

conservation plan. These assurances cannot be provided to Federal agencies. This rule does not apply to incidental take permits issued prior to March 25, 1998. The assurances provided in incidental take permits issued prior to March 25, 1998 remain in effect, and those permits will not be revised as a result of this rulemaking.

(1) *Changed circumstances provided for in the plan.* If additional conservation and mitigation measures are deemed necessary to respond to changed circumstances and were provided for in the plan's operating conservation program, the permittee will implement the measures specified in the plan.

(2) *Changed circumstances not provided for in the plan.* If additional conservation and mitigation measures are deemed necessary to respond to changed circumstances and such measures were not provided for in the plan's operating conservation program, NMFS will not require any conservation and mitigation measures in addition to those provided for in the plan without the consent of the permittee, provided the plan is being properly implemented.

(3) *Unforeseen circumstances.* (i) In negotiating unforeseen circumstances, NMFS will not require the commitment of additional land, water, or financial compensation or additional restrictions on the use of land, water, or other natural resources beyond the level otherwise agreed upon for the species covered by the conservation plan without the consent of the permittee.

(ii) If additional conservation and mitigation measures are deemed necessary to respond to unforeseen circumstances, NMFS may require additional measures of the permittee where the conservation plan is being properly implemented, but only if such measures are limited to modifications within conserved habitat areas, if any, or to the conservation plan's operating conservation program for the affected species, and maintain the original terms of the conservation plan to the maximum extent possible. Additional conservation and mitigation measures will not involve the commitment of additional land, water or financial compensation or additional restrictions on the use of land, water, or other natural

resources otherwise available for development or use under the original terms of the conservation plan without the consent of the permittee.

(iii) NMFS will have the burden of demonstrating that unforeseen circumstances exist, using the best scientific and commercial data available. These findings must be clearly documented and based upon reliable technical information regarding the status and habitat requirements of the affected species. NMFS will consider, but not be limited to, the following factors:

(A) Size of the current range of the affected species;

(B) Percentage of range adversely affected by the conservation plan;

(C) Percentage of range conserved by the conservation plan;

(D) Ecological significance of that portion of the range affected by the conservation plan;

(E) Level of knowledge about the affected species and the degree of specificity of the species' conservation program under the conservation plan; and

(F) Whether failure to adopt additional conservation measures would appreciably reduce the likelihood of survival and recovery of the affected species in the wild.

(h) Nothing in this rule will be construed to limit or constrain the Assistant Administrator, any Federal, State, local, or tribal government agency, or a private entity, from taking additional actions at its own expense to protect or conserve a species included in a conservation plan.

[55 FR 20606, May 18, 1990, as amended at 63 FR 8872, Feb. 23, 1998]

**§ 222.23 Permits for scientific purposes or to enhance the propagation or survival of the affected endangered species.**

(a) The Director, National Marine Fisheries Service, may issue permits for scientific purposes or to enhance the propagation or survival of the affected endangered species which authorize, under such terms and conditions as he may prescribe, taking, importation, or certain other acts with respect to endangered species otherwise prohibited by section 9 of the Endangered Species Act of 1973. The

