SEC. 255. NEXT GENERATION BOMBER AIRCRAFT.

(a) **FINDINGS.**—Congress makes the following findings:

(1) Long-range strike is a critical mission in which the United States needs to retain a credible and dominant capability.

(2) Long range, penetrating strike systems provide—

(A) a hedge against being unable to obtain access to forward bases for political reasons;

(B) a capacity to respond quickly to contingencies;

(C) the ability to base outside the reach of emerging adversary anti-access and area-denial capabilities; and

(D) the ability to impose disproportionate defensive costs on prospective adversaries of the United States.

(3) The 2006 quadrennial defense review found that there was a requirement for a next generation bomber aircraft and directed the United States Air Force to “develop a new land-based, penetrating long range strike capability to be fielded by 2018”.

(4) *On April 6, 2009, Secretary of Defense Robert Gates announced that the United States “will not pursue a development program for a follow-on Air Force bomber until we have a better understanding of the need, the requirement and the technology”.*

(5) *On May 7, 2009, President Barack Obama announced the termination of the next generation bomber aircraft program in the document of the Office of Management and Budget entitled “Terminations, Reductions, and Savings”, stating that “there is no urgent need to begin an expensive development program for a new bomber” and that “the future bomber fleet may not be affordable over the next six years”.*

(6) *The United States will need a new long-range strike capability because the conflicts of the future will likely feature heavily defended airspace, due in large part to the proliferation of relatively inexpensive, but sophisticated and deadly, air defense systems.*

(7) *General Michael Maples, the Director of the Defense Intelligence Agency, noted during a March 10, 2009, hearing of the Committee on Armed Services of the Senate on worldwide threats that “Russia, quite frankly, is the developer of most of those [advanced air defense] systems and is exporting those systems both to China and to other countries in the world”.*

(8) *The Final Report of the Congressional Commission on the Strategic Posture of the United States, submitted to Congress on May 6, 2009, states that “[t]he bomber force is valuable particularly for extending deterrence in time of crisis, as their deployment is visible and signals U.S. commitment. Bombers also impose a significant cost burden on potential adversaries in terms of the need to invest in advanced air defenses”.*

(9) *The commanders of the United States Pacific Command, the United States Strategic Command, and the United States Joint Forces Command have each testified before the Committee on Armed Services of the Senate in support of the capability that the next generation bomber aircraft would provide.*

(10) *On June 17, 2009, General James Cartwright, Vice-Chairman of the Joint Chiefs of Staff and chair of the Joint Requirements Oversight Council, stated during a hearing before the Committee on Armed Services of the Senate that “the nation needs a new bomber”.*

(11) *Nearly half of the United States bomber aircraft inventory (47 percent) pre-dates the Cuban Missile Crisis.*

(12) *The only air-breathing strike platforms the United States possesses today with reach and survivability to have a chance of successfully executing missions more than 1,000 nautical miles into enemy territory from the last air-to-air refueling are 16 combat ready B-2 bomber aircraft.*

(13) *The B-2 bomber aircraft was designed in the 1980s and achieved initial operational capability over a decade ago.*

(14) *The crash of an operational B-2 bomber aircraft during takeoff at Guam in early 2008 indicates that attrition can and does occur even in peacetime.*

(15) *The primary mission requirement of the next generation bomber aircraft is the ability to strike targets anywhere on the globe with whatever weapons the contingency requires.*

(16) *The requisite aerodynamic, structural, and low-observable technologies to develop the next generation bomber aircraft already exist in fifth-generation fighter aircraft.*

(b) **POLICY ON CONTINUED DEVELOPMENT OF NEXT GENERATION BOMBER AIRCRAFT IN FISCAL YEAR 2010.**—*It is the policy of the United States to support a development program for next generation bomber aircraft technologies.*

SEC. 903. SENSE OF CONGRESS REGARDING THE DIRECTOR OF OPERATIONAL ENERGY PLANS AND PROGRAMS.

(a) **FINDINGS.**—*Congress makes the following findings:*

(1) *The demand for operational energy within the Department of Defense imposes significant logistical burdens and operational vulnerabilities on the warfighter and increases force protection requirements.*

(2) *In March 2008, the Comptroller General of the United States found that responsibilities for operational energy strategy, management, and oversight within the Department are diffused throughout various offices and working groups, including the Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics; the Office of the Under Secretary of Defense for Policy; the Office of the Under Secretary of Defense (Comptroller); the Office of Program Analysis and Evaluation; the Office of the Chairman of the Joint Chiefs of Staff; the commanders of the combatant commands; and the offices of the Secretaries of the military departments.*

(3) *The Defense Science Board’s 2008 report titled “More Fight—Less Fuel” stated that “There are currently few efforts to manage energy demand by operational forces, which consume about three quarters of DoD energy, perhaps because no one is in charge. The lowest organizational level where all decisions that drive DoD energy use come together is the Deputy Secretary of Defense, implying the need for a senior energy official, and oversight of the Department’s energy strategy and program by the Deputy’s Advisory Working Group (DAWG).”*

(4) *Congress established the Director of Operational Energy Plans and Programs in section 139b of title 10, United States Code, to provide leadership, conduct oversight, and be accountable for operational energy plans and programs in the Department of Defense and the Army, Navy, Air Force, and Marine Corps.*

(5) *Congress envisioned that the Director would have a direct line of communication with the Secretary of Defense and the Deputy Secretary of Defense, including participation in the Deputy’s Advisory Working Group.*

(6) *The Department of Defense issued a statement that it “intends to establish this position as administratively reporting to the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)), and this official would report directly to the Secretary of Defense on issues related to Operational Energy”.*

(b) **SENSE OF CONGRESS.**—*It is the sense of Congress that the Director of Operational Energy Plans and Programs should report directly to the Secretary of Defense on issues related to operational energy and be included as a fully participating member of the Advisory Working Group of the Deputy Secretary of Defense.*

Subtitle C—Naval Vessels and Shipyards

SEC. 1021. SENSE OF CONGRESS ON THE MAINTENANCE OF A 313-SHIP NAVY.

(a) *FINDINGS.*—Congress makes the following findings:

(1) The Department of the Navy has a stated requirement for a 313-ship fleet.

(2) The Navy can better meet this requirement—

(A) by procuring sufficient numbers of new ships; and

(B) by ensuring the sound material condition of existing ships that will enable the Navy to utilize them for their full planned service lives.

(3) When procuring new classes of ships, the Navy must exercise greater caution than it has exhibited to date in proceeding from one stage of the acquisition cycle to the next before a ship program has achieved a level of maturity that significantly lowers the risk of cost growth and schedule slippage.

(4) In retaining existing assets, the Navy can do a much better job of achieving the full planned service lives of ships and extending the service lives of certain ships so as to keep their unique capabilities in the fleet while the Navy takes the time necessary to develop and field next-generation capabilities under a low risk program.

(5) The Navy can undertake certain development approaches that can help the Navy control the total costs of ownership of a ship or class of ships, including emphasizing common hull designs, open architecture combat systems, and other com-

mon ship systems in order to achieve efficiency in acquiring and supporting various classes of ships.

(6) *The Navy needs to continue its efforts toward achieving an open architecture for existing combat systems, as this will have great benefit in reducing the costs and risks of fielding new classes of ships, and will yield recurring savings from reducing the costs of buying later ships in a program and reducing life cycle support costs for ships and classes of ships.*

(7) *The Navy can also undertake other measures to acquire new ships and maintain the current fleet with greater efficiency, including—*

(A) *greater use of fixed-price contracts;*

(B) *maximizing competition (or the option of competition) throughout the life cycle of its ships;*

(C) *entering into multi-year contracts when warranted;*

and

(D) *employing an incremental approach to developing new technologies.*

(b) *SENSE OF CONGRESS.—It is the sense of Congress that—*

(1) *the Navy should meet its requirement for a 313-ship fleet until such time that modifications to the Navy's ship fleet force structure are warranted, and the Secretary of the Navy provides Congress with a justification of any proposed modifications, supported by rigorous and sufficient warfighting analysis;*

(2) *the Navy should take greater care to achieve the full planned service life of existing ships and reduce the incidence of early ship decommissioning;*

(3) *the Navy should exercise greater restraint on the acquisition process for ships in order to achieve on-time, on-cost ship-building programs; and*

(4) *Congress should support the Navy when it is acting responsibly to undertake measures that can help the Navy achieve the requirement for a 313-ship fleet and maintain a fleet that is adequate to meet the national security needs of the United States.*

SEC. 1022. DESIGNATION OF U.S.S. CONSTITUTION AS AMERICA'S SHIP OF STATE.

(a) *FINDINGS.—Congress makes the following findings:*

(1) *In the Act entitled "An Act to Provide a Naval Armament", approved on March 27, 1794 (1 Stat. 350, Chap. XII), the 3rd Congress authorized the construction of six frigates as the first ships to be built for the United States Navy.*

(2) *One of the six frigates was built in Boston, Massachusetts, between 1794 and 1797, and is the only one of the original six ships to survive.*

(3) *President George Washington named this frigate "Constitution" to represent the Nation's founding document.*

(4) *President Thomas Jefferson, asserting the right of the United States to trade on the high seas, dispatched the frigate Constitution in 1803 as the flagship of the Mediterranean Squadron to end the depredations of the Barbary States against United States ships and shipping, which led to a treaty being signed with the Bashaw of Tripoli in the captain's cabin aboard the frigate Constitution on June 4, 1805.*

(5) *The frigate Constitution, with her defeat of the H.M.S. Guerriere, secured the first major victory by the young United States Navy against the Royal Navy during the War of 1812, gaining in the process the nickname "Old Ironsides", which she has proudly carried since.*

(6) *Congress awarded gold medals to four of the ship's commanding officers (Preble, Hull, Stewart, and Bainbridge), a record unmatched by any other United States Navy vessel.*

(7) *The frigate Constitution emerged from the War of 1812 undefeated, having secured victories over three additional ships of the Royal Navy.*

(8) *As early as May 1815, the frigate Constitution had already been adopted as a symbol of the young Republic, as attested by the [Washington] National Intelligencer which proclaimed, "Let us keep 'Old Ironsides' at home. She has, literally become the Nation's Ship . . . and should thus be preserved . . . in honorable pomp, as a glorious Monument of her own, and our other Naval Victories."*

(9) *Rumors in 1830 that "Old Ironsides", an aging frigate, was about to be scrapped resulted in a public uproar demanding that the ship be restored and preserved, spurred by Oliver Wendell Holmes' immortal poem "Old Ironsides".*

(10) *"Old Ironsides" circumnavigated the world between 1844 and 1846, showing the American flag as she searched for future coaling stations that would eventually fuel the steam-powered navy of the United States.*

(11) *The first Pope to set foot on United States sovereign territory was Pius IX onboard the frigate Constitution in 1849.*

(12) *On April 25, 1860, "Old Ironsides" evacuated the midshipmen of the United States Naval Academy from Annapolis, Maryland, to Newport, Rhode Island, preventing the young officers and the esteemed ship from falling into Confederate hands.*

(13) *In 1896, Congressman John F. "Honey Fitz" Fitzgerald introduced legislation to return "Old Ironsides" from the Portsmouth Naval Shipyard in New Hampshire, where she was moored pier side and largely forgotten, to Boston for her 100th birthday.*

(14) *Thousands of school children contributed pennies between 1925 and 1927 to help fund a much needed restoration for "Old Ironsides".*

(15) *Between 1931 and 1934, more than 4,500,000 Americans gained inspiration, at the depth of the Great Depression, by going aboard "Old Ironsides" as she was towed to 76 ports on the Atlantic, Gulf, and Pacific coasts.*

(16) *The 83rd Congress enacted the Act of July 23, 1954 (68 Stat. 527, chapter 565), which directed the Secretary of the Navy to transfer to the States and appropriate commissions four other historic ships then on the Navy inventory, and to repair and equip the U.S.S. Constitution, as much as practicable, to her original condition, but not for active service.*

(17) *Queen Elizabeth II paid a formal visit to the U.S.S. Constitution in 1976, at the start of her state visit marking the bicentennial of the United States.*

(18) *The U.S.S. Constitution, in celebration of her bicentennial, returned to sea under sail on July 21, 1997, for the first*

time since 1881, proudly setting sails purchased by the contributions of thousands of pennies given by school children across the United States.

(19) *The U.S.S. Constitution is the oldest commissioned warship afloat in the world.*

(20) *The U.S.S. Constitution is a national historic landmark.*

(21) *The U.S.S. Constitution continues to perform official, ceremonial duties, including in recent years hosting a congressional dinner honoring the late Senator John Chafee of Rhode Island, a special salute for the dedication of the John Moakley Federal Courthouse, a luncheon honoring British Ambassador Sir David Manning, and a special underway demonstration during which 60 Medal of Honor recipients each received a personal Medal of Honor flag.*

(22) *The U.S.S. Constitution celebrated on October 21, 2007, the 210th anniversary of her launching.*

(23) *The U.S.S. Constitution will remain a commissioned ship in the United States Navy, with the Navy retaining control of the ship, its material condition, and its employment.*

(24) *The U.S.S. Constitution's primary mission will remain education and public outreach, and any Ship of State functions will be an adjunct to the ship's primary mission.*

(b) **DESIGNATION AS AMERICA'S SHIP OF STATE.**—

(1) **IN GENERAL.**—*The U.S.S. Constitution is hereby designated as "America's Ship of State".*

(2) **REFERENCES.**—*The U.S.S. Constitution may be known or referred to as "America's Ship of State".*

(3) **SENSE OF CONGRESS.**—*It is the sense of Congress that the President, Vice President, executive branch officials, and members of Congress should use the U.S.S. Constitution for the conducting of pertinent matters of state, such as hosting visiting heads of state, signing legislation relating to the Armed Forces, and signing maritime related treaties.*

(4) **FEE OR REIMBURSEMENT STRUCTURE FOR NON-DEPARTMENT OF THE NAVY USE.**—*The Secretary of the Navy shall determine an appropriate fee or reimbursement structure for any non-Department of the Navy entities using the U.S.S. Constitution for Ship of State purposes.*

SEC. 1023. TEMPORARY REDUCTION IN MINIMUM NUMBER OF OPERATIONAL AIRCRAFT CARRIERS.

(a) **TEMPORARY WAIVER.**—*Notwithstanding section 5062(b) of title 10, United States Code, during the period beginning on the date of the inactivation of the U.S.S. Enterprise (CVN-65) scheduled, as of the date of the enactment of this Act, for fiscal year 2013 and ending on the date of the commissioning into active service of the U.S.S. Gerald R. Ford (CVN-78), the number of operational aircraft carriers in the naval combat forces of the Navy may be 10.*

(b) **EVALUATION AND REPORT.**—

mission under this chapter shall include, at a minimum, the following rights of the accused:

“(A) To present evidence in the accused’s defense, to cross-examine the witnesses who testify against the accused, and to examine and respond to all evidence admitted against the accused on the issue of guilt or innocence and for sentencing, as provided for by this chapter.

“(B) To be present at all sessions of the military commission (other than those for deliberations or voting), except when excluded under section 949d of this title.

“(C)(i) When none of the charges preferred against the accused are capital, to be represented before a military commission by civilian counsel if provided at no expense to the Government, and by either the defense counsel detailed or the military counsel of the accused’s own selection, if reasonably available.

“(ii) When any of the charges preferred against the accused are capital, to be represented before a military commission in accordance with clause (i) and, to the greatest extent practicable, by at least one additional counsel who is learned in applicable law relating to capital cases and who, if necessary, may be a civilian and compensated in accordance with regulations prescribed by the Secretary of Defense.

“(D) To self-representation, if the accused knowingly and competently waives the assistance of counsel, subject to the provisions of paragraph (4).

“(E) To the suppression of evidence that is not reliable or probative.

“(F) To the suppression of evidence the probative value of which is substantially outweighed by—

“(i) the danger of unfair prejudice, confusion of the issues, or misleading the members; or

“(ii) considerations of undue delay, waste of time, or needless presentation of cumulative evidence.

“(3) In making exceptions in the applicability in trials by military commission under this chapter from the procedures and rules otherwise applicable in general courts-martial, the Secretary of Defense may provide the following:

“(A) Evidence seized outside the United States shall not be excluded from trial by military commission on the grounds that the evidence was not seized pursuant to a search warrant or authorization.

“(B) A statement of the accused that is otherwise admissible shall not be excluded from trial by military commission on grounds of alleged coercion or compulsory self-incrimination so long as the evidence complies with the provisions of section 948r of this title.

“(C) Evidence shall be admitted as authentic so long as—

“(i) the military judge of the military commission determines that there is sufficient evidence that the evidence is what it is claimed to be; and

“(ii) the military judge instructs the members that they may consider any issue as to authentication or identification of evidence in determining the weight, if any, to be given to the evidence.

“(D) Hearsay evidence not otherwise admissible under the rules of evidence applicable in trial by general courts-martial may be admitted in a trial by military commission only if—

“(i) the proponent of the evidence makes known to the adverse party, sufficiently in advance to provide the adverse party with a fair opportunity to meet the evidence, the proponent’s intention to offer the evidence, and the particulars of the evidence (including information on the circumstances under which the evidence was obtained); and

“(ii) the military judge, after taking into account all of the circumstances surrounding the taking of the statement, including the degree to which the statement is corroborated, the indicia of reliability within the statement itself, and whether the will of the declarant was overborne, determines that—

“(I) the statement is offered as evidence of a material fact;

“(II) the statement is probative on the point for which it is offered;

“(III) direct testimony from the witness is not available as a practical matter, taking into consideration the physical location of the witness, the unique circumstances of military and intelligence operations during hostilities, and the adverse impacts on military or intelligence operations that would likely result from the production of the witness; and

“(IV) the general purposes of the rules of evidence and the interests of justice will best be served by admission of the statement into evidence.

“(4)(A) The accused in a military commission under this chapter who exercises the right to self-representation under paragraph (2)(D) shall conform the accused’s deportment and the conduct of the defense to the rules of evidence, procedure, and decorum applicable to trials by military commission.

“(B) Failure of the accused to conform to the rules described in subparagraph (A) may result in a partial or total revocation by the military judge of the right of self-representation under paragraph (2)(D). In such case, the military counsel of the accused or an appropriately authorized civilian counsel shall perform the functions necessary for the defense.

“(c) DELEGATION OF AUTHORITY TO PRESCRIBE REGULATIONS.—The Secretary of Defense may delegate the authority of the Secretary to prescribe regulations under this chapter.

“(d) NOTICE TO CONGRESS OF MODIFICATION OF RULES.—Not later than 60 days before the date on which any proposed modification of the rules in effect for military commissions under this chapter goes into effect, the Secretary of Defense shall submit to the Committee on Armed Services of the Senate and the Committee on Armed Services of the House of Representatives a report describing the proposed modification.

“(4) *No appellate military judge on the United States Court of Military Commission Review may be reassigned to other duties, except under circumstances as follows:*

designee of the Secretary, in consultation with the Judge Advocate General of the armed force of which the appellate military judge is a member, approves such reassignment.

“(B) The appellate military judge retires or otherwise separates from the armed forces.

“(C) The appellate military judge is reassigned to other duties by the Secretary of Defense, or the designee of the Secretary, in consultation with the Judge Advocate General of the armed force of which the appellate military judge is a member, based on military necessity and such reassignment is consistent with service rotation regulations (to the extent such regulations are applicable).

“(D) The appellate military judge is withdrawn by the Secretary of Defense, or the designee of the Secretary, in consultation with the Judge Advocate General of the armed force of which the appellate military judge is a member, for good cause consistent with applicable procedures under chapter 47 of this title (the Uniform Code of Military Justice).

“(c) PROHIBITION ON CONSIDERATION OF ACTIONS ON COMMISSION IN EVALUATION OF FITNESS.—In the preparation of an effectiveness, fitness, or efficiency report or any other report or document used in whole or in part for the purpose of determining whether a commissioned officer of the armed forces is qualified to be advanced in grade, or in determining the assignment or transfer of any such officer or whether any such officer should be retained on active duty, no person may—

“(1) consider or evaluate the performance of duty of any member of a military commission under this chapter; or

“(2) give a less favorable rating or evaluation to any commissioned officer because of the zeal with which such officer, in acting as counsel, represented any accused before a military commission under this chapter.

“§ 949c. Duties of trial counsel and defense counsel

“(a) TRIAL COUNSEL.—The trial counsel of a military commission under this chapter shall prosecute in the name of the United States.

“(b) DEFENSE COUNSEL.—(1) The accused shall be represented in the accused’s defense before a military commission under this chapter as provided in this subsection.

“(B) is admitted to the practice of law in a State, district, or possession of the United States, or before a Federal court;

“(C) has not been the subject of any sanction of disciplinary action by any court, bar, or other competent governmental authority for relevant misconduct;

“(D) has been determined to be eligible for access to information classified at the level Secret or higher; and

“(E) has signed a written agreement to comply with all applicable regulations or instructions for counsel, including any rules of court for conduct during the proceedings.

“(4) If the accused is represented by civilian counsel, military counsel shall act as associate counsel.

“(5) The accused is not entitled to be represented by more than one military counsel. However, the person authorized under regulations prescribed under section 948k of this title to detail counsel, in such person’s sole discretion, may detail additional military counsel to represent the accused.

“(6) Defense counsel may cross-examine each witness for the prosecution who testifies before a military commission under this chapter.

“(7) Civilian defense counsel shall protect any classified information received during the course of representation of the accused in accordance with all applicable law governing the protection of classified information, and may not divulge such information to any person not authorized to receive it.

“§ 949d. Sessions

“(a) SESSIONS WITHOUT PRESENCE OF MEMBERS.—(1) At any time after the service of charges which have been referred for trial by military commission under this chapter, the military judge may call the military commission into session without the presence of the members for the purpose of—

“(A) hearing and determining motions raising defenses or objections which are capable of determination without trial of the issues raised by a plea of not guilty;

“(B) hearing and ruling upon any matter which may be ruled upon by the military judge under this chapter, whether or not the matter is appropriate for later consideration or decision by the members;

“(C) if permitted by regulations prescribed by the Secretary of Defense, receiving the pleas of the accused; and

“(D) performing any other procedural function which may be performed by the military judge under this chapter or under rules prescribed pursuant to section 949a of this title and which does not require the presence of the members.

“(2) Except as provided in subsections (b), (c), and (d), any proceedings under paragraph (1) shall be conducted in the presence of the accused, defense counsel, and trial counsel, and shall be made part of the record.

“(b) DELIBERATION OR VOTE OF MEMBERS.—When the members of a military commission under this chapter deliberate or vote, only the members may be present.

“(c) CLOSURE OF PROCEEDINGS.—(1) The military judge may close to the public all or part of the proceedings of a military commission under this chapter.

“(2) The military judge may close to the public all or a portion of the proceedings under paragraph (1) only upon making a specific finding that such closure is necessary to—

“(A) protect information the disclosure of which could reasonably be expected to cause damage to the national security, including intelligence or law enforcement sources, methods, or activities; or

“(B) ensure the physical safety of individuals.

“(3) A finding under paragraph (2) may be based upon a presentation, including a presentation ex parte or in camera, by either trial counsel or defense counsel.

“(d) EXCLUSION OF ACCUSED FROM CERTAIN PROCEEDINGS.—The military judge may exclude the accused from any portion of a proceeding upon a determination that, after being warned by the military judge, the accused persists in conduct that justifies exclusion from the courtroom—

“(1) to ensure the physical safety of individuals; or

“(2) to prevent disruption of the proceedings by the accused.

“§ 949e. Continuances

“The military judge in a military commission under this chapter may, for reasonable cause, grant a continuance to any party for such time, and as often, as may appear to be just.

“§ 949f. Challenges

“(a) CHALLENGES AUTHORIZED.—The military judge and members of a military commission under this chapter may be challenged by the accused or trial counsel for cause stated to the military commission. The military judge shall determine the relevance and validity of challenges for cause, and may not receive a challenge to more than one person at a time. Challenges by trial counsel shall ordinarily be presented and decided before those by the accused are offered.

