

§ 648.16

the vessel; NMFS permit number assigned to the vessel; expected date and time of departure from port; whether the trip will be directed on surf clams or ocean quahogs; expected date, time, and location of landing; and name of the individual providing notice.

(2) Owners or operators that have given notification of a fishing trip under this paragraph (b) who decide to cancel or postpone the trip prior to departure must immediately provide notice of cancellation by telephone to the Office of Law Enforcement to which the original notification was provided. A separate notification shall be provided for the next fishing trip. Owners or operators that discontinue a fishing trip in the EEZ must immediately provide notice of discontinuance by telephone to the Office of Law Enforcement to which the original notification was provided. The owner or operator providing notice of discontinuance shall advise of any changes in landing time or port of landing. The owner or operator discontinuing a fishing trip in the EEZ must return to port and off-load any surf clams or ocean quahogs prior to commencing fishing operations in the waters under the jurisdiction of any state.

(3) The vessel permits, the vessel, its gear, and catch shall be subject to inspection upon request by an authorized officer.

(4) *Suspension of notification requirements.* The Regional Administrator may suspend notification requirements for vessels fishing under a Maine mahogany quahog permit issued pursuant to §648.4(a)(4)(i) if he determines that such notification is not necessary to enforce effectively the management measures in the Maine mahogany quahog zone. The Regional Administrator may rescind such suspension if he concludes that the original determination is no longer valid. A suspension or rescission of suspension of the notification requirements by the Regional Administrator shall be published in the FEDERAL REGISTER.

(c) *Radio hails.* Permit holders, while underway, must be alert for communication conveying enforcement instructions and immediately answer via VHF-FM radio, channel 16 when hailed by an authorized officer. Vessels not

50 CFR Ch. VI (10–1–98 Edition)

required to have VHF-FM radios by the Coast Guard are exempt from this requirement.

[61 FR 34968, July 3, 1996, as amended at 62 FR 14648, Mar. 27, 1997; 63 FR 27485, May 19, 1998]

§648.16 Penalties.

See §600.735.

§648.17 Exemptions for vessels fishing in the NAFO Regulatory Area for Multispecies vessels.

A vessel issued a valid High Seas Fishing Compliance permit under 50 CFR part 300 is exempt from multispecies permit, mesh size, effort-control, and possession limit restrictions, specified in §§648.4, 648.80, 648.82 and §648.86, respectively, while transiting the EEZ with multispecies on board the vessel, or landing multispecies in U.S. ports that were caught while fishing in the NAFO Regulatory Area, provided:

(a) The vessel operator has a letter of authorization issued by the Regional Administrator on board the vessel;

(b) For the duration of the trip, the vessel fishes, except for transiting purposes, exclusively in the NAFO Regulatory Area and does not harvest fish in, or possess fish harvested in, or from, the EEZ;

(c) When transiting the EEZ, all gear is properly stowed in accordance with one of the applicable methods specified in §648.81(e); and

(d) The vessel operator complies with the High Seas Fishing Compliance permit and all NAFO conservation and enforcement measures while fishing in the NAFO Regulatory Area.

[63 FR 11595, Mar. 10, 1998]

Subpart B—Management Measures for the Atlantic Mackerel, Squid, and Butterfish Fisheries

§648.20 Maximum optimum yield (OYs).

The OYs specified pursuant to §648.21 during a fishing year may not exceed the following amounts:

(a) Mackerel—that quantity of mackerel that is less than or equal to the allowable biological catch (ABC) in U.S. waters specified pursuant to §648.21.

(b) *Loligo*—the catch associated with a fishing mortality rate of F_{max} .

(c) *Illex*—the catch associated with a fishing mortality rate of F_{20} .

(d) Butterfish—the catch associated with a fishing mortality rate of F_{MSY} .

[61 FR 34968, July 3, 1996, as amended at 62 FR 8637, Feb. 26, 1997]

§648.21 Procedures for determining initial annual amounts.

(a) *Initial recommended annual specifications.* The Atlantic Mackerel, Squid, and Butterfish Monitoring Committee (Monitoring Committee) shall meet annually to develop and recommend the following specifications for consideration by the Mackerel, Squid, and Butterfish Committee of the MAFMC: (1) Initial OY (IOY), domestic annual harvest (DAH), and domestic annual processing (DAP) for the squids; (2) IOY, DAH, DAP, and bycatch level of the total allowable level of foreign fishing (TALFF), if any, for butterfish; and (3) IOY, DAH, DAP, joint venture processing (JVP), if any, and TALFF, if any, for mackerel. The Monitoring Committee may also recommend that certain ratios of TALFF, if any, for mackerel to purchases of domestic harvested fish and/or domestic processed fish be established in relation to the initial annual amounts.

(b) *Guidelines.* As the basis for its recommendations under paragraph (a) of this section, the Monitoring Committee shall review available data pertaining to: Commercial and recreational landings, discards, current estimates of fishing mortality, stock status, the most recent estimates of recruitment, virtual population analysis results, levels of noncompliance by harvesters or individual states, impact of size/mesh regulations, results of a survey of domestic processors and joint venture operators of estimated mackerel processing capacity and intent to use that capacity, results of a survey of fishermen's trade associations of estimated mackerel harvesting capacity and intent to use that capacity, and any other relevant information. The specifications recommended pursuant to paragraph (a) of this section must be consistent with the following:

(1) *Squid.* (i) The ABC for any fishing year must be either the maximum OY

specified in §648.20, or a lower amount, if stock assessments indicate that the potential yield is less than the maximum OY.

(ii) IOY is a modification of ABC based on social and economic factors.

(2) *Mackerel.* (i) Mackerel ABC must be calculated from the formula $ABC = S - C - T$, where C is the estimated catch of mackerel in Canadian waters for the upcoming fishing year; S is the mackerel spawning stock size at the beginning of the year for which quotas are specified; and T, which must be equal to or greater than 900,000 mt (1,984,050,000 lb), is the spawning stock size that must be maintained in the year following the year for which quotas are specified.

(ii) IOY is a modification of ABC, based on social and economic factors, and must be less than or equal to ABC.

(iii) IOY is composed of DAH and TALFF. DAH, DAP, and JVP must be projected by reviewing data from sources specified in paragraph (a) of this section and other relevant data, including past domestic landings, projected amounts of mackerel necessary for domestic processing and for joint ventures during the fishing year, projected recreational landings, and other data pertinent for such a projection. The JVP component of DAH is the portion of DAH that domestic processors either cannot or will not use. In addition, IOY is based on the criteria set forth in the Magnuson Act, specifically section 201(e), and on the following economic factors:

(A) Total world export potential by mackerel producing countries.

(B) Total world import demand by mackerel consuming countries.

(C) U.S. export potential based on expected U.S. harvests, expected U.S. consumption, relative prices, exchange rates, and foreign trade barriers.

(D) Increased/decreased revenues to the United States from foreign fees.

(E) Increased/decreased revenues to U.S. harvesters (with/without joint ventures).

(F) Increased/decreased revenues to U.S. processors and exporters.

(G) Increases/decreases in U.S. harvesting productivity due to decreases/increases in foreign harvest.
