

Based on information contained in the Universal Service Worksheets, FCC Form 457, USAC submitted the following information regarding end-user telecommunications revenues on November 13, 1997:

Total Interstate, Intrastate, and International End-User Telecommunications Revenues from January 1, 1997–June 30, 1997: \$89.827 billion.

Total Interstate and International End-User Telecommunications Revenues from January 1, 1997–June 30, 1997: \$35.001 billion.<sup>21</sup>

USAC recommended that, in calculating the contribution bases, the Commission adjust end-user telecommunications revenues downward to account for possible uncollectible contributions and possible errors in the projections of demand and administrative expense. The proposed contribution factors set forth in the November 13, 1997 Public Notice thus were based on USAC's recommended contribution bases.<sup>22</sup> The revised contribution factors set forth below, however, are based on contribution bases that include no adjustments for uncollectibles or errors in projection. Based on the low level of carrier-to-carrier uncollectibles for access charges,<sup>23</sup> we have concluded that projected levels of uncollectible contributions should be minimal. Furthermore, given the quarterly evaluation of demand, we find that we do not need to take into account possible errors in projections when setting the contribution factors. Any projection-related errors can be corrected in subsequent quarters.<sup>24</sup>

Finally, we note that the contribution factors proposed by USAC and set forth in the Public Notice were derived by dividing quarterly total program costs by revenues for a six-month period. Although these factors, if approved, would have been used to collect funds for the first quarter, they would have been applied to the six-month revenues reported on individual contributor's Universal Service Worksheets. To obtain contribution factors that will be applied to revenues that approximate first

quarter revenues, the revised contribution factors set forth below are based on contribution bases that are divided by two. This results in a more accurate portrayal of the contribution factors but does not change the amounts collected.

Based on the figures submitted by USAC, Schools and Libraries Corporation, and Rural Health Care Corporation, and revised as set forth above, the approved contribution factors for the first quarter of 1998 are as follows:

Contribution factor for the schools and libraries and rural health care support mechanisms:

Total Program Costs / Contribution Base (Interstate, International, and Intrastate) = \$0.325 billion / (\$89.827 billion / 2) = **0.0072**.

Contribution factor for the high cost and low income support mechanisms:

Total Program Costs / Contribution Base (Interstate and International) = \$0.559 billion / (\$35.001 billion / 2) = **0.0319**.

These factors are the approved first quarter 1998 universal service contribution factors. To calculate contributions, USAC shall multiply these factors by one half of contributors' end-user telecommunications revenues for January 1, 1997 through June 30, 1997, as reported on Universal Service Worksheets. USAC will bill and collect those contributions on a monthly basis. ### Conference Call Meeting of the North American Numbering Council

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice.

<sup>21</sup> Letter from William Stern, NECA to Secretary, FCC, dated November 13, 1997.

<sup>22</sup> Letter from John A. Ricker, NECA to Universal Service Branch, dated November 10, 1997.

<sup>23</sup> The Commission estimates that carrier-to-carrier uncollectible rates are 0.2 percent. This estimate was calculated using 1996 ARMIS data. (1996 ARMIS 4301, Traffic Sensitive Total Uncollectibles (Column R, Row 1060) divided by Traffic Sensitive Total Revenues (Column R, Row 1090)).