“(b) PEREMPTORY CHALLENGES.—The accused and trial counsel are each entitled to one peremptory challenge, but the military judge may not be challenged except for cause.

“(c) CHALLENGES AGAINST ADDITIONAL MEMBERS.—Whenever additional members are detailed to a military commission under this chapter, and after any challenges for cause against such additional members are presented and decided, the accused and trial counsel are each entitled to one peremptory challenge against members not previously subject to peremptory challenge.

“§ 949g. Oaths

“(a) IN GENERAL.—(1) Before performing their respective duties in a military commission under this chapter, military judges, members, trial counsel, defense counsel, reporters, and interpreters shall take an oath to perform their duties faithfully.

“(2) The form of the oath required by paragraph (1), the time and place of the taking thereof, the manner of recording thereof, and whether the oath shall be taken for all cases in which duties are to be performed or for a particular case, shall be as provided in regulations prescribed by the Secretary of Defense. The regulations may provide that—

“(A) an oath to perform faithfully duties as a military judge, trial counsel, or defense counsel may be taken at any time by any judge advocate or other person certified to be qualified or competent for the duty; and

“(B) if such an oath is taken, such oath need not again be taken at the time the judge advocate or other person is detailed to that duty.

“(b) *WITNESSES.*—Each witness before a military commission under this chapter shall be examined on oath.

“(c) *OATH DEFINED.*—In this section, the term ‘oath’ includes an affirmation.

“§ 949h. Former jeopardy

“(a) *IN GENERAL.*—No person may, without the person’s consent, be tried by a military commission under this chapter a second time for the same offense.

“(b) *SCOPE OF TRIAL.*—No proceeding in which the accused has been found guilty by military commission under this chapter upon any charge or specification is a trial in the sense of this section until the finding of guilty has become final after review of the case has been fully completed.

“§ 949i. Pleas of the accused

“(a) *PLEA OF NOT GUILTY.*—If an accused in a military commission under this chapter after a plea of guilty sets up matter inconsistent with the plea, or if it appears that the accused has entered the plea of guilty through lack of understanding of its meaning and effect, or if the accused fails or refuses to plead, a plea of not guilty shall be entered in the record, and the military commission shall proceed as though the accused had pleaded not guilty.

“(b) *FINDING OF GUILT AFTER GUILTY PLEA.*—With respect to any charge or specification to which a plea of guilty has been made by the accused in a military commission under this chapter and accepted by the military judge, a finding of guilty of the charge or specification may be entered immediately without a vote. The finding shall constitute the finding of the military commission unless the plea of guilty is withdrawn prior to announcement of the sentence, in which event the proceedings shall continue as though the accused had pleaded not guilty.

“§ 949j. Opportunity to obtain witnesses and other evidence

“(a) *IN GENERAL.*—(1) Defense counsel in a military commission under this chapter shall have a reasonable opportunity to obtain witnesses and other evidence as provided in regulations prescribed by the Secretary of Defense. The opportunity to obtain witnesses and evidence shall be comparable to the opportunity available to a criminal defendant in a court of the United States under article III of the Constitution.

“(2) Process issued in military commissions under this chapter to compel witnesses to appear and testify and to compel the production of other evidence—

“(A) shall be similar to that which courts of the United States having criminal jurisdiction may lawfully issue; and

“(B) shall run to any place where the United States shall have jurisdiction thereof.

“(b) *DISCLOSURE OF EXCULPATORY EVIDENCE.*—(1) As soon as practicable, trial counsel in a military commission under this chapter shall disclose to the defense the existence of any evidence that reasonably tends to—

“(A) negate the guilt of the accused of an offense charged;

or

“(B) reduce the degree of guilt of the accused with respect to an offense charged.

“(2) The trial counsel shall, as soon as practicable, disclose to the defense the existence of evidence that reasonably tends to impeach the credibility of a witness whom the government intends to call at trial.

“(3) The trial counsel shall, as soon as practicable upon a finding of guilt, disclose to the defense the existence of evidence that is not subject to paragraph (1) or paragraph (2) but that reasonably may be viewed as mitigation evidence at sentencing.

“(4) The disclosure obligations under this subsection encompass evidence that is known or reasonably should be known to any government officials who participated in the investigation and prosecution of the case against the defendant.

“§ 949k. Defense of lack of mental responsibility

“(a) *AFFIRMATIVE DEFENSE.*—It is an affirmative defense in a trial by military commission under this chapter that, at the time of the commission of the acts constituting the offense, the accused, as a result of a severe mental disease or defect, was unable to appreciate the nature and quality or the wrongfulness of the acts. Mental disease or defect does not otherwise constitute a defense.

“(b) *BURDEN OF PROOF.*—The accused in a military commission under this chapter has the burden of proving the defense of lack of mental responsibility by clear and convincing evidence.

“(c) *FINDINGS FOLLOWING ASSERTION OF DEFENSE.*—Whenever lack of mental responsibility of the accused with respect to an offense is properly at issue in a military commission under this chapter, the military judge shall instruct the members as to the defense of lack of mental responsibility under this section and shall charge the members to find the accused—

“(1) guilty;

“(2) not guilty; or

“(3) subject to subsection (d), not guilty by reason of lack of mental responsibility.

“(d) *MAJORITY VOTE REQUIRED FOR FINDING.*—The accused shall be found not guilty by reason of lack of mental responsibility under subsection (c)(3) only if a majority of the members present at the time the vote is taken determines that the defense of lack of mental responsibility has been established.

“§ 949l. Voting and rulings

“(a) *VOTE BY SECRET WRITTEN BALLOT.*—Voting by members of a military commission under this chapter on the findings and on the sentence shall be by secret written ballot.

“(b) *RULINGS.*—(1) The military judge in a military commission under this chapter shall rule upon all questions of law, including the admissibility of evidence and all interlocutory questions arising during the proceedings.

“(2) Any ruling made by the military judge upon a question of law or an interlocutory question (other than the factual issue of mental responsibility of the accused) is conclusive and constitutes the ruling of the military commission. However, a military judge may change such a ruling at any time during the trial.

“(c) INSTRUCTIONS PRIOR TO VOTE.—Before a vote is taken of the findings of a military commission under this chapter, the military judge shall, in the presence of the accused and counsel, instruct the members as to the elements of the offense and charge the members—

“(1) that the accused must be presumed to be innocent until the accused’s guilt is established by legal and competent evidence beyond a reasonable doubt;

“(2) that in the case being considered, if there is a reasonable doubt as to the guilt of the accused, the doubt must be resolved in favor of the accused and the accused must be acquitted;

“(3) that, if there is reasonable doubt as to the degree of guilt, the finding must be in a lower degree as to which there is no reasonable doubt; and

“(4) that the burden of proof to establish the guilt of the accused beyond a reasonable doubt is upon the United States.

“§ 949m. Number of votes required

“(a) CONVICTION.—No person may be convicted by a military commission under this chapter of any offense, except as provided in section 949i(b) of this title or by concurrence of two-thirds of the members present at the time the vote is taken.

“(b) SENTENCES.—(1) Except as provided in paragraphs (2) and (3), sentences shall be determined by a military commission by the concurrence of two-thirds of the members present at the time the vote is taken.

“(2) No person may be sentenced to death by a military commission, except insofar as—

“(A) the penalty of death has been expressly authorized under this chapter, chapter 47 of this title, or the law of war for an offense of which the accused has been found guilty;

“(B) trial counsel expressly sought the penalty of death by filing an appropriate notice in advance of trial;

“(C) the accused was convicted of the offense by the concurrence of all the members present at the time the vote is taken; and

“(D) all members present at the time the vote was taken concurred in the sentence of death.

“(3) No person may be sentenced to life imprisonment, or to confinement for more than 10 years, by a military commission under this chapter except by the concurrence of three-fourths of the members present at the time the vote is taken.

“(c) NUMBER OF MEMBERS REQUIRED FOR PENALTY OF DEATH.—(1) Except as provided in paragraph (2), in a case in which the penalty of death is sought, the number of members of the military commission under this chapter shall be not less than 12 members.

“(2) In any case described in paragraph (1) in which 12 members are not reasonably available for a military commission because of physical conditions or military exigencies, the convening authority shall specify a lesser number of members for the military commission (but not fewer than 9 members), and the military commission may be assembled, and the trial held, with not less than the number of members so specified. In any such case, the convening

authority shall make a detailed written statement, to be appended to the record, stating why a greater number of members were not reasonably available.

“§ 949n. Military commission to announce action

“A military commission under this chapter shall announce its findings and sentence to the parties as soon as determined.

“§ 949o. Record of trial

“(a) RECORD; AUTHENTICATION.—Each military commission under this chapter shall keep a separate, verbatim, record of the proceedings in each case brought before it, and the record shall be authenticated by the signature of the military judge. If the record cannot be authenticated by the military judge by reason of death, disability, or absence, it shall be authenticated by the signature of the trial counsel or by a member of the commission if the trial counsel is unable to authenticate it by reason of death, disability, or absence. Where appropriate, and as provided in regulations prescribed by the Secretary of Defense, the record of a military commission under this chapter may contain a classified annex.

“(b) COMPLETE RECORD REQUIRED.—A complete record of the proceedings and testimony shall be prepared in every military commission under this chapter.

“(c) PROVISION OF COPY TO ACCUSED.—A copy of the record of the proceedings of the military commission under this chapter shall be given the accused as soon as it is authenticated. If the record contains classified information, or a classified annex, the accused shall receive a redacted version of the record consistent with the requirements of subchapter V of this chapter. Defense counsel shall have access to the unredacted record, as provided in regulations prescribed by the Secretary of Defense.

“SUBCHAPTER V—CLASSIFIED INFORMATION PROCEDURES

“Sec.

“949p-1. Protection of classified information: applicability of subchapter.

“949p-2. Pretrial conference.

“949p-3. Protective orders.

“949p-4. Discovery of, and access to, classified information by the accused.

“949p-5. Notice by accused of intention to disclose classified information.

“949p-6. Procedure for cases involving classified information.

“949p-7. Introduction of classified information into evidence.

“§ 949p-1. Protection of classified information: applicability of subchapter

“(a) PROTECTION OF CLASSIFIED INFORMATION.—Classified information shall be protected and is privileged from disclosure if disclosure would be detrimental to the national security. Under no circumstances may a military judge order the release of classified information to any person not authorized to receive such information.

“(b) ACCESS TO EVIDENCE.—Any information admitted into evidence pursuant to any rule, procedure, or order by the military judge shall be provided to the accused.

“(c) DECLASSIFICATION.—Trial counsel shall work with the original classification authorities for evidence that may be used at trial to ensure that such evidence is declassified to the maximum ex-

tent possible, consistent with the requirements of national security. A decision not to declassify evidence under this section shall not be subject to review by a military commission or upon appeal.

“(d) CONSTRUCTION OF PROVISIONS.—The judicial construction of the Classified Information Procedures Act (18 U.S.C. App.) shall be authoritative in the interpretation of this subchapter, except to the extent that such construction is inconsistent with the specific requirements of this chapter.

“§ 949p-2. Pretrial conference

“(a) MOTION.—At any time after service of charges, any party may move for a pretrial conference to consider matters relating to classified information that may arise in connection with the prosecution.

“(b) CONFERENCE.—Following a motion under subsection (a), or sua sponte, the military judge shall promptly hold a pretrial conference. Upon request by either party, the court shall hold such conference ex parte to the extent necessary to protect classified information from disclosure, in accordance with the practice of the Federal courts under the Classified Information Procedures Act (18 U.S.C. App.).

“(c) MATTERS TO BE ESTABLISHED AT PRETRIAL CONFERENCE.—

“(1) TIMING OF SUBSEQUENT ACTIONS.—At the pretrial conference, the military judge shall establish the timing of—

“(A) requests for discovery;

“(B) the provision of notice required by section 949p-5 of this title; and

“(C) the initiation of the procedure established by section 949p-6 of this title.

“(2) OTHER MATTERS.—At the pretrial conference, the military judge may also consider any matter—

“(A) which relates to classified information; or

“(B) which may promote a fair and expeditious trial.

“(d) EFFECT OF ADMISSIONS BY ACCUSED AT PRETRIAL CONFERENCE.—No admission made by the accused or by any counsel for the accused at a pretrial conference under this section may be used against the accused unless the admission is in writing and is signed by the accused and by the counsel for the accused.

“§ 949p-3. Protective orders

“Upon motion of the trial counsel, the military judge shall issue an order to protect against the disclosure of any classified information that has been disclosed by the United States to any accused in any military commission under this chapter or that has otherwise been provided to, or obtained by, any such accused in any such military commission.

“§ 949p-4. Discovery of, and access to, classified information by the accused

“(a) LIMITATIONS ON DISCOVERY OR ACCESS BY THE ACCUSED.—

“(1) DECLARATIONS BY THE UNITED STATES OF DAMAGE TO NATIONAL SECURITY.—In any case before a military commission in which the United States seeks to delete, withhold, or otherwise obtain other relief with respect to the discovery of or access

to any classified information, the trial counsel shall submit a declaration invoking the United States' classified information privilege and setting forth the damage to the national security that the discovery of or access to such information reasonably could be expected to cause. The declaration shall be signed by a knowledgeable United States official possessing authority to classify information.

"(2) STANDARD FOR AUTHORIZATION OF DISCOVERY OR ACCESS.—Upon the submission of a declaration under paragraph (1), the military judge may not authorize the discovery of or access to such classified information unless the military judge determines that such classified information would be noncumulative, relevant, and helpful to a legally cognizable defense, rebuttal of the prosecution's case, or to sentencing, in accordance with standards generally applicable to discovery of or access to classified information in Federal criminal cases. If the discovery of or access to such classified information is authorized, it shall be addressed in accordance with the requirements of subsection (b).

"(b) DISCOVERY OF CLASSIFIED INFORMATION.—

"(1) SUBSTITUTIONS AND OTHER RELIEF.—The military judge, in assessing the accused's discovery of or access to classified information under this section, may authorize the United States—

"(A) to delete or withhold specified items of classified information;

"(B) to substitute a summary for classified information;

or

"(C) to substitute a statement admitting relevant facts that the classified information or material would tend to prove.

"(2) EX PARTE PRESENTATIONS.—The military judge shall permit the trial counsel to make a request for an authorization under paragraph (1) in the form of an ex parte presentation to the extent necessary to protect classified information, in accordance with the practice of the Federal courts under the Classified Information Procedures Act (18 U.S.C. App.). If the military judge enters an order granting relief following such an ex parte showing, the entire presentation (including the text of any written submission, verbatim transcript of the ex parte oral conference or hearing, and any exhibits received by the court as part of the ex parte presentation) shall be sealed and preserved in the records of the military commission to be made available to the appellate court in the event of an appeal.

"(3) ACTION BY MILITARY JUDGE.—The military judge shall grant the request of the trial counsel to substitute a summary or to substitute a statement admitting relevant facts, or to provide other relief in accordance with paragraph (1), if the military judge finds that the summary, statement, or other relief would provide the accused with substantially the same ability to make a defense as would discovery of or access to the specific classified information.

"(c) RECONSIDERATION.—An order of a military judge authorizing a request of the trial counsel to substitute, summarize, withhold, or prevent access to classified information under this section

is not subject to a motion for reconsideration by the accused, if such order was entered pursuant to an *ex parte* showing under this section.

“§ 949p-5. Notice by accused of intention to disclose classified information

“(a) NOTICE BY ACCUSED.—

“(1) NOTIFICATION OF TRIAL COUNSEL AND MILITARY JUDGE.—If an accused reasonably expects to disclose, or to cause the disclosure of, classified information in any manner in connection with any trial or pretrial proceeding involving the prosecution of such accused, the accused shall, within the time specified by the military judge or, where no time is specified, within 30 days before trial, notify the trial counsel and the military judge in writing. Such notice shall include a brief description of the classified information. Whenever the accused learns of additional classified information the accused reasonably expects to disclose, or to cause the disclosure of, at any such proceeding, the accused shall notify trial counsel and the military judge in writing as soon as possible thereafter and shall include a brief description of the classified information.

“(2) LIMITATION ON DISCLOSURE BY ACCUSED.—No accused shall disclose, or cause the disclosure of, any information known or believed to be classified in connection with a trial or pretrial proceeding until—

“(A) notice has been given under paragraph (1); and

“(B) the United States has been afforded a reasonable opportunity to seek a determination pursuant to the procedure set forth in section 949p-6 of this title and the time for the United States to appeal such determination under section 950d of this title has expired or any appeal under that section by the United States is decided.

“(b) FAILURE TO COMPLY.—If the accused fails to comply with the requirements of subsection (a), the military judge—

“(1) may preclude disclosure of any classified information not made the subject of notification; and

“(2) may prohibit the examination by the accused of any witness with respect to any such information.

“§ 949p-6. Procedure for cases involving classified information

“(a) MOTION FOR HEARING.—

“(1) REQUEST FOR HEARING.—Within the time specified by the military judge for the filing of a motion under this section, either party may request the military judge to conduct a hearing to make all determinations concerning the use, relevance, or admissibility of classified information that would otherwise be made during the trial or pretrial proceeding.

“(2) CONDUCT OF HEARING.—Upon a request by either party under paragraph (1), the military judge shall conduct such a hearing and shall rule prior to conducting any further proceedings.

“(3) IN CAMERA HEARING UPON DECLARATION TO COURT BY APPROPRIATE OFFICIAL OF RISK OF DISCLOSURE OF CLASSIFIED INFORMATION.—Any hearing held pursuant to this subsection

(or any portion of such hearing specified in the request of a knowledgeable United States official) shall be held in camera if a knowledgeable United States official possessing authority to classify information submits to the military judge a declaration that a public proceeding may result in the disclosure of classified information. Classified information is not subject to disclosure under this section unless the information is relevant and necessary to an element of the offense or a legally cognizable defense and is otherwise admissible in evidence.

“(4) *MILITARY JUDGE TO MAKE DETERMINATIONS IN WRITING.*—As to each item of classified information, the military judge shall set forth in writing the basis for the determination.

“(b) *NOTICE AND USE OF CLASSIFIED INFORMATION BY THE GOVERNMENT.*—

“(1) *NOTICE TO ACCUSED.*—Before any hearing is conducted pursuant to a request by the trial counsel under subsection (a), trial counsel shall provide the accused with notice of the classified information that is at issue. Such notice shall identify the specific classified information at issue whenever that information previously has been made available to the accused by the United States. When the United States has not previously made the information available to the accused in connection with the case the information may be described by generic category, in such forms as the military judge may approve, rather than by identification of the specific information of concern to the United States.

“(2) *ORDER BY MILITARY JUDGE UPON REQUEST OF ACCUSED.*—Whenever the trial counsel requests a hearing under subsection (a), the military judge, upon request of the accused, may order the trial counsel to provide the accused, prior to trial, such details as to the portion of the charge or specification at issue in the hearing as are needed to give the accused fair notice to prepare for the hearing.

“(c) *SUBSTITUTIONS.*—

“(1) *IN CAMERA PRETRIAL HEARING.*—Upon request of the trial counsel pursuant to the Military Commission Rules of Evidence, and in accordance with the security procedures established by the military judge, the military judge shall conduct a classified in camera pretrial hearing concerning the admissibility of classified information.

“(2) *PROTECTION OF SOURCES, METHODS, AND ACTIVITIES BY WHICH EVIDENCE ACQUIRED.*—When trial counsel seeks to introduce evidence before a military commission under this chapter and the Executive branch has classified the sources, methods, or activities by which the United States acquired the evidence, the military judge shall permit trial counsel to introduce the evidence, including a substituted evidentiary foundation pursuant to the procedures described in subsection (d), while protecting from disclosure information identifying those sources, methods, or activities, if—

“(A) the evidence is otherwise admissible; and

“(B) the military judge finds that—

“(i) the evidence is reliable; and

“(ii) the redaction is consistent with affording the accused a fair trial.

“(d) ALTERNATIVE PROCEDURE FOR DISCLOSURE OF CLASSIFIED INFORMATION.—

“(1) MOTION BY THE UNITED STATES.—Upon any determination by the military judge authorizing the disclosure of specific classified information under the procedures established by this section, the trial counsel may move that, in lieu of the disclosure of such specific classified information, the military judge order—

“(A) the substitution for such classified information of a statement admitting relevant facts that the specific classified information would tend to prove;

“(B) the substitution for such classified information of a summary of the specific classified information; or

“(C) any other procedure or redaction limiting the disclosure of specific classified information.

“(2) ACTION ON MOTION.—The military judge shall grant such a motion of the trial counsel if the military judge finds that the statement, summary, or other procedure or redaction will provide the defendant with substantially the same ability to make his defense as would disclosure of the specific classified information.

“(3) HEARING ON MOTION.—The military judge shall hold a hearing on any motion under this subsection. Any such hearing shall be held in camera at the request of a knowledgeable United States official possessing authority to classify information.

“(4) SUBMISSION OF STATEMENT OF DAMAGE TO NATIONAL SECURITY IF DISCLOSURE ORDERED.—The trial counsel may, in connection with a motion under paragraph (1), submit to the military judge a declaration signed by a knowledgeable United States official possessing authority to classify information certifying that disclosure of classified information would cause identifiable damage to the national security of the United States and explaining the basis for the classification of such information. If so requested by the trial counsel, the military judge shall examine such declaration during an ex parte presentation.

“(e) SEALING OF RECORDS OF IN CAMERA HEARINGS.—If at the close of an in camera hearing under this section (or any portion of a hearing under this section that is held in camera), the military judge determines that the classified information at issue may not be disclosed or elicited at the trial or pretrial proceeding, the record of such in camera hearing shall be sealed and preserved for use in the event of an appeal. The accused may seek reconsideration of the military judge’s determination prior to or during trial.

“(f) PROHIBITION ON DISCLOSURE OF CLASSIFIED INFORMATION BY THE ACCUSED; RELIEF FOR ACCUSED WHEN THE UNITED STATES OPPOSES DISCLOSURE.—

“(1) ORDER TO PREVENT DISCLOSURE BY ACCUSED.—Whenever the military judge denies a motion by the trial counsel that the judge issue an order under subsection (a), (c), or (d) and the trial counsel files with the military judge a declaration signed by a knowledgeable United States official possessing authority to classify information objecting to disclosure of the classified information at issue, the military judge shall order that the accused not disclose or cause the disclosure of such information.

“(2) *RESULT OF ORDER UNDER PARAGRAPH (1).*—Whenever an accused is prevented by an order under paragraph (1) from disclosing or causing the disclosure of classified information, the military judge shall dismiss the case, except that, when the military judge determines that the interests of justice would not be served by dismissal of the case, the military judge shall order such other action, in lieu of dismissing the charge or specification, as the military judge determines is appropriate. Such action may include, but need not be limited to, the following:

“(A) *Dismissing specified charges or specifications.*

“(B) *Finding against the United States on any issue as to which the excluded classified information relates.*

“(C) *Striking or precluding all or part of the testimony of a witness.*

“(3) *TIME FOR THE UNITED STATES TO SEEK INTERLOCUTORY APPEAL.*—An order under paragraph (2) shall not take effect until the military judge has afforded the United States—

“(A) *an opportunity to appeal such order under section 950d of this title; and*

“(B) *an opportunity thereafter to withdraw its objection to the disclosure of the classified information at issue.*

“(g) *RECIPROCITY.*—

“(1) *DISCLOSURE OF REBUTTAL INFORMATION.*—Whenever the military judge determines that classified information may be disclosed in connection with a trial or pretrial proceeding, the military judge shall, unless the interests of fairness do not so require, order the United States to provide the accused with the information it expects to use to rebut the classified information. The military judge may place the United States under a continuing duty to disclose such rebuttal information.

“(2) *SANCTION FOR FAILURE TO COMPLY.*—If the United States fails to comply with its obligation under this subsection, the military judge—

“(A) *may exclude any evidence not made the subject of a required disclosure; and*

“(B) *may prohibit the examination by the United States of any witness with respect to such information.*

“§949p-7. Introduction of classified information into evidence

“(a) *PRESERVATION OF CLASSIFICATION STATUS.*—Writings, recordings, and photographs containing classified information may be admitted into evidence in proceedings of military commissions under this chapter without change in their classification status.

