The Chairman shall enter the proceeds in a special interest-bearing account to the credit of the appropriate endowment for the purposes specified in each case.

SEC. 411. No part of any appropriation contained in this Act shall be expended or obligated to complete and issue the 5-year program under the Forest and Rangeland Renewable Resources Planning Act.

- (1) by striking “or” following “stand of timber,” in (3); and*

The projects may be completed in a subsequent fiscal year. Funds shall not be expended under this section to replace funds which would otherwise appropriately be expended from the timber salvage sale fund. SEC. 415. Prior to October 1, 2006, the Secretary of Agriculture shall not be considered to be in violation of subparagraph 6(f)(5)(A) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604(f)(5)(A)) solely because more than 15 years have passed without revision of the plan for a unit of the National Forest System. SEC. 416. No timber sale in Region 10 shall be advertised if the indicated rate is deficit when appraised using a residual value approach that assigns domestic Alaska values for western redcedar. Program accomplishments shall be based on volume sold. Should Region 10 sell, in the current fiscal year, the annual average portion of the decadal allowable sale quantity called for in the current Tongass Land Management Plan in sales which are not deficit

when appraised using a residual value approach that assigns domestic Alaska values for western redcedar, all of the western redcedar timber from those sales which is surplus to the needs of domestic processors in Alaska, shall be made available to domestic processors in the contiguous 48 United States at prevailing domestic prices. Should Region 10 sell, in the current fiscal year, less than the annual average portion of the decadal allowable sale quantity called for in the Tongass Land Management Plan in sales which are not deficit when appraised using a residual value approach that assigns domestic Alaska values for western redcedar, the volume of western redcedar timber available to domestic processors at prevailing domestic prices in the contiguous 48 United States shall be that volume: (1) which is surplus to the needs of domestic processors in Alaska; and (2) is that percent of the surplus western redcedar volume determined by calculating the ratio of the total timber volume which has been sold on the Tongass to the annual average portion of the decadal allowable sale quantity called for in the current Tongass Land Management Plan. The percentage shall be calculated by Region 10 on a rolling basis as each sale is sold (for purposes of this amendment, a "rolling basis" shall mean that the determination of how much western redcedar is eligible for sale to various markets shall be made at the time each sale is awarded). Western redcedar shall be deemed "surplus to the needs of domestic processors in Alaska" when the timber sale holder has presented to the Forest Service documentation of the inability to sell western redcedar logs from a given sale to domestic Alaska processors at a price equal to or greater than the log selling value stated in the contract. All additional western redcedar volume not sold to Alaska or contiguous 48 United States domestic processors may be exported to foreign markets at the election of the timber sale holder. All Alaska yellow cedar may be sold at prevailing export prices at the election of the timber sale holder.

SEC. 417. No funds provided in this Act may be expended to conduct preleasing, leasing and related activities under either the Mineral Leasing Act (30 U.S.C. 181 et seq.) or the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) within the boundaries of a National Monument established pursuant to the Act of June 8, 1906 (16 U.S.C. 431 et seq.) as such boundary existed on January 20, 2001, except where such activities are allowed under the Presidential proclamation establishing such monument.

In entering into agreements with foreign countries pursuant to the Wildfire Suppression Assistance Act (42 U.S.C. 1856m) the Secretary of Agriculture and the Secretary of the Interior are authorized to enter into reciprocal agreements in which the individuals furnished under said agreements to provide wildfire services are considered, for purposes of tort liability, employees of the country receiving said services when the individuals are engaged in fire suppression: Provided, That the Secretary of Agriculture or the Secretary of the Interior shall not enter into any agreement under this provision unless the foreign country (either directly or through its fire organization) agrees to assume any and all liability for the acts or omissions of American firefighters engaged in firefighting in a foreign country: Provided further, That when an agreement is reached for furnishing fire fighting services, the only remedies for acts or omissions committed while fighting fires shall

be those provided under the laws of the host country, and those remedies shall be the exclusive remedies for any claim arising out of fighting fires in a foreign country: Provided further, That neither the sending country nor any legal organization associated with the firefighter shall be subject to any legal action whatsoever pertaining to or arising out of the firefighter's role in fire suppression.

SEC. 419. Notwithstanding any other provision of law or regulation, to promote the more efficient use of the health care funding allocation for fiscal year 2006, the Eagle Butte Service Unit of the Indian Health Service, at the request of the Cheyenne River Sioux Tribe, may pay base salary rates to health professionals up to the highest grade and step available to a physician, pharmacist, or other health professional and may pay a recruitment or retention bonus of up to 25 percent above the base pay rate.

SEC. 420. In awarding a Federal contract with funds made available by this Act, notwithstanding Federal Government procurement and contracting laws, the Secretary of Agriculture and the Secretary of the Interior (the "Secretaries") may, in evaluating bids and proposals, give consideration to local contractors who are from, and who provide employment and training for, dislocated and displaced workers in an economically disadvantaged rural community, including those historically timber-dependent areas that have been affected by reduced timber harvesting on Federal lands and other forest-dependent rural communities isolated from significant alternative employment opportunities: Provided, That notwithstanding Federal Government procurement and contracting laws the Secretaries may award contracts, grants or cooperative agreements to local non-profit entities, Youth Conservation Corps or related partnerships with State, local or non-profit youth groups, or small or micro-business or disadvantaged business: Provided further, That the contract, grant, or cooperative agreement is for forest hazardous fuels reduction, watershed or water quality monitoring or restoration, wildlife or fish population monitoring, or habitat restoration or management: Provided further, That the terms "rural community" and "economically disadvantaged" shall have the same meanings as in section 2374 of Public Law 101-624: Provided further, That the Secretaries shall develop guidance to implement this section: Provided further, That nothing in this section shall be construed as relieving the Secretaries of any duty under applicable procurement laws, except as provided in this section.

SEC. 421. No funds appropriated in this Act for the acquisition of lands or interests in lands may be expended for the filing of declarations of taking or complaints in condemnation without the approval of the House and Senate Committees on Appropriations: Provided, That this provision shall not apply to funds appropriated to implement the Everglades National Park Protection and Expansion Act of 1989, or to funds appropriated for Federal assistance to the State of Florida to acquire lands for Everglades restoration purposes.

(d) In preparing any reports to the Committees on Appropriations on competitive sourcing activities, agencies funded in this Act shall include the incremental cost directly attributable to conducting the competitive sourcing competitions, including costs attributable to paying outside consultants and contractors and, in accordance with full cost accounting principles, all costs attributable to developing, implementing, supporting, managing, monitoring, and reporting on competitive sourcing, including personnel, consultant, travel, and training costs associated with program management.

(e) In carrying out any competitive sourcing study involving Forest Service employees, the Secretary of Agriculture shall—

(1) determine whether any of the employees concerned are also qualified to participate in wildland fire management activities; and

(2) take into consideration the effect that contracting with a private sector source would have on the ability of the Forest Service to effectively and efficiently fight and manage wildfires.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2361), making appropriations for the Department of the Interior, Environment, and Related Agencies for the fiscal year ending September 30, 2006, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The conference agreement on H.R. 2361 incorporates some of the provisions of both the House and the Senate versions of the bill. Report language and allocations set forth in either House Report 109–80 or Senate Report 109–80 that are not changed by the conference are approved by the committee of conference. The statement of the managers, while repeating some report language for emphasis, does not negate the language referenced above unless expressly provided herein.

REPROGRAMMING GUIDELINES

The managers have revised the reprogramming guidelines to add an exception for certain Environmental Protection Agency grants (section 3(b)) and to delete certain instructions to the Forest Service dealing with boundary adjustments and transfer of funds.

The following are the procedures governing reprogramming actions for programs and activities funded in the Interior, Environment, and Related Agencies Appropriations Act:

1. *Definitions.*—(a) “Reprogramming,” as defined in these procedures, includes the reallocation of funds from one budget activity to another. In cases where either the House or Senate Committee report displays an allocation of an appropriation below the activity level, that more detailed level shall be the basis for reprogramming. For construction accounts, a reprogramming constitutes the reallocation of funds from one construction project (identified in the justification or Committee report) to another. A reprogramming shall also consist of any significant departure from the program described in the agency’s budget justifications. This includes proposed reorganizations even without a change in funding.

(b) “Committees” refer to the House and Senate Committees on Appropriations and, specifically, the Subcommittee on Interior, Environment, and Related Agencies.

2. *Guidelines for Reprogramming.*—(a) A reprogramming should be made only when an unforeseen situation arises; and then only if postponement of the project or the activity until the next appropriation year would result in actual loss or damage. Mere convenience or desire should not be factors for consideration.

(b) Any project or activity, which may be deferred through reprogramming, shall not later be accomplished by means of further reprogramming; but, instead, funds should again be sought for the deferred project or activity through the regular appropriations process.

(c) Reprogramming should not be employed to initiate new programs or to change allocations specifically denied, limited or increased by the Congress in the Act or the report. In cases where unforeseen events or conditions are deemed to require changes, proposals shall be submitted in advance to the Committees, regardless of amounts involved, and be fully explained and justified.

(d) Reprogramming proposals submitted to the Committees for approval shall be considered approved 30 calendar days after receipt if the Committees have posed no objection. However, agencies will be expected to extend the approval deadline if specifically requested by either Committee.

(e) Proposed changes to estimated working capital fund bills and estimated overhead charges, deductions, reserves or holdbacks, as such estimates were presented in annual budget justifications, shall be submitted through the reprogramming process.

3. *Criteria and Exceptions.*—Any proposed reprogramming must be submitted to the Committees in writing prior to implementation if it exceeds \$500,000 annually or results in an increase or decrease of more than 10 percent annually in affected programs, with the following exceptions:

(a) With regard to the tribal priority allocations activity of the Bureau of Indian Affairs, Operation of Indian Programs account, there is no restriction on reprogrammings among the programs within this activity. However, the Bureau shall report on all reprogrammings made during the first 6 months of the fiscal year by no later than May 1 of each year, and shall provide a final report of all reprogrammings for the previous fiscal year by no later than November 1 of each year.

(b) With regard to the Environmental Protection Agency, State and Tribal Assistance Grants account, reprogramming requests associated with States and Tribes applying for partnership grants do not need to be submitted to the Committees for approval should such grants exceed the normal reprogramming limitations. In addition, the Agency need not submit a request to move funds between wastewater and drinking water objectives for those grants targeted to specific communities.

4. *Quarterly Reports.*—(a) All reprogrammings shall be reported to the Committees quarterly and shall include cumulative totals.

(b) Any significant shifts of funding among object classifications also should be reported to the Committees.

5. *Administrative Overhead Accounts.*—For all appropriations where costs of administrative expenses are funded in part from “assessments” of various budget activities within an appropriation, the assessments shall be shown in justifications under the discussion of administrative expenses.

