

20 percent, if needed, to maintain capitalization of the fund. The Assistant Administrator has effectively waived the surcharge until further notice.

(d) *Observer fees.* The Assistant Administrator will notify the owners or operators of FFV's of the estimated annual costs of placing observers aboard their vessels. The owners or operators of any such vessel must provide for repayment of those costs by including one-fourth of the estimated annual observer fee as determined by the Assistant Administrator in a L/C as prescribed in §600.518(b)(2). During the fiscal year, payment will be withdrawn from the L/C as required to cover anticipated observer coverage for the upcoming fishery. The Assistant Administrator will reconcile any differences between the estimated cost and actual costs of observer coverage within 90 days after the end of the fiscal year.

(e) *Financial assurances.* (1) A foreign nation, or the owners and operators of certain vessels of that foreign nation, may be required by the Assistant Administrator to provide financial assurances. Such assurances may be required if—

(i) Civil and criminal penalties assessed against fishing vessels of the Nation have not effectively deterred violations;

(ii) Vessels of that Nation have engaged in fishing in the EEZ without proper authorization to conduct such activities;

(iii) The Nation's vessel owners have refused to answer administrative charges or summons to appear in court; or

(iv) Enforcement of Magnuson-Stevens Act civil or criminal judgments in the courts of a foreign nation is unattainable.

(2) The level of financial assurances will be guided by the level of penalties assessed and costs to the U.S. Government.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§600.520 Northwest Atlantic Ocean fishery.

(a) *Purpose.* Sections 600.520 and 600.525 regulate all foreign fishing conducted under a GIFA within the EEZ in

the Atlantic Ocean north of 35°00' N. lat.

(b) *Authorized fishery—(1) Allocations.* Foreign vessels may engage in fishing only in accordance with applicable national allocations.

(2) *Time and area restrictions.* (i) Fishing, including processing, scouting, and support of foreign or U.S. vessels, is prohibited south of 35°00' N. lat., and north and east of a line beginning at the shore at 44°22' N. lat., 67°52' W. long. and intersecting the boundary of the EEZ at 44°11'12" N. lat., 67°16'46" W. long.

(ii) The Regional Administrator will consult with the Council prior to giving notice of any area or time restriction. NMFS will also consult with the USCG if the restriction is proposed to reduce gear conflicts. If NMFS determines after such consultation that the restriction appears to be appropriate, NMFS will publish the proposed restriction in the FEDERAL REGISTER, together with a summary of the information on which the restriction is based. Following a 30-day comment period, NMFS will publish a final action.

(iii) The Regional Administrator may rescind any restriction if he/she determines that the basis for the restriction no longer exists.

(iv) Any notice of restriction shall operate as a condition imposed on the permit issued to the foreign vessels involved in the fishery.

(3) *TALFF.* The TALFFs for the fisheries of the Northwest Atlantic Ocean are published in the FEDERAL REGISTER. Current TALFFs are also available from the Regional Administrator.

(4) *Species definitions.* The category "other finfish" used in TALFFs and in allocations includes all species except:

(i) The other allocated species, namely: Short-finned squid, long-finned squid, Atlantic herring, Atlantic mackerel, river herring (includes alewife, blueback herring, and hickory shad), and butterfish.

(ii) The prohibited species, namely: American plaice, American shad, Atlantic cod, Atlantic menhaden, Atlantic redfish, Atlantic salmon, all marlin, all spearfish, sailfish, swordfish, black sea bass, bluefish, croaker, haddock, ocean pout, pollock, red hake, scup, sea turtles, sharks (except

§ 600.520

50 CFR Ch. VI (10–1–98 Edition)

dogfish), silver hake, spot, striped bass, summer flounder, tilefish, yellowtail flounder, weakfish, white hake, windowpane flounder, winter flounder, witch flounder, Continental Shelf fishery resources, and other invertebrates (except nonallocated squids).

(5) *Closures.* The taking of any species for which a Nation has an allocation is permitted, provided that:

(i) The vessels of the foreign nation have not caught the allocation of that Nation for any species or species group (e.g., “other finfish”). When vessels of a foreign nation have caught an applicable allocation of any species, all further fishing other than scouting, processing, or support by vessels of that Nation must cease, even if other allocations have not been reached. Therefore, it is essential that foreign nations plan their fishing strategy to ensure

