

plans or plan amendments, where applicable. Lands acquired by an exchange within a Bureau of Land Management district shall automatically become public lands as defined in 43 U.S.C. 1702 and shall become part of that district. The acquired lands shall be managed in accordance with existing regulations and provisions of applicable land use plans and plan amendments. Lands acquired by an exchange that are located within the boundaries of areas of critical environmental concern or any other area having an administrative designation established through the land use planning process shall automatically become part of the unit or area within which they are located, without further action by the Bureau of Land Management, and shall be managed in accordance with all laws, rules, regulations, and land use plans applicable to such unit or area.

(h) *Environmental analysis.* After an agreement to initiate an exchange is signed, an environmental analysis shall be conducted by the authorized officer in accordance with the National Environmental Policy Act of 1969 (42 U.S.C. 4371), the Council on Environmental Quality regulations (40 CFR parts 1500-1508), and the environmental policies and procedures of the Department of the Interior and the Bureau of Land Management. In making this analysis, the authorized officer shall consider timely written comments received in response to the published exchange notice, pursuant to § 2201.2 of this part.

(i) *Reservations or restrictions in the public interest.* In any exchange, the authorized officer shall reserve such rights or retain such interests as are needed to protect the public interest or shall otherwise restrict the use of Federal lands to be exchanged, as appropriate. The use or development of lands conveyed out of Federal ownership are subject to any restrictions imposed by the conveyance documents and all laws, regulations, and zoning authorities of State and local governing bodies.

(j) *Hazardous substances—(1) Federal lands.* The authorized officer shall determine whether hazardous substances may be present on the Federal lands involved in an exchange and shall provide notice of known storage, release, or

disposal of hazardous substances on the Federal lands to the other parties in accordance with the provisions of 40 CFR part 373. The authorized officer shall provide this notice in the exchange agreement. The authorized officer shall also provide such notice, to the extent information is readily available, in the agreement to initiate an exchange. Unless the non-Federal party is a potentially responsible party under 42 U.S.C. 9607(a), the conveyance document from the United States shall contain a covenant in accordance with 42 U.S.C. 9620(h)(3). Where the non-Federal party is a potentially responsible party with respect to the property, it may be appropriate to enter into an agreement, as referenced in 42 U.S.C. 9607(e), whereby that party would indemnify the United States and hold the United States harmless against any loss or cleanup costs after conveyance.

(2) *Non-Federal lands.* The non-Federal party shall notify the authorized officer of any known, suspected and/or reasonably ascertainable storage, release, or disposal of hazardous substances on the non-Federal land pursuant to § 2201.1 of this part. Notwithstanding such notice, the authorized officer shall determine whether hazardous substances are known to be present on the non-Federal land involved in an exchange. If hazardous substances are known or believed to be present on the non-Federal land, the authorized officer shall reach an agreement with the non-Federal party regarding the responsibility for appropriate response action concerning the hazardous substances before completing the exchange. The terms of this agreement and any appropriate "hold harmless" agreement shall be included in an exchange agreement, pursuant to § 2201.7-2 of this part.

(k) *Legal description of properties.* All lands subject to an exchange shall be properly described on the basis of either a survey executed in accordance with the Public Land Survey System laws and standards of the United States or, if those laws and standards cannot be applied, the lands shall be properly described and clearly locatable by other means as may be prescribed or allowed by law.