6. *Contingency Accounts.*—For all appropriations where assessments are made against various budget activities or allocations for contingencies the Committees expect a full explanation, as part of

the budget justification, consistent with section 405 of this Act. The explanation shall show the amount of the assessment, the activities assessed, and the purpose of the fund. The Committees expect reports each year detailing the use of these funds. In no case shall a fund be used to finance projects and activities disapproved or limited by Congress or to finance new permanent positions or to finance programs or activities that could be foreseen and included in the normal budget review process. Contingency funds shall not be used to initiate new programs.

7. *Report Language.*—Any limitation, directive, or earmarking contained in either the House or Senate report which is not contradicted by the other report nor specifically denied in the conference report shall be considered as having been approved by both Houses of Congress.

8. *Assessments.*—No assessments shall be levied against any program, budget activity, subactivity, or project funded by the Interior, Environment, and Related Agencies Appropriations Act unless such assessments and the basis therefore are presented to the Committees and are approved by such Committees, in compliance with these procedures.

9. *Land Acquisitions and Forest Legacy.*—(a) Lands shall not be acquired for more than the approved appraised value (as addressed in section 301(3) of Public Law 91-646) except for condemnations and declarations of taking, unless such acquisitions are submitted to the Committees for approval in compliance with these procedures.

(b) Subsection (a) does not apply to the National Park Service for tracts with an appraised value of \$500,000 or less.

10. *Land Exchanges.*—Land exchanges, wherein the estimated value of the Federal lands to be exchanged is greater than \$500,000, shall not be consummated until the Committees have had a 30-day period in which to examine the proposed exchange.

11. *Appropriations Structure.*—The appropriation structure for any agency shall not be altered without advance approval of the Committees.

TITLE I—DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

The conference agreement provides \$860,791,000 for management of lands and resources instead of \$845,783,000 as proposed by the House and \$867,045,000 as proposed by the Senate.

Land Resources.—Changes to the House level for land resources include an increase of \$1,000,000 for the National Center for Invasive Plant Management, and decreases of \$100,000 for Santa Ana River land management, \$156,000 for Wyoming soil surveys, which is addressed under realty and ownership management, and \$250,000 for Santa Ana River conservation efforts.

The managers encourage the Bureau to work with the Bighorn Institute to conserve and recover the peninsular desert bighorn sheep.

The managers are aware of the Salt Cedar Task Force's work in northeast Montana and encourage the Bureau to explore methods of partnering with the task force on control and eradication efforts surrounding Fort Peck Reservoir.

Within the funds provided for Santa Ana River conservation efforts, \$100,000 should be directed to the land management planning effort.

Recreation Management.—Changes to the House level for recreation management include an increase of \$1,000,000 for the undaunted stewardship program and a decrease of \$500,000 for Santa Rosa and San Jacinto National Monument management plans.

Energy and Minerals.—Changes to the House level for energy and minerals include an increase of \$1,000,000 for oil and gas management.

The managers do not include funding for the Utah Oil and Gas internet pilot program due to the Bureau's inability to perform the pilot at this time but encourage the Bureau to work to develop this capability.

Realty Ownership and Management.—Changes to the House level for realty ownership and management include increases of \$7,000,000 for Alaska conveyance, \$300,000 for GIS mapping in Utah, \$750,000 for recordable disclaimer applications in Alaska, \$160,000 for Wyoming soil surveys and \$950,000 for a cadastral survey in Montana.

Resource Protection and Maintenance.—Changes to the House level for resource protection and maintenance include a decrease of \$250,000 for California desert conservation plans.

The managers agree that law enforcement funds provided above the requested level should be used in National Landscape Conservation System lands in Montana, Colorado, California, and other NLCS lands not included in the Administration's requested increased above the enacted level.

Transportation and Facilities Maintenance.—Changes to the House level for transportation and facilities maintenance include increases of \$750,000 for capping oil wells in the National Petroleum Reserve Alaska and \$750,000 for Pacific Crest, Continental Divide and Iditarod trails.

Challenge Cost Share.—Changes to the House level for challenge cost share include an increase of \$2,604,000 for the traditional challenge cost share program.

The Administration's budget request included a proposal to eliminate the range improvement account and included \$3,000,000 in the cooperative conservation initiative and \$7,000,000 in the deferred maintenance program to fund the activities performed by the range improvement account. The managers have restored the range improvement account, but direct the Bureau to focus no less than \$4,000,000 from the deferred maintenance program to the range improvement activities suggested in the budget justification. Furthermore, the Bureau is expected to focus at least \$3,000,000 of challenge cost share activities on range activities including sagebrush restoration and invasive weed control.

Bill Language.—The conference agreement retains language included in the Senate bill that earmarks \$1,250,000 for the Youth

Conservation Corps program. The House bill recommended \$1,000,000 for this purpose.

WILDLAND FIRE MANAGEMENT

(INCLUDING TRANSFER OF FUNDS)

The conference agreement provides \$766,564,000 for wildland fire management as proposed by the Senate instead of \$761,564,000 as proposed by the House.

State and Local Fire Assistance.—The change to the House level for State and local fire assistance is an increase of \$5,000,000.

The managers agree that funding for the National Center for Landscape Fire Analysis shall remain at or above the fiscal year 2005 enacted level.

Changes to the House level for construction include increases of \$1,500,000 for the Sand Hollow Recreation MOU with the State of Utah, which completes the project, \$450,000 for the Paiute Meadows Trail project, and a decrease of \$1,500,000 for general construction projects.

LAND ACQUISITION

The conference agreement provides \$8,750,000 for land acquisition instead of \$3,817,000 as proposed by the House and \$12,250,000 as proposed by the Senate.

UNITED STATES FISH AND WILDLIFE SERVICE

RESOURCE MANAGEMENT

The conference agreement provides \$1,008,880,000 for resource management instead of \$1,005,225,000 as proposed by the House and \$993,485,000 as proposed by the Senate. Changes to the House recommended level are described below.

Ecological Services.—In Endangered Species Act recovery programs, there are decreases of \$298,000 for wolf recovery and \$150,000 for the Northern aplomado falcon and increases of \$1,114,000 for the Yellowstone grizzly bear conservation strategy, \$500,000 for Lahontan cutthroat trout, \$1,000,000 for the Penobscot River restoration project, \$1,000,000 for Atlantic salmon recovery activities managed through the National Fish and Wildlife Foundation, \$1,200,000 for eider and sea otter recovery at the Alaska SeaLife Center, and \$350,000 for White Sulphur Springs NFH, WV, mussel recovery.

In habitat conservation, increases for the partners for fish and wildlife program include \$1,000,000 for Seattle, WA, shoreline restoration for salmon habitat, \$700,000 for Big Hole watershed restoration in Montana, \$500,000 for the Montana Water Center wild fish habitat initiative, \$1,250,000 for the Nevada biodiversity research and conservation project, \$100,000 for Bald eagle restoration with the Vermont Natural Heritage Partners program, \$540,000 for conservation work at Don Edwards NWR, CA, \$1,000,000 for the wildlife enterprises program at Mississippi State University, \$150,000 for the Thunder Basin initiative in Wyoming, \$100,000 for invasive species control by the Friends of Lake Sakakawea, \$550,000 for endangered bird conservation in Hawaii, \$500,000 for geographic information system mapping of NWRs in Alaska, and \$425,000 for the study of declining wildlife populations on Lake Umbagog NWR with the New Hampshire Audubon Society. These increases are offset by a decrease of \$100,000 for a study of Colorado River flow and aquatic habitats (Blue sucker) from Longhorn Dam to Matagorda Bay and a \$9,000,000 reduction to the general program increase proposed in the budget request.

In coastal programs, there is an increase of \$200,000 in support of the proposed general program expansion.

Refuges and Wildlife.—In refuge operations/refuge visitor services, there is a decrease of \$1,000,000 for visitor facility enhancements. The managers note that \$5,000,000 is provided in the construction account for visitor contact facilities.

In migratory bird management, there are increases in conservation and monitoring of \$375,000 for focal species management, \$100,000 for survey and monitoring, and \$100,000 for population and habitat assessment. In the joint ventures program, there is an increase of \$100,000 in national administration for a program assessment of existing joint ventures and an increase of \$400,000 to initiate the Central Hardwoods and the Northern Great Plains joint ventures.

In law enforcement operations, there is a decrease of \$100,000 for vehicle replacement.

Fisheries.—In the fisheries program, there are increases in hatchery operations of \$600,000 for hatchery operations, \$1,400,000 for whirling disease and related fish health issues, and \$500,000 for the wildlife health center in Montana. In hatchery maintenance, there is a decrease of \$1,500,000 for whirling disease; funds for this program have been moved to hatchery operations. In fish and wildlife management, there are decreases of \$750,000 for the national fish habitat initiative and \$350,000 for Yukon River Salmon Treaty implementation and an increase of \$102,000 for aquatic nuisance species control.

General Administration.—In general operations, increases include \$250,000 for National Conservation Training Center operations and \$397,000 for NCTC maintenance. In international programs, increases include \$300,000 for the Caddo Lake Ramsar Center in Texas and \$100,000 for the wildlife without borders Africa program.

Bill Language.—Language is included earmarking \$2,500,000 for the Youth Conservation Corps as proposed by the Senate instead of \$2,000,000 as proposed by the House.

The managers agree to the following:

1. The funds provided for wolf recovery include \$350,000 for the Nez Perce Tribe, \$730,000 for the Idaho Office of Species Conservation, \$100,000 for the Service's Snake River Basin Office pursuant to a memorandum of agreement between the Nez Perce Tribe and the State of Idaho, and \$320,000 for wolf monitoring and related activities by the State of Montana.

2. The \$1,000,000 provided in the ESA recovery program for the Penobscot River restoration project represents the first time funding has been provided in the Service's budget. Funds were provided for the project by the National Oceanic and Atmospheric Administration last fiscal year; additional funds are anticipated through the Army Corps of Engineers and NOAA in fiscal year 2006; and the State of Maine along with private groups are also expected to provide funds for removing dams on the Penobscot River. The managers will carefully analyze any future requests for funding from the Fish and Wildlife Service budget for this project with the expectation that the aforementioned other entities will be the primary contributors to the project.

3. The Peregrine Fund is funded at \$550,000 in fiscal year 2006, which includes \$150,000 for Northern aplomado falcon recovery activities.

4. The funding provided in the partners for fish and wildlife program for a study of declining wildlife populations on Lake Umbagog NWR in cooperation with the New Hampshire Audubon Society, will complete this project.