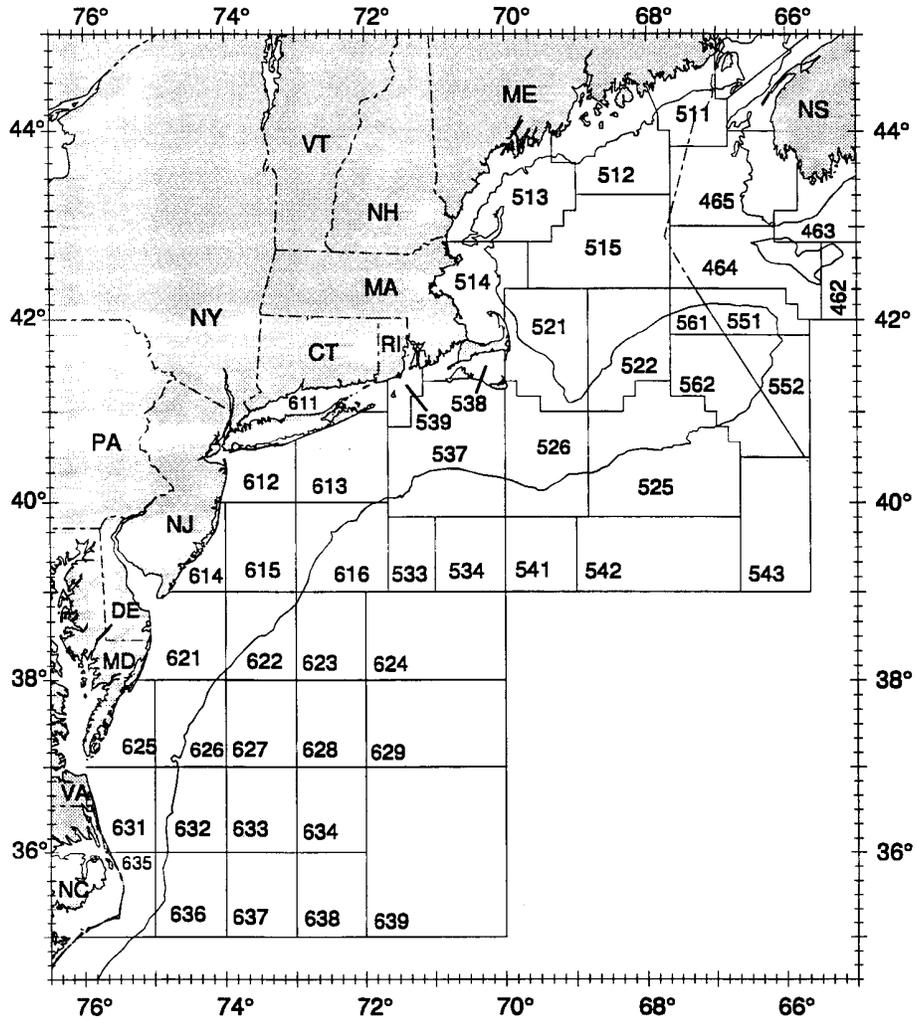

that the reaching of an allocation for one species does not result in the premature closing of a Nation’s fishery for other allocated species.

(ii) The fishery has not been closed for other reasons under §600.511.

(6) *Allocation utilization.* Foreign fishing vessels may elect to retain or discard allocated species; however, the computation of allocation utilization and fee refunds will be based on the total quantity of that species that was caught. Prohibited species must always be returned to the sea as required under §600.509.

(c) *Fishing areas.* For the purposes of the Northwest Atlantic Ocean fishery, fishing areas are that portion of the EEZ shown inside the boundaries of the “three digit statistical areas” described in Figure 1 to this section.

Figure 1 to § 600.520--Fishing Areas of the Northwest Atlantic Ocean Fisheries

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.525 Atlantic herring fishery.

(a) *Initial specifications.* The initial specifications of OY, DAH, DAP, JVP, TALFF, and reserve (if any) have been established by the PMP for Atlantic herring approved on July 6, 1995. These annual specifications will remain in effect unless adjusted pursuant to the provisions specified in paragraph (b) of this section.

(b) *Procedures to adjust initial specifications.* NMFS may adjust these initial specifications upward or downward to produce the greatest overall benefit to the United States at any time prior to or during the fishing years for which the initial specifications are set by publishing notification in the FEDERAL REGISTER with the reasons for such adjustments. Any notice of adjustment may provide for public comment. Adjustments to the initial specifications may take into account the following information:

(1) The estimated domestic processing capacity and extent to which it will be used.;

(2) Landings and catch statistics.;

(3) Stock assessments.

(4) Relevant scientific information.

Subpart G—Preemption of State Authority Under Section 306(b)

§ 600.605 General policy.

It is the policy of the Secretary that preemption proceedings will be conducted expeditiously. The administrative law judge and counsel or other representative for each party are encouraged to make every effort at each stage of the proceedings to avoid delay.

§ 600.610 Factual findings for Federal preemption.

(a) The two factual findings for Federal preemption of state management authority over a fishery are:

(1) The fishing in a fishery that is covered by an FMP implemented under the Magnuson-Stevens Act is engaged in predominately within the EEZ and beyond such zone.

(2) A state has taken any action, or omitted to take any action, the results of which will substantially and ad-

versely affect the carrying out of such FMP.

(b) Whether fishing is engaged in “predominately” within or beyond the EEZ will be determined after consideration of relevant factors, including but not limited to, the catch (based on numbers, value, or weight of fish caught, or other relevant factors) or fishing effort during the appropriate period, and in light of historical patterns of the distribution of catch or fishing effort for such stock or stocks of fish.

(c) Whether relevant effects are substantial will be determined after consideration of the magnitude of such actual or potential effects. Relevant to this determination are various factors, including but not limited to, the proportion of the fishery (stock or stocks of fish and fishing for such stocks) that is subject to the effects of a particular state’s action or omission, the characteristics and status (including migratory patterns and biological condition) of the stock or stocks of fish in the fishery, and the similarity or dissimilarity between the goals, objectives, or policies of the state’s action or omission and the management goals or objectives specified in the FMP for the fishery or between the state and Federal conservation and management measures of the fishery.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.615 Commencement of proceedings.

(a) *Notice of proposed preemption.* (1) If a proceeding under this part is deemed necessary, the Administrator must issue a notice of proposed preemption to the Attorney General of the State or States concerned. The notice will contain:

(i) A recital of the legal authority and jurisdiction for instituting the proceeding.

(ii) A concise statement of the § 600.610 factual findings for Federal preemption upon which the notice is based.

(iii) The time, place, and date of the hearing.