species listed as endangered under either the Endangered Species Conservation Act of 1969 or the Endangered Species Act of 1973 and currently under the jurisdiction of the Secretary of Commerce are: Shortnose sturgeon (*Acipenser brevirostrum*); Totoaba (*Cynoscion macdonaldi*), Snake River sockeye salmon (*Oncorhynchus nerka*), Umpqua River cutthroat trout (*Oncorhynchus clarki clarki*); Southern California steelhead (*Oncorhynchus mykiss*), which includes all naturally spawned populations of steelhead (and their progeny) in streams from the Santa Maria River, San Luis Obispo County, California (inclusive) to Malibu Creek, Los Angeles County, California (inclusive); Upper Columbia River steelhead (*Oncorhynchus mykiss*), which includes the Wells Hatchery stock and all naturally spawned populations of steelhead (and their progeny) in streams in the Columbia River Basin upstream from the Yakima River, Washington, to the United States-Canada Border; Sacramento River winter-run chinook salmon (*Oncorhynchus tshawytscha*); Western North Pacific (Korean) gray whale (*Eschrichtius robustus*), Blue whale (*Balaenoptera musculus*), Humpback whale (*Megaptera novaeangliae*), Bowhead whale (*Balaenamysticetus*), Right whales (*Eubalaena spp.*), Fin or finback whale (*Balaenoptera physalus*), Sei whale (*Balaenoptera borealis*), Sperm whale (*Physeter catodon*); Cochito (*Phocoena sinus*), Chinese river dolphin (*Lipotes vexillifer*); Indus River dolphin (*Platanista minor*); Caribbean monk seal (*Monachus tropicalis*) Hawaiian monk seal (*Monachus schauinslandi*); Mediterranean monk seal (*Monachus monachus*); Saimaa seal (*Phoca hispida saimensis*); Steller sea lion (*Eumetopias jubatus*), western population, which consists of Steller sea lions from breeding colonies located west of 144° W. long.; Leatherback sea turtle (*Dermochelys coriacea*), Pacific hawksbill sea turtle (*Eretmochelys imbricata bissa*), Atlantic hawksbill sea turtle (*Eretmochelys imbricata imbricata*), Atlantic ridley sea turtle (*Lepidochelys kempi*). Green sea turtle (*Chelonia mydas*) breeding colony populations in Florida and on the Pacific coast of Mexico, and the olive ridley

sea turtle (*Lepidochelys olivacea*) breeding colony population on the Pacific coast of Mexico. Of these, the National Marine Fisheries Service has sole agency jurisdiction for sea turtles while the turtles are in the water and the U.S. Fish and Wildlife Service has jurisdiction for sea turtles while the turtles are on land. Within the jurisdiction of a State, more restrictive State laws or regulations in regard to endangered species shall prevail in regard to taking. Proof of compliance with applicable State laws will be required before a permit will be issued.

(b) *Application procedures.* To obtain such a permit, an application must be made to the Director in accordance with this subpart, except for marine mammal permits which shall be issued in accordance with the provisions of part 216, subpart D of this chapter, and sea turtle permits which shall be issued in accordance with part 220, subpart E of this chapter. The sufficiency of the application shall be determined by the Director in accordance with the requirements of this part and, in that connection, he may waive any requirement for information, or require any elaboration or further information deemed necessary. The following information will be used as the basis for determining whether an application is complete and whether a permit for scientific purposes or to enhance the propagation or survival of the affected endangered species should be issued by the Director. An original and four copies of the completed application shall be submitted to the Director, National Marine Fisheries Service, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, Washington, DC 20235. Assistance may be obtained by writing the Director or calling the Marine Mammal and Endangered Species Division in Washington, DC (202-343-9445 and effective December 2, 1974, it will become 202-634-7529). At least 45 days should be allowed for processing. An application for a permit shall provide the following information (when the information requested is not applicable put "N.A.") and such other information that the Director may require:

(1) Title: As applicable, either:

(i) Application for Permit for Scientific Purposes under the Endangered Species Act of 1973; or

(ii) Application for Permit to Enhance the Propagation or Survival of the Endangered Species Under the Endangered Species Act of 1973.

(2) The date of the application.

(3) The identity of the applicant including complete name, address, and telephone number. If the applicant is a partnership or a corporate entity set forth the details. If the endangered species is to be utilized by a person other than the Applicant, set forth the name of that person and such other information as would be required if such person were an Applicant.

(4) A description of the purpose of the proposed acts, including:

(i) A detailed justification of the need for the endangered species, including a discussion of possible alternatives, whether or not under the control of the applicant; and

(ii) A detailed description of how the species will be used.