5. The managers are concerned that for the past two years the white pelican population at Chase Lake NWR, ND, has experienced unexplained disturbances. In 2004, nearly 30,000 pelicans abandoned the colony and in 2005, inspections revealed only about 500 live chicks out of a potential summer hatch of 9,000. The managers are aware that the Service is working to determine the scope of these problems and expects the Service to report to the House and Senate Committees on Appropriations no later than October 1, 2005, on what it believes is the cause of the 2004 abandonment and the 2005 deaths and what steps it believes are necessary to reverse this trend.

6. The managers are aware that the Service is currently working on the Comprehensive Conservation Plan for Vieques NWR in Puerto Rico. In an effort to keep the House and Senate Committees on Appropriations informed on the progress and scope of the CCP, the Service should report to the Committees by January 1, 2006, on plan development and on environmental cleanup efforts currently being conducted on Vieques NWR, the expected cost of the cleanup, if known, and the methods being used to dispose of ordinance.

7. The managers continue to be concerned about the Service's share of the cost of airport operations at Midway Atoll NWR. The managers also are concerned about the unresolved issues surrounding a new contract for airport operations and funding by the Federal Aviation Administration. The managers understand that FAA will cover the costs associated with the airfield in fiscal year 2006 and beyond and that the Service will pay an appropriate share of the indirect costs in addition to paying ongoing refuge operations costs. The total cost to the Service for all operations at Midway is expected to be \$4.3 million in fiscal year 2006. The managers note that the airport is not needed for refuge operations and the managers will not agree to a reprogramming for additional funds for airport-related expenses in fiscal year 2006 unless there is a compelling, unanticipated, emergency requirement. Further, to the extent the new airport contract results in savings, the Service should share in those savings. The House and Senate Committees on Appropriations should be notified when the contract is awarded.

8. No additional funding is provided for existing joint ventures in fiscal year 2006. The \$100,000 provided in the migratory bird management program for national administration of joint venture activities is for a program assessment of the existing joint venture programs. To the extent that future funding increases are requested for joint ventures, the funding should be based on the results of the program assessment. Likewise, if the assessment determines that certain joint ventures are not yielding desired results, the managers believe the Service should consider decreased funding for those projects in future budget requests.

9. The \$1,400,000 provided for whirling disease research includes \$1,000,000 for the National Partnership on the Management of Wild and Native Coldwater Fisheries and \$400,000 for the Whirling Disease Foundation.

10. Funding for whirling disease research and related fish health issues and for the wildlife health center in Montana is provided in the hatchery operations budget. The Service should reprogram any other base budget funds for these activities in fiscal year 2006 to the hatchery operations budget and should budget for these activities in hatchery operations in future budget requests.

11. An increase of \$1,000,000 is provided for continued development of the National Fish Habitat Initiative. Distribution of these funds should follow the direction in House Report 109–80.

12. The fisheries program should continue to keep the House and Senate Committees on Appropriations apprised of its efforts to address base budget erosion and inequities in field station funding, including consideration of reimbursable funding.

13. The funds provided for the Caddo Lake Ramsar Center in Texas are for conservation and education programs directly related to Caddo Lake and may not be used for infrastructure, construction-related projects, legal or management fees, or any other purposes. The Center should work cooperatively with Texas A&M University on preparing a program of work for fiscal year 2006.

The conference agreement provides \$73,250,000 for the historic preservation fund instead of \$72,705,000 as proposed by the House and \$74,500,000 as proposed by the Senate.

Changes to the House level include increases of \$250,000 for States and Territories and \$795,000 for Indian tribes. Decreases to the House level include \$500,000 for historically black colleges and universities.

The conference agreement includes a total of \$30,000,000 for Save America's Treasures. Of this amount, \$13,250,000 is for competitive grants, of which \$5,000,000 is provided for Preserve America grants, and the balance of the funds are to be distributed as follows:

| Use of prior year unobligated balances | -17,000,000 |
| Total | 301,291,000 |

The funds provided for general management planning should be expended consistent with project directives in both the House and Senate reports.

Funds provided for Big Bend NP (curatorial facility), Grand Portage NM (heritage center), Homestead NM (visitor center), Little Rock Central High School NHS (visitor center), Wolf Trap (main gate facility) and Yellowstone NP (Old Faithful visitor center) are intended to complete these projects.

Funds provided for the Flight 93 National Memorial may not be used for land acquisition. The Service is strongly encouraged to reduce dramatically the amount of land required for this project.

The managers expect the National Park Service and the legislated partners for the Dayton Aviation Heritage National Historical Park to collaborate in the development of a priority list of requirements needed to fulfill the authorized mission of the park. Such a list should give consideration to both the recurring and non-recurring needs of the park, and should serve as a framework for guiding decisions about the most important investments needed to further the park's purpose. The managers recognize that the National Aviation Heritage Area may have a separate set of priorities, but the priorities for the park and heritage area should complement one another.

The managers direct the National Park Service to explore viable ways to encourage the sale, by concessioners or via lease agreements (in accordance with real property leasing authority, 36 CFR Part 17), of authentic American made souvenirs, which reflect, educate, and celebrate the unique history, spirit, culture, and natural treasures of the designated region and individual park, either through existing concessioner retail operations or other appropriate agreements. The managers expect a written report detailing progress made by December 1, 2006.

The managers encourage the Secretary to give priority consideration for funding in the next round of Southern Nevada Public Lands Management Act project approvals to the water and wastewater system improvements that were proposed in the fiscal year 2006 budget request for Lake Mead National Recreation Area. The managers are aware that nearly \$1 billion in revenues will be available in fiscal year 2006. Of that amount, the Secretary of the Interior controls 85 percent. Projects such as these should be funded from this source and not requested in the budget.

The managers understand that private funds already raised toward replacement visitor facilities at the U.S.S. Arizona Memorial are available for planning and design of the new facility. The National Park Service is nearing completion of its review of this partnership construction project, and is encouraged to complete the review and advance the project to the next stage as expeditiously as possible. Before final approval, the Director of the National Park Service should forward to the House and Senate Committees on Appropriations the details of the financing of this project. The managers understand that the present facility is undersized for the visitation to this park site, and that a new facility is needed to address functional and structural requirements.

Bill language.—The conference agreement provides \$400,000 for the Mark Twain Boyhood Home NHL to be derived from the

Historic Preservation Fund. The agreement also includes language proposed by the Senate permitting a solicitation that includes the full scope of the contract for the Jackson Visitor Center replacement and rehabilitation of the Paradise Inn and Annex at Mount Rainier NP.

The managers have included \$25,000,000 for the purpose of implementing the Modified Water Deliveries to Everglades National Park project which will allow the Army Corps of Engineers to continue this important restoration project so as to restore more natural water flows to the park. The \$25,000,000 is subject to the reporting requirements of P.L. 108–108 and the availability of the funds is contingent upon the appropriation and full availability of funds appropriated to the Army Corps of Engineers for the purpose of implementing the project, including the development of detailed design documents for a bridge or series of bridges for Tamiami Trail that will allow for restored water flows between the water conservation areas and Everglades National Park.

LAND AND WATER CONSERVATION FUND

(RESCISSION)

The conference agreement rescinds the contract authority provided for fiscal year 2006 by 16 U.S.C. 4601–10a as proposed by both the House and the Senate.

LAND ACQUISITION AND STATE ASSISTANCE

The conference agreement provides \$64,909,000 for land acquisition and State assistance instead of \$9,421,000 as proposed by the House and \$86,005,000 as proposed by the Senate.

The managers agree to the following distribution of funds:

| <i>Area (State)</i> | <i>Amount</i> |
|---|---------------|
| Big Thicket National Preserve (TX) | \$2,000,000 |
| Chickamauga-Chattanooga NMP (TN) | 1,800,000 |
| Civil War Battlefield Sites (Grants) | 3,000,000 |
| Gauley River NRA (WV) | 500,000 |
| Golden Gate NRA (CA) | 525,000 |
| Haleakala NP (HI) | 3,700,000 |
| Harpers Ferry NHP (WV) | 2,000,000 |
| Ice Age NST (WI) | 1,000,000 |
| Lewis and Clark NHP (OR/WA) | 1,600,000 |

| Wilson's Creek NB (MO) | 1,200,000 |
| Wrangell-St. Elias NP & P (AK) | 750,000 |
| Subtotal | 30,075,000 |
| Emergencies and Hardships | 2,500,000 |
| Acquisition Management | 9,749,000 |
| Inholdings | 2,500,000 |
| Use of Prior Year Balances | –9,915,000 |
| Stateside Grants | 28,413,000 |
| Stateside Administration | 1,587,000 |
| Total | 64,909,000 |

Bill Language.—The conference agreement includes language proposed by the Senate, providing that none of the funds provided

for the State assistance program may be used to establish a contingency fund.

The conference agreement rescinds \$9,915,000 in prior year funds from the Cat Island project at Gulf Islands National Seashore, as proposed by the House.

The managers agree that the heroic efforts by the passengers of Flight 93 should be remembered with a lasting memorial. Although no funds are provided for land acquisition, \$1,000,000 is included in the construction account for planning activities.

The managers have revised the reprogramming guidelines to specify that the reprogramming requirement for acquisitions in excess of appraised values does not apply to the National Park Service for condemnations, declarations of taking, and tracts with an appraised value of \$500,000 or less. The revised reprogramming guidelines are contained in the front of the statement of the managers in this report.

ADMINISTRATIVE PROVISIONS

The conference agreement does not include the longstanding proviso providing that none of the funds may be used to process any grant or contract documents which do not include the text of 18 U.S.C. 1913.

UNITED STATES GEOLOGICAL SURVEY

SURVEYS, INVESTIGATIONS, AND RESEARCH

The conference agreement provides \$976,035,000 for surveys, investigations, and research instead of \$974,586,000 as proposed by the House and \$963,057,000 as proposed by the Senate.

Mapping, Remote Sensing and Geographic Investigations.—The change to the House level for mapping, remote sensing and geographic investigations is a decrease of \$2,000,000 for the Landsat program.

The managers direct the Survey to offset the decrease with reductions in travel, administrative streamlining and buyout savings throughout the Bureau.

Geologic Hazards, Resources and Processes. Changes to the House level for geologic hazards, resources and processes include increases of \$500,000 for Alaska gas hydrates, and decreases of \$648,000 for Florida shelf research, \$412,000 for Puget Sound and \$1,134,000 for Alaska mineral assessments.

The managers strongly disagree with the Administration's proposed reductions to the minerals assessment program and believe it is irresponsible for the Administration to decrease or eliminate funding for what is clearly an inherently Federal responsibility. The conference agreement restores funding for this vital program to the enacted level.

