

107TH CONGRESS
2^D SESSION

H. R. 5210

To amend the Solid Waste Disposal Act to require implementation by brand owners of management plans that provide refund values for certain beverage containers.

IN THE HOUSE OF REPRESENTATIVES

JULY 24, 2002

Ms. RIVERS introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To amend the Solid Waste Disposal Act to require implementation by brand owners of management plans that provide refund values for certain beverage containers.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “National Beverage
5 Producer Responsibility Act of 2002”.

6 **SEC. 2. FINDINGS.**

7 Congress finds that—

8 (1) the beverage industry has an established
9 and effective marketing infrastructure that provides

1 a wide range of beverage products at affordable
2 prices to consumers in the United States;

3 (2) the absence of a beverage industry infra-
4 structure for recovering used beverage containers
5 has—

6 (A) placed undue burdens on local waste
7 authorities;

8 (B) failed to provide any incentive for the
9 beverage industry to reduce waste; and

10 (C) resulted in tens of billions of
11 unrecycled beverage containers per year, includ-
12 ing 114,000,000,000 unrecycled beverage con-
13 tainers in 1999;

14 (3) of particular concern—

15 (A) glass beverage containers are difficult
16 and costly to recycle through municipal
17 curbside programs because of breakage;

18 (B) valuable beverage container types are
19 being replaced with low-value plastics and com-
20 posite packaging; and

21 (C) removing glass or other valuable bev-
22 erage container types from curbside programs
23 has been found to reduce the public costs of
24 those programs;

1 (4) an efficient, industry-operated system of
2 beverage container collection, recycling, and reuse
3 would—

4 (A) reduce the overall burden placed on
5 taxpayers and municipal waste management
6 systems; and

7 (B) shift the responsibility for that collec-
8 tion, recycling, and reuse to beverage producers
9 and consumers;

10 (5) deposit systems, originally devised by the
11 beverage industry to recover used bottles, have been
12 shown to be an effective and sustainable means for
13 recovering used beverage containers, especially the
14 increasing proportion of beverage containers the bev-
15 erages contained by which are consumed away from
16 the home;

17 (6) greater reuse and recycling of beverage con-
18 tainers would—

19 (A) significantly improve the energy and
20 emissions performance of the beverage industry
21 of the United States; and

22 (B) in each year, conserve an amount of
23 electrical energy equivalent to that required to
24 serve millions of homes in the United States;

1 (7) 10 States have enacted and implemented
2 laws designed to protect the environment, conserve
3 energy and material resources, and reduce waste by
4 requiring—

5 (A) beverage consumers to pay a deposit
6 on the purchase of beverage containers; and

7 (B) the beverage industry to pay a refund
8 on used beverage containers that are returned
9 for reuse and recycling;

10 (8) those laws—

11 (A) enjoy strong public support; and

12 (B) have proven to be effective in achieving
13 high rates of beverage container reuse and recy-
14 cling;

15 (9) a national standard for beverage container
16 reuse and recycling would ensure that beverage con-
17 sumers in all regions of the United States would
18 enjoy access to beverage container reuse and recy-
19 cling services;

20 (10) a beverage container reuse and recycling
21 system designed by brand owners could—

22 (A) be seamlessly integrated with the na-
23 tional and regional marketing systems of the
24 brand owners;

1 (B) maximize efficiency of the brand own-
2 ers; and

3 (C) minimize unproductive costs of compli-
4 ance with requirements of several different re-
5 cycling programs;

6 (11) a national system of beverage container
7 reuse and recycling is consistent with the intent of
8 the Solid Waste Disposal Act (42 U.S.C. 6901 et
9 seq.); and

10 (12) this Act is consistent with the goals estab-
11 lished by the Administrator of the Environmental
12 Protection Agency, including the national goal of 35
13 percent source reduction and recycling by 2005.
