

may have to submit certain information to demonstrate that they have met the standards. b. Cost Study of Local Switching Costs: Price cap LEC are required to conduct a cost study to determine the geographically-average portion of local switching costs that is attributable to the line-side ports, and to dedicated trunk side cards and ports. c. Cost Study of Interstate Access Service that Remain Subject to Price Cap Regulation: To implement our backstop to market-based access charge reform, we require each incumbent price cap LEC to file a cost study no later than February 8, 2001, demonstrating the cost of providing those interstate access services that remain subject to price cap regulation because they do not face substantial competition. d. Tariff Filings: The Commission requires the filing of various tariffs. e. Third-Party Disclosure: In the Second Order on Reconsideration, the Commission requires LECs to provide IXCs with customer-specific information about how many and what type of presubscribed interexchange carrier charges (PICCs) they are assessing for each of the IXC's presubscribed customers. One of the primary goals of the First Report and Order was to develop a cost-recovery mechanism that permits carriers to recover their costs in a manner that reflects the way in which those costs are incurred. Without access to information that indicates whether the LEC is assessing a primary or non-primary residential PICC, or about how many local business lines are presubscribed to a particular IXC, the IXCs will be unable to develop rates that accurately reflect the underlying costs. The information required under these Orders would be used in determining whether the incumbent LECs should receive the regulatory relief proposed in the Orders. The information collected under the Second Order on Reconsideration and Memorandum Opinion and Order would be submitted by the LECs to the interexchange carriers (IXCs) for use in developing the most cost-efficient rates and rate structures.