Water Resources Investigations.—Changes to the House level for water resources investigations include increases of \$500,000 for the Memphis aquifer study, \$230,000 for the Ozark aquifer study, \$1,250,000 to continue Tar Creek remediation with the University of Oklahoma, \$900,000 for coalbed methane research on the Tongue River, \$450,000 for water monitoring in Hawaii, \$295,000

for Lake Champlain monitoring and a decrease of \$450,000 for the San Pedro partnership.

The managers are concerned by continuing reports that suggest the Survey's water resources program is providing or seeking to provide a variety of commercial services to Federal and non-Federal entities in direct competition with the private sector. The managers have previously encouraged the Survey to use the services of the private sector in the conduct of its activities wherever feasible, cost effective, and consistent with the quality standards and principles pertaining to the effective performance of governmental functions. The managers expect that the Survey should strive to implement such a policy to the best of its ability in the performance of its work.

The managers agree that if the San Francisco South Bay salt ponds project is a priority for the Survey, additional funding should be requested in future budgets.

The managers agree to continue the Lake Champlain monitoring and research assessment activities and have included increased funding of \$295,000 to restore the program to the enacted level. Future budget requests should include sufficient funds for these operations.

The managers agree that the Survey's participation in the Long Term Estuary Assessment program should be continued at the current year enacted level.

Biological Research.—Changes to the House level for biological research include increases of \$100,000 for the invasive species initiative, \$350,000 to complete the Mark Twain National Forest mining study, \$800,000 for molecular biology research at the Leetown Science Center, \$200,000 for the multidisciplinary water study at Leetown Science Center, \$350,000 for pallid sturgeon research, \$200,000 for the diamondback terrapin study, \$400,000 to complete the Northern Continental Divide Ecosystem study in Montana, \$55,000 to restore the base funding for Cooperative Research Units, \$400,000 for remote survey and monitoring equipment for the ivory-billed woodpecker in Arkansas, \$200,000 for the University of Missouri-Columbia to establish a wetland ecology center for excellence, and decreases of \$150,000 for a database of invasive species on national wildlife refuges and \$185,000 for equipment for the Anadromous Fish Research Center.

The managers have included a portion of the requested funding increase for the invasive species initiative and direct the Survey to fund the leafy spurge eradication program proposed in the request.

The managers have included funding for ivory-billed woodpecker survey efforts in Arkansas. The funding should be used in collaboration with Cornell University's Laboratory of Ornithology and the U.S. Fish and Wildlife Service to conduct aerial and ground surveys using remote video and acoustic technologies.

The managers understand funding provided to the University of Missouri-Columbia for the establishment of a wetland ecology center of excellence should be used for one-time start-up costs and this funding will not be included in future appropriations.

The managers remain concerned about the National Biological Information Infrastructure program. No clearly coordinated budgetary and programmatic plan has emerged for its expansion, and

the managers remain concerned about the reason an Internet-based program that hosts biological information must be geographically distributed.

The managers understand that the multidisciplinary water study at Leetown Science Center is nearing completion. The Survey should provide a brief report to the House and Senate Committees on Appropriations by December 31, 2005, evaluating the research that has been conducted to date and outlining what, if any, issues remain to be addressed in order to finish the project.

Science Support.—The change to the House level for science support is a decrease of \$2,000,000 for the Landsat program.

The managers direct the Survey to offset the decrease with reductions in travel, administrative streamlining and buyout savings throughout the Bureau.

Bill Language.—The conference agreement modifies language included in both the House and Senate bills allowing the Survey to publish and disseminate data.

ADMINISTRATIVE PROVISIONS

The conference agreement includes language proposed by the Senate that contained minor technical differences from the House.

MINERALS MANAGEMENT SERVICE

ROYALTY AND OFFSHORE MINERALS MANAGEMENT

The conference agreement provides \$153,651,000 for royalty and offshore minerals management instead of \$152,676,000 as proposed by the House and \$152,516,000 as proposed by the Senate. The managers agree to the following changes to the House recommendations:

1. The leasing and environmental program includes an earmark of \$150,000 within available funds for the Alaska Whaling Commission as proposed by the Senate and there is a decrease of \$175,000 for fixed costs.
2. Resource evaluation includes an increase of \$900,000 for the Center for Marine Resources, MS as proposed by the Senate and a decrease of \$100,000 for fixed costs.
3. The regulatory program has a decrease of \$200,000 for fixed costs.
4. The information management program has a decrease of \$200,000 for fixed costs.
5. Royalty management includes an increase of \$1,000,000 for the State and tribal audit program.
6. General administration includes fixed cost decreases of \$250,000 for administrative operations and \$150,000 for general support services.
7. The Department is undertaking a study of the impacts of the merger of the GovWorks program into the National Business Center. This study will also include an assessment of the impact that this organizational realignment will have on MMS's ability to carry out its mission. The managers understand that an initial organizational transfer will commence at the beginning of the fiscal year, but before the final commencement of the restructuring, the managers expect to receive a report on the impacts of the merger.

OIL SPILL RESEARCH

The conference agreement provides \$7,006,000 for oil spill research as proposed by both the House and the Senate.

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT
REGULATION AND TECHNOLOGY

The conference agreement provides \$110,535,000 for regulation and technology as proposed by both the House and the Senate. This total includes an indefinite appropriation estimated to be \$100,000.

ABANDONED MINE RECLAMATION FUND

The conference agreement provides \$188,014,000 for the abandoned mine reclamation fund as proposed by both the House and the Senate. The managers note that bill language within Title I, general provisions, provides an extension until June 30, 2006, of the Secretary's authority to collect fees pursuant to the Surface Mining Control and Reclamation Act. The conference agreement includes the bill language proposed by the House which provides for a one-time transfer of the balance in the fund for the rural abandoned mine program, which has not been used for 10 years, to the Federal share fund, so the funds could be used in the future for emergencies and other Federal obligations. The conference agreement also includes the bill language recommended by the Senate concerning special grant authorities for Maryland's acid mine abatement program.

BUREAU OF INDIAN AFFAIRS

OPERATION OF INDIAN PROGRAMS

The conference agreement provides \$1,991,490,000 for the operation of Indian programs instead of \$1,992,737,000 as proposed by the House and \$1,971,132,000 as proposed by the Senate.

The managers agree that an alternative budget structure for the operation of Indian programs would provide greater opportunity for reviewing funding levels and assessing performance on a programmatic level. The managers are concerned that there was inadequate consultation with Tribes when preparing this new budget structure. The Bureau should follow previous guidance given in the House and Senate reports on this issue.

Tribal Priority Allocations.—The change to the House level for tribal priority allocations is a decrease of \$750,000 for the Indian Child Welfare Act.

Other Recurring Programs.—Changes to the House level for other recurring programs include increases of \$12,500,000 for tribally controlled community colleges, \$500,000 for technical assistance for tribally controlled community colleges, \$210,000 for fish hatchery maintenance, \$98,000 for the Alaska Sea Otter Commission, \$450,000 for the Bering Sea Fishermen's Association, \$300,000 for the Chugach Regional Resources Commission, \$350,000 for Lake Roosevelt management, and decreases of \$12,000,000 for ISEP formula funding, \$1,500,000 for student transportation, \$200,000 for irrigation operations and maintenance,

\$1,000,000 for the Washington State Fish and Wildlife program and \$1,250,000 for the Chippewa Ottawa Resource Authority.

The managers have included funding in the ISEP program and direct this increase to the Bureau's FOCUS program for assisting at-risk children, encouraging more parental participation in schools, and encouraging participation in after-school activities.

The managers are aware that the Department is examining how to strengthen management of education programs and would consider a reprogramming from education program adjustments to support education management.

The managers have retained the increases provided in both the House and Senate bills for the Intertribal Bison Cooperative.

Non-recurring Programs.—Changes to the House level for non-recurring programs include increases of \$500,000 for the Rocky Mountain Patient Advocate program, \$750,000 for the rural Alaska fire program, \$1,500,000 for the Salish and Kootenai College information technology program, \$1,500,000 for water management planning, \$400,000 for Alaska legal services, and a decrease of \$970,000 for the endangered species program.

The managers expect funding provided for the Rocky Mountain Patient Advocate Program to be the last installment from this account. The program is expected to seek other methods of funding to become a self-sufficient, long term, advocacy program for Native Americans seeking health care.

The managers agree that within the water management and planning program, \$200,000 is for the operation, maintenance, and repair of the Fort Peck Reservation tribal water system.

Special Programs and Pooled Overhead.—Changes to the House level for special programs and pooled overhead include increases of \$49,000 for the United Tribes Technical College, \$450,000 for the United Sioux Tribes Development Corporation, \$1,250,000 for the Western Heritage Center tribal history and education project, \$100,000 for the Rocky Mountain Tribal education symposia, \$74,000 for the Crownpoint Institute and decreases of \$4,500,000 for public safety and justice law enforcement and \$58,000 for the National Ironworkers Training program.

The managers believe that the United Tribes Technical College and Crownpoint Institute are institutions of higher learning that provide an educational benefit to Indian country and should be included in future budget requests.

Bill Language.—The conference agreement includes language proposed by the Senate that continues to allow the use of contract support funds for indirect contract support costs. The House included language that allowed the use of contract support funds for both direct and indirect costs.

The managers believe that any change to the allocation of contract support costs must be done formally with tribal consultation and any funding for direct contract support costs should be above the current levels provided for indirect contract support costs.

CONSTRUCTION

The conference agreement provides \$275,637,000 for construction instead of \$284,137,000 as proposed by the House and \$267,137,000 as proposed by the Senate. Changes to the House

level include an increase of \$7,500,000 for irrigation projects and decreases of \$10,000,000 for replacement school construction, \$1,000,000 for employee housing, and \$5,000,000 for facilities improvement and repair.

The addition of \$7,500,000 in non-reimbursable construction funds for Indian irrigation rehabilitation is separate from the Navajo Indian Irrigation Project, which retains its own construction budget of \$12,773,000. Within the funds provided for Indian irrigation rehabilitation, a number of Bureau and tribal projects are in desperate need of immediate attention to continue delivering water to users. The Bureau is expected to consult with the House and Senate Committees on Appropriations, in the form of a detailed proposal, prior to obligating funds. The Bureau is expected to administer these funds from the central office program level to address projects with the greatest need of rehabilitation. Construction of new projects or expansion of existing projects is secondary to the rehabilitation, reconstruction, and necessary upgrade of current irrigation projects and systems. Specific projects to be addressed under these guidelines, and to be addressed in the Bureau's proposal for the obligation of these funds are: the Fort Yates Unit of the Standing Rock Sioux Project, the Blackfeet Irrigation Project, the Crow Irrigation Project, the Fort Belknap Irrigation Project, the Fort Peck Irrigation Project, and the Wind River Irrigation Project.

indian land and water claim settlements and miscellaneous

PAYMENTS TO INDIANS

The conference agreement provides \$34,754,000 for Indian land and water claim settlements and miscellaneous payments to Indians as proposed by the House instead of \$24,754,000 as proposed by the Senate.