“(b) *PRECAUTIONS BY MILITARY JUDGES.*—

“(1) *PRECAUTIONS IN ADMITTING CLASSIFIED INFORMATION INTO EVIDENCE.*—The military judge in a trial by military commission, in order to prevent unnecessary disclosure of classified information, may order admission into evidence of only part of a writing, recording, or photograph, or may order admission into evidence of the whole writing, recording, or photograph with excision of some or all of the classified information contained therein, unless the whole ought in fairness be considered.

“(2) *CLASSIFIED INFORMATION KEPT UNDER SEAL.*—The military judge shall allow classified information offered or ac-

cepted into evidence to remain under seal during the trial, even if such evidence is disclosed in the military commission, and may, upon motion by the United States, seal exhibits containing classified information for any period after trial as necessary to prevent a disclosure of classified information when a knowledgeable United States official possessing authority to classify information submits to the military judge a declaration setting forth the damage to the national security that the disclosure of such information reasonably could be expected to cause.

“(c) TAKING OF TESTIMONY.—

“(1) OBJECTION BY TRIAL COUNSEL.—During the examination of a witness, trial counsel may object to any question or line of inquiry that may require the witness to disclose classified information not previously found to be admissible.

“(2) ACTION BY MILITARY JUDGE.—Following an objection under paragraph (1), the military judge shall take such suitable action to determine whether the response is admissible as will safeguard against the compromise of any classified information. Such action may include requiring trial counsel to provide the military judge with a proffer of the witness’ response to the question or line of inquiry and requiring the accused to provide the military judge with a proffer of the nature of the information sought to be elicited by the accused. Upon request, the military judge may accept an *ex parte* proffer by trial counsel to the extent necessary to protect classified information from disclosure, in accordance with the practice of the Federal courts under the Classified Information Procedures Act (18 U.S.C. App.).

“(d) DISCLOSURE AT TRIAL OF CERTAIN STATEMENTS PREVIOUSLY MADE BY A WITNESS.—

“(1) MOTION FOR PRODUCTION OF STATEMENTS IN POSSESSION OF THE UNITED STATES.—After a witness called by the trial counsel has testified on direct examination, the military judge, on motion of the accused, may order production of statements of the witness in the possession of the United States which relate to the subject matter as to which the witness has testified. This paragraph does not preclude discovery or assertion of a privilege otherwise authorized.

“(2) INVOCATION OF PRIVILEGE BY THE UNITED STATES.—If the United States invokes a privilege, the trial counsel may provide the prior statements of the witness to the military judge during an *ex parte* presentation to the extent necessary to protect classified information from disclosure, in accordance with the practice of the Federal courts under the Classified Information Procedures Act (18 U.S.C. App.).

“(3) ACTION BY MILITARY JUDGE ON MOTION.—If the military judge finds that disclosure of any portion of the statement identified by the United States as classified would be detrimental to the national security in the degree to warrant classification under the applicable Executive Order, statute, or regulation, that such portion of the statement is consistent with the testimony of the witness, and that the disclosure of such portion is not necessary to afford the accused a fair trial, the military judge shall excise that portion from the statement. If the military judge finds that such portion of the statement is incon-

sistent with the testimony of the witness or that its disclosure is necessary to afford the accused a fair trial, the military judge, shall, upon the request of the trial counsel, review alternatives to disclosure in accordance with section 949p–6(d) of this title.

“(b) TREATMENT DURING CONFINEMENT BY OTHER THAN THE ARMED FORCES.—Persons confined under subsection (a)(2) in a penal or correctional institution not under the control of an armed force are subject to the same discipline and treatment as persons confined or committed by the courts of the United States or of the State, District of Columbia, or place in which the institution is situated.

“950j. *Finality of proceedings, findings, and sentences.*

“§ 950a. Error of law; lesser included offense

“(a) *ERROR OF LAW.*—A finding or sentence of a military commission under this chapter may not be held incorrect on the ground of an error of law unless the error materially prejudices the substantial rights of the accused.

“(b) *LESSER INCLUDED OFFENSE.*—Any reviewing authority with the power to approve or affirm a finding of guilty by a military commission under this chapter may approve or affirm, instead, so much of the finding as includes a lesser included offense.

“§ 950b. Review by the convening authority

“(a) *NOTICE TO CONVENING AUTHORITY OF FINDINGS AND SENTENCE.*—The findings and sentence of a military commission under this chapter shall be reported in writing promptly to the convening authority after the announcement of the sentence.

“(b) *SUBMITTAL OF MATTERS BY ACCUSED TO CONVENING AUTHORITY.*—(1) The accused may submit to the convening authority matters for consideration by the convening authority with respect to the findings and the sentence of the military commission under this chapter.

“(2)(A) Except as provided in subparagraph (B), a submittal under paragraph (1) shall be made in writing within 20 days after the accused has been given an authenticated record of trial under section 949o(c) of this title.

“(B) If the accused shows that additional time is required for the accused to make a submittal under paragraph (1), the convening authority may, for good cause, extend the applicable period under subparagraph (A) for not more than an additional 20 days.

“(3) The accused may waive the accused’s right to make a submittal to the convening authority under paragraph (1). Such a waiver shall be made in writing, and may not be revoked. For the purposes of subsection (c)(2), the time within which the accused may make a submittal under this subsection shall be deemed to have expired upon the submittal of a waiver under this paragraph to the convening authority.

“(c) *ACTION BY CONVENING AUTHORITY.*—(1) The authority under this subsection to modify the findings and sentence of a military commission under this chapter is a matter of the sole discretion and prerogative of the convening authority.

“(2) The convening authority is not required to take action on the findings of a military commission under this chapter. If the convening authority takes action on the findings, the convening authority may, in the sole discretion of the convening authority, only—

“(A) dismiss any charge or specification by setting aside a finding of guilty thereto; or

“(B) change a finding of guilty to a charge to a finding of guilty to an offense that is a lesser included offense of the offense stated in the charge.

“(3)(A) The convening authority shall take action on the sentence of a military commission under this chapter.

“(B) Subject to regulations prescribed by the Secretary of Defense, action under this paragraph may be taken only after consideration of any matters submitted by the accused under subsection (b) or after the time for submitting such matters expires, whichever is earlier.

“(C) In taking action under this paragraph, the convening authority may, in the sole discretion of the convening authority, approve, disapprove, commute, or suspend the sentence in whole or in part. The convening authority may not increase a sentence beyond that which is found by the military commission.

“(4) The convening authority shall serve on the accused or on defense counsel notice of any action taken by the convening authority under this subsection.

“(d) ORDER OF REVISION OR REHEARING.—(1) Subject to paragraphs (2) and (3), the convening authority of a military commission under this chapter may, in the sole discretion of the convening authority, order a proceeding in revision or a rehearing.

“(2)(A) Except as provided in subparagraph (B), a proceeding in revision may be ordered by the convening authority if—

“(i) there is an apparent error or omission in the record; or

“(ii) the record shows improper or inconsistent action by the military commission with respect to the findings or sentence that can be rectified without material prejudice to the substantial rights of the accused.

“(B) In no case may a proceeding in revision—

“(i) reconsider a finding of not guilty of a specification or a ruling which amounts to a finding of not guilty;

“(ii) reconsider a finding of not guilty of any charge, unless there has been a finding of guilty under a specification laid under that charge, which sufficiently alleges a violation; or

“(iii) increase the severity of the sentence unless the sentence prescribed for the offense is mandatory.

“(3) A rehearing may be ordered by the convening authority if the convening authority disapproves the findings and sentence and states the reasons for disapproval of the findings. If the convening authority disapproves the finding and sentence and does not order a rehearing, the convening authority shall dismiss the charges. A rehearing as to the findings may not be ordered by the convening authority when there is a lack of sufficient evidence in the record to support the findings. A rehearing as to the sentence may be ordered by the convening authority if the convening authority disapproves the sentence.

“§ 950c. Appellate referral; waiver or withdrawal of appeal

“(a) AUTOMATIC REFERRAL FOR APPELLATE REVIEW.—Except as provided in subsection (b), in each case in which the final decision of a military commission under this chapter (as approved by the convening authority) includes a finding of guilty, the convening authority shall refer the case to the United States Court of Military Commission Review. Any such referral shall be made in accordance with procedures prescribed under regulations of the Secretary.

“(b) WAIVER OF RIGHT OF REVIEW.—(1) Except in a case in which the sentence as approved under section 950b of this title extends to death, an accused may file with the convening authority a statement expressly waiving the right of the accused to appellate review by the United States Court of Military Commission Review under section 950f of this title of the final decision of the military commission under this chapter.

“(2) A waiver under paragraph (1) shall be signed by both the accused and a defense counsel.

“(3) A waiver under paragraph (1) must be filed, if at all, within 10 days after notice of the action is served on the accused or on defense counsel under section 950b(c)(4) of this title. The convening authority, for good cause, may extend the period for such filing by not more than 30 days.

“(c) WITHDRAWAL OF APPEAL.—Except in a case in which the sentence as approved under section 950b of this title extends to death, the accused may withdraw an appeal at any time.

“(d) EFFECT OF WAIVER OR WITHDRAWAL.—A waiver of the right to appellate review or the withdrawal of an appeal under this section bars review under section 950f of this title.

“§ 950d. Interlocutory appeals by the United States

“(a) INTERLOCUTORY APPEAL.—Except as provided in subsection (b), in a trial by military commission under this chapter, the United States may take an interlocutory appeal to the United States Court of Military Commission Review of any order or ruling of the military judge—

“(1) that terminates proceedings of the military commission with respect to a charge or specification;

“(2) that excludes evidence that is substantial proof of a fact material in the proceeding;

“(3) that relates to a matter under subsection (c) or (d) of section 949d of this title; or

“(4) that, with respect to classified information—

“(A) authorizes the disclosure of such information;

“(B) imposes sanctions for nondisclosure of such information; or

“(C) refuses a protective order sought by the United States to prevent the disclosure of such information.

“(b) LIMITATION.—The United States may not appeal under subsection (a) an order or ruling that is, or amounts to, a finding of not guilty by the military commission with respect to a charge or specification.

“(c) SCOPE OF APPEAL RIGHT WITH RESPECT TO CLASSIFIED INFORMATION.—The United States has the right to appeal under paragraph (4) of subsection (a) whenever the military judge enters an order or ruling that would require the disclosure of classified information, without regard to whether the order or ruling appealed from was entered under this chapter, another provision of law, a rule, or otherwise. Any such appeal may embrace any preceding order, ruling, or reasoning constituting the basis of the order or ruling that would authorize such disclosure.

“(d) TIMING AND ACTION ON INTERLOCUTORY APPEALS RELATING TO CLASSIFIED INFORMATION.—

“(1) APPEAL TO BE EXPEDITED.—An appeal taken pursuant to paragraph (4) of subsection (a) shall be expedited by the United States Court of Military Commission Review.

“(2) APPEALS BEFORE TRIAL.—If such an appeal is taken before trial, the appeal shall be taken within 10 days after the order or ruling from which the appeal is made and the trial shall not commence until the appeal is decided.

“(3) APPEALS DURING TRIAL.—If such an appeal is taken during trial, the military judge shall adjourn the trial until the appeal is decided, and the court of appeals—

“(A) shall hear argument on such appeal within 4 days of the adjournment of the trial (excluding weekends and holidays);

“(B) may dispense with written briefs other than the supporting materials previously submitted to the military judge;

“(C) shall render its decision within four days of argument on appeal (excluding weekends and holidays); and

“(D) may dispense with the issuance of a written opinion in rendering its decision.

“(e) NOTICE AND TIMING OF OTHER APPEALS.—The United States shall take an appeal of an order or ruling under subsection (a), other than an appeal under paragraph (4) of that subsection, by filing a notice of appeal with the military judge within 5 days after the date of the order or ruling.

“(f) METHOD OF APPEAL.—An appeal under this section shall be forwarded, by means specified in regulations prescribed by the Secretary of Defense, directly to the United States Court of Military Commission Review.

“(g) APPEALS COURT TO ACT ONLY WITH RESPECT TO MATTER OF LAW.—In ruling on an appeal under paragraph (1), (2), or (3) of subsection (a), the appeals court may act only with respect to matters of law.

“(h) SUBSEQUENT APPEAL RIGHTS OF ACCUSED NOT AFFECTED.—An appeal under paragraph (4) of subsection (a), and a decision on such appeal, shall not affect the right of the accused, in a subsequent appeal from a judgment of conviction, to claim as error reversal by the military judge on remand of a ruling appealed from during trial.

“§ 950e. Rehearings

“(a) COMPOSITION OF MILITARY COMMISSION FOR REHEARING.—Each rehearing under this chapter shall take place before a military commission under this chapter composed of members who were not members of the military commission which first heard the case.

“(b) SCOPE OF REHEARING.—(1) Upon a rehearing—

“(A) the accused may not be tried for any offense of which the accused was found not guilty by the first military commission; and

“(B) no sentence in excess of or more than the original sentence may be imposed unless—

“(i) the sentence is based upon a finding of guilty of an offense not considered upon the merits in the original proceedings; or

“(ii) the sentence prescribed for the offense is mandatory.

“(2) Upon a rehearing, if the sentence approved after the first military commission was in accordance with a pretrial agreement and the accused at the rehearing changes his plea with respect to the charges or specifications upon which the pretrial agreement was based, or otherwise does not comply with pretrial agreement, the sentence as to those charges or specifications may include any punishment not in excess of that lawfully adjudged at the first military commission.

“§950f. Review by United States Court of Military Commission Review

“(a) *ESTABLISHMENT.*—There is a court of record to be known as the ‘United States Court of Military Commission Review’ (in this section referred to as the ‘Court’). The Court shall consist of one or more panels, each composed of not less than three appellate military judges. For the purpose of reviewing decisions of military commissions under this chapter, the Court may sit in panels or as a whole, in accordance with rules prescribed by the Secretary of Defense.

“(b) *JUDGES.*—(1) Judges on the Court shall be assigned or appointed in a manner consistent with the provisions of this subsection.

“(3) The President may appoint, by and with the advice and consent of the Senate, additional judges to the United States Court of Military Commission Review.

“(4) No person may serve as a judge on the Court in any case in which that person acted as a military judge, counsel, or reviewing official.

“(c) *CASES TO BE REVIEWED.*—The Court shall, in accordance with procedures prescribed under regulations of the Secretary, review the record in each case that is referred to the Court by the convening authority under section 950c of this title with respect to any matter properly raised by the accused.

“(d) *STANDARD AND SCOPE OF REVIEW.*—In a case reviewed by the Court under this section, the Court may act only with respect to the findings and sentence as approved by the convening authority. The Court may affirm only such findings of guilty, and the sentence or such part or amount of the sentence, as the Court finds correct in law and fact and determines, on the basis of the entire record, should be approved. In considering the record, the Court may weigh the evidence, judge the credibility of witnesses, and determine controverted questions of fact, recognizing that the military commission saw and heard the witnesses.

“(e) *REHEARINGS.*—If the Court sets aside the findings or sentence, the Court may, except where the setting aside is based on lack of sufficient evidence in the record to support the findings, order a rehearing. If the Court sets aside the findings or sentence and does not order a rehearing, the Court shall order that the charges be dismissed.

“§950g. Review by United States Court of Appeals for the District of Columbia Circuit; writ of certiorari to Supreme Court

“(a) *EXCLUSIVE APPELLATE JURISDICTION.*—Except as provided in subsection (b), the United States Court of Appeals for the District of Columbia Circuit shall have exclusive jurisdiction to determine the validity of a final judgment rendered by a military commission (as approved by the convening authority and, where applicable, the United States Court of Military Commission Review) under this chapter.

“(b) *EXHAUSTION OF OTHER APPEALS.*—The United States Court of Appeals for the District of Columbia Circuit may not review a final judgment described in subsection (a) until all other appeals under this chapter have been waived or exhausted.

“(c) *TIME FOR SEEKING REVIEW.*—A petition for review by the United States Court of Appeals for the District of Columbia Circuit must be filed by the accused in the Court of Appeals not later than 20 days after the date on which—

“(1) written notice of the final decision of the United States Court of Military Commission Review is served on the accused or on defense counsel; or

“(2) the accused submits, in the form prescribed by section 950c of this title, a written notice waiving the right of the accused to review by the United States Court of Military Commission Review.

“(d) *SCOPE AND NATURE OF REVIEW.*—The United States Court of Appeals for the District of Columbia Circuit may act under this section only with respect to the findings and sentence as approved by the convening authority and as affirmed or set aside as incorrect in law by the United States Court of Military Commission Review, and shall take action only with respect to matters of law, including the sufficiency of the evidence to support the verdict.

“(e) *REVIEW BY SUPREME COURT.*—The Supreme Court may review by writ of certiorari pursuant to section 1254 of title 28 the final judgment of the United States Court of Appeals for the District of Columbia Circuit under this section.

“§ 950h. Appellate counsel

“(a) *APPOINTMENT.*—The Secretary of Defense shall, by regulation, establish procedures for the appointment of appellate counsel for the United States and for the accused in military commissions under this chapter. Appellate counsel shall meet the qualifications of counsel for appearing before military commissions under this chapter.

“(b) *REPRESENTATION OF UNITED STATES.*—Appellate counsel appointed under subsection (a)—

“(1) shall represent the United States in any appeal or review proceeding under this chapter before the United States Court of Military Commission Review; and

“(2) may, when requested to do so by the Attorney General in a case arising under this chapter, represent the United States before the United States Court of Appeals for the District of Columbia Circuit or the Supreme Court.

“(c) *REPRESENTATION OF ACCUSED.*—The accused shall be represented by appellate counsel appointed under subsection (a) before the United States Court of Military Commission Review, the United States Court of Appeals for the District of Columbia Circuit, and the Supreme Court, and by civilian counsel if retained by the accused. Any such civilian counsel shall meet the qualifications under paragraph (3) of section 949c(b) of this title for civilian counsel appearing before military commissions under this chapter and shall be subject to the requirements of paragraph (7) of that section.

“§ 950i. Execution of sentence; suspension of sentence

“(a) *IN GENERAL.*—The Secretary of Defense is authorized to carry out a sentence imposed by a military commission under this chapter in accordance with such procedures as the Secretary may prescribe.

“(b) *EXECUTION OF SENTENCE OF DEATH ONLY UPON APPROVAL BY THE PRESIDENT.*—If the sentence of a military commission under this chapter extends to death, that part of the sentence providing for death may not be executed until approved by the President. In such a case, the President may commute, remit, or suspend the sentence, or any part thereof, as he sees fit.

“(c) *EXECUTION OF SENTENCE OF DEATH ONLY UPON FINAL JUDGMENT OF LEGALITY OF PROCEEDINGS.*—(1) If the sentence of a military commission under this chapter extends to death, the sentence may not be executed until there is a final judgment as to the legality of the proceedings (and with respect to death, approval under subsection (b)).

“(2) A judgment as to legality of proceedings is final for purposes of paragraph (1) when review is completed in accordance with the judgment of the United States Court of Military Commission Review and—

“(A) the time for the accused to file a petition for review by the United States Court of Appeals for the District of Columbia Circuit has expired, the accused has not filed a timely petition for such review, and the case is not otherwise under review by the Court of Appeals; or

“(B) review is completed in accordance with the judgment of the United States Court of Appeals for the District of Columbia Circuit and—

“(i) a petition for a writ of certiorari is not timely filed;

“(ii) such a petition is denied by the Supreme Court; or

“(iii) review is otherwise completed in accordance with the judgment of the Supreme Court.

“(d) *SUSPENSION OF SENTENCE.*—The Secretary of the Defense, or the convening authority acting on the case (if other than the Secretary), may suspend the execution of any sentence or part thereof in the case, except a sentence of death.

“§ 950j. Finality of proceedings, findings, and sentences

“The appellate review of records of trial provided by this chapter, and the proceedings, findings, and sentences of military commissions as approved, reviewed, or affirmed as required by this chapter, are final and conclusive. Orders publishing the proceedings of military commissions under this chapter are binding upon all departments, courts, agencies, and officers of the United States, subject only to action by the Secretary or the convening authority as provided in section 950i(c) of this title and the authority of the President.

“SUBCHAPTER VIII—PUNITIVE MATTERS

“Sec.

“950p. Definitions; construction of certain offenses; common circumstances.

“950q. Principals.

“950r. Accessory after the fact.

“950s. Conviction of lesser offenses.

“950t. Crimes triable by military commission.

“§ 950p. Definitions; construction of certain offenses; common circumstances

“(a) DEFINITIONS.—In this subchapter:

“(1) The term ‘military objective’ means combatants and those objects during hostilities which, by their nature, location, purpose, or use, effectively contribute to the war-fighting or war-sustaining capability of an opposing force and whose total or partial destruction, capture, or neutralization would constitute a definite military advantage to the attacker under the circumstances at the time of an attack.

“(2) The term ‘protected person’ means any person entitled to protection under one or more of the Geneva Conventions, including civilians not taking an active part in hostilities, military personnel placed out of combat by sickness, wounds, or detention, and military medical or religious personnel.

“(3) The term ‘protected property’ means any property specifically protected by the law of war, including buildings dedicated to religion, education, art, science, or charitable purposes, historic monuments, hospitals, and places where the sick and wounded are collected, but only if and to the extent such property is not being used for military purposes or is not otherwise a military objective. The term includes objects properly identified by one of the distinctive emblems of the Geneva Conventions, but does not include civilian property that is a military objective.

“(b) CONSTRUCTION OF CERTAIN OFFENSES.—The intent required for offenses under paragraphs (1), (2), (3), (4), and (12) of section 950t of this title precludes the applicability of such offenses with regard to collateral damage or to death, damage, or injury incident to a lawful attack.

“(c) COMMON CIRCUMSTANCES.—An offense specified in this subchapter is triable by military commission under this chapter only if the offense is committed in the context of and associated with hostilities.

“(d) EFFECT.—The provisions of this subchapter codify offenses that have traditionally been triable by military commission. This chapter does not establish new crimes that did not exist before the date of the enactment of this subchapter, as amended by the National Defense Authorization Act for Fiscal Year 2010, but rather codifies those crimes for trial by military commission. Because the provisions of this subchapter codify offenses that have traditionally been triable under the law of war or otherwise triable by military commission, this subchapter does not preclude trial for offenses that occurred before the date of the enactment of this subchapter, as so amended.

“§ 950q. Principals

“Any person punishable under this chapter who—

“(1) commits an offense punishable by this chapter, or aids, abets, counsels, commands, or procures its commission;

“(2) causes an act to be done which if directly performed by him would be punishable by this chapter; or

“(3) is a superior commander who, with regard to acts punishable by this chapter, knew, had reason to know, or should have known, that a subordinate was about to commit such acts or had done so and who failed to take the necessary and reasonable measures to prevent such acts or to punish the perpetrators thereof,

is a principal.

“§ 950r. Accessory after the fact

“Any person subject to this chapter who, knowing that an offense punishable by this chapter has been committed, receives, comforts, or assists the offender in order to hinder or prevent his apprehension, trial, or punishment shall be punished as a military commission under this chapter may direct.

(3) concurrent with the surveys next conducted under the provisions of section 5304(d)(1)(A) of title 5, United States Code, beginning after the date of the enactment of this Act, the Bureau of Labor Statistics should conduct separate surveys to determine the extent of any pay disparity (as defined by section 5302 of that title) that may exist with respect to positions located in the State of Alaska, the State of Hawaii, and the United States territories, including American Samoa, Guam, Commonwealth of the Northern Mariana Islands, Commonwealth of Puerto Rico, and the United States Virgin Islands;

For employees in allowance areas, the minimum step rate for any grade of a special rate schedule shall be increased at the time of an increase in the applicable locality rate percentage for the allowance area by not less than the dollar increase in the locality-based comparability payment for a non-special rate employee at the same minimum step provided under section 1914 of this subtitle, and corresponding increases shall be provided for all step rates of the given pay range.