(5) A detailed description of the project, or program, in which the endangered species is to be used, including:

(i) The period of time over which the project or program will be conducted;

(ii) A list of the names and addresses of the sponsors or cooperating institutions and the scientists involved;

(iii) A copy of the formal research proposal or contract if one has been prepared;

(iv) A statement of whether the proposed project or program has broader significance than the individual researcher's goals (i.e., does the proposed project or program respond directly or indirectly to recommendation of any national or international scientific body charged with research or management of the endangered species, and, if so, how?); and

(v) A description of the arrangements, if any, for the disposition of any dead specimen or its skeleton or other remains, for the continued benefit to science, in a museum or other institutional collection.

(6) A description of the endangered species which is the subject of the application, including the following:

(i) A list of each species and the number of each, including the common and

scientific name; the subspecies (if applicable); population group, and range;

(ii) A physical description of each animal, including the age, size, and sex;

(iii) A list of the probable dates of capture or other taking, importation, exportation, and other acts which require a permit, for each animal, and the location of capture or other taking, importation, exportation, and other acts which require a permit, as specifically as possible;

(iv) A description of the status of the stock of each species related insofar as possible to the location or area of taking;

(v) A description of the manner of taking for each animal, including the gear to be used;

(vi) The name and qualifications of the persons or entity which will capture or otherwise take the animals;

(vii) If the capture or other taking is to be done by a contractor, a statement as to whether a qualified member of your staff (include name(s) and qualifications) will supervise or observe the capture or other taking. Accompany such statement with a copy of the proposed contract or a letter from the contractor indicating agreement to capture or otherwise taken the animals, should a permit be granted;

(7) A description of the manner of transportation of any live animal taken, imported, exported, or shipped in interstate commerce, including:

(i) Mode of transportation;

(ii) Name of transportation company;

(iii) Length of time in transit for the transfer of the animal(s) from the capture site to the holding facility;

(iv) Length of time in transit for any future move or transfer of the animal(s) that is planned;

(v) The qualifications of the common carrier or agent used for transportation of the animals;

(vi) A description of the pen, tank, container, cage, cradle, or other devices used, both to hold the animal at the capture site and during transportation;

(vii) Special care before and during transportation, such as salves, antibiotics, moisture; and

(viii) A statement as to whether the animals will be accompanied by a veterinarian or other similarly qualified person, and the qualifications of such person.

(8) Describe the contemplated care and maintenance of any live animals sought, including a complete description of the facilities where any such animals will be maintained including:

(i) The dimensions of the pools or other holding facilities and the number, sex, and age of animals by species to be held in each;

(ii) The water supply, amount, and quality;

(iii) The diet, amount and type, for all animals;

(iv) Sanitation practices used;

(v) Qualifications and experience of the staff; and

(vi) A written certification from a licensed veterinarian knowledgeable about the species (or related species) or group which is the subject of the application, or from a recognized expert on the species (or related species) or group covered in the application that he has personally reviewed the amendments for transporting and maintaining the animal(s) and that in his opinion they are adequate to provide for the well-being of the animal; and

(vii) The availability in the future of a consulting expert or veterinarian meeting paragraph (b)(8)(vi) requirements of this section;

(9) A statement of willingness to participate in a cooperative breeding program and maintain or contribute data to a stud book.

(10) A statement of how the applicant's proposed project or program will enhance or benefit the wild population.

(11) For the 5 years preceding the date of this application, provide a detailed description of all mortalities involving species which were under the control of or utilized by the applicant and are either presently listed as endangered species or are taxonomically related within the Order to the species which is the subject of this application, including:

(i) A list of all endangered species and species related to the species which is the subject of this application; captured, transported, maintained, or utilized by the applicant for scientific

purposes or to enhance the propagation or survival of the affected species, and/or for all such species caused to be captured, transported, maintained, or utilized for scientific purposes or to enhance the propagation or survival of the affected species, by the Applicant;

(ii) The numbers of mortalities among such animals by species, by date, location of capture, i.e., from which population, and location of such mortalities;

(iii) The cause(s) of any such mortalities; and

(iv) The steps which have been taken by Applicant to avoid or decrease any such mortalities.