The managers have agreed to \$10,000,000 for the Quinault Indian Nation settlement and retained bill language included in the House that authorized the payment. The managers understand that this is the final payment for this settlement.

INDIAN GUARANTEED LOAN PROGRAM ACCOUNT

The conference agreement provides \$6,348,000 for the Indian guaranteed loan program as proposed by both the House and the Senate.

DEPARTMENTAL OFFICES

INSULAR AFFAIRS

ASSISTANCE TO TERRITORIES

The conference agreement provides \$76,883,000 for assistance to territories instead of \$76,563,000 as proposed by the House and \$76,683,000 as proposed by the Senate. Changes in funding levels from the House recommendation include the Senate recommendation for an additional \$320,000 to continue judicial, court education, and court administration training.

COMPACT OF FREE ASSOCIATION

The conference agreement provides \$5,362,000 for the compact of free association as proposed by the House instead of \$4,862,000 as proposed by the Senate. The conference agreement follows the funding recommendations made by the House.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

The conference agreement provides \$127,183,000 for departmental management instead of \$97,755,000 as proposed by the House and \$104,627,000 as proposed by the Senate. The changes described below are to the House recommended funding level.

Management and Coordination.—Performance data contracting/financial management is reduced by \$250,000.

Central Services.—IT certification and accreditation is reduced by \$322,000.

Financial and Business Management System.—The conference agreement reduces the Financial and Business Management System by \$1,000,000.

Other Items.—The conference agreement restores \$21,000,000 for necessary expenses for management of the Department of the Interior.

Bill Language.—The conference agreement retains language proposed by the Senate deriving \$7,441,000 from the Land and Water Conservation Fund for consolidated land acquisition appraisal services, and prohibiting the use of funds in this Act or previous appropriations Acts to establish reserves in the Working Capital Fund other than for accrued annual leave and depreciation of equipment without prior House and Senate Committee approval.

PAYMENTS IN LIEU OF TAXES

The conference agreement provides \$236,000,000 for payments in lieu of taxes instead of \$242,000,000 as proposed by the House and \$235,000,000 as proposed by the Senate.

CENTRAL HAZARDOUS MATERIALS FUND

The conference agreement provides \$9,855,000 for the central hazardous materials fund as proposed by the House and the Senate.

The conference agreement includes language included in the Senate bill that makes provisions for this account permanent. The House did not include permanent language.

OFFICE OF THE SOLICITOR

SALARIES AND EXPENSES

The conference agreement provides \$55,440,000 for the office of the solicitor instead of \$55,340,000 as proposed by the House and \$55,652,000 as proposed by the Senate. The change described below is to the House recommended funding level.

Audits.—Funding for FISMA/audit capability is decreased by \$300,000.

Investigations.—Funding for additional audit staff is decreased by \$150,000.

OFFICE OF SPECIAL TRUSTEE FOR AMERICAN INDIANS

FEDERAL TRUST PROGRAMS

The conference agreement provides \$191,593,000 for Federal trust programs as proposed by both the House and the Senate. The managers have retained language contained in the House bill that caps the total amount of funding that can be used for historical accounting activities at \$58,000,000.

The managers are closely following efforts to settle the long-standing Cobell v. Norton case and reiterate their position that any settlement to the case must be implemented in such a way that the programs in this bill are not adversely affected. The House and Senate Committees on Appropriations will not consider any settlement that decreases available funding for programs in Indian country funded in this bill. Further, the managers disagree with the continued insistence by the court that the Department of the Interior, to fulfill the intent of Congress, must perform a full historical accounting. This results in the Department of the Interior being forced to divert resources and negatively impacts programs in Indian country.

INDIAN LAND CONSOLIDATION

The conference agreement provides \$34,514,000 for Indian land consolidation programs as proposed by both the House and the Senate.

NATURAL RESOURCE DAMAGE ASSESSMENT AND RESTORATION

NATURAL RESOURCE DAMAGE ASSESSMENT FUND

The conference agreement provides \$6,106,000 for the natural resource damage assessment fund as proposed by both the House and the Senate.

The managers agree to the following:

1. A total of \$5,000,000 is provided for the clean diesel initiative as described in House Report 109–80.

2. Within stratospheric ozone domestic programs, the Sunwise program should be continued at the fiscal year 2005 funding level.

OFFICE OF INSPECTOR GENERAL

The conference agreement provides \$37,455,000 for the Office of Inspector General instead of \$37,955,000 as proposed by the House and \$36,955,000 as proposed by the Senate.

BUILDINGS AND FACILITIES

The conference agreement provides \$40,218,000 for buildings and facilities as proposed by both the House and the Senate.

HAZARDOUS SUBSTANCE SUPERFUND

(INCLUDING TRANSFERS OF FUNDS)

The conference agreement provides \$1,260,621,000 for hazardous substance superfund instead of \$1,258,333,000 as proposed by the House and \$1,256,165,000 as proposed by the Senate. Changes to the House recommended level are detailed below.

for Superfund instead of \$1,258,333,000 as proposed by the House and \$1,256,165,000 as proposed by the Senate.

The managers are concerned that EPA has not yet issued a Record of Decision (ROD) for Libby, Montana, despite years of cleanup efforts. The managers direct the Agency to issue its Record of Decision for Libby, Montana no later than May 1, 2006. EPA should also provide a report on the contents of the ROD to both the House and Senate Committees on Appropriations no later than June 15, 2006. The managers are disappointed that the Agency could not meet an earlier deadline, originally proposed by the Senate, and expect periodic updates on the progress of completion of the ROD for Libby, Montana.

The House proposed a study by the National Academy of Sciences of Superfund mega sites that involve dredging. Upon further reflection, the managers believe that the appropriate role for the NAS is to act as an independent peer review body that will conduct an objective evaluation of some of the ongoing dredging projects underway at Superfund mega sites. By undertaking such an evaluation, the Academy can serve as an objective voice on this issue. The manager expect that the evaluation will be initiated by December 1, 2005, and finished as soon as possible, but no later than one year after the Academy begins work. In addition, the managers insist that any such evaluation by the Academy should not delay in any way the progress of the Hudson River PCB dredging project or any other Superfund dredging project.

(INCLUDING RESCISSIONS OF FUNDS)

The conference agreement provides \$3,261,696,000 for State and Tribal assistance grants and a rescission of \$80,000,000 from expired grants, contracts, and interagency agreements, instead of \$3,227,800,000 and a rescission of \$100,000,000 as proposed by the House and \$3,453,550,000 and a rescission of \$58,000,000 as proposed by the Senate. The rescission is to be taken from expired grants, contracts, and interagency agreements in the various EPA accounts and is not exclusive to this account. Changes to the House recommended level are detailed below.

Air Toxics and Quality.—In air toxics and quality programs, there is a decrease of \$3,000,000 for the clean school bus initiative.

Brownfields.—There is a decrease of \$7,500,000 for brownfields projects.

Categorical Grants.—In categorical grants, there are increases of \$1,000,000 for section 106 pollution control grants, \$1,856,000 for targeted watershed grants, and \$1,200,000 for wastewater operator training, and decreases of \$934,000 for hazardous waste financial assistance, \$1,772,000 for section 319 nonpoint source grants, \$5,500,000 for section 106 water quality monitoring grants, \$854,000 for public water system supervision, \$600,000 for radon, \$15,000,000 for water quality cooperative agreements, and \$1,000,000 for wetlands program development.

Rescission.—The conference agreement modifies rescission language proposed by the House and the Senate and rescinds \$80,000,000 from expired grants, contracts and interagency agreements instead of a rescission of \$100,000,000 as proposed by the House and a rescission of \$58,000,000 as proposed by the Senate. Although this language appears under the State and Tribal Assistance Grants heading, it applies to all EPA appropriation accounts. The conference agreement does not direct the rescinded funds to the clean water State revolving fund as proposed by the House nor does the language reference an April 2005 review by the Government Accountability Office as proposed by the House.

Other Bill Language.—Language is included making permanent the prohibition, proposed by the Senate, on the use of funds from the drinking water State revolving fund for health effects studies on drinking water contaminants. The managers note these studies are, and should continue to be, funded under the science and technology account.

Language is included, as proposed by the Senate, providing direction on the distribution of funds to address drinking water and wastewater infrastructure needs of Alaska Native villages.

Language proposed by the House referencing special project grants is included with a technical modification.

There is no earmark for the Fortuna Radar Site as proposed by the Senate.

Language is included making permanent the authority, proposed by the Senate, for States to transfer funds between the clean water and drinking water revolving funds.

Language is not included, which was proposed by the House, stipulating that special project funding from fiscal year 2000 or earlier that is not obligated on an approved grant by the end of fiscal year 2006 will be transferred to the appropriate State revolving fund. Instead, such funds that are not obligated on approved grants by September 1, 2006, are included in the rescission referenced above.

Language is not included, which was proposed by the House, providing for the transfer of excess funds after completion of spe-

cial project grants to the appropriate State revolving fund. Instead such funds are included in the rescission referenced above.

Language is not included, which was proposed by the House, transferring funds from projects that are determined to be ineligible for a grant to the appropriate State revolving fund. The managers expect EPA to keep the House and Senate Committees on Appropriations apprised of grants that are determined to be ineligible.

Language is included making permanent the authority, proposed by the House, for EPA to make technical corrections to special project grants. The Senate had similar language but used the phrase "notwithstanding any other provision of law"; whereas the House language and the language adopted in the conference agreement uses the phrase "notwithstanding this or previous appropriations Acts".

The conference agreement includes a minor technical correction to the school bus retrofit language.

The managers agree to the following:

1. Within the funds provided for the United States-Mexico border program, \$4,000,000 is for the El Paso Utilities Board and \$3,000,000 is for the City of Brownsville water supply project.
2. Within the categorical grant targeted watersheds program, \$6,000,000 is for a regional pilot program for the Chesapeake Bay as described in Senate Report 109-80.

ADMINISTRATIVE PROVISIONS

The conference agreement includes language proposed by the House regarding an exception to CERCLA relating to the qualifying date for brownfields grants or loans. The House had a single year provision. The Senate proposed to make this provision permanent.

Language is not included, which was proposed by the Senate, providing permanent authority for the use of brownfields grant funding for administrative expenses.

