timber offered for sale in the same general area during the period for which the short term right-of-way is granted.

(i) The authorized officer may, in his discretion, issue to private operators rights-of-way across O. and C. lands, needed for the conduct of salvage operations, for a period not to exceed five years. A salvage operation as used in this paragraph means the removal of trees injured or killed by windstorms, insect infestation, disease, or fire, together with any adjacent green timber needed to make an economic logging show. As a condition of the granting of such rights-of-way, the operator will be required, when the authorized officer deems it necessary, to grant to the United States and its licensees for the conduct of salvage operations on O. and C. lands for a period not to exceed five years, rights-of-way across lands controlled directly or indirectly by him and to grant the right to use to the extent indicated in §§ 2812.3-5 and 2812.3-6 any portions of the road system controlled directly or indirectly by the private operator which is adequate or can economically be made adequate to accommodate the requirements of both the operator and of the United States and its licensees.

§ 2812.0-7 Cross reference.

For disposal of timber or material to a trespasser, see § 9239.0-9 of this chapter.

§ 2812.0-9 Information collection.

The information collection requirements contained in part 2810 of Group 2800 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004-0102 and 1004-0107. The information is being collected to permit the authorized officer to determine if use of the public lands should be granted for rights-of-way grants or temporary use permits. The information

§ 2812.1

will be used to make this determination. A response is required to obtain a benefit.

[60 FR 57072, Nov. 13, 1995]

§ 2812.1 Application procedures.

§ 2812.1-1 Filing.

(a) An application for a permit for a right-of-way over the O. and C. lands must be submitted in duplicate on a form prescribed by the Director and filed in the appropriate district office. Application forms will be furnished upon request.

(b) Any application filed hereunder, including each agreement submitted by the applicant as a part thereof or as a condition precedent to the issuance of a permit, may be withdrawn by the applicant by written notice delivered to the authorized officer prior to the time the permit applied for has been issued to, and accepted by, the applicant.

[35 FR 9637, June 13, 1970, as amended at 41 FR 21642, May 27, 1976]

§ 2812.1-2 Contents.

(a) An individual applicant and each member of any unincorporated association which is an applicant must state in the application whether he is a native born or a naturalized citizen of the United States. Naturalized citizens will be required to furnish evidence of naturalization pursuant to the provisions of § 2802.1-4.

(b) An application by a private corporation must be accompanied by two copies of its articles of incorporation, one of which must be certified by the proper official of the company under its corporate seal, or by the secretary of the State where organized. A corporation organized in a State other than Oregon must submit a certificate issued by the State of Oregon attesting that the corporation is authorized to transact business within that State. The requirements of this paragraph shall be deemed satisfied if the corporation, having once filed the required documents, makes specific reference to the date and case number of such previous applications, states what changes, if any, have been made since the prior filings, and includes a statement that the right of the company to

43 CFR Ch. II (10-1-99 Edition)

do business in the State of Oregon has not lapsed or terminated.

(c) Where the application is for a right-of-way on any portion of which the applicant proposes to construct a road, it must be accompanied by two copies of a map prepared on a scale of 4 inches or 8 inches to the mile. Showing the survey of the right-of-way so that it may be accurately located on the ground. The map should comply with the following requirements, except as the authorized officer may waive in any particular instance all or any of such requirements:

Courses and distances of the center line of the right-of-way should be given; the courses referred to the true meridian and the distance in feet and decimals thereof. The initial and terminal points of the survey must be accurately connected by course and distance to the nearest readily identifiable corner of the public land surveys, or, if there be no such corner within two miles, then connected to two permanent and prominent monuments or natural objects. All subdivisions of the public lands surveys, any part of which is within the limits of the survey, should be shown in their entirety, based upon the official subsisting plat with subdivisions, section, township, and range clearly marked. The width of the right-of-way should be given; and if not of uniform width, the locations and amount of change must be definitely shown. There shall also be a statement on the face of or appended to the map indicating the grade and usable width of the road to be constructed, the type of material which will be used for the surface, the type and extent of the drainage facilities, and the type of construction and estimated capacity of any bridges. The map should bear upon its face the statement of the person who made the survey, if any, and the certificate of the applicant; such statement and certificate should be as set out in Forms as approved by the Director.

(d) Where the application is for the use of an existing road, a map adequate to show the location thereof will be required, together with a statement of the specific nature and location of any proposed improvements to such road. A blank map suitable for most cases may be procured from the appropriate district forester.