(2) CONTINUATION OF COST OF LIVING ALLOWANCE RATE.—If an employee, who the day before the date of enactment of this Act was eligible to receive a cost-of-living allowance under section 5941 of title 5, United States Code, would receive a rate of basic pay and applicable locality-based comparability payment which is in excess of the maximum rate limitation set under section 5304(g) of title 5, United States Code, for his position (but for that maximum rate limitation) due to the operation of this subtitle, the employee shall continue to receive the cost-of-living allowance rate in effect on December 31, 2009 without adjustment until—

(A) the employee leaves the allowance area or pay system; or

(B) the employee is entitled to receive basic pay (including any applicable locality-based comparability payment or similar supplement) at a higher rate, but, when any such position becomes vacant, the pay of any subsequent appointee thereto shall be fixed in the manner provided by applicable law and regulation.

(3) LOCALITY-BASED COMPARABILITY PAYMENTS.—Any employee covered under paragraph (2) shall receive any applicable locality-based comparability payment extended under section 1914 of this subtitle which is not in excess of the maximum rate set under section 5304(g) of title 5, United States Code, for his position including any future increase to statutory pay limitations under 5318 of title 5, United States Code. Notwithstanding paragraph (2), to the extent that an employee covered under that paragraph receives any amount of locality-based comparability payment, the cost-of-living allowance rate under that paragraph shall be reduced accordingly, as provided under section 5941(c)(2)(B) of title 5, United States Code.

SEC. 3144. SENSE OF CONGRESS ON PRODUCTION OF MOLYBDENUM-99.

(a) FINDINGS.—Congress finds the following:

(1) There are fewer than five reactors around the world currently capable of producing molybdenum-99 (in this section referred to as “Mo-99”) and there are no such reactors in the United States that can provide a reliable supply of Mo-99 to meet medical needs.

(2) Since November 2007, there have been major disruptions in the global availability of Mo-99, including at facilities in Canada and the Netherlands, which have led to shortages of Mo-99-based medical products in the United States and around the world.

(3) Ensuring a reliable supply of medical radioisotopes, including Mo-99, is of great importance to the public health.

(4) It is also a national security priority of the United States, and specifically of the Department of Energy, to encourage the production of low-enriched uranium-based radioisotopes in order to promote a more peaceful international nuclear order.

(5) The National Academy of Sciences has identified a need to establish a reliable capability in the United States for the production of Mo-99 and its derivatives for medical purposes using low-enriched uranium.

(6) There also exists a capable industrial base in the United States that can support the development of Mo-99 production facilities and can conduct the processing and distribution of

radiopharmaceutical products for use in medical tests worldwide.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) radioisotopes and radiopharmaceuticals, including Mo-99 and its derivatives, are essential components of medical tests that help diagnose and treat life-threatening diseases affecting millions of people each year; and

(2) the Secretary of Energy should continue and expand a program to meet the need identified by the National Academy of Sciences to ensure a source of Mo-99 and its derivatives for use in medical tests to help ensure the health security of the United States and around the world and promote peaceful nuclear industries through the use of low-enriched uranium.

Sec. 4713. *Report on mandatory minimum sentencing provisions.*

SEC. 4701. SHORT TITLE.

This division may be cited as the "Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention Act".

SEC. 4702. FINDINGS.

Congress makes the following findings:

(1) *The incidence of violence motivated by the actual or perceived race, color, religion, national origin, gender, sexual orientation, gender identity, or disability of the victim poses a serious national problem.*

(2) *Such violence disrupts the tranquility and safety of communities and is deeply divisive.*

(3) *State and local authorities are now and will continue to be responsible for prosecuting the overwhelming majority of violent crimes in the United States, including violent crimes motivated by bias. These authorities can carry out their responsibilities more effectively with greater Federal assistance.*

(4) *Existing Federal law is inadequate to address this problem.*

(5) *A prominent characteristic of a violent crime motivated by bias is that it devastates not just the actual victim and the family and friends of the victim, but frequently savages the community sharing the traits that caused the victim to be selected.*

(6) *Such violence substantially affects interstate commerce in many ways, including the following:*

(A) *The movement of members of targeted groups is impeded, and members of such groups are forced to move across State lines to escape the incidence or risk of such violence.*

(B) *Members of targeted groups are prevented from purchasing goods and services, obtaining or sustaining employment, or participating in other commercial activity.*

(C) *Perpetrators cross State lines to commit such violence.*

(D) *Channels, facilities, and instrumentalities of interstate commerce are used to facilitate the commission of such violence.*

(E) *Such violence is committed using articles that have traveled in interstate commerce.*

(7) *For generations, the institutions of slavery and involuntary servitude were defined by the race, color, and ancestry of those held in bondage. Slavery and involuntary servitude were enforced, both prior to and after the adoption of the 13th amendment to the Constitution of the United States, through widespread public and private violence directed at persons because of their race, color, or ancestry, or perceived race, color, or ancestry. Accordingly, eliminating racially motivated violence is an important means of eliminating, to the extent possible, the badges, incidents, and relics of slavery and involuntary servitude.*

(8) *Both at the time when the 13th, 14th, and 15th amendments to the Constitution of the United States were adopted, and continuing to date, members of certain religious and na-*

tional origin groups were and are perceived to be distinct “races”. Thus, in order to eliminate, to the extent possible, the badges, incidents, and relics of slavery, it is necessary to prohibit assaults on the basis of real or perceived religions or national origins, at least to the extent such religions or national origins were regarded as races at the time of the adoption of the 13th, 14th, and 15th amendments to the Constitution of the United States.

(9) Federal jurisdiction over certain violent crimes motivated by bias enables Federal, State, and local authorities to work together as partners in the investigation and prosecution of such crimes.

(10) The problem of crimes motivated by bias is sufficiently serious, widespread, and interstate in nature as to warrant Federal assistance to States, local jurisdictions, and Indian tribes.

SEC. 4703. DEFINITIONS.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF
CONFERENCE

SUMMARY STATEMENT OF CONFERENCE ACTIONS

Explanation of funding summary

The administration's budget request for national defense discretionary programs for fiscal year 2010 was \$680.2 billion. This amount was primarily comprised of \$550.2 billion for the base budget of which \$533.8 billion was for the Department of Defense and \$16.4 billion was for the Department of Energy. The discretionary budget request also included \$130.0 billion for overseas contingency operations. In total, the conference agreement authorizes \$680.2 billion, which matches the request. The conference agreement authorizes \$550.2 billion for the base budget and \$130.0 billion for overseas contingency operations. The agreement accommodates a budget amendment received on August 13, 2009, to reallocate approximately \$1.0 billion from lower-priority Department of Defense contingency operations' requirements to expand the Army's active component by up to 22,000 personnel in 2010.

The administration's budget for national defense also included discretionary programs outside the jurisdiction of the committees, discretionary programs that do not require further authorizations, mandatory programs that are part of current law, and a new mandatory proposal dealing with concurrent receipt. When these programs are added the total request for national defense equaled \$693.1 billion as re-estimated by the Congressional Budget Office. The bill is consistent with this level with one exception. The administration's concurrent receipt proposal was not included in this bill as acceptable and specific offsets were not proposed by the administration.

The following two tables summarize the direct authorizations and the equivalent budget authority levels for fiscal year 2010 defense programs. The first table summarizes the conference agreement on national defense authorizations. It also includes a memorandum of non-defense authorizations in the agreement. The second table summarizes the total budget authority implication for national defense by adding funding for items that are not within the jurisdiction of the committees or that do not require an annual authorization.

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE I—PROCUREMENT

BUDGET ITEMS

Paladin Integration Management

The budget request included \$96.5 million in Weapons and Tracked Combat Vehicles, Army, for M109A6 Paladin Integration Management (PIM).

The House bill and the Senate amendment would authorize the budget request.

The conferees agree to a \$91.5 million decrease for PIM procurement as requested by the Army.

Standard Missile-3 procurement

The budget request included \$168.7 million in Procurement, Defense-wide, for procurement of Standard Missile-3 (SM-3) Block IA interceptors for the Aegis Ballistic Missile Defense (BMD) system.

The House bill would authorize the budget request.

The Senate amendment would authorize the budget request.

The conference agreement would authorize \$191.9 million in Procurement, Defense-wide, for procurement of SM-3 Block IA missiles, an increase of \$23.2 million.

The conferees note that on September 17, 2009, the President announced a new missile defense architecture for Europe that will rely heavily on the SM-3 interceptor, to be used both on ships and on land. The first phase of the architecture, to be deployed in 2011, would include deployment of Aegis BMD ships equipped with SM-3 Block IA interceptors to defend against existing Iranian short- and medium-range ballistic missiles. The conferees believe it would be valuable to increase the inventory of SM-3 Block IA interceptors to defend against Iran's existing ballistic missile capabilities.

National Guard and Reserve Equipment—Overview

The budget request for fiscal year 2010 included an authorization request for National Guard and Reserve Equipment procurement within various accounts in the Department of Defense.

The House bill would authorize \$600.0 million specifically for National Guard and Reserve Equipment.

The Senate amendment would provide no authorization for National Guard and Reserve Equipment.

The conferees recommend an authorization of \$600.0 million for National Guard and Reserve Equipment. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

The conferees expect that the National Guard and Reserve forces to use this funding to procure high priority equipment that would be used by these units in their critical dual mission role of full-spectrum combat operations and domestic civil support missions.

ITEMS OF SPECIAL INTEREST

VH-71 Presidential helicopter program

In April 2009, the administration proposed in budget documents, including a document called "Terminations, Reductions, and Savings, Fiscal Year 2010," to terminate the Presidential helicopter replacement (VH-71) program and initiate a new Presidential helicopter replacement program.

The Secretary of Defense announced on April 6, 2009, the cancellation of the VH-71 program, after that program experienced a history of excessive and uncontrolled cost growth and persistent slips in its delivery schedule. On May 15, 2009, the Under Secretary of Defense for Acquisitions, Technology, and Logistics issued an acquisition decision memorandum implementing the Secretary's decision and the Department of the Navy issued a stop-work order on the program. Subsequently, on June 1, 2009, the Secretary of the Navy canceled the System Development and Design contract for the program.

While the conferees agree that cancellation of the program was warranted under the circumstances, they are disappointed that:

(1) the Nation has invested more than \$3.0 billion in this program and has little to show for that investment;

(2) the Navy invested considerable time and talent in trying to implement the acquisition program without success; and

(3) the "requirements" system failed to do its fair share of trading requirements or adding resources when the acquisition program ran into immovable obstacles.

During this process, the Navy and its acquisition system failed to receive adequate support, resources, and authority from the Office of the Secretary of Defense (OSD) and the White House Military Office (WHMO) to execute a successful acquisition program. The conferees understand that despite the many warnings and expert advice from the Government Accountability Office, Navy acquisition officials were directed by OSD and WHMO to execute a schedule-driven program and were unable to adhere to prudent acquisition practices.

The conferees note that a June 5, 2009, Congressional Research Service report cites Navy estimates that a new acquisition program would probably cost between \$10.0 billion and \$17.0 billion.

Therefore, given that level of possible investment, the conferees strongly encourage the Department of Defense and the Executive Branch to consider a complete range of alternatives for meeting requirements. The conferees believe that such consideration must include evaluating both single- and multi-platform solutions to meet the complete transportation requirements of the President, and evaluating costs, consider the investment already made in the VH-71 program for possible use for some portion of the mission within a multi-platform solution. The conferees also believe that a program to replace the Presidential helicopter presents a particularly valuable opportunity for the Department of Defense to demonstrate the right way to develop and procure major weapon systems. Accordingly, the conferees expect that, in implementing such a program, the Department will fully comply with the letter and the spirit of the recently enacted Weapon Systems Acquisition Reform Act of 2009 (Public Law 111-23).

Subtitle A—Authorization of Appropriations

LEGISLATIVE PROVISIONS ADOPTED

Authorization of appropriations (secs. 101–106)

The House bill contained provisions (secs. 101–106) that would authorize the recommended fiscal year 2010 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, Defense-wide activities, and National Guard and reserve equipment, and Rapid Acquisition Fund.

The Senate amendment contained provisions (secs. 101–104) that would authorize the recommended fiscal year 2010 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, and Defense-wide activities.

The conferees agree to include provisions that would authorize the recommended fiscal year 2010 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, Defense-wide activities, National Guard and reserve equipment, and Mine Resistant Ambush Protected Vehicle Fund.

Relation to funding table (sec. 107)

The Senate amendment contained a provision that would specify that the amounts authorized to be appropriated by sections 101, 102, 103, and 104 of the amendment would be available, in accordance with the requirements of section 4001 of the amendment, for projects, programs, and activities, and in the amounts, specified in the funding table in section 4101 of the amendment.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Subtitle B—Army Programs

Procurement of future combat systems spin out early-infantry brigade combat team equipment (sec. 111)

The House bill contained a provision (sec. 112) that would limit the Army to the procurement of one brigade set of Future Combat Systems spin out early-infantry brigade combat team equipment in order to allow for adequate testing prior to full-rate production.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Army to increase the quantity of equipment procured through low-rate initial production provided that the Under Secretary of Defense for Acquisition, Technology, and Logistics makes certain certifications with respect to the program's strategy and baseline, testing, technology readiness, and independent cost estimates.

Subtitle C—Navy Programs

Littoral Combat Ship program (sec. 121)

The House bill contained a provision (sec. 121) that would restructure the cost cap for the Littoral Combat Ship (LCS) program, subject to certain prerequisites and certifications. The bill would also authorize the Secretary to obligate funds to compile a technical data package necessary for future competition.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would provide authority to the Secretary of the Navy to implement a new acquisition strategy, as requested by the Secretary, that would utilize a block-buy approach for the procurement of LCS vessels during the period of fiscal year 2010 through 2014, and would include authority to obligate funds for economic order quantity buys and cost reduction initiatives, should such measures improve overall program affordability. The conferees note that, unlike a multiyear procurement, a block-buy is useful here in that it conveys a long-term commitment by the Government to execute the program in a way that allows the Government to extract economic advantages from its purchases. However, a block-buy does not bind the government to performance under a multiyear contract, thereby subjecting the government to liability for cancellation or termination costs in the event of non-performance under the contract.

In addition, the amendment would apply a revised cost cap to the fiscal 2011 ships, which could be waived under certain circumstances. The amendment would also require the Navy to obtain a technical data package from the winning LCS contractor.

The conferees support the revised acquisition strategy for the program, which is based upon many of the principles long advocated by the conferees, including enhancing competition, assuring more program stability, achieving more efficient construction rates, incentivizing industry investment, and increasing commonality.

The conferees recognize that the existing cost cap for the LCS program has been effective, prohibiting the Navy from awarding an unaffordable contract in fiscal year 2010. Consequently, the conferees agree to retain a cost cap, while giving the Secretary of the Navy significant discretion in the award of the fiscal year 2010 through 2014 ships. The conferees intend the cost cap described in subsection (c)(1) to apply to the fiscal year 2011 ships and any additional ship constructed through 2014 at the shipyard that is a member of the contractor team selected in response to the solicitation for the fiscal year 2010 ships.

The conferees expect that, if contractors and suppliers respond to this solicitation with aggressive pricing proposals that result in a more affordable program, the government will guarantee long-

term stability in the procurement plan. The conferees believe that, with aggressive construction yard investment and “design for affordability” changes, costs for vessels should continue to decline (in constant dollars) over the period of the block-buy.

The amendment would also require that the Navy report yearly on specific costs incurred in the construction of LCS vessels and adjustments to the cost caps. The conferees intend that this annual report would assist in providing strong oversight on the costs of this program. If the Navy and contractors are unable to achieve significant cost savings under this new acquisition strategy, the conferees’ support for this program will not be assured.

Treatment of Littoral Combat Ship program as a major defense acquisition program (sec. 122)

The Senate amendment contained a provision (sec. 111) that would require the Littoral Combat Ship program be designated as a major defense acquisition program.

The House bill contained no similar provision.

The House recesses.

The conferees note that the Weapon Systems Acquisition Reform Act of 2009 (Public Law 111–23), if interpreted properly, would require this program already to be so designated.

Report on strategic plan for homeporting the Littoral Combat Ship (sec. 123)

The Senate amendment contained a provision (sec. 112) that would require the Secretary of the Navy to submit a strategic plan for homeporting vessels in the Littoral Combat Ship program.

The House bill contained no similar provision.

The House recesses with technical amendments.

Advance procurement funding (sec. 124)

The House bill contained a provision (sec. 123) that would authorize the Secretary of the Navy to use advance procurement funds to enter into contracts for production planning and other related support services that reduce overall procurement lead time of the vessel. Additionally, this section would authorize the Secretary to enter into contracts for advance construction efforts for the aircraft carrier designated CVN–79, if the Secretary determines that cost savings, construction efficiencies, or workforce stability would be achieved through the use of such contracts.

The Senate amendment contained no similar provision.

The Senate recesses.

Procurement programs for future naval surface combatants (sec. 125)

The Senate amendment contained a provision (sec. 113) that would prevent the Navy from obligating any funds for building surface combatants after 2011 until the Navy conducts particular analyses, and completes certain tasks that should be required at the beginning of major defense acquisition programs. The committee report (S. Rept. 111–35) also would direct that the Secretary of the Navy obligate no more than 50 percent of the funds authorized for fiscal year 2010 in PE 24201N, CG(X), until the Navy sub-

mits a plan for implementing the requirements of this section to the congressional defense committees.

The House bill contained no similar provision.

The House recedes with technical amendments. The conferees agree to direct that the Secretary submit the plan for implementing the requirements of this section to the congressional defense committees at the same time as the President submits the budget request for fiscal year 2011.

Ford-class aircraft carrier report (sec. 126)

The House bill contained a provision (sec. 122) that would require the Secretary of the Navy to make an assessment of the cost of shifting to 5-year intervals for the construction of aircraft carriers, including the effect of such shifting of that interval on other programs. The House bill would have placed a limitation on the use of any funds for the aircraft carrier, designated CVN-79, for shifting to a 5-year interval.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would remove the limitation on the use of funds for CVN-79.

The conferees note that a 5-year interval for aircraft carrier construction, as proposed by the Secretary of Defense, may be the appropriate course of action for the Department of the Navy. However, the conferees are concerned that this decision may not have been made following a rigorous cost-benefit analysis. Therefore, the conferees expect that the Secretary of the Navy will take no further action to preclude the ability of the Secretary to award a construction contract for CVN-79 in fiscal year 2012 or the aircraft carrier designated CVN-80 in fiscal year 2016, consistent with the Annual Long-Range Plan for Construction of Naval Vessels for Fiscal Year 2009, until he completes the required assessment and fully informs the congressional defense committees of any such a decision.

Report on service life extension program for Oliver Hazard Perry class frigates (sec. 127)

The Senate amendment contained a provision (sec. 114) that would require the Secretary of the Navy to submit a report on a service life extension program for the Oliver Hazard Perry class frigates.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Conditional multiyear procurement authority for F/A-18E, F/A-18F, or EA-18G aircraft (sec. 128)

The House bill contained a provision (sec. 124) that would authorize the Secretary of the Navy to buy F/A-18E/F or EA-18G aircraft under a multiyear contract.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would, notwithstanding only that element within section 2306b(i)(1) of title 10, United States Code, that requires the Secretary of Defense to provide required certifications (in this case) by March 1, 2009, and authorize the Secretary of the Navy to buy F/A-18E/F or EA-18G aircraft under a multiyear contract, but only if that multiyear con-

tract otherwise fully complies with the requirements of section 2306b of title 10, United States Code. In addition, the amendment would require by March 1, 2010, that the Secretary of the Defense submit to the congressional defense committees a report on how the findings and conclusions of the Quadrennial Defense Review and 30-year aviation procurement plan have informed the Department's acquisition strategy with regard to the F/A-18E/F and EA-18G aircraft programs-of-record.

The conferees note that the authority granted under this provision would expire on May 1, 2010, unless the Secretary of the Navy provides Congress written notification that the Department intends to execute the authority provided by this provision, but that administrative processes or other contracting activities necessary for execution of this authority cannot be completed by May 1, 2010. The provision would require that any such notification: (1) include a date certain for execution of the authority; and (2) specify a date no later than September 30, 2010, for such completion.

With this provision, the conferees convey general support for the Department's current plans to ensure that it meets the Navy's forward presence and operational requirements, while the F-35B and F-35C are being developed and ultimately fielded. However, this provision is also intended to reflect the conferees continuing concerns that, in light of the continuing increase in the strike-fighter shortfall, definitive actions that mitigate the stated shortfall cannot be delayed for too much longer. Should the Quadrennial Defense Review and the 30-year aviation procurement plan warrant a change in the programs-of-record for either the F/A-18E/F or EA-18G, the conferees expect that the Department of the Defense will give full and fair consideration to buying additional F/A-18E/F or EA-18G aircraft under a multiyear contract.

On August 17, 2009, the Under Secretary of Defense for Acquisition, Technology, and Logistics provided the congressional defense committees with a report, required by section 123 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417), detailing a cost and benefit comparison between an annual and multiyear F/A-18E/F and EA-18G aircraft procurement through fiscal year 2015. In that report, the Under Secretary, using the current pricing agreement data provided by the contractor, estimated that the savings that the Navy could expect to achieve, procuring the remaining program of record 89 F/A-18E/F and EA-18G aircraft, equated to 6.48 percent, or \$315.0 million. The conferees expect that, should the Navy exercise the authority granted under this provision, the contractors and suppliers would respond to any solicitation with aggressive pricing proposals that would allow the Navy to achieve greater savings.

In view of the lateness with which the Department submitted the fiscal year 2010 budget to Congress, the conferees agree to grant this narrow exception to the requirements of section 2306b, title 10, United States Code, as amended in the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181). However, the conferees fully expect the Department to address with due diligence and spirit of intent, items of interest addressed by conferees in section 811 of the statement of managers (H. Rept. 110-477) accompanying that Act. Finally, the conferees expect that all

subsequent multiyear procurement authority requests from the Department of Defense will be fully compliant with the requirements set forth in section 2306b, title 10, United States Code.

Subtitle D—Air Force Programs

Report on the procurement of 4.5 generation fighter aircraft (sec. 131)

The House bill contained a provision (sec. 133) that would report on various aspects of potential procurement of 4.5 generation fighter aircraft.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would delete references in the provision to multiyear procurement and certifications.

The conferees agree that the investment strategy that the Department of the Air Force intends to help the Department of Defense transition from, the capability provided by the current tactical fighter force to a smaller but more flexible, lethal and capable strike fighter force, will be challenging. As the Air Force implements that strategy but where circumstances warrant, the conferees expect the Air Force will analyze the viability of procuring additional 4.5 generation fighter aircraft under a multiyear contract and, where those conditions required to be present under Section 2306b of title 10, United States Code, as amended, exist, submit a multiyear procurement proposal to Congress, accompanied with certifications required under Section 2306b of title 10, United States Code, as amended.

With this provision, the conferees merely intend for the Air Force to conduct, and provide the congressional defense committees with, the analysis necessary to support, where warranted, a multiyear purchase of additional 4.5 generation fighter aircraft, specifically defined under this provision to capture the F-15, F-16, and F-18 that have advanced radar, data-link and avionics capabilities and the capability to deploy advanced armaments. The conferees do not intend that this provision will modify in any way the requirements of Section 2306b of title 10, United States Code, as amended, by section 811 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), and the statement of managers accompanying those amendments (H. Rept. 110-477).

Revised availability of certain funds available for the F-22A fighter aircraft (sec. 132)

The House bill contained a provision (sec. 131) that would repeal section 134 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417).

The Senate amendment contained a similar provision (sec. 122) that would (1) repeal section 134; and (2) allow the Secretary of the Air Force to reallocate fiscal year 2009 F-22A advanced procurement funds to other F-22A priorities.

The House recedes.

Preservation and storage of unique tooling for F-22 fighter aircraft (sec. 133)

The House bill contained a provision (sec. 132) that would require the Secretary of the Air Force to develop a plan for the preservation and storage of unique tooling related to the production of hardware and end items for F-22 fighter aircraft which would: (1) ensure that the Secretary preserves and stores such tooling in a manner that allows the production of such hardware and end items to be restarted after a period of idleness; (2) identify the costs of restarting production with respect to the supplier base of such hardware and end items; and (3) identify any contract modifications, additional facilities, or funding that the Secretary determines necessary to carry out the plan. This section would also prevent the Secretary from spending any funds to dispose of F-22 production tooling until 45 days after the Secretary submits the required report.