GENERAL PROVISIONS, ENVIRONMENTAL PROTECTION AGENCY

Section 201 modifies language, proposed by the Senate in sections 201 and 202 and by the House in section 434, dealing with human dosing studies. The managers note the many concerns expressed on both the House and Senate floors with respect to intentional human toxicity dosing studies relied upon by the EPA in reviewing applications for pesticide approvals. Concern is particularly acute for pregnant women, fetuses, and children. The managers believe this is a very serious issue that needs to be addressed by EPA as soon as possible. The managers have included statutory language that prohibits the EPA from accepting, considering, or relying on third party intentional dosing human toxicity studies for pesticides until EPA issues a final rulemaking addressing such studies. The language also requires EPA to provide for at least a 90-day public comment period on its proposed rule and to issue the final rule no later than 180 days after enactment of this Act. Such rule shall not permit the use of pregnant women, infants or children as subjects; shall be consistent with the principles proposed

in the 2004 report of the National Academy of Sciences on intentional human dosing and the principles of the Nuremberg Code with respect to human experimentation; and shall establish an independent Human Subjects Review Board.

Section 202 includes the text of Senate section 435 prohibiting the use of funds in contravention of Executive Order 12898 dealing with environmental justice. The House had a similar provision in section 432 of the House bill. The Senate provision that is included in the conference agreement includes a reference to the date of the Executive Order and to the Federal Register notice in which it was published.

Section 203 includes the text of House section 433 prohibiting the use of funds to finalize, issue, implement, or enforce the existing EPA wastewater blending policy.

Section 204 includes the text of Senate section 436 prohibiting the use of funds in contravention of 15 U.S.C. 2682(c)(3), dealing with lead-based paint, or to delay implementation of that provision of law.

Section 205 includes language, as proposed by the Senate under Administrative Provisions for the EPA, prohibiting the use of funds to publish proposed or final regulations relating to certain small engines required by section 428(b) of division G of Public Law 108–199 until the Administrator has completed and published a technical study of safety issues, including the risk of fire and burn to consumers.

FOREST AND RANGELAND RESEARCH

The conference agreement provides \$283,094,000 for forest and rangeland research instead of \$285,000,000 as proposed by the House and \$280,892,000 as proposed by the Senate. The forest inventory and analysis program is provided \$60,267,000 instead of \$62,100,000 recommended by the House and \$58,434,000 recommended by the Senate; this is an increase of \$4,341,000 above the fiscal year 2005 level. The managers agree to the following changes to recommendations that were proposed by the House:

The managers also agree to the following:

1. The funding provided for advanced wood structure research should be used for merit-based work by the Forest Products Laboratory and cooperators, including members of the advanced housing research consortium. This replaces recommendations made by both the House and the Senate.

2. The managers do not support the proposal to close the research work unit in Morgantown, WV and direct the Service to maintain funding near the fiscal year 2005 level for work unit RWU NE-4751.

3. The managers direct the Forest Service to continue working with the USDA Cooperative State Research, Education, and Extension Service to administer the program with the Joe Skeen Institute for Rangeland Restoration at Montana State University.

4. The Forest Service should ensure that all research facility managers understand how to comply fully with Congressional allocations in a timely manner.

5. The managers support efforts by the Forest Products Laboratory in Madison, Wisconsin, to prioritize its wood products research programs and urge the Forest Service to work with industry partners and research users to develop a comprehensive, agency-wide wood products research plan to guide future investment at the Laboratory.

STATE AND PRIVATE FORESTRY

The conference agreement provides \$283,577,000 for State and private forestry instead of \$254,875,000 as proposed by the House and \$254,615,000 as proposed by the Senate. Funding levels for this appropriation should follow the House recommendations unless otherwise instructed herein.

Forest Health Management.—The conference agreement provides \$54,236,000 for Federal lands forest health management instead of \$55,000,000 as proposed by the House and \$50,023,000 as proposed by the Senate. The conference agreement includes \$47,629,000 for cooperative lands forest health management instead of \$48,000,000 as proposed by the House and \$22,608,000 as proposed by the Senate. The change from the House recommendation is the addition of \$300,000 for the Vermont forest monitoring cooperative as proposed by the Senate, and a general reduction of \$671,000.

Cooperative Fire Assistance.—The conference agreement includes \$33,422,000 for State fire assistance instead of \$35,422,000 as proposed by the House and \$26,500,000 as proposed by the Senate. This allocation includes \$2,500,000 as proposed by the House

for urgent work near the San Bernardino National Forest, and a general program decrease of \$2,000,000 below the House level.

The conference agreement includes \$6,000,000 for volunteer fire assistance as proposed by both the House and the Senate. The conference agreement also includes additional funds for State fire and volunteer fire assistance as part of the national fire plan funding within the wildland fire management account.

Forest Stewardship.—The conference agreement includes \$34,699,000 for forest stewardship instead of \$37,399,000 as proposed by the House and \$32,320,000 as proposed by the Senate. Changes from the House recommendations include a general decrease of \$2,500,000 and a decrease of \$200,000 for land use decision models. Funding for this last project is included within the research account.

Forest Legacy Program.—The conference agreement includes \$57,380,000 for the forest legacy program instead of \$25,000,000 as proposed by the House and \$62,632,000 as proposed by the Senate. These funds are derived from the Land and Water Conservation Fund. The conference agreement includes the following distribution of funds for the forest legacy program:

NATIONAL FOREST SYSTEM

(INCLUDING TRANSFERS OF FUNDS)

The conference agreement provides \$1,424,348,000 for the national forest system instead of \$1,417,920,000 as proposed by the House and \$1,377,656,000 as proposed by the Senate.

Funds should be distributed as follows:

| | |
|--|---------------|
| Land management planning | \$59,057,000 |
| Inventory and monitoring | 170,179,000 |
| Recreation, heritage & wilderness | 265,200,000 |
| Wildlife & fish habitat management | 134,850,000 |
| Grazing management | 49,000,000 |
| Forest products | 284,297,000 |
| Vegetation & watershed management | 184,050,000 |
| Minerals and geology management | 85,865,000 |
| Landownership management | 93,000,000 |
| Law enforcement operations | 89,200,000 |
| Vales Calderas National Preserve, NM | 5,150,000 |
| Centennial of Service challenge | 4,500,000 |
| Total | 1,424,348,000 |

The following discussion describes funding changes from the House passed bill.

Land Management Planning.—The conference agreement provides funding as recommended by the House; funds are not provided for environmental training as recommended by the Senate.

Inventory and Monitoring.—The agreement includes the House recommendation, plus Senate recommendations of \$1,000,000 for the Stennis Space Center, MS, and \$170,000 for the Fernow experimental forest hydrology study, WV.

Recreation, Heritage, and Wilderness Management.—The conference agreement provides funding as recommended by the House.

Wildlife and Fish Habitat Management.—The conference agreement provides funding as recommended by the House plus an increase above the House level of \$50,000 for the Batten Kill river project, VT, bringing the total for this project to \$250,000. In addition, the managers direct the Forest Service to support the grizzly bear study in the Flathead NF and surrounding area with \$125,000 out of base funds to be used for tracking collars.

Grazing Management.—The conference agreement provides funding as recommended by the House. The managers replace the Senate recommendations concerning grazing management to encourage the Forest Service and the BLM to modify stocking levels in a manner consistent with the local range conditions, considering that there have been improvements in moisture conditions in some western States. The Service and the BLM should use credible range condition monitoring data from professional range conservationists employed by State or county governments or universities.

Forest Products.—The conference agreement provides funding as recommended by the House with the addition of \$1,000,000 above the House level for the Tongass NF, AK. The managers agree to the Senate proposed earmark in bill language of \$5,000,000 for Tongass national forest timber sales preparation.

The managers replace the Senate recommendations concerning performance management systems with instructions included under the administrative provisions heading to clarify that the performance management system needs to include all Forest Service officials and programs.

The managers modify the Senate recommendations concerning a stewardship contract in New Mexico. The Service is expected to develop and begin implementing by June 1, 2006, one or more large stewardship contracts that are at least 10,000 acres, to be on the Lincoln NF, NM. The Service should work with the Mescalero Apache Tribe and the New Mexico State Forester to assure the

stewardship contract is drafted so that lands on the Lincoln NF are treated, and the Service should work with this tribe to assist them at developing a stewardship proposal.

Vegetation and Watershed Management.—The conference agreement provides funding as recommended by the House with the addition of \$350,000 above the House level for the leafy spurge eradication program in North Dakota.

Minerals and Geology Management.—The conference agreement provides funding as recommended by the House.

Landownership Management.—The conference agreement provides funding as recommended by the House.

Law Enforcement operations.—The conference agreement decreases the House recommendation for the Daniel Boone NF anti-drug effort by \$100,000, leaving a total of \$900,000. Similar work on the Mark Twain NF is reduced by \$200,000, leaving a total of \$500,000. In addition, \$500,000 is provided for the Spring Mountains NRA, NV emergency warning system, and there is a general program decrease of \$2,000,000 below the House recommendation. The managers note that the Administrative provisions include bill language recommended by the House and the Senate concerning the transfer of funds for various overhead charges affecting the law enforcement operations activity.

Valles Caldera National Preserve.—The managers have put all funding for the Valles Caldera National Preserve, NM, in the national forest system account to facilitate management of this activity; this includes the \$3,650,000 the Senate recommended in this account plus an additional \$1,500,000 the Senate recommended in the capital improvement and maintenance account.

Other.—The conference agreement provides that the Land Between the Lakes NRA, TN and KY, should be funded from various accounts at least at the budget request level of \$8,400,000. The general reduction to the national forest system account passed on the House floor is not included.

WILDLAND FIRE MANAGEMENT

(INCLUDING TRANSFERS OF FUNDS)

The conference agreement provides \$1,779,395,000 for wildland fire management instead of \$1,790,506,000 as proposed by the House and \$1,745,531,000 as proposed by the Senate.

Wildfire Preparedness.—The agreement includes \$676,014,000 for preparedness as proposed by the Senate instead of \$691,014,000 as proposed by the House. The managers reiterate the direction contained in the House and Senate reports regarding the need to maintain the level of fire readiness established in fiscal year 2005.

Wildfire Suppression Operations.—The conference agreement includes \$700,492,000 for suppression operations as proposed by both the House and the Senate. The managers have provided the full amount of the ten-year average cost of wildfire suppression increased for inflation, an increase of \$51,633,000 above the fiscal year 2005 funding level.

The managers have modified bill language recommended by the House concerning assessing the suppression activity for indirect costs in a manner the same as all other Forest Service accounts

and programs. The managers direct that all programs be treated similarly so they can contribute their fair share to the costs of administering and running the Service. The managers do not agree with the House recommendation concerning the second bullet in the budget appendix.

