

§ 68.212

47 CFR Ch. I (10–1–00 Edition)

the Communications Act of 1934 relating to equipment registration.

(b) *Notice of Intent to Revoke Part 68 Registration.* Before revoking a Part 68 registration under the provisions of this section, the Commission, or the Common Carrier Bureau under delegated authority, will issue a written Notice of Intent to Revoke Part 68 Registration, or Joint Notice of Apparent Liability for Forfeiture and Intent to Revoke Part 68 Registration pursuant to §§ 1.80 and 1.89 of this chapter.

(1) *Contents of the Notice.* The Notice will:

(i) Identify the registration date(s) and registration number(s) of the equipment, and the rule or federal law apparently violated;

(ii) Set forth the nature of the act or omission charged against the registrant, and the facts upon which such charge is based;

(iii) Specify that in the event of revocation, the registrant may not re-apply for registration of the same product for a period of six months; and

(iv) Specify that revocation of the registration may be in addition to, or in lieu of, an amount in forfeiture levied pursuant to § 1.80 of this chapter.

(c) *Delivery.* The Notice will be sent via certified mail to the registrant at the address certified in the Part 68 application associated with the registration at issue.

(d) *Response.* The registrant will be given a reasonable period of time (usually 30 days from the date of the Notice) to show, in writing, why its part 68 registration should not be revoked or why the forfeiture penalty should not be imposed or should be reduced.

(e) *Reapplication.* A registrant whose registration has been revoked may not apply for registration of the same product for a period of six months from the date of revocation of the registration.

(f) *Reconsideration or appeal.* A registrant who is issued a revocation of equipment registration and/or forfeiture assessment may request reconsideration or make administrative appeal of the decision pursuant to Part 1 of the Commission's rules—Practice and Procedure, Part 1 of this chapter.

[61 FR 42392, Aug. 15, 1996]

§ 68.212 Assignment of equipment registration.

Commission equipment registration may not be assigned, exchanged or in any other way transferred to another party, without prior written notice to the Commission.

§ 68.213 Installation of other than “fully protected” non-system simple customer premises wiring.

(a) *Scope of this rule.* Provisions of this rule apply only to “unprotected” premises wiring used with simple installations of wiring for up to four line residential and business telephone service. More complex installations of wiring for multiple line services, for use with systems such as PBX and key telephone systems, are controlled by § 68.215 of these rules.

(b) *Wiring authorized.* Unprotected premises wiring may be used to connect units of terminal equipment or protective circuitry to one another, and to carrier-installed facilities if installed in accordance with these rules. The telephone company is not responsible, except pursuant to agreement between it and the customer or undertakings by it, otherwise consistent with Commission requirements, for installation and maintenance of wiring on the subscriber's side of the demarcation point, including any wire or jacks that may have been installed by the carrier. The subscriber and/or premises owner may install wiring on the subscriber's side of the demarcation point, and may remove, reconfigure, and rearrange wiring on that side of the demarcation point including wiring that may have been installed by the carrier. The customer or premises owner may not access carrier wiring and facilities on the carrier's side of the demarcation point. Customers may not access the telephone company-installed protector. All plugs and jacks used in connection with inside wiring shall conform to subpart F of this part. In multiunit premises with more than one customer, the premises owner may adopt a policy restricting a customer's access to wiring on the premises to only that wiring located in the customer's individual unit wiring that serves only that particular customer. See Demarcation