The Senate amendment contained a similar provision.
The Senate recedes with a technical amendment.

AC-130 gunships (sec. 134)

The Senate amendment contained a provision (sec. 125) that would require a report on the service life of AC-130 gunships and an analysis of alternatives for any gunship modernization requirements identified by the 2009 Quadrennial Defense Review.

The House bill contained no similar provision.
The House recedes with a clarifying amendment.

Report on E-8C Joint Surveillance and Target Attack Radar System re-engining (sec. 135)

The Senate amendment contained a provision (sec. 126) that would require the Secretary of the Air Force to provide a report on various aspects of the Air Force's plan to provide new engines to the E-8C joint surveillance and target attack radar system (JSTARS) aircraft. The provision would also prevent the Air Force from taking any action that would disrupt execution of that re-engining program until the Secretary submits that report.

The House bill contained no similar provision.
The House recedes.

Repeal of requirement to maintain certain retired C-130E aircraft (sec. 136)

The House bill contained a provision (sec. 136) that would amend section 134 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181) to repeal the requirement to maintain certain retired C-130E aircraft.

The Senate amendment contained no similar provision.
The Senate recedes.

Limitation on retirement of C-5 aircraft (sec. 137)

The Senate amendment contained a provision (sec. 121) that would prevent the Air Force from retiring any C-5 aircraft until certain conditions are met. These include: (1) completing operational testing of the C-5 Reliability Enhancement and Re-engining Program; (2) providing a report by the Director of Oper-

ational Testing on the results of that operational testing; and (3) delivering reports on the economic and risk analyses that led to any decision to retire the aircraft before the end of their useful service lives.

The House bill contained no similar provision.

The House recedes with an amendment that would, among other things, reduce the required waiting period after notification by the Secretary and eliminate the requirement that any aircraft retired be maintained in Type 1000 storage.

Reports on strategic airlift aircraft (sec. 138)

The House bill contained a provision (sec. 134) that would require the Secretary of the Air Force, in consultation with the Director of the Air National Guard, to submit a report to the congressional defense committees on the proposed force structure and basing of strategic airlift aircraft at least 120 days before the date on which any C-5 aircraft is retired.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) change the reporting period to 90 days before any retirement; and (2) remove a reporting requirement related to military construction funding increases.

Strategic airlift force structure (sec. 139)

The House bill contained a provision (sec. 135) that would increase the minimum required strategic airlift force structure by amending subsection (g)(1) of section 8062 of title 10, United States Code, by striking “2008” and inserting “2009,” and by striking “299” and inserting “316.”

The Senate amendment contained no similar provision.

The Senate recedes.

Subtitle E—Joint and Multiservice Matters

Body armor procurement (sec. 141)

The House bill contained a provision (sec. 141) that would require the Secretary of Defense to establish within each military service procurement account a separate procurement budget line item assigned for body armor investment and funding transparency.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment. The conferees do not intend that this provision should limit the military departments’ ability to use other rapid development or acquisition authorities to ensure the fastest possible exploitation of body armor material improvements, production, or fielding to our deployed or deploying forces.

Unmanned cargo-carrying-capable aerial vehicles (sec. 142)

The House bill contained a provision (sec. 142) that would prohibit obligation or expenditure of procurement funding for an unmanned cargo-carrying-capable aerial vehicle until 15 days after the Department had certified that the Joint Requirements Over-

sight Council has approved a joint and common requirement for such a vehicle type.

The Senate amendment contained no similar provision.
The Senate recesses.

Modification of nature of data link for use by tactical unmanned aerial vehicles (sec. 143)

The Senate amendment contained a provision (sec. 131) that would amend section 141(a)(1) of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163) to add Internet Protocol-capable communications relays as an additional standard for Department of Defense unmanned aerial vehicles.

The House bill contained no similar provision.
The House recesses, with a technical amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Elimination of F–22A aircraft procurement funding

The Senate amendment contained a provision (sec. 106) that eliminated funding from the bill as reported by the Senate Committee on Armed Services that would have authorized additional F–22A procurement funding.

The House bill contained no similar provision and no authorization of funding for additional procurement of F–22A in fiscal year 2010.

The Senate recesses.

The conferees agree not to authorize funding for additional procurement of F–22A in fiscal year 2010.

Restriction on obligation of funds for Army tactical radio systems

The House bill contained a provision (sec. 111) that would restrict the obligation of funds for all Army tactical radio sets except for those approved by the joint tactical radio system (JTRS) joint program office and those specifically procured to meet an operational needs statement or joint urgent operational need statement.

The Senate amendment contained no similar provision.

The House recesses.

The conferees are concerned that the Army lacks clear requirements, or a comprehensive acquisition strategy, for the procurement and upgrade of its tactical radio systems. Given the billions of dollars requested each year by the Army for communications equipment, and the importance of this equipment in ongoing combat operations, the conferees are alarmed that the Army has been unable to put a disciplined acquisition process in place to procure the needed equipment in a manner that avoids waste, fosters true competition, moves the Army away from reliance on legacy radio systems, and anticipates and bridges to next generation radio communications.

The conferees believe that despite clear congressional intent and guidance, the Army continues to rely on legacy radio systems awarded through a marginally competitive process, has failed to update requirements, has not provided adequate internal oversight and discipline to its radio acquisition plans, and is potentially jeopardizing its ability to create and transition affordably to the future

battlefield network. For example, the Army has yet to adjust its requirements for the various models of the JTRS program 6 months after the Department of Defense's (DOD) termination of the Future Combat Systems program. In addition, the Army, in the fiscal year 2010 budget, requested \$135.0 million in funding for the Single Channel Ground and Airborne Radio system despite the fact that Congress had already provided funding adequate to procure the current acquisition objective. Finally, the Army has yet to develop a plan to integrate into its inventory or requirements more than 20,000 vehicular radio sets procured from commercial sources that the Army still claims do not meet full Army requirements despite their use in combat operations for more than 5 years.

The conferees understand that managing the requirements and acquisition system for such a large and diverse set of equipment is not easy, especially with the funding demands of ongoing combat operations. Therefore, instead of dictating specific legislative guidance for fiscal year 2010, the conferee's urge the Army in 2010 to reassess its tactical radio requirements, make all needed adjustments based on force structure and programmatic changes, and deliver to Congress as part of its fiscal year 2012 budget submission a new comprehensive tactical radio plan that addresses the numerous concerns expressed by Congress. The conferees also urge senior Army and DOD leaders to take a direct role in developing this new plan, in order to ensure that the various competing interests and demands within the Army are reconciled and accounted for in the new path forward.

Competitive bidding for procurement of steam turbines for ship service turbine generators and main propulsion turbines for Ohio-class submarine replacement program

The Senate bill contained a provision (sec. 115) that would require the Secretary of the Navy to take measures to ensure appropriate competition is conducted for procurement of steam turbines for both the ships service turbine generators and main engines of the Ohio-class submarine replacement program.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that section 202 of the Weapons Systems Acquisition Reform Act of 2009 (Public Law 111-23) requires that the Secretary of Defense ensure that the acquisition strategy for each major defense acquisition program include measures to preserve the option of competition through the life of the program. Such a requirement would apply to the Ohio-class replacement program.

The Secretary of the Navy should consider means of preserving competition for this program at the system, subsystem, and component level to the maximum extent practicable. In particular, the conferees agree that steam turbines for this new class of submarine should be procured in a competitive environment. The conferees direct that, if the Secretary of the Navy were to decide in favor of sole source procurement of steam turbines, the Secretary must forward the justification required by section 2302 of title 10, United States Code, to the congressional defense committees not later than 30 days prior to awarding such a contract.

Multiyear procurement authority for DDG-51 Burke-class destroyers

The House bill contained a provision (sec. 125) that would authorize the Secretary of the Navy to enter into a multiyear contract, beginning in fiscal year 2010, for procuring DDG-51 Burke-class destroyers.

The Senate amendment contained no similar provision.

The House recedes.

Conversion of certain vessels; leasing rates

The House bill contained a provision (sec. 126) that would permit the Secretary of the Navy to use up to \$35.0 million from the Weapons Procurement, Navy, account to lease and convert vessels that have defaulted on construction loan guarantees: (1) that have become the property of the United States; and (2) for which, the Maritime Administrator has a right of disposal.

The Senate amendment contained no similar provision.

The House recedes.

The conferees agree that the Navy should in trying to make near-term additions to the high speed vessel fleet, consider fully the possibility of using vessels within the control of the Maritime Administration.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND
EVALUATION

BUDGET ITEMS

Minerva

The conferees note the potential of social science research to contribute to vital national security missions. The conferees are concerned over the dearth of social science expertise within the Department, and believe that as new initiatives are started or expanded, such as the Minerva Initiative and the Human Terrain System, that lack of organic expertise is becoming more acute and apparent.

The conference agreement includes an authorization of \$13.3 million in PE 61103A for the Minerva Research Initiative, a portion of the roughly \$20.0 million being requested for this purpose across the Department of Defense. The conferees direct that at least \$5.0 million of the Initiative's fiscal year 2010 funding be used to develop in-house Department of Defense capabilities at defense laboratories and schools consistent with the research goals of the Minerva Initiative. The conferees support the greater development of in-house social science capabilities in order to reduce dependencies on contractors on the battlefield, and to enable the Department to more effectively fund, manage, and oversee extramural social science research activities.

Electromagnetic gun

The budget request included \$11.7 million in PE 63004A, \$4.1 million in PE 62618A, and \$6.4 million in PE 61104A for activities related to the Army's Electromagnetic (EM) Gun initiative.

The House bill would authorize the budget request for these programs.

The Senate amendment would authorize reductions of \$11.5 million in PE 63004A and \$2.0 million in PE 62618A for these programs.

The conferees agree to authorize reductions of \$11.5 million in PE 63004A and \$2.0 million in PE 62618A for these programs. The conferees note that the Army has terminated its program to develop a vehicle-mounted EM gun due to significant questions raised about the technical feasibility of the program. The conferees further note that the Army still has a need to develop advanced lethality capabilities, leveraging technologies and mechanisms such as advanced energetic materials, hypervelocity, and novel penetrators. Therefore, the conferees authorize increases of \$2.0 million in PE 62618A and \$6.5 million in PE 63004A for advanced lethality research efforts.

The conferees note that the Army's reassessment of the large planned investments of its limited science and technology resources into the EM gun program and the ultimate termination of the effort was largely based on the independent analyses of the program performed by the JASON scientific advisory board, the Office of the Director of Defense Research and Engineering, and the Defense Advanced Research Projects Agency. The conferees are concerned that internal Army scientific and technical organizations appear to have been unable to identify and highlight the technical shortfalls in the envisioned program to decision-makers, and further that the Army did not task the National Research Council's Board on Army Science and Technology to examine the technical feasibility of the program.

The conferees believe that the Army should place a higher priority on robust technical analysis of modernization programs. The difficulties that the EM gun and Future Combat Systems development efforts have encountered can be partially attributed to a lack of independent, technically informed discussion within the Army's decision making process. The conferees recommend that the Secretary and Chief of Staff of the Army closely examine how they obtain independent technical advice to support technical and programmatic decision-making.

Joint Future Theater Lift

The budget request included \$8.5 million in PE 63801A for Aviation Advanced Development.

The House bill would authorize the requested amount.

The Senate amendment would authorize an additional \$50.0 million for risk reduction activities for the Joint Future Theater Lift (JFTL). The Senate amendment also would require a report from the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) by December 1, 2009.

The conferees do not expect that additional funds will be appropriated for JFTL risk-reduction activities, and therefore agree to authorize the requested amount for Army Aviation Advanced Development. The conferees also agree to modify the reporting requirement contained in the Senate amendment.

The conferees direct the USD(AT&L), in coordination with the Chairman of the Joint Requirements Oversight Council, to report to the congressional defense committees coincident with submission

of the fiscal year 2011 budget request with answers to the following questions:

1. What is the Department's acquisition strategy regarding a C-130 replacement and what is the schedule for such a program?
2. What is the Department's strategy for maintaining the advanced tiltrotor industrial base?
3. Are there operational benefits of a vertical takeoff and landing heavy transport worth paying a premium over the acquisition cost of a conventional fixed wing transport?
4. Does the operational requirement justify proceeding with an acquisition strategy requiring investing in a heavy lift vertical takeoff and landing transport program of record without first building a technology prototype to demonstrate technical feasibility and cost?

Future combat system non-line-of-sight cannon

The budget request included \$58.2 million in PE 64647A for the contract termination liability associated with the cancellation of the Future Combat Systems non-line-of-sight cannon.

The House bill would authorize a decrease of \$58.2 million in PE 64660A for excess contract termination liability.

The Senate amendment would authorize an identical decrease.

The conferees agree to authorize a decrease of \$27.0 million in PE 64647A for excess contract termination liability.

Future combat system manned ground vehicles and common ground vehicle

The budget request included \$368.6 million in PE 64660A for the contract termination liability associated with the cancellation of the Future Combat Systems manned ground vehicle.

The House bill would authorize a decrease of \$268.6 million in PE 64660A for excess contract termination liability.

The Senate amendment would authorize a decrease of \$368.6 million in PE 64660A for excess contract termination liability.

The conferees agree to authorize a decrease of \$184.0 million in PE 64660A for excess contract termination liability.

Life support systems

The budget request contained \$10.7 million in PE 64706F for life support systems development.

The House bill would add \$7.0 million for the advanced common ejection seat 5 (ACES 5) development program.

The Senate amendment would approve the budget request.

The conferees agree to authorize an additional \$2.4 million for the ACES 5 program within PE 64706F.

The conferees understand that the ACES 5 program might be able to serve as a competitor for the ejection seat system in the F-35 Joint Strike Fighter program. At this time, the F-35 Joint Program Office is considering the procurement of only one ejection seat system for all variants of the F-35 aircraft.

This approach raises a broader question about the implementation of the Weapon Systems Acquisition Reform Act of 2009 (Public Law 111-23). Section 202 of that Act requires that the Secretary

of Defense ensure that the acquisition strategy of every major defense acquisition program (MDAP) includes “measures to ensure competition, or the option of competition, at both the prime contract level and the subcontract level (at such tier or tiers as are appropriate) of such program throughout the life-cycle of such program as a means to improve contractor performance. . . .” The Act also lists a number of measures that such competition may include if such measures are cost-effective. These measures include dual sourcing and unbundling of contracts.

The conferees believe that the F-35 ejection seat system could be such a system where the benefits of competition would be cost-effective. The conferees believe that there may be other systems as well, such as training systems, logistics management systems, etc., that could lend themselves to increasing the competitive options for the F-35 program. As the Defense Department’s largest MDAP, the conferees believe the F-35 program should be one of the first to benefit from implementation of the Weapon Systems Acquisition Reform Act of 2009. The conferees expect that, over the next budget cycle, the Department and the F-35 Program Executive Office (PEO) will develop a specific plan for how the F-35 PEO will implement the provisions of that Act.

Wide-area airborne surveillance

The budget request included \$46.0 million in PE 35206F for Research, Development, Test, and Evaluation of the Gorgon Stare wide-area airborne surveillance system (WAAS); \$19.9 million in Aircraft Procurement Air Force, Line 25, and \$13.0 million in Operations and Maintenance, Air Force. The budget request also included \$39.0 million in PE 35206F to begin development of the WAAS program of record following the Gorgon Stare quick reaction capability (QRC).

The House bill would authorize the requested amounts.

The Senate amendment would authorize no funds to continue the Gorgon Stare Quick Reaction Capability (QRC).

The conferees are concerned that the Air Force is rushing to develop a WAAS program of record in fiscal year 2010 with the requirement, the mission, and the concept of operations remaining ill-defined. Based on the limited analysis done on systems with similar mission requirements, it is evident that Gorgon Stare does not currently have the resolution required to meet the full mission set of requirements. It is also evident that the technology required to meet the full mission set is several years away and program personnel are hoping that the technology required will evolve on a schedule to provide affordable capabilities.

The conferees believe that the Department should proceed expeditiously to deploy the Gorgon Stare QRC and Blue Devil to support ongoing military operations and to determine the value of WAAS imagery, in conjunction with other types of sensors, to support ground force overwatch operations and high-value individual targeting.

The conferees agree that WAAS technology development programs should be pursued to provide the necessary resolution and associated technology required and only at such time as technology

readiness levels are satisfactorily demonstrated should a program of record be initiated.

The conferees direct that the Under Secretary of Defense for Acquisition, Technology, and Logistics provide to the congressional defense and intelligence committees, not later than April 1, 2010, a report, for each WAAS project for which funding is requested in the fiscal year 2011 budget request, detailing:

(1) the operational requirement, including requirements for observing, identifying, and tracking individuals;

(2) the results of operations research studies associated with the WAAS requirement for high-value targeting, forensic analysis, and overwatch of ground operations;

(3) the concept of operations for each;

(4) lessons learned from the deployment of Constant Hawk, Angel Fire, and Gorgon Stare quick reaction capability;

(5) the number of sensors and orbits planned for each service and platform;

(6) the resolution, frame rate, area coverage, and look angles required to support operational requirements to track vehicles and individuals;

(7) data processing advances, data storage requirements, processing, exploitation, distribution requirements, and their associated costs and budgets to meet operational requirements;

(8) the relationship between the WAAS program of record and the Long Endurance, Multi-intelligence hybrid airship program; and

(9) the requirements and plans for multi-sensor integration, tipping and cueing necessary for the WAAS program of record to meet operational requirements.

Irregular Warfare Support

The budget request included \$43.8 million in PE 63121D8Z for Special Operations and Low Intensity Conflict advanced development, including funding for the Irregular Warfare Support Program (IWSP), in the base budget, and no funding in this PE in Research, Development, Test, & Evaluation for Overseas Contingency Operations (OCO).

The House bill would authorize an increase of \$100.0 million in this PE in Research, Development, Test, & Evaluation for OCO for expansion of IWSP.

The Senate amendment would authorize the budget request in PE 63121D8Z for both the base and OCO budget.

The conferees agree to authorize the requested amount in PE 63121D8Z for both the base and OCO budget. The conferees recognize the importance of enhancing the counterterrorism and counterinsurgency capabilities of the Department of Defense (DOD), and the government as a whole, through the types of innovative projects and activities undertaken and proposed by IWSP within the Office of the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (ASD(SO/LIC)).

The conferees are aware of concerns about whether this program office within ASD(SO/LIC) is the appropriate location for a substantial effort to support the combatant commands through unconventional, creative, and multi-disciplinary (military, cultural, so-

cial, ideological, economic, and legal) approaches to counterinsurgency and counterterrorism. The conferees are more concerned, however, that: (1) this small program office in the Office of the Secretary of Defense appears to be the only entity in the Department, and perhaps in the executive branch, engaged in these types of activities; and (2) that so little funding is requested each year to sustain such activities and to scale up those that prove to be successful. The conferees are aware that the Commander of the International Security Assistance Force (ISAF) in Afghanistan, General Stanley McChrystal, requested substantial, specific support from the IWSP office on an urgent basis, citing a “critical gap” in capabilities.

The conferees direct the ASD(SO/LIC) to inform the congressional defense committees, within 90 days of enactment of this Act, how DOD intends to respond to the ISAF Commander’s request. The conferees also direct the Assistant Secretary to provide a report to the congressional defense committees, coincident with the submission of the fiscal year 2011 budget request, describing all activities and programs within DOD and elsewhere in the executive branch that are similar to those projects underway or proposed by IWSP, their level of funding, and the executing organization. The report also should include an assessment of the results to date and the potential utility of the ongoing and proposed IWSP programs, at their present scope and if they were to be scaled up substantially.

Ground-Based Interceptor vendor base sustainment

The budget request included \$982.9 million in PE 63882C for the Ground-based Midcourse Defense element of the Ballistic Missile Defense System, including funds for the Ground-Based Interceptor (GBI). The request did not include funds for continued sustainment of the active vendor base for GBIs.

The House bill would authorize the budget request.

The Senate amendment would authorize the budget request.

The conference agreement includes an authorization of \$1.0 billion in PE 63882C, an additional \$20.0 million for sustainment of the GBI vendor base.

The conferees note a number of new developments since the budget submission that affect consideration of the GBI vendor base. In late summer, the Department of Defense approved the new Integrated Master Test Plan for the Ballistic Missile Defense System. The Missile Defense Agency acknowledges that it will need an additional seven GBIs to implement the new test plan. These GBIs would be in addition to the ones currently on contract, and would require new production. In September, 2009, the Missile Defense Agency informed the congressional defense committees that a recently finished study of the GBI vendor base concluded that additional funding in fiscal year 2010 would permit sustainment of active GBI vendors and reduce the amount of funding that would be needed for the same function in fiscal year 2011. The conferees believe such additional funding will help keep active vendors producing needed parts, and will reduce risk to the future production of GBIs for the test program.

National Cyber Range

The budget request included \$50.0 million in PE 35103E for Defense Advanced Research Projects Agency (DARPA)-funded efforts in Comprehensive National Cybersecurity Initiative.

The House bill would authorize the budget request.

The Senate amendment would authorize a decrease of \$19.6 million for the DARPA National Cyber Range (NCR) program.

The conferees agree to authorize the budget request for the NCR program. The conferees agree that DARPA is uniquely qualified to develop the test tools and infrastructure needed to assess potential future cyber capabilities. The conferees also agree that DARPA is not qualified to provide for the long-term operation of this type of infrastructure, which is intended to be shared between the Federal Government, industry and academia, and that there has been insufficient attention paid to the transition of this resource to an organization that can operate, maintain, and sustain the capability. The conferees note that DARPA has indicated that it “envisions transitioning the NCR program to a U.S. government operational partner after prototype development in the late 2010/early 2011 timeframe.” However, this partner has yet to be identified to the conferees’ knowledge and no funding has been programmed in any other organization’s budget to support continued operations of the NCR.

The conferees note that there has been a proliferation of network testbeds across the Department of Defense, the Federal Government, and even among contractors that operate program-specific testbeds. This creates an environment of unnecessary duplication and waste of resources and expertise. The conferees note that the Director of the Test Resource Management Center is currently assessing the Department’s overall capabilities for network systems testing, including for cyber security capabilities. The conferees look forward to reviewing the results of this assessment, and urge the leadership of the Department to pay greater attention to ensure a comprehensive approach to development, testing, and evaluation of cyber operations systems and capabilities.

ITEM OF SPECIAL INTEREST

Utilization of Future Combat Systems contract vehicles

The conferees note that, consistent with the direction of the Under Secretary of Defense for Acquisition, Technology, and Logistics, the Army intends to continue some second-tier technology development efforts that were initiated under the Future Combat Systems (FCS) program, including the development of active protection systems. The conferees understand that this work continues to be funded through the FCS Lead Systems Integrator (LSI) contract vehicle, despite the termination of the FCS program, thereby potentially incurring additional costs to the government. The conferees believe that any use of FCS contract vehicles for continuing FCS-related technology development efforts should only be temporary, and that the work should be transitioned into new contract vehicles as soon as practicable. The conferees direct the Secretary of the Army to report to the congressional defense committees no later than 45 days after the date of enactment of this Act, as to

the contract vehicles being used to continue FCS-related technology development work, the plan and schedule for the establishment of new contract vehicles, and the role of the LSI in these programs.

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 201)

The House bill contained a provision (sec. 201) that would authorize appropriations for fiscal year 2010 for the use of the Department of Defense for research, development, test, and evaluation.

The Senate bill contained a similar provision (sec. 201).

The agreement includes a provision that would authorize appropriations for fiscal year 2010 for the use of the Department of Defense for research, development, test, and evaluation.

Relation to funding table (sec. 202)

The Senate amendment contained a provision (sec. 201(b)) that would authorize funds in this title in accordance with the requirements of section 4001 and in the amounts specified in the funding table in section 4201.

The House bill contained no similar provision.

The House recesses.