The conference agreement does not include bill language recommended by the Senate dealing with the transfer of unobligated balances to the national forest system account. The managers agree with the House recommendation that the Forest Service should not automatically allocate 50% of the wildland fire suppression funds to all the regions at the beginning of the year, and there should not be a transfer of any unobligated suppression funds for non-suppression activities. If the Service has a low-cost wildfire season, the unobligated funds should be carried over to pay for future seasons when it is likely that catastrophic wildfires will occur again.

The managers encourage the Forest Service to establish a suitable memorial for the two brave firefighters who lost their lives July 22, 2003, at the Cramer fire near Salmon, ID.

The managers direct the Forest Service to make available for public review the results of any feasibility study conducted for the purpose of determining whether to acquire specific models of aircraft for use as air tankers.

Other Wildfire Operations.—The conference agreement includes \$402,889,000 for other fire operation activities instead of \$399,000,000 as proposed by the House and \$369,025,000 as proposed by the Senate. The allocation of this funding is as follows:

| <i>Program</i> | <i>Amount</i> |
|--|---------------|
| Hazardous fuels | \$286,000,000 |
| Rehabilitation & restoration | 6,281,000 |
| Research & development | 23,219,000 |
| Joint fire science | 8,000,000 |
| Forest health management—Federal | 15,000,000 |
| Forest health management—cooperative | 10,000,000 |
| State and community fire assistance | 46,500,000 |
| Volunteer fire assistance | 7,889,000 |
| Total other wildfire operations | 402,889,000 |

Hazardous fuels.—The conference agreement includes \$286,000,000 for hazardous fuels treatments as proposed by the House, an increase of \$23,461,000 over the fiscal year 2005 level. This allocation includes the House proposed \$5,000,000 for the San Bernardino NF, CA, and the Senate proposed \$1,500,000 for the Santa Fe watershed, NM, and \$5,000,000 as proposed by the Senate for biomass utilization grants. The House had recommended the biomass grants funding within the State and private forestry account.

The conference agreement includes the Senate recommended bill language concerning the use of \$5,000,000 for the Community Forest Restoration Act and allowing a transfer for the biomass grants.

The managers direct the Secretary of Agriculture to report to the House and Senate Committees on Appropriations, the House Agriculture and Resources Committees, and the Senate Energy and Natural Resources Committee on the percentage of fuels reduction or restoration contracts that provide small diameter material to micro businesses, large commercial sawmills, or biomass facilities.

Rehabilitation.—The conference agreement includes \$6,281,000 for rehabilitation and restoration activities. The managers direct that \$2,000,000 be made available to the native plant materials program to be used in conjunction with the similar effort at the Department of the Interior under the joint guidance of the inter-agency plant conservation alliance.

Fire plan research and development.—The conference agreement includes \$23,219,000 for research and development activities. Changes from the House proposal include an increase of \$1,150,000 for the University of Montana landscape fire analysis center and \$350,000 for the University of Idaho FRAMES project.

Federal and cooperative forest health management.—The conference agreement includes \$15,000,000 for Federal forest health activities and \$10,000,000 for cooperative forest health activities as proposed by the House.

State fire and volunteer fire assistance.—The agreement includes \$46,500,000 for State and community fire assistance. Changes from the House recommendation include increases of \$2,100,000 for the Alaska Kenai Peninsula Borough, \$1,200,000 to the Municipality of Anchorage, \$800,000 for Fairbanks North Star Borough, AK, \$1,100,000 for the Matanuska-Susitna Borough, AK, and \$300,000 for the Alaska, Cook Inlet tribal council. Senate instructions on distribution of these funds should be followed by the Service.

The managers direct the Forest Service, working with the State foresters, to review the current State fire assistance allocation methodology for the funding provided under the wildland fire management appropriation and recommend appropriate changes. The State fire assistance under this heading should not be considered the same as the traditional funding in the State and private forestry account. Funding under this heading is intended to support the national fire plan. The managers encourage the Service and the States to focus this funding to those States and activities that the National fire plan suggests are most critically needed to reduce the danger of catastrophic wildfires, rewarding those States with demonstrated performance and cost share. Community wild-fire protection planning and cooperative hazardous fuels reduction activities should be highlighted. The Forest Service shall prepare a report to the House and Senate Committees on Appropriations before implementing any new allocation methodology.

The volunteer fire assistance allocation is \$7,889,000 as proposed by the Senate.

CAPITAL IMPROVEMENT AND MAINTENANCE

The conference agreement provides \$441,178,000 for capital improvement and maintenance instead of \$468,260,000 as proposed by the House and \$409,751,000 as proposed by the Senate. This is a reduction of \$73,523,000 below the fiscal year 2005 non-emergency funding level. The conference agreement provides for the following distribution of funds:

| <i>Activity/Project</i> | <i>Amount</i> |
|---------------------------|---------------|

The managers agree with the overall program direction for this account provided by both the House and the Senate except funding levels and project descriptions are indicated in the table above. The conference agreement includes the bill language recommended by the Senate concerning the Jarbidge Canyon road which provides authority to transfer some funds to the Department of the Interior for certain portions of this project.

The managers are aware of the importance of modernizing the Forest Products Laboratory. As noted previously, the managers urge the Forest Service to develop an integrated wood products research plan that will guide capital investments. The managers believe that the Forest Service should also conduct a strategic review of facilities needs before modernization efforts begin. Therefore, the managers do not agree with the Senate proposal to fund the construction of a durability test facility at this time. Instead, the managers agree to the House proposal to provide \$2,000,000 for the

modernization effort at the Laboratory, pending completion of the recommended integrated, national planning effort for wood products research. Once this plan is completed, the managers will give full consideration to supporting the Laboratory's multi-year modernization effort.

The funds provided for the Allegheny NF include \$1,000,000 for the Kiasutha campground, \$500,000 for Kinzua Wolf Run Marina, \$1,000,000 for the Bradford administrative site, and \$100,000 for forest-wide signage improvements. The Cherokee NF funding is for the Ocoee Whitewater Center interpretive and facility upgrades, Nolichucky work center property acquisition, the Cherokee hot shot complex, and the Cleveland office relocation project.

The managers have provided \$1,000,000 for environmental studies for a recreational lake in Smith County, Mississippi. The managers note, however, that a feasibility study of this project is currently underway in cooperation with the Forest Service and Mississippi State University. The managers note that conclusion of the ongoing studies regarding issues such as mineral rights and the need for condemnation of these rights is necessary to determine the feasibility of this project. If the study concludes that this project is not feasible, the managers expect that the funds provided for environmental studies will be reprogrammed for other high priority construction needs in Mississippi.

LAND ACQUISITION

The conference agreement provides \$42,500,000 for land acquisition instead of \$15,000,000 as proposed by the House and \$44,925,000 as proposed by the Senate.

The managers agree to the following distribution of funds:

| <i>Area (State)</i> | <i>Amount</i> |
|--|---------------|

The conference agreement provides \$64,000 for gifts, donations and bequests for forest and rangeland research as proposed by both the House and the Senate.

MANAGEMENT OF NATIONAL FOREST LANDS FOR SUBSISTENCE USES

The conference agreement provides \$5,067,000 for management of national forest system lands for subsistence uses in Alaska as proposed by the Senate instead of \$5,467,000 as proposed by the House.

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

The managers agree to the following changes to the House recommendations:

1. The Senate language is included which does not prohibit transfers for reimbursable agreements for the USDA National Information Technology center.

2. The Senate bill language allowing up to \$2,500,000 for the Youth Conservation Corps projects is included.

3. The conference agreement allows up to \$300,000 to be used by the National Forest Foundation for administrative expenses. The managers expect the Foundation to raise funds so this allocation can be reduced in the future.

4. The Senate language is included allowing certain authorized payments to the counties within the Columbia River Gorge National Scenic Area, WA & OR.

5. The Senate language is included allowing the Forest Service to reimburse the USDA Office of the General Counsel for certain travel expenses.

6. The Senate language is included which transfers certain land on Kodiak Island, AK, from the Forest Service to the U.S. Fish and Wildlife Service.

7. The conference agreement includes bill language not included by either the House or the Senate which allows the Forest Service to assess available funds to support the agency's needs for facilities maintenance for administrative and other buildings, but not recreation facilities. This replaces the Senate proposal within Title V which recommended establishing a working capital fund for all agency structures. The new provision allows the Forest Service to transfer up to \$35,000,000 from various agency accounts, based on a fair measure of facilities maintenance needs. The managers expect that initially, the Forest Service will use the square feet of building space and the various programs use of this space as the index to establish the transfer levels. The Forest Service should devise a performance-based system and need-based system to determine how to allocate assessed funds to the field. Before executing these transfers, the Forest Service shall report to the House and Senate Committees on Appropriations on the details of the proposed transfers and the methodology being used for both the assessment, and the field allocation. In addition, the Forest Service shall, as part of the normal budget justification, report on the anticipated transfers required in future fiscal years, and report on the previous year's transfers and proposed accomplishments. There should also be a display which indicates, by national forest, research station and area, the funding being allocated for facilities maintenance. The budget justification displays shall indicate, for every budget line item, the funding amount being assessed for facilities maintenance. This information should be readily visible along with each program description. The tables should also summarize the budget line item contribution to the other assessments.

8. This discussion replaces recommendations by both the House and the Senate concerning performance measures. The managers remain concerned about forest outputs and whether on-the-ground accomplishments remain a high priority for the Forest Service. The managers expect the Forest Service to maintain a performance management system that includes performance standards for line officers aggregated up to the Forest level so that forest-wide management goals can be measured against actual accomplishments for each forest. The performance standards should include clear annual measures for programs which are consistent with the output levels specified in the annual budget justification. The Forest Service needs to implement a system of internal data controls and data transparency consistent with the recommendations by the USDA-OIG March, 2005 audit. The Chief should hold agency line officers accountable for reporting accurate performance data in fiscal year 2006. The Forest Service should establish an independent review process to review the reported data. The Forest Service is directed to provide a report to the House and Senate Committees on Appropriations and the relevant House and Senate authorizing committees on this performance management system within 90 days of enactment. This report shall also be made available to the public following submission of the report to the committees noted above.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

INDIAN HEALTH SERVICE

INDIAN HEALTH SERVICES

The conference agreement provides \$2,732,298,000 for Indian health services as proposed by the House instead of \$2,732,323,000 as proposed by the Senate.

Bill Language.—The conference agreement modifies language included in both the House and the Senate bills concerning the Individuals with Disabilities Education Act. The two versions contained minor technical differences. The conference agreement includes language included in the Senate bill concerning the distribution of Alaska alcohol wellness funds.

The managers are aware of Indian health care needs in the state of Nevada and expect the Service to continue to meet with the 22 tribes in Nevada, as well as the Intertribal Council of Nevada and the Intertribal Health Board of Nevada, to discuss ways to improve the delivery and quality of their health services. The managers expect the Service to report to the House and Senate Committees on Appropriations by December 31, 2005 with recommendations on how to improve secondary and tertiary care in Nevada, including facility needs and the contract health services program that can be accomplished within current budgetary levels.

