

DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND
RELATED AGENCIES APPROPRIATION BILL, 2008

JUNE 22, 2007.—Committed to the Committee of the Whole House on the State of
the Union and ordered to be printed

Mr. DICKS of Washington, from the Committee on Appropriations,
submitted the following

SUPPLEMENTAL REPORT

[To accompany H.R. 2643]

The Committee on Appropriations submits the following additional report in explanation of H.R. 2643, making appropriations for the Department of the Interior, the Environmental Protection Agency, and Related Agencies for the fiscal year ending September 30, 2008. This report augments, but does not replace, instructions and guidance provided in House Report 110-187, the initial report filed by the Committee on this bill on June 11, 2007. With this new report, the Committee has updated its recommendations to give direction to agencies regarding funding for specific projects and to comply with clause 9 of rule XXI as it relates to transparency requirements when projects have been requested by Members of Congress. It also includes Committee recommendations related to projects requested by the executive branch as part of the President's fiscal year 2008 budget.

In allocating the funds made available by this bill for various agencies and appropriations accounts, the Committee directs that the following projects be funded:

EXECUTIVE AND LEGISLATIVE BRANCH PROJECTS

Compliance with Rules of the House.—The list of projects provided above is submitted in compliance with clause 9 of rule XXI of the Rules of the House of Representatives, which requires publication of a complete list of projects included in the bill which result principally from requests of Members of the House of Representatives. In addition the list includes projects of a similar character which are funded in the bill and which have been requested in the President's Budget for fiscal year 2008.

Projects.—The Committee notes that the Congress has made significant reforms in the way it reviews funding for the Federal government, reforms which the Committee takes very seriously as it executes its constitutional authority. Earmarking or directed spending of Federal dollars does not begin with Congress. It begins with the Executive Branch. For example, the list included above lists 92 specific land acquisition or construction projects which have been submitted by the Administration. The Administration, in selecting these projects, goes through a process that is the functional equivalent of earmarking. When the Committee reviews the budget request, it goes through a process of rigorous review and may alter or modify this list to reflect additional priorities.

Contractors.—The Executive Branch also engages in another practice which steers or directs money to specific entities or purposes through a process of contracting out various activities and services. In many important work locations, the number of people working for contractors exceeds the number of Federal employees in the same building or location. Many of these, in fact, are non-competitive or sole-sourced. When added together, the Executive Branch steers or directs far greater spending to specific projects or corporations than is directed or earmarked by Congress. And the practice of non-competitive contracting has exploded in the past five years. For example, the Department of the Interior reported to the Committee that the value of contracts awarded through processes that were "not fully and openly competitive" increased from \$26 million in 2000 to \$167 million in 2005.