Subtitle B—Program Requirements, Restrictions, and Limitations

Extension and enhancement of Global Research Watch Program (sec. 211)

The Senate amendment contained a provision (sec. 215) that would extend and enhance the Global Research Watch program.

The House bill contained no similar provision.

The House recesses.

Permanent authority for the Joint Defense Manufacturing Technology Panel (sec. 212)

The Senate amendment contained a provision (sec. 214) that would provide permanent authority for the Joint Defense Manufacturing Technology Panel.

The House bill contained no similar provision.

The House recesses.

Elimination of report requirements regarding defense science and technology program (sec. 213)

The Senate amendment contained a provision (sec. 217) that would modify report requirements related to the defense science and technology program.

The House bill contained no similar provision.

The House recesses with an amendment that would eliminate the reporting requirement that is the subject of the Senate provision. The conferees continue to support strong and stable investment in defense science and technology programs in order to support the development of advanced warfighting capabilities.

The conferees note that the recent JASON report entitled “S&T [Science and Technology] for National Security” raised a

number of critical concerns with respect to the Department of Defense's (DOD) basic research program. The JASONs observed that "important aspects of the DOD basic research programs are 'broken'" and that "throwing more money at the problems will not fix them." The study group further observed that "basic research funding is not exploited to seed inventions and discoveries that can shape the future; investments tend to be technological expenditures at the margin" and that "the portfolio balance of DOD basic research is generally not critically reviewed by independent, technically knowledgeable individuals," adding that the Office of the Director of Defense Research and Engineering "has too little time, staff, and authority to do this properly." Finally, the JASONs observed that "civilian career paths in the DOD research labs and program management are not competitive to other opportunities in attracting outstanding young scientists and retaining the best people."

The conferees note that the Secretary of Defense has called for significant increases in investments in basic research, and the conferees have supported that effort in this authorization act. However, given the significant concerns that a respected, independent review board have raised with the program, the conferees will carefully review how the DOD reacts to the JASON study and what steps it takes to address the issues raised in the study, before authorizing further increases in the basic research program.

Authorization for the Secretary of the Navy to purchase infrastructure and government purpose rights license associated with the Navy-Marine Corps Intranet (sec. 214)

The House bill contained a provision (sec. 211) that would limit the obligation of funds for the Navy Next-Generation Enterprise Network (NGEN) program until a detailed architectural specification for the network was submitted to the congressional defense committees.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would provide the Secretary of the Navy with the authority to enter into one or more contracts for the purpose of purchasing infrastructure, technical data, and intellectual property related to the Navy-Marine Corps Intranet (NMCI) program. The intent of the provision is to authorize the Secretary of the Navy to establish contractual arrangements that would permit budgeting for these purchases over multiple years.

The conferees note that the purchase of the infrastructure and intellectual property related to the NMCI program is a critical step in the development and procurement of NGEN. The conferees are concerned that the Navy and the current NMCI contractor have yet to come to an agreement on the valuation, or terms of purchase, of the critical elements of NMCI that are the subject of this provision. As the NMCI program has been in planning and execution for over 10 years and represents a large investment of Department of Defense resources, it is a poor reflection on Navy planning and Office of the Secretary of Defense oversight that the detailed plans for the completion of the NMCI program and the transition to NGEN are still so uncertain.

The conferees direct that the Secretary of the Navy provide a detailed discussion of the use of the authority provided by the provision as part of the reporting requirement established by section 1034 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110–417).

Limitation on expenditure of funds for Joint Multi-Mission Submersible program (sec. 215)

The House bill contained a provision (sec. 212) that would require the Secretary of Defense, in consultation with the Director of National Intelligence, to complete an assessment of the feasibility of implementing a cost-sharing agreement between the Department of Defense and the intelligence community pertaining to the Joint Multi-Mission Submersible Program. The provision would also prohibit the expenditure of funds for the Joint Multi-Mission Submersible Program until such an assessment is complete.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would prohibit the expenditure of funds for the Joint Multi-Mission Submersible Program to proceed beyond Defense Acquisition Milestone B Approval until such time as the Secretary of Defense, in consultation with the Director of National Intelligence, certifies that the agreement reached as a result of the assessment represents the most effective and affordable means of delivery for meeting a validated program requirement. The conferees expect that the required assessment will take into account any past use of submersible assets by the Department of Defense and the intelligence community.

The conferees strongly support the Department's decision to designate the Joint Multi-Mission Submersible Program as an Acquisition Category 1D Special Interest program, significantly increasing the level of program oversight from what was given to the Advanced SEAL Delivery System.

Separate program elements required for research and development of individual body armor and associated components (sec. 216)

The House bill contained a provision (sec. 213) that would require the Secretary of Defense to establish within each military service research, development, test, and evaluation account a separate program element assigned to the research and development of individual body armor.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment. The conferees do not intend that this provision should limit the military departments' ability to use other rapid development or acquisition authorities to ensure the fastest possible exploitation of body armor material improvements, production, or fielding to our deployed or deploying forces.

Separate procurement and research, development, test, and evaluation line items and program elements for the F-35B and F-35C Joint Strike Fighter aircraft (sec. 217)

The House bill contained a provision (sec. 214) that would require the Secretary of Defense to ensure that the Department of Defense procurement and research, development, test, and evalua-

tion program and budget exhibits provide separate data for the Navy and Marine Corps variants of the Joint Strike Fighter aircraft (F-35C and F-35B, respectively).

The Senate amendment contained no similar provision.
The Senate recesses.

Restriction on obligation of funds for Army tactical ground network program pending receipt of report (sec. 218)

The House bill contained a provision (sec. 216) that would restrict the obligation of 75 percent of fiscal year 2010 Future Combat Systems (FCS) research and development funds pending receipt of the milestone review report required by section 214(c) of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364).

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would narrow the scope of the funding limitation to the Army tactical ground network program.

The conferees are concerned that despite termination of the FCS Brigade Combat Team program in June 2009, the Office of the Secretary of Defense (OSD) has not issued specific guidance to the Army with regard to network hardware and software development which could lead to a stop work order for, or modification to, the base FCS contract. As a result, the conferees note that, according to the Department's budget documentation, the Army continues to spend millions of dollars a day on a contract for which no approved program of record currently exists. The conferees note that the Army was directed in June 2009 to establish a separate, new major defense acquisition program for an Army tactical ground network, but that no such program has been established. In addition, OSD and the Army have yet to determine the new program's acquisition strategy, structure, estimated cost, or technology readiness levels, all of which the conferees consider essential to ensure that the new Army tactical ground network program complies with existing DOD policy and the Weapon Systems Acquisition Reform Act of 2009 (Public Law 111-23).

Therefore, the conferees have agreed to an amendment that would restrict the obligation of certain funds for the new Army tactical ground network program until Congress receives additional detailed information on the new program from the Under Secretary of Defense for Acquisition, Technology, and Logistics.

Programs for ground combat vehicle and self-propelled howitzer capabilities for the Army (sec. 219)

The House bill contained a provision (sec. 219) that would require the Secretary of Defense to carry out programs to develop and field new or upgraded Army ground combat vehicle and self-propelled artillery capabilities.

The Senate amendment contained a similar provision (sec. 218).

The managers note that cancelation of the Non-Line of Sight Cannon (NLOS-C) vehicle leaves the Army solely dependent upon the Paladin Integrated Management (PIM) program for upgrading its self-propelled howitzer fleet. The managers direct the Army to

prioritize the development and fielding of the PIM upgrade program. In doing so, it should ensure that maximum value is derived from the many years of research and development on the Crusader and NLOS-C programs. Efforts should be made to integrate relevant mature technologies from NLOS-C to the PIM.

The House recesses.

Guidance on budget justification materials describing funding requested for operation, sustainment, modernization, and personnel of major ranges and test facilities (sec. 220)

The Senate amendment contained a provision (sec. 213) that that would clarify and standardize the information required in budget justification materials delivered to Congress describing amounts requested for funding of major range and test facilities.

The House bill contained no similar provision.

The House recesses with a clarifying amendment.

Assessment of technological maturity and integration risk of Army modernization programs (sec. 221)

The Senate amendment contained a provision (sec. 219) that would require the Director of Defense Research and Engineering (DDRE) to review and assess the technological maturity and integration risk of the technologies critical to the development and deployment of systems and technologies related to the platforms, sensors, and networks of Army modernization programs.

The House bill contained no similar provision.

The House recesses with an amendment that would clarify the requirements of the required technology assessment.

The conferees note that the restructuring of the Future Combat Systems (FCS) program has resulted in a number of continuing changes in the nomenclature and execution of Army modernization programs. The intent of this provision is to require an assessment of the technological maturity and integration risk of all critical systems and technologies supportive of Army modernization efforts that were formerly within the FCS program. As the required assessment is initiated, the conferees direct that the DDRE consult with Congress on which systems are included and excluded from the assessment.

Assessment of activities for technology modernization of the combat vehicle and armored tactical wheeled vehicle fleets (sec. 222)

The Senate amendment contained a provision (sec. 220) that would require an independent assessment of the strategy for technology for modernization of combat and tactical wheeled vehicle fleets.

The House bill contained no similar provision.

The House recesses with an amendment that would modify the timing of the delivery of the assessment and clarify that the assessment should cover the combat vehicle fleet and armored tactical wheeled vehicle fleet.

Subtitle C—Missile Defense Programs

Sense of Congress on ballistic missile defense (sec. 231)

The House bill contained a provision (sec. 224) that would express the sense of Congress reaffirming support for protecting the United States against limited ballistic missile attack.

The Senate amendment contained a related provision (sec. 241) that would express the sense of the Congress on the development, testing, fielding, and maintenance of ballistic missile defense systems that are capable of defending the United States, its forward-deployed forces, allies, and other friendly nations from the threat of ballistic missile attacks from nations such as North Korea and Iran.

The House recedes with a clarifying amendment.

The conferees note that the terms “operationally effective” and “cost effective” encompass the qualities of affordable, reliable, suitable, and survivable missile defense systems.

Assessment and plan for the Ground-based Midcourse Defense element of the Ballistic Missile Defense System (sec. 232)

The House bill contained a provision (sec. 222) that would require the Secretary of Defense to establish a sustainment and modernization program for the Ground-based Midcourse Defense (GMD) element of the Ballistic Missile Defense System (BMDS), to ensure the long-term reliability, availability, maintainability, and supportability of the GMD element.

The Senate amendment contained a similar provision (sec. 243) that would require the Secretary of Defense to conduct a detailed assessment of the GMD element, and establish a plan for the GMD element, and to submit reports on the assessment and the plan at about the time of the submission of the budget request for fiscal year 2011. The assessment and the plan would each include consideration of issues related to the ability of the GMD element to maintain its operational effectiveness over the course of its service life.

The House recedes with an amendment that would add a statement of the sense of Congress that the Secretary of Defense should ensure the reliability, availability, maintainability, and supportability of the GMD element throughout its service life. The amendment would also require the assessment of, and the plan for, the GMD element.

The conferees note that the GMD element is expected to have a service life of approximately 20 years, and stress the importance of ensuring that the GMD element should remain operationally effective throughout its service life. In order to ensure this effectiveness, the Department of Defense should take appropriate actions to preserve the reliability, availability, and maintainability of the GMD element over its entire service life.

The conferees note that these actions include maintaining the ability to produce any Ground-Based Interceptors (GBIs) needed for the element, including those needed to implement the newly approved Integrated Master Test Plan (IMTP). The Missile Defense Agency (MDA) recently acknowledged a need for seven additional GBIs for that purpose. Accordingly, the conferees urge MDA to take appropriate actions to reduce risk to the production capability

for the additional GBIs, and for future GBI refurbishment and sustainment work. The conferees agree to authorize additional funding for the active GBI vendor base, as described elsewhere in this report.

The conferees note that a number of developments have occurred since the submission of the budget request, which affect the GMD element. These include the approval of the IMTP, the acknowledgment of a need for seven additional test GBIs, a new GBI industrial base study, and the decision to build seven silos at Missile Field 2 at Fort Greely, Alaska, and to decommission Missile Field 1. The conferees expect MDA to keep the congressional defense committees informed in a timely manner of any such changes in the future that would affect the reliability, availability, and maintainability of the GMD element.

Continued production of Ground-Based Interceptor missile and operation of Missile Field 1 at Fort Greely, Alaska (sec. 233)

The Senate amendment contained a provision (sec. 245) that would require the Secretary of Defense to not allow a break in the production of the Ground-Based Interceptor (GBI) missiles for the Ground-based Midcourse Defense (GMD) element until the Department of Defense completes the Ballistic Missile Defense Review and makes a determination on how many GBIs will be needed to support the service life of the GMD element. The provision would also require the Secretary to ensure that Missile Field 1 at Fort Greely, Alaska, is not completely decommissioned until seven GBI silos have been emplaced at Missile Field 2 at Fort Greely, and would require the Secretary to ensure that no irreversible decision is made with respect to the disposition of GBI silos at Missile Field 2 until 60 days after submitting the reports required in another section of the Senate amendment that would describe the Department's assessment of, and plan for, the GMD element.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Limitation on availability of funds for acquisition or deployment of missile defenses in Europe (sec. 234)

The House bill contained a provision (sec. 223) that would limit the availability of fiscal year 2010 or future funds for the acquisition (other than initial long-lead procurement) or deployment of operational interceptors of a long-range missile defense system in Europe until the Secretary of Defense submits a report certifying that the proposed interceptor and the proposed radars to be deployed as part of such missile defense system have demonstrated, through successful, operationally realistic flight testing, a high probability of working in an operationally effective manner and the ability to accomplish the mission.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would remove the specific reference to the radars and clarify that the certification would include information about the ability of the proposed ballistic missile defense system to accomplish the mission.

The conferees note that this provision would extend a limitation contained in section 233(b) of the Duncan Hunter National De-

fense Authorization Act for Fiscal Year 2009 (Public Law 110–417, 122 Stat. 4393).

Authorization of funds for development and deployment of alternative missile defense systems in Europe (sec. 235)

The House bill contained a provision (sec. 226) that would authorize the use of \$353.1 million in fiscal year 2009 and 2010 funds authorized or otherwise made available for the Missile Defense Agency for the development of missile defenses in Europe to be used for the development and deployment of an alternative missile defense system that would protect Europe and the United States, subject to a certification by the Secretary of Defense that the alternative defense system is expected to meet certain conditions.

The Senate amendment contained a similar provision (sec. 246) that would authorize the use of the fiscal year 2009 and 2010 funds for the development and deployment of alternative missile defense systems designed to protect Europe, and the United States in the case of long-range missile threats, from the threats posed by current and future Iranian ballistic missiles of all ranges, if the Secretary certifies that the alternative systems are expected to meet certain conditions. The provision also included a rule of construction stating that it would not limit or prevent the Department of Defense from pursuing the development or deployment of operationally effective and cost effective missile defense systems in Europe.

The House recedes with an amendment that would add a requirement for an independent assessment of the operational effectiveness and cost-effectiveness of the alternative missile defense architecture announced by the President on September 17, 2009. The Secretary of Defense would be required to submit a report to the congressional defense committees by June 1, 2010, on the independent assessment.

The conference agreement would authorize the use of \$309.0 million in fiscal year 2009 and 2010 funds, the amount of funding available other than for military construction, for alternative European missile defense systems or their subsystems. The conferees expect the Department of Defense to promptly provide to the congressional defense committees an expenditure plan for any of these funds planned to be used for such missile defense systems in Europe pursuant to a certification by the Secretary.

Comprehensive plan for test and evaluation of the ballistic missile defense system (sec. 236)

The Senate amendment contained a provision (sec. 242) that would require the Secretary of Defense to establish a comprehensive plan for the developmental and operational test and evaluation of the Ballistic Missile Defense System. The provision would require the Secretary of Defense to submit a report to the congressional defense committees setting forth the plan by March 1, 2011.

The House bill contained a provision (sec. 227) that would require the Secretary of Defense to enter into an arrangement with the JASON Defense Advisory Panel to conduct a study on the discrimination capabilities of the Ballistic Missile Defense System. The provision would require the Secretary to submit to the appropriate congressional committees a report on the study.

The Senate amendment contained no similar provision.
The Senate recesses with a clarifying amendment.

Ascent phase missile defense strategy and plan (sec. 238)

The House bill contained a provision (sec. 225) that would require the Secretary of Defense to submit to the congressional defense committees a strategy for ascent phase missile defense.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would clarify that the Secretary's report would include both a strategy and a plan for ascent phase missile defense.

Extension of deadline for study on boost-phase missile defense (sec. 239)

The Senate amendment contained a provision (sec. 247) that would extend by 4 months the deadline for the submission of the boost-phase missile defense study required by section 232 of the Duncan Hunter National Defense Act for Fiscal Year 2009 (Public Law 110-417).

The House bill contained no similar provision.
The House recesses.

The House bill contained a provision (sec. 233) that would limit the obligation and expenditure of funds to 25 percent of the amount authorized to be appropriated for program element 35884L until 30 days after the Under Secretary of Defense for Intelligence submits all elements of the report required under section 923(d)(1) of the National Defense Authorization Act for 2004 (Public Law 108-136).

The Senate amendment contained no similar provision.

Report on the development of command and control systems (sec. 247)

The House bill contained a provision (sec. 217) that would limit the obligation of funds for the Net Enabled Command Capability (NECC) system.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require a report detailing the Department of Defense's (DOD) plans for consolidating the systems and technologies of the NECC program into the Global Command and Control System (GCCS) family of systems.

The conferees note the NECC program was originally intended to modernize DOD command and control systems, building them into a web-based, open architecture, interoperable set of systems that would better support joint warfighting operational capabilities. However, the NECC program has not managed to overcome significant technical, programmatic, and bureaucratic challenges and so is expected to be terminated or significantly restructured in the near future.

The conferees direct that the Department of Defense merge the NECC program and the GCCS family of systems and transition appropriate technologies from NECC into the GCCS family of systems. The conferees further expect that lessons learned from the attempted development of NECC be incorporated as DOD develops a plan of governance and development for next-generation command and control systems. The conferees note that the evolution of the GCCS family of systems into a more capable system may be best served using an incremental, spiral approach to modernizing the GCCS family of systems, deploying modular, operationally useful, and tested capabilities while moving towards a net-centric, web-based, standards-based service oriented architecture.

Since both the NECC program and the GCCS family of systems are currently undergoing significant restructuring, the conferees direct that the Department actively engage with the congressional defense committees during the development of the report required by this provision to ensure that the intent of the conferees is satisfied.

Evaluation of Extended Range Modular Sniper Rifle Systems (sec. 248)

The Senate amendment contained a provision (sec. 253) that would require the Assistant Secretary of the Army for Acquisition, Logistics, and Technology to conduct a comparative evaluation of extended range modular sniper rifles.

The House bill contained no similar provision.

The House recedes with an amendment that would strike language making available unobligated balances from prior years' appropriations.

Subtitle E—Other Matters

Enhancement of duties of Director of Department of Defense Test Resource Management Center with respect to the major range and test facility base (sec. 251)

The House bill contained a provision (sec. 241) that would authorize the Director of the Test Resource Management Center (TRMC) to have access to all of the data and records he or she needs to make recommendations to the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) on test resource issues.

The Senate amendment contained a provision (sec. 212) that would similarly authorize access to data and records, as well as authorizing the Director, TRMC to review changes to major test range funding before those changes are implemented.

The House recedes with a clarifying amendment.

The conferees note that the intent of this provision is to facilitate the Director, TRMC's ability to conduct appropriate oversight and analysis of changes to the Major Range and Test Facility Base (MTRFB) made outside the existing budget review mechanisms, and to enhance the Director's access to information. It is not the conferees intent to create a new administrative function so onerous that it detracts from the ability of the service testing organizations to accomplish their designated missions. The conferees' intent is to

authorize the Director, TRMC to review and advise the USD(AT&L) on changes to test facilities and resources that would result in the inability to adequately test critical defense systems, or that would place an undue burden on programs or other elements of the MRTFB. The provision is not intended to convey new authority to the Director, TRMC to unilaterally restrict service or agency efforts to execute improvements or upgrades, or to improve operational efficiency.

Therefore, the conferees direct that the USD(AT&L) work in conjunction with the Director, TRMC and appropriate service and agency organizations to establish procedures under which the review processes and access to records and data authorized by this provision are not overly intrusive and do not place an undue burden, in terms of workload or funding, on service and agency personnel and resources.

Establishment of program to enhance participation of historically black colleges and universities and minority-serving institutions in defense research programs (sec. 252)

The House bill contained a provision (sec. 243) that would authorize a program to enhance participation of historically black colleges and minority-serving institutions in defense research programs.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the details of the program, modify the description of the types of institutions that could participate in the program, and authorize the Secretary of Defense, if so desired, to limit the participation of institutions that can successfully compete for research funding outside the program.

Extension of authority to award prizes for advanced technology achievements (sec. 253)

The House bill contained a provision (sec. 244) that would extend the authority for organizations within the Department of Defense to award prizes for advanced technology development.

The Senate amendment contained an identical provision (sec. 216).

The conference agreement includes the provision.

Authority for National Aeronautics and Space Administration federally funded research and development centers to participate in merit-based technology research and development programs (sec. 254)

The House bill contained a provision (sec. 248) that would authorize federally funded research and development centers of the National Aeronautics and Space Administration respond to Department of Defense broad agency announcements for research funding opportunities.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

Next generation bomber aircraft (sec. 255)

The Senate amendment contained a provision (sec. 124) that would make a series of findings with respect to the next-generation bomber and that would declare that it is the policy of the United States to support a development program for next-generation bomber technologies.

The House bill contained no similar provision.

The House recesses.

LEGISLATIVE PROVISIONS NOT ADOPTED

F-35 and alternate propulsion system program

The Senate amendment contained a provision (sec. 211) that would: (1) increase in funding for procurement of UH-1Y/AH-1Z rotary wing aircraft and for management reserves for the F-35 Joint Strike Fighter program; and (2) prohibit the obligation of funds authorized to be appropriated for development or procurement of an alternate propulsion system for the F-35 until the Secretary of Defense certifies in writing to the congressional defense committees that development and procurement of the alternate propulsion system would: (a) reduce life cycle costs of the F-35; (b) improve operational readiness of the fleet of F-35 aircraft; (c) will not disrupt the F-35 research, development, test, and evaluation (RDT&E) and procurement phases of the program; and (d) will not result in the procurement of fewer F-35 aircraft during the life cycle of the program.

The House bill contained a provision (sec. 218) that would limit obligations for the F-35 RDT&E program to 75 percent until 15 days after the later of the dates on which: (1) the Under Secretary of Defense for Acquisition, Technology, and Logistics certifies in writing to the congressional defense committees that all fiscal year 2010 funds for the F-35 competitive propulsion system have been obligated; (2) the Secretary of Defense submits the report on F/A-18 multiyear procurement costs required by section 123 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417); and (3) the Department submits the 30-year aircraft procurement plan required by section 231a of title 10, United States Code.

The House bill also contained a provision (sec. 242) that would require the Secretary of Defense to include in annual budget requests submitted to the President, beginning in 2011, such amounts as are necessary for the full funding of continued development and procurement of a competitive propulsion system for the F-35.

Both the House and Senate recess from their respective provisions.

The conferees agree to authorize the budget request for 30 F-35 aircraft in Aircraft Procurement, Navy, and Aircraft Procurement, Air Force. The conferees also agree to authorize an increase of a total of \$430.0 million in RDT&E, Navy, and RDT&E, Air Force for continued F136 engine development; and \$130.0 million in Aircraft Procurement, Air Force, for F136 engine procurement. The conferees expect that the Secretary of Defense will comply with the direction in section 213 of the National Defense Authorization

Act for Fiscal Year 2008 (Public Law 110–181), and ensure that sufficient annual amounts are obligated and expended, in each fiscal year, for the continued development and procurement of two options for the F–35 propulsion system in order to ensure the development and competitive production of the F–35 propulsion system.

Restriction on obligation of funds pending submission of Selected Acquisition Report

The House bill contained a provision (sec. 215) that would restrict certain research and development accounts pending submission of comprehensive annual Selected Acquisition Reports for seven Army programs.

