SUPPLEMENTARY INFORMATION:

I. Abstract

Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) NOAA is responsible for management of the Nation's marine fisheries. As part of its efforts to enforce fishery regulations, NOAA has included in some of those regulations requirements that fishing gear be marked. The ability to link gear to its owner or operator is essential for enforcement in these fisheries, and the identification of gear is also useful in actions concerning the damage or loss of gear. NOAA has previously received Paperwork Reduction Act clearance for all of its gear-marking requirements under one Office of Management and Budget (OMB) control number, 0648-0305, but for internal management reasons NOAA intends that future clearances will be obtained on a regional or fishery basis. This notice is for the requirements imposed in the Southwest Region's pelagic longline and crustaceans fisheries.

II. Method of Collection

Fishermen in these fisheries must mark their fishing gear. Longline vessel operators must ensure that the official number of the vessel is affixed to every longline float and buoy, whether or not the float or buoy is deployed. The lobster vessel's official number must be marked legibly on all traps and floats.