INDIAN HEALTH FACILITIES

The conference agreement provides \$358,485,000 for Indian health facilities instead of \$370,774,000 as proposed by the House and \$335,643,000 as proposed by the Senate.

| Kayenta, AZ health center | 3,878,000 |
| Mobile dental units | 2,000,000 |
| Phoenix Indian Medical Center, AZ | 8,000,000 |
| San Carlos, AZ Health Center | 6,139,000 |
| Small ambulatory facilities | 7,000,000 |
| Subtotal | 38,343,000 |
| Other: | |
| Maintenance and improvement | 52,404,000 |
| Sanitation facilities | 93,519,000 |
| Facilities and environmental health support | 152,959,000 |
| Equipment | 21,260,000 |
| Total | 358,485,000 |

Bill Language.—The conference agreement includes language proposed by the Senate authorizing the construction of a replacement health facility in Nome, Alaska, on land owned by the Norton Sound Health Corporation. The House had no similar provision.

The managers consider the health facilities construction program to be a critical component in the provision of better health care to Native Americans and, therefore, expect that future budget submissions by the Service will include a much more aggressive schedule to fund these projects.

NATIONAL INSTITUTES OF HEALTH

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

The conference agreement provides \$80,289,000 for the national institute of environmental health sciences as proposed by both the House and the Senate.

AGENCY FOR TOXIC SUBSTANCES AND DISEASE REGISTRY

TOXIC SUBSTANCES AND ENVIRONMENTAL PUBLIC HEALTH

posed by the Senate. A reduction of \$100,000 from the House level has been taken from the Tropical Research Institute's study of microorganisms in tropical soils. Other changes from the House proposal for activities within this account include an increase of \$500,000 to restore base funding for key outreach programs such as the travel exhibition service, fellowships and affiliations, an additional \$500,000 to meet the budget request of \$1,000,000 for an institution-wide collections care and preservation initiative, and a reduction of \$1,000,000 from facilities maintenance to fund that activity at the amount requested in the budget.

FACILITIES CAPITAL

The conference agreement provides \$100,000,000 for the facilities capital account as proposed by the Senate instead of \$90,900,000 as proposed by the House. Within this amount, \$9,100,000 is provided for the Asia II Trail exhibit at the National Zoological Park as proposed by the House. While supportive of this project, the managers are concerned by the high initial cost estimates and encourage the Smithsonian to look at how the exhibit might be reduced in scope or in some way phased to achieve savings. The managers also understand that an aggressive fundraising effort will be required by the Smithsonian to secure private financing, without which this project cannot be successfully completed. The conference agreement also includes an additional \$9,100,000 for the POD 5 museum support center storage facility as recommended by the Senate.

ADMINISTRATIVE PROVISIONS, SMITHSONIAN INSTITUTION

The conference agreement continues administrative provisions included in the House bill that place restrictions on the use of funds for the following: (1) unapproved changes to science programs; (2) the design of new or expanded facilities; (3) Holt House; and (4) the purchase of buildings. The House provision regarding reprogramming authority is included with a modification that deletes the requirement for written approval from the House and Senate Committees on Appropriations.

NATIONAL GALLERY OF ART

SALARIES AND EXPENSES

The conference agreement provides \$96,600,000 for salaries and expenses of the National Gallery of Art as proposed by the Senate instead of \$97,100,000 as proposed by the House.

The managers note that language is included in Title IV—General Provisions raising the indemnity limit for art exhibitions as proposed by the Senate. The managers expect that future requests to alter the indemnity ceilings will be approved through the Office of Management and Budget and either included in the budget justification or, preferably, submitted as an official legislative proposal to, and acted upon by, the appropriate legislative committees of jurisdiction.

GRANTS AND ADMINISTRATION

The conference agreement provides \$126,264,000 for grants and administration of the National Endowment for the Arts as proposed by the Senate instead of \$131,264,000 as proposed by the House.

The managers expect that the increase above the enacted level will be used to expand the American Masterpieces program by \$2,000,000 and partially restore the Administration's proposed reduction to the Challenge America program by \$3,000,000.

Bill Language.—The conference agreement retains bill language proposed by the Senate providing that funds appropriated for the National Endowment for the Arts be expended in accordance with sections 309 and 311 of Public Law 108–108. The House bill addressed this issue in the general provisions section.

The conference agreement does not include a provision in section 437 of the House bill prohibiting the use of funds for the sale or slaughter of wild free roaming horses and burros.

The managers have not included language proposed by the Senate in section 434 dealing with the Biscuit fire recovery but the managers would like to have a report from the Forest Service on this issue. Accordingly, by March 1, 2006 the Forest Service should submit a report to the House and Senate Committees on Appro-

priations (and make this report publicly available on the agency web-site) which discusses the following issues concerning the Biscuit fire in southern Oregon:

1. The change in reforestation capabilities and costs between the date of the containment of the Biscuit Fire and the completion of the Biscuit Fire Recovery Project, as detailed in the Record of Decision.

2. The commercial value lost, as well as recovered, of fire-killed timber within the Biscuit Fire area.

3. All actions included in the Record of Decision for the Biscuit Fire Recovery Project, but forgone because of delay or funding shortfall.

4. The Forest Service original estimate of the acres that should be reforested and the cost in dollars and per acre, including planting stock and overhead and a summary of the original schedule to do the work.

5. A summary of the initial Forest Service plan to salvage timber; including a discussion of the acres which would have been harvested and the estimated volume and value of that salvage, as well as the cost to the Federal government to develop and administer the sale and the anticipated cost to the purchasers.

6. A similar summary for the final Forest Service salvage plan.

7. A presentation and list of all of the timber sales offered and planned, including the volume, and appraised value. The presentation should indicate sales offered but not sold, and sales not yet underway. It should also separate out sales by land management regime.

The conference agreement does not include a provision in section 437 of the Senate bill expressing the sense of the Senate with regard to the national debt and funding for the global war on terror.

TITLE V—FOREST SERVICE FACILITY REALIGNMENT AND ENHANCEMENT ACT

The conference report modifies legislation recommended by the Senate in Title V. This provision allows the Forest Service to dispose of administrative facilities that are no longer needed and use all of the revenue to reduce the administrative-site deferred maintenance backlog. This improves the Service's ability to realign facilities to meet the needs of the workforce and the Nation. The legislation authorizes the Secretary of Agriculture to sell, lease, exchange or combine a sale and exchange of certain administrative sites the Secretary determines are no longer needed for National Forest System purposes. The legislation incorporates new authorities for streamlining regulations to facilitate the timely disposal of administrative sites and to improve the marketability of the sites. All receipts derived from the conveyance of administrative sites and facilities shall be deposited in the Sisk Act fund and remain available to the Secretary until expended, without further appropriations. These funds will be used for the administrative costs incurred in conveying sites; the acquisition of land for administrative

sites; and for the decommissioning, construction, maintenance, rehabilitation, and improvement of administrative sites.

The managers make the following recommendations:

1. The Service is allowed to dispose of up to 10 isolated, undeveloped sites per year which were acquired or used for administrative purposes, with certain limitations.

2. Certain lands are explicitly excluded, including any land within the national wilderness system, in the wild and scenic river system, lands specifically designated for natural area or recreation purposes, or in a national monument. In addition, it is the intent of the managers that the exclusions apply to undeveloped lands on historic trails and sites, national preserves, national recreation areas, national scenic areas, national conservation areas, national botanical areas, national forest primitive areas, research natural areas, national game refuges and wildlife preserve areas, and officially designated special interest areas.

3. The managers direct that the service should not dispose of lands needed for natural resource management, or lands which are important to provide public access to other lands or waters, such as recreational river corridors or sites with special recreational values.

4. The managers intend that disposal of lands will not create new non-Federal inholdings within larger areas of contiguous Federal or other publicly owned lands available for recreational activities.

5. The provision requires the Service to include detailed displays in the annual budget justification of the anticipated program under this authority and provide other details so the Congress and the public can evaluate the program and its impact. The Service should notify the Congress if changes to this plan are later necessary. The managers are concerned that future appropriation decisions concerning facility construction, reconstruction and maintenance being made will be fully informed by knowledge of the anticipated revenues derived from this new authority. The managers also understand that the revenue stream will be temporary, and that all areas of the Nation do not have a similar amount of excess facilities nor ability to generate revenue.

6. The authorities provided by this Title expire on September 30, 2008. However, the managers will closely monitor the implementation of this provision. The managers encourage the Congress to extend the authority if steady progress is demonstrated. As with the pilot conveyance authority, the Service is more likely to successfully plan and implement project planning if there continues to be no less than two or three years remaining on the authority.

7. The conference agreement repeals the previous pilot conveyance authority, which was established in the Department of the Interior and Related Agencies Appropriations Act, 2002. The repeal is effective as of September 30, 2006, and any project initiated under the pilot authority may be completed under that authority.

8. The agreement continues the Senate-recommended language concerning lead-based and asbestos abatement, but limits the exclusion only to laws affecting these matters.

9. The agreement clarifies that the Forest Service should follow the National Environmental Policy Act (NEPA) with the exception that the Service must analyze only the most reasonably foreseeable use of the site, and determine whether or not to reserve any right, title or interest in the sites. The managers expect that, consistent with the NEPA, the Service will evaluate the alternative of not disposing of the sites.

10. The agreement requires that the Forest Service consult with local governmental officials of the community in which the administrative site is located and provide public notice of the proposed conveyance.

11. The conference agreement does not include the Senate proposal concerning the working capital fund. However, the conference agreement includes, within the Administrative provisions section of the Forest Service, bill language which allows the Forest Service to assess all funds available to the agency to support maintenance of facilities other than recreation facilities. The managers expect that this assessment approach will provide field managers an incentive to carefully evaluate their space needs and help reduce the total amount of building space maintained. This should save money and reduce the tremendous backlog in deferred maintenance that has accumulated within the Forest Service.

TITLE VI—VETERANS HEALTH CARE

Sec. 601. Appropriates \$1,500,000,000 to the Department of Veterans Affairs for Medical Services for fiscal year 2005. The conferees agree that the amount provided will be available until September 30, 2006. The conferees note that the fiscal year 2006 budget amendment submitted to the Congress on July 14, 2005 included additional fiscal year 2005 requirements for Medical Services. The conferees agree, that prior to completion of the fiscal year 2006 appropriations Act for the Department of Veterans Affairs, the House and Senate subcommittees of jurisdiction will continue to evaluate and adjust the funding level required for fiscal year 2006 based upon most current information available.