The Senate amendment contained no similar provision.

The House recesses.

Integrated Air and Missile Defense system project

The House bill contained a provision (sec. 221) that would restrict the availability of fiscal year 2010 funds for the Army's Integrated Air and Missile Defense project until the Secretary of Defense certifies to the congressional defense committees that certain conditions have been met.

The House recesses.

Executive agent for advanced energetics

The House bill contained a provision (sec. 245) that would have established an executive agent for advanced energetics within the Department of Defense.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note the importance of advanced energetic materials in the development of next-generation defense capabilities. The conferees direct the Under Secretary of Defense for Acquisition, Technology, and Logistics to provide a report describing the plan and process it is using to address the concerns raised in the original House provision (sec. 245). The report should clearly indicate how the activities envisioned to be undertaken by the proposed

executive agent are currently being executed with existing Departmental processes. The report should be provided to the congressional defense committees no later than October 1, 2010.

Study on thorium-liquid fueled reactors for Naval forces

The House bill contained a provision (sec. 246) that would have directed the Secretary of Defense and the Chairman of the Joint Chiefs of Staff to carry out jointly a study on the use of thorium-liquid fueled nuclear reactors for naval propulsion.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that while there may be credible research initiatives to explore the use of molten salt reactors for commercial power generation, the use of molten salt reactors on naval vessels is not currently technically feasible and a requirement to perform a study on the use of molten salt reactors is premature. This is due to technology challenges with material construction (molten salt reactors are inherently corrosive to metals), storage of the liquid fuel, and radiation shielding for the crew from a non-solid fuel reactor. The conferees recommend that the Navy continue to monitor the progress of technology development in commercial application of molten salt reactors, including licensing, for potential future application.

Visiting National Institutes of Health Senior Neuroscience Fellowship Program

The House bill contained a provision (sec. 247) that would establish a neuroscience fellowship program within the Department of Defense.

The Senate amendment contained no similar provision.

The House recedes.

The conferees direct the Department of Defense to continue to support neuroscience research to support the development of military capabilities.

TITLE III—OPERATION AND MAINTENANCE

BUDGET ITEM

Commercial imagery augmentation

The budget request included classified amounts in Operations and Maintenance, Defense-wide, in the National Geospatial Intelligence Agency budget to begin acquiring the equivalent capacity of two additional 1.1-meter electro-optical (EO) imaging satellites.

The House bill would authorize the Department of Defense (DOD) to implement the initiative as requested.

The Senate amendment would direct DOD to acquire the capacity of one 1.5-meter EO satellite in lieu of one of the two proposed 1.1-meter satellite equivalents “on a schedule keyed to the risks identified” by the Secretary of Defense in congressional testimony.

The conferees agree that DOD should consider obtaining the capabilities of 1.5-meter aperture EO satellites for multiple reasons: to hedge against the risk of gaps in national intelligence col-

lection capabilities; to determine how well 1.5-meter EO satellites can meet imagery collection requirements; to better support combatant commander requirements for point-target and area imagery; and to ensure that U.S. industry retains world leadership in commercial remote sensing.

The conferees agree that the DOD should plan to acquire the capacity of one or more 1.5-meter satellites by the middle of the coming decade, consistent with the administration's plans for replenishment in the mid-decade timeframe, and with the estimates of the time needed to develop and construct 1.5-meter aperture satellites.

The conferees understand that fulfilling this plan would require that the fiscal year 2011 budget request include funding to begin the process of acquiring the capacity of a 1.5-meter aperture satellite. The conferees expect that it will take at least 60 months to deliver a 1.5-meter EO satellite (1 year of non-recurring development and 4 years to build the satellite).

The conferees direct the Secretary of Defense to develop a plan to acquire the capacity of at least one 1.5-meter aperture EO satellite on the schedule outlined above and provide this plan to the congressional defense and intelligence committees when the fiscal year 2011 budget request is submitted.

The conferees also agree on the need to review the existing limitation on the resolution of the imagery that the space commercial data providers (CDP) are allowed to sell commercially. The conferees agree that controls remain necessary on what targets the CDPs can image for commercial sale, but are skeptical that the current limit on resolution makes sense. The conferees direct that the Secretary of Defense request that the Office of Science and Technology Policy undertake an interagency review of current regulatory policy. The conferees further request that the administration provide the results of this review to the congressional intelligence and defense committees by June 1, 2010.

ITEM OF SPECIAL INTEREST

Navy depot maintenance

The conferees note that the budget request for ship maintenance would leave \$200.0 million in deferred maintenance in fiscal year 2010 for active and reserve ships at a time when it is questionable whether the Navy can sustain ship material readiness while serving as a key element of the Nation's strategic reserve force. The conferees also note that depot maintenance programs were identified by the Chief of Naval Operations as the sole priorities in the Navy's unfunded priority list for fiscal year 2010 that was submitted to the committee.

The conferees are very concerned that continued underfunding of these critical sustainment programs jeopardizes ship material readiness, reduces the service life of the fleet, drives up long-term sustainment costs, and increases strategic risk for the Nation. The conferees urge the Secretary of the Navy to fully resource ship depot maintenance requirements in the future.

While the House and Senate bills added funding to meet 100 percent of the Navy's ship depot maintenance requirement for fis-

cal year 2010, the conferees note that the House and Senate appropriations committees chose not to provide additional funding, leaving the conferees no option but to authorize at the appropriators' level or risk hollow budget authority. The conferees understand this decision was based on Government Accountability Office analysis of the Navy's historical execution of its ship depot maintenance budget.

Likewise, the conferees have provided additional funding for Navy aviation depot maintenance at the same level as the allowable appropriation but still short of the Navy's unfunded requirement.

The conferees urge the Secretary of the Navy to take action as necessary to demonstrate that the Navy can successfully execute its depot maintenance account to the fullest extent to ensure material readiness.

The provision would also require the Secretary to issue regulations and to provide a report to Congress.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require: (1) the Secretary to issue regulations that prohibit the disposal of certain waste in open-air burn pits during contingency operations except in circumstances in which the Secretary determines that no alternative disposal method is feasible; (2) notification to congress-

sional defense committees when the Secretary determines that no alternative disposal method is feasible; and (3) a report on the use of open-air burn pits by the United States armed forces. The Senate amendment contained a provision (sec. 323) that would suspend such authority until the Secretary of Defense certifies that the Department of Defense is in compliance with the requirements of section 2330a of title 10, United States Code.

The Senate recedes with an amendment that would suspend the authority to initiate public-private competitions until the Secretary certifies that the Department is in compliance with certain statutory requirements. Based on the timing of a required review and report, the earliest date on which this certification could be made would be October 15, 2010.

Requirement for debriefings related to conversion of functions from performance by Federal employees to performance by a contractor (sec. 326)

The House bill contained no similar provision.

The House recesses.

The House bill contained no similar provision.

The House recesses with an amendment that would: (1) clarify that the Secretary should consider cost effectiveness in developing the required strategy; and (2) delete a paragraph providing the Secretary with contracting authority to achieve the purposes of the section. The conferees conclude that the Secretary already has broad contracting authority to execute projects that support the national defense.

Subtitle E—Reports

Annual report on procurement of military working dogs (sec. 341)

The House bill contained a provision (sec. 341) that would require an annual report on the procurement of military working dogs.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would sunset the reporting requirement after 5 years and clarify the contents of the report.

The conferees note that the provision would require that certain information be provided with regard to working dogs provided by different sources. The conferees expect that report will identify each source by State or country.

Plan for managing vegetative encroachment at training ranges (sec. 342)

The Senate amendment contained a provision (sec. 342) that would require the Secretary of Defense to report on the extent to which vegetation and overgrowth limits the use of military land for training, to identify the installations impacted by overgrowth, to provide a plan to address the constraints caused by vegetation, and to provide updates to the plan, as necessary. The Senate provision would have required this information be included in the Department of Defense's annual sustainable range report.

Subtitle F—Other Matters

Authority for airlift transportation at Department of Defense rates for non-Department of Defense Federal cargoes (sec. 351)

The House bill contained a provision (sec. 351) that would allow the Secretary of Defense to charge other Federal Government agencies the same rate for airlift services as the Department charges internal Department of Defense customers, whenever the Secretary determines that such action would promote efficiency and would not have any negative effect on national security objectives.

The Senate amendment contained no similar provision.

The Senate recesses.

Policy on ground combat and camouflage utility uniforms (sec. 352)

The House bill contained a provision (sec. 352) that would direct the Secretary of Defense, in consultation with the Defense Logistics Agency, to require that future ground combat uniforms be standardized in order to ensure increased interoperability of ground combat forces, and reduce tactical risks encountered when military personnel wear a different uniform from their counterparts in the other military services in a combat area.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would establish, as policy of the United States, that the design and fielding of all future ground combat and camouflage utility uniforms of the armed forces may uniquely reflect the identity of the individual military services, provided that the ground combat and utility uniforms, to the maximum extent practicable provide members of every service an equivalent level of performance, functionality, and protection commensurate with their respective assigned combat missions, minimize the risk to the individual, and provide interoperability with other components of individual war fighter systems. The Senate amendment would direct the Comptroller General to conduct an assessment of the ground combat uniforms and camouflage utility uniforms currently in use in the Department of Defense, and report

within 180 days of enactment of this Act. The Senate amendment would also require the Secretaries of the military departments, consistent with their title 10 authority over acquisition matters, to establish joint criteria for future ground combat uniforms.

The conferees note that this section is not intended to impair or reduce the authority of special operations forces under section 167 of this title to design and employ combat uniforms to meet their specific mission requirements. However, the conferees believe that the technological advances and improvements made in support of special operations forces uniform requirements should be shared across the Department for incorporation in other uniforms when appropriate and cost-effective.

The conferees note that Department of Defense Instruction (DODI) 4140.63, dated August 5, 2008, establishes the Joint Clothing and Textiles Governance Board and assigns the Director, Defense Logistics Agency (DLA) as chair of the Board. The conferees also note that DODI 4140.63 prescribes that the Director, DLA is responsible to “ensure collaboration and DoD-wide integration of clothing and textile activities” and shall “participate as an advisor on joint Service boards and committees established to facilitate research, development and inter-service product standardization opportunities”. In establishing the joint criteria for future ground combat uniforms, the conferees expect that the Secretaries of the military departments will collaborate with the Director, DLA.

Condition-based maintenance demonstration programs (sec. 353)

The House bill contained a provision (sec. 355) that would authorize the Secretaries of the Army and Navy to conduct 12-month condition-based maintenance (CBM) demonstration programs on specific tactical wheeled vehicle systems and on four systems or components of the guided missile destroyer class of surface combatant ships.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize CBM demonstration programs on selected tactical wheeled vehicles and selected systems or components of surface combatant ships, such as guided missile destroyers. The Senate amendment would allow the services flexibility in the selection of systems which include on-board diagnostic systems suitable to such a program, would promote open architecture, and would ensure competition and best value to the Department of Defense.

Extension of arsenal support program initiative (sec. 354)

The House bill contained a provision (sec. 357) that would extend the Arsenal Support Program Initiative (ASPI) for an additional year pending the findings of a comprehensive depot study which will assess a wide range of manufacturing activities to include ASPI.

The Senate amendment contained a similar provision (sec. 324).

The House recedes with a technical amendment.

The conferees remain concerned that cost savings to the Army have not been significant and encourage the Army to explore the

use of other existing and readily available authorities to accomplish the same goals as ASPI.

LEGISLATIVE PROVISIONS NOT ADOPTED

Exception to alternative fuel procurement requirement

The House bill contained a provision (sec. 335) that would amend section 526 of the Energy Independence and Security Act of 2007 (Public Law 110–140) to specify that federal agencies are not prohibited from entering into contracts to purchase generally-available fuels that are not alternative or synthetic fuels or predominantly produced from nonconventional petroleum sources in certain circumstances.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that section 526 was not intended to preclude the Department of Defense from purchasing the fuel that it needs for national defense from the generally-available fuel supply. The conferees believe that clarification would be helpful and that such clarification should take place in the context of pending energy or climate change legislation.

Termination of certain public-private competitions for conversion of Department of Defense functions to performance by a contractor

The House bill contained a provision (sec. 326) that would halt all ongoing public-private competitions being conducted by the Department of Defense pursuant to Office of Management and Budget Circular A–76, and establish a review and approval process for recommencing such competitions.

The Senate amendment contained a provision (sec. 323) that would terminate public-private competitions that exceed certain time limitations.

The conference agreement does not include either provision.

Defense Science Board review of alternative fuel goals and certification activities

The Senate amendment contained a provision (sec. 333) that would direct the Secretary of the Air Force to continue alternative aviation fuel initiatives with specific goals, and would require a notification to Congress if the goals were adjusted. The provision would direct the Army, Navy, and Air Force to submit annual reports on goals and progress to research, test, and certify the use of alternative fuels in their respective aircraft fleets. The provision would also direct the Defense Science Board to assess the feasibility and advisability of achieving the alternative fuel goals.

The House bill contained a provision (sec. 334) that would establish a goal for the Department of Defense to procure 25 percent of the total quantity of aviation fuel consumed by the Department in the contiguous United States from renewable aviation fuel sources in fiscal year 2025 and each subsequent fiscal year.

Both the Senate and House recede.

The conferees direct the Defense Science Board to report to the Secretary of Defense and to the Director of Operational Energy Plans and Programs, not later than February 1, 2011, on the alter-

native fuel certification efforts of the military services. The report shall include a review and comparison of the military services' existing alternative fuel goals and alternative fuel certification activities, including a comparison of the different types of alternative fuels being considered by each service, an assessment of the technological and economic achievability of the services' current goals, a review of the role of renewable fuels in the services' alternative fuel strategies and a detailed summary of resources being applied to renewable fuels as compared with non-renewable alternatives, an assessment of the military utility of military goals for domestic alternative fuel use, an assessment of the military utility of technologies that reduce fuel consumption by forward-deployed forces, consideration of the environmental impacts of the different types of alternative fuels under consideration or use by each of the services in comparison with fuels from conventional petroleum sources, an assessment of the advisability of the services' current alternative fuel goals, and recommendations for the Department of Defense and military services relating to fuel use in the future.

Report on status of Air National Guard and Air Force Reserve

The Senate bill contained a provision (sec. 343) that would require a report from the Secretary of Defense on the status and readiness of the Air National Guard and Air Force Reserve.

The House bill contained no similar provision.

The Senate recesses.

Restriction on use of funds for counterthreat finance efforts

The House bill contained a provision (sec. 353) that would require the Secretary of Defense to limit Department of Defense (DOD) financial support of counterthreat finance (CTF) efforts to only those activities carried out by DOD personnel and supporting DOD contract personnel until a report is provided to the congressional defense committees describing the nature, extent, and expected future cost requirements associated with the mission.

The Senate amendment contained no similar provision.

The House recesses.

The conferees, however, direct the Secretary of Defense to provide a classified report to the congressional defense committees 120 days after the enactment of this Act outlining each counterthreat finance activity currently being conducted by the Department of Defense, including the defense intelligence agencies, and including those efforts the Department may be a part of but for which other government agencies may be the lead. The outline of each program should include a description of the activity, the component of the Department leading the activity, the level of funding and manpower, the source of funding, the authority under which the activity is being conducted, and, if applicable, other government agencies involved in the activity. The report should also include counter threat finance challenges, if any, related to funding, authorities, interagency issues, and any other matters deemed appropriate by the Secretary.

Limitation on obligation of funds pending submission of classified justification material

The House bill contained a provision (sec. 354) that would limit the obligation of funds authorized to be appropriated for the Office of the Secretary of Defense for budget activity four, line 270, until classified justification material is provided to Congress.

Senate amendment contained no similar provision.

The House recesses.

Study on distribution of hemostatic agents

The House bill contained a provision (sec. 356) that would require the Secretary of Defense to submit a report on the distribution of hemostatic agents to service members serving in Iraq and Afghanistan.

The Senate amendment contained no similar provision.

The House recesses.

TITLE IV—MILITARY PERSONNEL AUTHORIZATIONS

Subtitle A—Active Forces

End strengths for active forces (sec. 401)

The House bill contained a provision (sec. 401) that would authorize the following end strengths for active-duty personnel of the armed forces as of September 30, 2010: Army, 547,400; Navy, 328,800; Marine Corps, 202,100; and Air Force, 331,700.

The Senate bill contained an identical provision (sec. 401).

The agreement includes a provision that would authorize an active-duty end strength for the Army of 562,400.

The conferees remain concerned about the stress on all of the services, but most particularly the Army and the Marine Corps. To help ease this stress, the conferees support the President's request for increased active-duty end strengths for all components, totaling over 55,000 more active-duty service members than authorized in 2009. After passage of the House and the Senate bills, the administration submitted a budget amendment to Congress that proposed additional Army active-duty end strength of 15,000, funded out of 2010 overseas contingency operation funds. In light of the budget amendment, and the continued stress on the Army, the conferees believe the Army should be authorized the additional end strength requested by the President.

End strength levels for the active forces for fiscal year 2010 are set forth in the following table:

Service	FY 2009 authorized	FY 2010		Change from	
		Request	Recommendation	FY 2010 request	FY 2009 authorized
Army	532,400	562,400	562,400	0	30,000

Air Force	317,050	331,700	331,700	0	14,650
DOD Total	1,369,773	1,425,000	1,425,000	0	55,227

Revision in permanent active duty end strength minimum levels (sec. 402)

The House bill contained a provision (sec. 402) that would establish the following minimum end strengths for active-duty personnel as of September 30, 2010: Army, 547,400; Navy, 328,800; Marine Corps, 202,100; and Air Force 331,700.

The Senate amendment contained no similar provision.

The Senate recesses.

Minimum end strength levels for active forces are set forth in the following table:

Service	FY 2009 authorized	FY 2010 Recommendation	Change from FY 2009
Army	532,400	547,400	15,000
Navy	325,300	328,800	3,500
Marine Corps	194,000	202,100	8,100
Air Force	317,050	331,700	14,650
DOD Total	1,368,750	1,410,000	41,250

Additional authority for increases of Army active-duty end strengths for fiscal years 2011 and 2012 (sec. 403)

The House bill contained a provision (sec. 403) that would authorize the Secretary of Defense to increase the Army's active-duty end strength by 30,000 over the fiscal year 2010 level during fiscal years 2011 and 2012 provided the Secretary included the cost of such increases in the annual budget request for those fiscal years.

The Senate amendment contained a provision (sec. 402) that would authorize the Secretary of Defense to increase the active-duty end strength of the Army by 30,000 over the fiscal year 2010 level during fiscal year 2010 provided that the Secretary funded the increase through Department of Defense reserve funds or an emergency supplemental, and in fiscal years 2011 and 2012 provided the Secretary included the costs of such increases in the annual budget request for those fiscal years.

The Senate recesses.

Subtitle B—Reserve Forces

End strengths for Selected Reserve (sec. 411)

The House bill contained a provision (sec. 411) that would authorize the following end strengths for Selected Reserve personnel, including the end strengths for reserves on active duty in support of the reserves as of September 30, 2010: the Army National Guard of the United States, 358,200; the Army Reserve, 205,000; the Navy Reserve, 65,500; the Marine Corps Reserve, 39,600; the Air National Guard of the United States, 106,700; the Air Force Reserve, 69,500; and the Coast Guard Reserve, 10,000.

The Senate amendment contained a similar provision (sec. 411).

The Senate recesses.

End strength levels for the Selected Reserve are set forth in the following table:

Coast Guard Reserve	10,000	10,000	10,000	0	0

End strengths for Reserves on active duty in support of the Reserves (sec. 412)

The House bill contained a provision (sec. 412) that would authorize the following end strengths for Reserves on active duty in support of the reserve components as of September 30, 2010: the Army National Guard of the United States, 32,060; the Army Reserve, 16,261; the Navy Reserve, 10,818; the Marine Corps Reserve, 2,261; the Air National Guard of the United States, 14,555; and the Air Force Reserve, 2,896.

The Senate amendment contained an identical provision (sec. 412).

The conference agreement includes the provision.

End strength levels for reserves on active duty in support of the reserves are set forth in the following table:

Service	FY 2009 authorized	FY 2010		Change from	
		Request	Recommendation	FY 2010 request	FY 2009 authorized
Army National Guard	32,060	32,060	32,060	0	0

End strengths for military technicians (dual status) (sec. 413)

The House bill contained a provision (sec. 413) that would authorize the following end strengths for military technicians (dual status) as of September 30, 2010: the Army Reserve, 8,395; the Army National Guard of the United States, 27,210; the Air Force Reserve, 10,417; and the Air National Guard of the United States, 22,313.

The Senate amendment contained an identical provision (sec. 413).

The conference agreement includes the provision.

End strength levels for military technicians (dual status) are set forth in the following table:

Service	FY 2009 au- thorized	FY 2010		Change from	
		Request	Recommendation	FY 2010 request	FY 2009 authorized
Army Reserve	8,395	8,154	8,395	241	0

Fiscal year 2010 limitation on number of non-dual status technicians (sec. 414)

The House bill contained a provision (sec. 414) that would establish the following maximum end strengths for the reserve components of the Army and Air Force for non-dual status technicians as of September 30, 2010: the Army National Guard of the United States, 2,191; the Air National Guard of the United States, 350; the Army Reserve, 595; and the Air Force Reserve, 90.

The Senate amendment contained a similar provision (sec. 414) that would establish a maximum end strength for the Army National Guard for non-dual status technicians of 1,600.

The House recedes.

The conferees understand that the operational tempo for the reserve components has increased during the current conflicts, and that higher tempo in turn necessitates higher numbers of full-time support personnel to support the reserve components. Consequently, Congress has acted in recent years to increase the number of Army full-time support personnel, including military technicians. In some cases, Congress has authorized more full-time support personnel than was requested by the administration. The conferees understand that the Army continues to assess their temporary and permanent full-time support requirements and is working on a comprehensive study that will address its needs.

Under a Presidential waiver of end strength limitations, the Army National Guard's non-dual status technician population is now over 3,000 strong, despite the 1,600 cap on permanent end strength. As such, the conferees feel it is prudent to wait for the result of the full-time support report, as well as the report on non-dual status technician requirements found elsewhere in this Act, before increasing the permanent cap. The purpose of the Presidential waiver authority is precisely to satisfy short-term emergency needs. In light of the reports still outstanding and the current strength of the Army National Guard's non-dual status technician population under the Presidential waiver, the conferees feel that the permanent cap of 1,600 remains sufficient for fiscal year 2010.

Maximum number of reserve personnel authorized to be on active duty for operational support (sec. 415)

The House bill contained a provision (sec. 415) that would authorize the maximum number of reserve component personnel who may be on active duty or full-time National Guard duty under section 115(b) of title 10, United States Code, during fiscal year 2010 to provide operational support.

The Senate amendment contained an identical provision (sec. 415).

The conference agreement includes this provision.

Submittal of options for creation of trainees, transients, holdees, and students account for the Army National Guard (sec. 416)

The House bill contained a provision (sec. 416) that would require the Secretary of the Army to report to the congressional defense committees on options for the creation of a trainee, transients, holdees, and students (TTHS) account within the Army National Guard.

The Senate amendment contained a similar provision (sec. 416).

The Senate recedes with a technical amendment.

Report on requirements of the National Guard for non-dual status technicians (sec. 417)

The Senate amendment contained a provision (sec. 511) that would require the Secretary of Defense to report to the Committees on Armed Services of the Senate and the House of Representatives within 180 days of the date of enactment of this Act on the roles, duties, and requirements for non-dual status technicians in the National Guard.

The House bill contained no similar provision.

The House recedes with an amendment that would add to the report elements a description of the demands for non-dual status technicians given current operational tempo and a description of the current and anticipated demands of the National Guard for non-dual status technicians as a result of the evolution of the National Guard into an operational force.

Expansion of authority of secretaries of the military departments to increase certain end strengths to include Selected Reserve end strengths (sec. 418)

The Senate amendment contained a provision (sec. 417) that would amend section 115(g) of title 10, United States Code, to authorize the secretaries of the military departments to increase their authorized Selected Reserve end strengths by up to 2 percent.

