

line as long as it obtains all necessary authorizations from the Commission for use of radio frequencies. This authority does not apply to acquisitions of corporate control, which are not limited to acquisitions of equity ownership, such as stock or partnership interests, and which include actual working control by whatever manner exercised (such as, for example, by veto power, controlling interest in a board of directors, or other shareholder agreement provisions).

(b) Domestic common carriers subject to this section shall not engage in any line construction that may have a significant effect on the environment as defined in § 1.1307 of this chapter without prior compliance with the Commission's environmental rules. See § 1.1312 of this chapter.

[64 FR 39939, July 23, 1999]

§ 63.02 Exemptions for extensions of lines and for systems for the delivery of video programming.

(a) Any common carrier is exempt from the requirements of section 214 of the Communications Act of 1934, as amended, for the extension of any line.

(b) A common carrier shall not be required to obtain a certificate under section 214 of the Communications Act of 1934 with respect to the establishment or operation of a system for the delivery of video programming.

[64 FR 39939, July 23, 1999]

§ 63.09 Definitions applicable to international Section 214 authorizations.

The following definitions shall apply to §§ 63.09–63.24 of this part, unless the context indicates otherwise:

(a) *Facilities-based carrier* means a carrier that holds an ownership, indefinite-right-of-user, or leasehold interest in bare capacity in the U.S. end of an international facility, regardless of whether the underlying facility is a common carrier or non-common carrier submarine cable or a satellite system.

(b) *Control* includes actual working control in whatever manner exercised and is not limited to majority stock ownership. *Control* also includes direct or indirect control, such as through intervening subsidiaries.

(c) *Special concession* is defined as in § 63.14(b) of this part.

(d) *Foreign carrier* is defined as any entity that is authorized within a foreign country to engage in the provision of international telecommunications services offered to the public in that country within the meaning of the International Telecommunication Regulations, see Final Acts of the World Administrative Telegraph and Telephone Conference, Melbourne, 1988 (WATTC-88), Art. 1, which includes entities authorized to engage in the provision of domestic telecommunications services if such carriers have the ability to originate or terminate telecommunications services to or from points outside their country.

(e) Two entities are *affiliated* with each other if one of them, or an entity that controls one of them, directly or indirectly owns more than 25 percent of the capital stock of, or controls, the other one.

Also, a U.S. carrier is *affiliated* with two or more foreign carriers if the foreign carriers, or entities that control them, together directly or indirectly own more than 25 percent of the capital stock of, or control, the U.S. carrier and those foreign carriers are parties to, or the beneficiaries of, a contractual relation (e.g., a joint venture or market alliance) affecting the provision or marketing of international basic telecommunications services in the United States.

(f) *Market power* means sufficient market power to affect competition adversely in the U.S. market.

NOTE 1: The assessment of "capital stock" ownership will be made under the standards developed in Commission case law for determining such ownership. See, e.g., Fox Television Stations, Inc., 10 FCC Rcd 8452 (1995). "Capital stock" includes all forms of equity ownership, including partnership interests.

NOTE 2: Ownership and other interests in U.S. and foreign carriers will be attributed to their holders and deemed cognizable pursuant to the following criteria: Attribution of ownership interests in a carrier that are held indirectly by any party through one or more intervening corporations will be determined by successive multiplication of the ownership percentages for each link in the vertical ownership chain and application of the relevant attribution benchmark to the resulting product, except that wherever the ownership percentage for any link in the