(e) Every application for a right-of-way must also be accompanied by a diagram indicating the roads and rights-of-way which form an integral part of the road system with which the

requested right-of-way will connect, the portions of such road system which the applicant directly controls within the meaning of §2812.0-5(i), the portions thereof which the applicant indirectly controls within the meaning of §2812.0-5(j), and the portions thereof as to which the applicant has no control within the meaning of such sections. As to the portions over which the applicant has no control, he must furnish a statement showing for the two years preceding the date of the filing of the application, all periods of time that he had direct or indirect control thereof, and the date and nature of any changes in such control. The diagram shall also contain the name of the person whom the applicant believes directly controls any portion of such road system which the applicant does not directly control. Where a right-of-way for a railroad is involved, the applicant must indicate which portions of the right-of-way will be available for use as truck roads upon the removal of the rails and ties and the probable date of such removal. Blank diagram forms, suitable for most cases, may be obtained from the appropriate district forester.

§2812.1-3 Unauthorized use, occupancy, or development.

Any use, occupancy, or development of the Revested Oregon and California Railroad and Reconveyed Coos Bay Wagon Road Grant Lands (O & C) lands (as is defined in 43 CFR 2812.0-5(e)), for tramroads without an authorization pursuant to this subpart, or which is beyond the scope and specific limitations of such an authorization, or that cause unnecessary or undue degradation, is prohibited and shall constitute a trespass as defined in §2800.0-5. Anyone determined by the authorized officer to be in violation of this section shall be notified of such trespass in writing and shall be liable to the United States for all costs and payments determined in the same manner as set forth at §2801.3, part 2800 of this title.

[54 FR 25855, June 20, 1989]

§2812.2 Nature of permit.

§2812.2-1 Nonexclusive license.

Permits for rights-of-way for tramroads, do not constitute easements, and do not confer any rights on the permittee to any material for construction or other purposes except, in accordance with the provisions of §§2812.6-2 and 2812.8-3, such materials as may have been placed on such lands by a permittee. The permits are merely nonexclusive licenses to transport forest products owned by the permittee. Such permits may be canceled pursuant to §2812.8.

§2812.2-2 Right of permittee to authorize use by third parties.

A permittee may not authorize other persons to use the right-of-way for the transportation of forest products which are not owned by the permittee. Any person, other than the permittee or a licensee of the United States who desires to use the right-of-way for such purposes, is required to make application therefor and to comply with all the provisions of these regulations relating to applications and applicants: *Provided, however,* That upon the request of a permittee the authorized officer may, with respect to an independent contractor who desires to use such right-of-way for the transportation of forest products owned by such independent contractor and derived from timber or logs acquired by him from such permittee, waive the requirements of this sentence. Where the right-of-way involved has been substantially improved by the holder of an outstanding permit, any subsequent permit issued for the same right-of-way will be conditioned upon the subsequent permittee's agreement while the prior permit is outstanding, to be bound by the road rules of and to pay fair compensation to, the prior permittee, such rules and compensation to be agreed upon by the prior and subsequent permittee in accordance with the procedures and standards established by the regulations in §§2812.4-1, 2812.4-3, and 2812.4-4 of this subpart.

§ 2812.2-3

§ 2812.2-3 Construction in advance of permit.

The authorized officer may grant an applicant authority to construct improvements on a proposed right-of-way prior to a determination whether the permit should issue. Such advance authority shall not be construed as any representation or commitment that a permit will issue. Upon demand by the authorized officer, the applicant will fully and promptly comply with all the requirements imposed under and by this paragraph. Advance construction will not be authorized unless and until applicant has complied with §§ 2812.1-1, 2812.1-2, 2812.3-1 and 2812.5-1.

§ 2812.3 Right-of-way and road use agreement.

§ 2812.3-1 Rights over lands controlled by applicant.

Where, in the judgment of the authorized officer, it appears necessary in order to carry out the policy set forth in § 2812.0-6, he may require the applicant, as a condition precedent to the issuance of the permit:

(a) To grant to the United States, for use by it and its licensees and permittees, rights-of-way across lands in the O. and C. area directly controlled by the applicant; and as to lands in such area which are indirectly controlled by him, either to obtain such rights for the United States or to make a showing satisfactory to the authorized officer that he has negotiated therefor in good faith and to waive as to the United States, its licensees and permittees any exclusive or restricted right he may have to such lands as are indirectly controlled by him.

(b) In addition, to agree to permit the United States and its licensees, upon the payment of fair compensation as hereinafter provided, to use under the terms and conditions of this paragraph such portion as the applicant directly controls of the road system and rights-of-way which are an integral part of or may be added to the road system with which the right-of-way applied for will connect, and as to the portions of such road system or rights-of-way as the applicant indirectly controls, either to obtain such rights for the United

43 CFR Ch. II (10-1-99 Edition)

States and its licensees or to make a showing satisfactory to the authorized officer that he has negotiated therefor in good faith and, in such latter circumstance, to waive as to the United States and its licensees any exclusive or restricted right he may have in such portion of the road system and rights-of-way.