(12) A certification in the following language:

I hereby certify that the foregoing information is complete, true and correct to the best of my knowledge and belief. I understand that this information is submitted for the purpose of obtaining a permit under the Endangered Species Act of 1973 (87 Stat. 864, Pub. L. 93-205, 16 U.S.C. 1531 et seq.) and regulations promulgated thereunder, and that any false statement may subject me to the criminal penalties of 18 U.S.C. 1001, or to penalties under the Endangered Species Act of 1973.

(13) The applicant and/or an officer thereof must sign the application.

(c) *Issuance criteria.* The Director shall specifically consider, among other criteria, the following in determining whether to issue a permit for scientific purposes or to enhance the propagation or survival of the affected endangered species:

(1) Whether the permit was applied for in good faith;

(2) Whether the permit if granted and exercised will not operate to the disadvantage of the endangered species;

(3) Whether the permit would be consistent with the purposes and policy set forth in section 2 of the Act;

(4) Whether the permit would further a bona fide and necessary or desirable scientific purpose or enhance the propagation or survival of the endangered species, taking into account the benefits anticipated to be derived on behalf of the endangered species;

(5) The status of the population of the requested species, and the effect of the proposed action on the population, both direct and indirect;

(6) If a live animal is to be taken, transported, or held in captivity—the applicant's qualifications for the proper care and maintenance of the species and the adequacy of his facilities;

(7) Whether alternative non-endangered species or population stocks can and should be used;

(8) Whether the animal was born in captivity or was (or will be) taken from the wild;

(9) Provision for disposition of the species if and when the applicant's project or program terminates;

(10) How the applicant's needs, program, and facilities compare and relate to proposed and ongoing projects and programs;

(11) Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application;

(12) Opinions or views of scientists or other persons or organizations knowledgeable of the species which is the subject of the application or of other matters germane to the application; and

(d) Permits applied for under this section shall contain terms and conditions as the Director may deem appropriate, including:

(1) The number and kind of species which are covered;

(2) The location and manner of taking;

(3) Port of entry or export;

(4) The methods of transportation, care and maintenance to be used with live species;

(5) Any requirements for reports or rights of inspections with respect to any activities carried out pursuant to the permit;

(6) The transferability or assignability of the permit;

(7) The sale or other disposition of the species, its progeny or the species product;

(8) A reasonable fee covering the costs of issuance of such permit, including reasonable inspections and an appropriate apportionment of overhead and administrative expenses of the Department of Commerce. All such fees will be deposited in the Treasury to the credit of the appropriation which is

current and chargeable for the cost of furnishing the service.

[39 FR 41375, Nov. 27, 1974]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 222.23, see the List of CFR Sections Affected in the Finding Aids section of this volume.

**§ 222.24 Procedures for issuance of permits.**

(a) Whenever application for a permit is received by the Director which the Director deems sufficient, he shall, as soon as practicable, publish a notice thereof in the FEDERAL REGISTER. Information received by the Director as a part of the application shall be available to the public as a matter of public record at every stage of the proceeding. An interested party may within 30 days after the date of publication of such notice, submit to the Director his written data, views, or arguments with respect to the taking, importation, or other action proposed in the application and may request a hearing in connection with the action to be taken thereon.

(b) If a request for a hearing is made within the 30-day period referred to in paragraph (a) of this section, or if the Director determines that a hearing would otherwise be advisable, the Director may, within 60 days after the date of publication of the notice referred to in paragraph (a) of this section, afford to such requesting party or parties an opportunity for a hearing. Such hearing shall also be open to participation by any interested members of the public. Notice of the date, time, and place of such hearing shall be published in the FEDERAL REGISTER not less than 15 days in advance of such hearing. Any interested person may appear in person or through representatives at the hearing and may submit any relevant material, data, views, comments, arguments, or exhibits. A summary record of the hearing shall be kept.

(c) Except as provided in subpart D of 15 CFR part 904, as soon as practicable but not later than 30 days after the close of the hearing (or if no hearing is held, as soon as practicable after the end of the 30 days succeeding publication of the notice referred to in paragraph (a) of this section) the Director