§ 2812.3-2 Other roads and rights-of-way controlled by applicant.

In addition to the private road systems and rights-of-way described in § 2812.3-1 in the event the applicant controls directly or indirectly other roads or rights-of-way in any O. and C. area where the authorized officer of the Bureau finds that, as of the time of filing or during the pendency of the application, the United States is unreasonably denied access to its timber for management purposes or where, as of such time, competitive bidding by all prospective purchasers of timber managed by the Bureau in the O. and C. area, or of other Federal timber intermingled with or adjacent to such timber, is substantially precluded by reason of the applicant's control, direct or indirect, of such roads or rights-of-way, the authorized officer may require the applicant to negotiate an agreement granting to the United States and its licensees the right to use, in accordance with the terms and conditions of this paragraph such portion of such roads or rights-of-way as may be necessary to accommodate such management or competitive bidding.

§ 2812.3-3 Form of grant to the United States, recordation.

Any grant of rights to the United States under this section shall be executed on a form prescribed by the Director which shall constitute and form a part of any permit issued upon the application involved. The applicant shall record such agreement in the office of land records of the county or counties in which the roads, rights-of-way, or lands, subject to the agreement are located, and submit evidence of such recordation to the appropriate district manager.

Bureau of Land Management, Interior

§ 2812.3-7

§ 2812.3-4 Where no road use agreement is required.

Where, in the judgment of the authorized officer, it is consistent with the policy set forth in subpart 2811 he may issue a permit without requesting the applicant to grant any rights to the United States under this paragraph.

§ 2812.3-5 Use by the United States and its licensees of rights received from a permittee.

The use by the United States and its licensees of any of the rights received from a permittee hereunder shall be limited to that which is necessary for management purposes, or to reach, by the most reasonably direct route, involving the shortest practicable use of the permittee's road system, a road or highway which is suitable for the transportation of forest products in the type and size of vehicle customarily used for such purposes and which is legally available for public use for ingress to and the removal of forest products from Government lands or from other lands during such periods of time as the timber thereon may be committed by a cooperative agreement to coordinated administration with timber of the United States. However, the type and size of vehicle which may be used by the licensee on the permittee's road shall be governed by §§ 2812.3-7 and 2812.4-3.

§ 2812.3-6 Duration and location of rights granted or received by the United States.

The rights-of-way granted by the United States under any permit issued under § 2812.6, subject to the provisions of § 2812.7, will be for a stated term or terms which may vary for each portion of the right-of-way granted; such term or terms will normally be coincident with the probable period of use for the removal of forest products by the permittee and any successor in interest of the various portions of the right-of-way requested. In the same manner the permit will also state the duration of the rights of the United States to use and to permit its licensees to use, and the location by legal subdivisions of, each of the various portions, if any, of the roads, rights-of-way, and lands which a permittee hereunder author-

izes the United States and its licensees to use; and, similarly, the duration of such rights received by the United States will normally be coincident with the probable period of use for the removal of forest products, by the United States and its existing and prospective licensees, of such roads, rights-of-way, and lands.

§ 2812.3-7 Permittee's agreement with United States respecting compensation and adjustment of road use.

(a) Where the United States receives rights over any road, right-of-way, or lands, controlled directly or indirectly by a permittee, the authorized officer will seek to arrive at an advance agreement with the permittee respecting any or all of such matters as the time, route, and specifications for the development of the road system in the area; the total volume of timber to be moved over such road system, and the proportion of such timber which belongs to the United States or is embraced in a cooperative agreement for coordinated management with timber of the United States managed by the Bureau; the consequent proportion of the capital costs of the road system to be borne by such timber of the United States or embraced in such cooperative agreement; the period of time over, or rate at which, the United States or its licensees shall be required to amortise such capital cost; provisions for road maintenance; the use in addition to the uses set forth in § 2812.3-5 which the United States and its licensees may make of the road system involved, a formula for determining the proportionate capacity of the road system or portions thereof which shall be available to the United States and its licensees for the transportation of forest products; the amount and type of insurance to be carried, and the type of security to be furnished by licensees of the United States who use such road; and such other similar matters as the authorized officer may deem appropriate. To the extent necessary to fulfill the obligations of the United States under any such advance agreement, subsequent contracts for the sale of timber managed by the Bureau and tapped by such road system, and subsequent cooperative agreements for the