The House bill contained no similar provision.

The House recedes with a technical amendment.

The Senate amendment contained no similar provision.
The Senate recesses.

TITLE V—MILITARY PERSONNEL POLICY

Subtitle A—Officer Personnel Policy

Grade of Legal Counsel to the Chairman of the Joint Chiefs of Staff (sec. 501)

The Senate amendment contained a provision (sec. 503) that would amend section 156(c) of title 10, United States Code, to require that an officer appointed to serve as Legal Counsel to the Chairman of the Joint Chiefs of Staff be appointed in the regular grade of brigadier general or rear admiral (lower half).

The House bill contained no similar provision.
The House recesses.

Modification of limitations on general and flag officers on active duty (sec. 502)

The Senate amendment contained a provision (sec. 501) that would amend sections 525, 526, and 721 of title 10, United States Code, to implement section 506 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110–417) to modify the distribution and authorized end strengths of general and flag officers on active duty.

The House bill contained no similar provision.

The House recesses with an amendment that would add a requirement that the Secretary of Defense submit to the Committees on Armed Services of the Senate and the House of Representatives a report setting forth an assessment of: (1) the provisions of title 10, United States Code, that exclude commissioned officers of the armed forces on active duty in general and flag officer grades from the limitations on the authorized strengths of general and flag officers; (2) whether the authorized numbers of general and flag officers in active status under section 12004(a) of title 10, United

States Code, are adequate to provide the reserve components a sufficient number of general and flag officers on active status in order to meet increased authorizations for active duty service and provide these officers with appropriate opportunities for joint responsibility and joint officer development; and (3) whether the requirements for general and flag officer positions resulting from recommendations for statutory authority to specify the grade of the Chief of the Navy Dental Corps, the Chief and Deputy Chief of Chaplains in the Air Force, the Chief of the Army Medical Specialist Corps, and the establishment of the Vice Chief of the National Guard Bureau are necessary in light of recent legislative modifications of applicable provisions of law.

Revisions to annual report requirement on joint officer management (sec. 503)

The House bill contained a provision (sec. 511) that would amend section 667 of title 10, United States Code, to align the reporting requirement on joint officer management with joint programs and policies of the Department of Defense, and remove the requirement to report on the joint qualifications of critical occupational specialty officers and the analysis of assignments of officers after designation as joint qualified officers.

The Senate amendment contained a similar provision (sec. 502).

The Senate recedes.

The conferees believe that the limitation contained in section 668(b)(1)(B) of title 10, United States Code, that excludes assignments as instructor at joint professional military education Phase I courses from the joint duty assignment list may be inappropriate and could negatively impact the quality of instructors. The conferees intend to address this issue in the National Defense Authorization Act for Fiscal Year 2011 with the goal of improving instructor quality.

Extension of temporary increase in maximum number of days leave members may accumulate and carryover (sec. 504)

The House bill contained a provision (sec. 501) that would extend to December 31, 2012, the temporary authority for service members to accumulate and carryover 75 days of leave from one fiscal year to the next.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would extend the temporary authority to September 30, 2013.

Computation of retirement eligibility for enlisted members of the Navy who complete the Seaman to Admiral (STA-21) officer candidate program (sec. 505)

The House bill contained no similar provision.

The House recedes with a technical amendment.

The conferees acknowledge that incongruous State requirements for school enrollment, eligibility, placement, and graduation create unique challenges for military families whose school-aged children move, on average, six to nine times between kindergarten and high school graduation. The conferees believe that enactment of the Interstate Compact, which includes development of State councils to provide for coordination among government agencies and military installations, will improve educational opportunities and support for military school-aged children.

Subtitle E—Missing or Deceased Persons

Additional requirements for accounting for members of the Armed Forces and Department of Defense civilian employees listed as missing in conflicts occurring before enactment of new system for accounting for missing persons (sec. 541)

The House bill contained a provision (sec. 561) that would amend section 1509 of title 10, United States Code, to require the Secretary of Defense to implement a comprehensive and fully resourced program to account for missing persons from all conflicts beginning with World War II. The provision would expand the prisoner of war/missing in action (POW/MIA) community to include other elements of the Department which are involved in the accounting for and recovery of missing persons, such as the Defense Intelligence Agency's Stony Beach program. Finally, the provision would require the Secretary of Defense to take necessary measures to ensure that the number of missing persons annually accounted for increases to 200 by 2015 and 350 by 2020.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to ensure adequate resources are provided to the POW/MIA accounting community necessary to account for 200 persons annually by 2015. The conferees understand that accounting for 200 persons annually by 2015 represents a significant increase from the current accounting effort. Given that more than 80,000 service members remain missing from the Nation's conflicts from World War II to the present, and that achieving the fullest possible accounting of those missing has been a long-standing national priority, the conferees believe that the Department should make every effort to increase the number of persons accounted for annually. As accounting efforts become more difficult with the passage of time, the conferees urge the Secretary of Defense to increase annual accounting to 350 by 2020.

Policy and procedures on media access and attendance by family members at ceremonies for the dignified transfer of remains of members of the Armed Forces who die overseas (sec. 542)

Miles, Jr., for acts of valor during the Korean War.

Subtitle G—Military Family Readiness Matters

Establishment of online resources to provide information about benefits and services available to members of the Armed Forces and their families (sec. 561)

The Senate amendment contained a provision (sec. 577) that would require the service secretaries to provide certain information to service members and their families at certain points in their career concerning service and veteran benefits, including disability and survivor benefits and mandatory offsets thereto. The provision would also require the service secretaries to provide biennial notice of benefits to all service members, perform public outreach on benefits, and to establish and maintain a website providing comprehensive benefit information to service members and their families. Finally, the provision would require the Secretary of Defense to report to Congress within 1 year on the implementation of the provision.

The House bill contained no similar provision.

The House recesses with an amendment that would require the Secretary of Defense to establish and maintain a website to provide comprehensive benefit information to service members and their families, and to conduct public service outreach on the availability of the website.

The conferees remain concerned that service members and their families lack essential information about the compensation, benefits, services, and programs available to them. Similarly, the conferees believe that many service members, retirees, their families, and their survivors, are unaware, to their detriment, of disability and survivor benefits and statutorily-mandated offsets affecting those benefits. The conferees urge the Department to take necessary initiatives to enhance the knowledge and understanding of service members, retirees, and their survivors concerning pay and compensation matters, veteran benefits, and survivor benefits.

Additional members on Department of Defense Military Family Readiness Council (sec. 562)

The Senate amendment contained a provision (sec. 551) that would mandate the addition of two members to the Department of Defense Military Family Readiness Council. One representative would be from the National Guard, and the other representative would be from a reserve component other than the National Guard, and each would be appointed by the Secretary of Defense.

The House bill contained no similar provision.

The House recedes with an amendment that would specify that one representative must be from the Army National Guard or Air National Guard, and the other must be from the Army Reserve, Navy Reserve, Marine Corps Reserve, or the Air Force Reserve. The amendment would also limit these representatives' terms to 3 years, as well as require that the Guard representative rotate between the Army National Guard and the Air National Guard, and the reserve component representative that is not National Guard must rotate among the specified reserve components.

Support for military families with special needs (sec. 563)

The House bill contained a provision (sec. 710B) that would require coverage under the TRICARE program for any treatment of autism spectrum disorders that a health care professional determines to be medically necessary, and would prohibit the Secretary of Defense from considering applied behavior analysis or other structured behavior programs as special education services not otherwise authorized under TRICARE.

The Senate amendment contained a provision (sec. 553) that would require the Secretary to develop and implement a policy and program to provide community support for military dependent children with autism and their families, including two or more pilot projects to evaluate the effectiveness of various approaches to provide such support.

The House recedes with an amendment that would establish an Office of Community Support for Military Families with Special Needs within the Office of the Under Secretary of Defense for Personnel and Readiness, which would have the responsibility to develop and implement a comprehensive policy and program of support for military families with special needs, to establish the capability to provide timely access to information and referral services, and to oversee the expansion of case management and individualized support services provided by the military departments. The amendment would also authorize the Secretary to establish a foundation to enhance the Department of Defense's programs, training, and research.

The conferees agree to an increase of \$50.0 million to be available for this purpose, which is reflected in the tables for this Act.

The conferees believe that expanding support for families with special needs is a critical requirement for the all-volunteer force. Regrettably such programs have not been a priority for the Department, as evidenced by its failure to implement requirements for expanded services for autism support as required by section 587 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181). The conferees are also concerned that enrollment in the Exceptional Family Member Program, which is crucial to ensuring that the needs of eligible dependents are met, is far lower than necessary to reach the estimated 220,000 family members who are eligible for such enrollment.

The conferees expect that implementation of this section will result in substantial improvements in identification and outreach to larger numbers of individuals who need support and coordination of available services, expansion of case management services,

more direct training and counseling for parents and families, and timely access to information and referral to both Department of Defense and other federal, State, and local special needs resources and services.

The conferees direct the Secretary to examine ways to mitigate the challenges for families who may be disadvantaged by relocation during their military service, and to ensure that enrollment in the Exceptional Family Member Program, or any successor to that program, is perceived as a positive and necessary family readiness resource.

The conferees applaud those who, through their advocacy for families with autism, have illuminated the shortfalls in support for families with all special needs that this section is intended to address.

Pilot program to secure internships for military spouses with Federal agencies (sec. 564)

The House bill contained a provision (sec. 581) that would authorize the Secretary of Defense to establish an internship pilot program for certain military spouses to obtain employment with other federal agencies or departments that could potentially lead to career portability and advancement. The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would provide for similar expansion of eligibility for family and medical leave under title 5, United States Code, for federal civil service employees.

Deadline for report on sexual assault in the Armed Forces by Defense Task Force on Sexual Assault in the Military Services (sec. 566)

Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375) to change the date for the report of the Defense Task Force on Sexual Assault in the Military Services to December 1, 2009.

Report on international intrafamilial abduction of children of members of the Armed Forces (sec. 570)

The House bill contained a provision (sec. 588) that would express a sense of Congress that intra-familial abduction to foreign countries of children of members of the armed forces constitutes a grave violation of the rights of military parents whose children are abducted and poses a significant threat to the psychological well-being and development of the abducted children. The provision also required recurring reports on the programs, projects, and activities carried out by the Department of Defense to assist members of the armed forces whose children are abducted.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require a report to the Committees on Armed Services of the Senate and the House of Representatives, not later than 180 days after enactment of this Act, on international intrafamilial abduction of children of members of the armed forces and an assessment of assistance available to parents of abducted children, measures taken to prevent abduction of children of military personnel, and education available to military parents on the risks of international intrafamilial child abduction.

Assessment of impact of deployment of members of the Armed Forces on their dependent children (sec. 571)

The Senate amendment contained a provision (sec. 554) that would require the Secretary of Defense to undertake a comprehensive assessment of the impact of deployment on dependent children and adolescents of military service members. The provision would also require the Secretary to conduct a review of the mental health care and counseling services available to children of service members; whether the status of a service member as active duty or reserve affects the access of a military child to such services; and whether and to what extent waiting lists, geographic distance, and other factors may obstruct military childrens' receipt of such services.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary also to address children of deployed service members in families in which one parent is in the armed forces, both parents are in the armed forces, and the service member is a single parent.

The conferees note that the requirement for the Secretary to review the mental health care and counseling services available to dependent children is addressed elsewhere in this Act.

Report on child custody litigation involving service of members of the Armed Forces (sec. 572)

The House bill contained a provision (sec. 584) that would amend title II of the Servicemembers Civil Relief Act (50 U.S.C. 521 et seq.) to provide that if a motion for change of custody of a child of a service member is filed while the service member is deployed in support of a contingency operation, no court may enter an order modifying or amending any previous judgment or order, or issue a new order, that changes custody arrangements for that child that existed as of the date of the deployment of the service member, except that a court may enter a temporary custody order if the court finds that it is in the best interest of the child. The provision would also preclude a court from considering the absence of a service member by reason of deployment, or possibility of deployment, in determining the best interest of the child.

The Senate amendment contained a provision (sec. 555) that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives, not later than June 1, 2010, a report on reported judicial cases involving child custody disputes in which the service of a deployed or deploying member of the armed forces, active or reserve, was an issue in a child custody dispute.

The House recesses with an amendment that would change the date for the report on judicial cases involving child custody disputes to March 31, 2010.

The conferees believe that actions need to be taken by the Secretary of Defense and by military leaders and legal assistance personnel to assist in preventing, where possible, legal disputes over child custody involving military members who are custodial parents.

The conferees have raised concerns in previous conference agreements since 2008 that service members who have been awarded custody of minor children but who are required to deploy in defense of the Nation or be absent from their children as a result of their military duties are vulnerable to litigation by non-custodial, biological parents. The conferees believe that providing assistance and education regarding measures service members can take in advance of deployment to prevent child custody disputes will serve to prevent many lawsuits and minimize the distraction of having to fight to retain custody of children while our service members are deployed. Further, the conferees are concerned that service members faced with the risk of losing custody of children as a result of military service may opt to leave the military, and potential recruits may choose not to join a military service.

The conferees commend the several States that have enacted legislation to address child custody circumstances that arise from the current demands of military service.

The conferees believe that the Secretary of Defense must also take steps to assist deployed members of the armed forces in child custody disputes that arise as a result of their military service. Although the Secretary has concluded that it would be unwise to push for federal legislation in an area that is typically a matter of state law concern, he did identify several steps that the Department should take to address this issue.

The conferees commend the Secretary for his initiative, and ask that he report to the Committees on Armed Services of the Senate and the House of Representatives not later than 180 days after enactment of this Act on the measures the Department has taken to prevent child custody litigation involving military members who are custodial parents to include contacting the governors of each of the States that have yet to pass legislation addressing the special considerations of child custody cases in the military to urge them to pass such legislation, asking the Chief of the National Guard Bureau to follow up with the Adjutant General of those States on the issue of child custody in the military, including concerns over child custody matters on the list of 10 key quality of life issues that will be presented to governors, outreach activities by the Department of Defense Regional State Liaisons with States whose legislatures have not addressed military custody concerns, efforts by the Judge Advocate General of the Army, Navy, and Air Force and the Staff Judge Advocate to the Commandant of the Marine Corps to work with the American Bar Association to publicize and support the national pro bono project of the American Bar Association, and engaging with the military services to update and standardize the family care plans to provide for long-term and short-term care, care and support for children, and financial ar-

rangements including power of attorney when the service members are deployed. The conferees request a second and final report assessing the effectiveness of these actions no later than 1 year after the initial report.

Comptroller General report on child care assistance for members of the Armed Forces (sec. 573)

The Senate amendment contained a provision (sec. 561) that would require the Comptroller General to submit a report on financial assistance for child care provided by the Department of Defense to members of the reserve components who are deployed in connection with a contingency operation.

The House bill contained no similar provision.

The House recedes with an amendment that would expand the scope of the report to include an assessment of the financial assistance for child care provided to all active-duty service members, as well as to members of the reserve components who are deployed in connection with a contingency operation.

The provision would also amend section 102 of UOCAVA to require each service secretary to designate an office on each installation as a voter registration agency designated under section 7(a)(2) of the National Voter Registration Act of 1993 (Public Law 103-31), and authorize the Secretary of Defense to designate pay, personnel, and identification offices as designated voter registration agencies.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Modification of matching fund requirements under National Guard Youth Challenge Program (sec. 593)

The House bill contained a provision (sec. 593) that would amend section 509(d)(1) of title 32, United States Code, to increase the maximum cost share of the Department of Defense (DOD) for state National Guard Youth Challenge Programs from 60 to 75 percent of the costs of the program, beginning October 1, 2009.

The Senate amendment contained a similar provision (sec. 576) that would also authorize the Department of Defense to fund 100 percent of a new program's costs during the first 2 years of operation.

The Senate recedes.

The conferees are aware that the National Guard Youth Challenge Program is an effective youth outreach and mentoring program that benefits both the States in which it operates and the Nation, and that there is continued pressure for the Department of Defense to assume a larger funding role for this program. The conferees understand that the Department currently allows States to include in-kind, non-cash support as part of the statutorily mandated State share of the cost of operating the program.

To better understand the nature and extent to which the States' required contributions for operation of the program are fulfilled by monetary contributions and also by in-kind, non-cash support, the conferees direct the Secretary of Defense to report to the Committees on Armed Service of the Senate and the House of Representatives no later than 180 days after enactment of this Act on: 1) the annual overall cost in each State over the last 3 years of operating the Challenge program; 2) the annual amounts of cash and value of in-kind contributions by each State for those years; 3) a description of the in-kind, non-cash contributions that made up each State's required share; and 4) the total DOD cash contribution, to include personnel costs, to support the program in each State for the last 3 years. The conferees also direct the Secretary of Defense to prescribe regulations to clearly define and specify the criteria for allowable in-kind, non-cash support for both the Department and the participating States that will fulfill the requirement of section 509(d)(1) of title 32, United States Code.

Expansion of Military Leadership Diversity Commission to include reserve component representatives (sec. 594)

The House bill contained a provision (sec. 595) that would amend section 596(b)(1) of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417) by including reserve component representatives in the membership of the Military Leadership Diversity Commission.

The House bill contained a provision (sec. 596) that would require the Office for Reintegration Programs in the Department of Defense to establish, as part of the Yellow Ribbon Reintegration Program, a program to provide National Guard and reserve members and their families, in coordination with community programs, with training in suicide prevention and community healing and response to suicide.

The Senate amendment contained a similar provision (sec. 557).

The House recedes.

Comprehensive plan on prevention, diagnosis, and treatment of substance use disorders and disposition of substance abuse offenders in the Armed Forces (sec. 596)

The Senate amendment contained a provision (sec. 552) that would require the Secretary of Defense to conduct a comprehensive review of and report on the programs and activities of the Department of Defense for the prevention, diagnosis, and treatment of substance abuse disorders and the policies of the Department relating to the disposition of substance abuse offenders. The provision would also require a study by an independent entity on substance abuse disorder programs for members of the armed forces and require the Secretary of Defense to submit a comprehensive plan to improve these programs, activities, and policies to the Committees on Armed Services of the Senate and the House of Representatives.

The House bill contained no similar provision.

The House recedes with a clarifying amendment that would require the reestablishment of regional long-term inpatient substance abuse treatment programs.

The conferees note that overall responsibility for substance abuse programs is a personnel function of the military departments, but that medical treatment policy is formulated and resourced by the Assistant Secretary of Defense for Health Affairs. The conferees expect a better integration of these functions.

The conferees note the success of regional residential rehabilitation programs that the Department of Defense disestablished in the 1990s, and consequently this provision would require the Department of Defense to re-establish this capability.

Reports on Yellow Ribbon Reintegration Program and other reintegration programs (sec. 597)

The Senate amendment contained a provision (sec. 558) that would require the Secretary of Defense to report on the various reintegration programs being administered in support of National Guard and reserve members and their families, to include assessments of various elements of the Yellow Ribbon Reintegration Program and administration of the program.

The House bill contained no similar provision.

The House recedes with an amendment that would create two separate reporting requirements; one on the various reintegration programs being administered in support of National Guard and reserve members and their families, and one on the Yellow Ribbon Reintegration Program, and would add to the required reporting elements for the Yellow Ribbon Reintegration Program a list of accounts from which funds for the program were derived during the last fiscal year and why funds from those accounts were chosen.

Reports on progress in completion of certain incident information management tools (sec. 598)

The House bill contained a provision (sec. 597) that would require the Secretary of Defense to report to the Committees on Armed Services of the Senate and House of Representatives, not later than 120 days after the enactment of this Act and every 6 months thereafter, on the progress with respect to the completion of the Defense Incident-Based Reporting System (DIBRS).

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would also require reports on progress with respect to the completion of the Defense Sexual Assault Incident Database (DSAID).

The conferees are concerned that the Department of Defense has failed to take the steps necessary to ensure compliance with section 563 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110–417). The Department of Defense’s experience with the Defense Integrated Military Human Resources System, and the Defense Personal Property System, among others, demonstrate that a centralized, joint military program office with proven information system acquisition expertise, as well as necessary resourcing, personnel, and organizational authority is essential for success. The lack of progress in implementing DIBRS illustrates the problems the DSAID will encounter if it is not managed properly. The conferees expect the Department of Defense, not just the Sexual Assault Prevention and Response Office, to take the measures necessary to complete these critical information systems.

LEGISLATIVE PROVISIONS NOT ADOPTED

Rank requirement for officer serving as Chief of the Navy Dental Corps to correspond to Army and Air Force requirements

The House bill contained a provision (sec. 502) that would amend section 5138(a) of title 10, United States Code, to require that the Chief of the Dental Corps of the Navy be appointed in the grade of rear admiral.

The Senate amendment contained no similar provision.

The House recesses.

A separate provision in this Act would require the Secretary of Defense to include an assessment of this provision in a report on general and flag officers.

Chief and Deputy Chief of Chaplains of the Air Force

The Senate amendment contained a provision (sec. 504) that would amend chapter 805 of title 10, United States Code, to establish in statute the positions of Chief and Deputy Chief of Chaplains in the Air Force and require their appointment in the grades of major general and brigadier general, respectively.

The House bill contained no similar provision.

The Senate recesses.

A separate provision in this Act would require the Secretary of Defense to include an assessment of this provision in a report on general and flag officers.

Grade of commissioned officers in uniformed medical accession programs

The Senate amendment contained a provision (sec. 521) that would amend sections 2114(b) and 2121(c) of title 10, United States Code, to authorize medical students attending the Uniformed Services University of the Health Sciences (USUHS) and students participating in the armed forces Health Professions Scholarship and Financial Assistance Programs (HPSP) who have prior commis-

sioned service to serve, while on active duty, in pay grade O–1, or in pay grade O–2 if they meet specified promotion criteria prescribed by the service secretary. The amendment would also amend section 2004a of title 10, United States Code, to provide that an officer detailed as a student at a medical school would serve on active duty in the same grade with the same entitlement to pay as specified in section 2114(b) of title 10, United States Code.

The House bill contained no similar provision.

The Senate recesses.

The conferees believe that the requirement that USUHS and HPSP students remain in the grade of O–1 throughout their 4-year course of medical study appears to be a vestige of the conscription era. This requirement lacks adequate justification at a time when the Army, Navy, and Air Force urgently need to attract and retain highly capable and motivated medical officers who, per section 2114(a) of title 10, United States Code, demonstrate “dedication to a career in the uniformed services.” In this regard, the conferees question this requirement when no other category of commissioned officer currently is denied regular promotion opportunity. If the Department of Defense desires to retain the policy in section 2114(b), the conferees expect the services, in consultation with the Surgeons General of the Army, Navy, and Air Force, to explain why it should be retained, and whether it should also be applied to other categories of military officers in a student status.

Inclusion of email address on Certificate of Release or Discharge from Active Duty (DD Form 214)

The House bill contained a provision (sec. 523) that would amend section 596 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) to require the Secretary of Defense to modify the Certificate of Release or Discharge from Active Duty (DD Form 214) in order to permit a member of the armed forces to include an email address on the form.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that Department of Defense Instruction 1336.01, issued on August 20, 2009, provides that if the service member elects, the member’s email address will be included on the DD Form 214.

Secure electronic delivery of Certificate of Release or Discharge from Active Duty

Findings

The Senate amendment contained a provision (sec. 582) that would express the following congressional findings: (1) the right to vote is a fundamental right; (2) due to logistical, geographic, operational, and environmental barriers, military and overseas voters are burdened by many obstacles that impact their ability to vote and register to vote, the most critical of which include problems transmitting balloting materials and not being given enough time to vote; (3) States play an essential role in facilitating the ability of military and overseas voters to register to vote and have their ballots cast and counted, especially with respect to implementing improvements in absentee voter registration and absentee ballot procedures; (4) the Department of Defense educates military and overseas voters about their rights under the Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff et seq.) and plays an indispensable role in taking measures which allow military and overseas voters to have their votes count; and (5) local, State, and Federal Government entities involved with getting ballots to military and overseas voters must work in cooperation to provide voter registration services and balloting materials in a secure and expeditious manner.

TITLE VI—COMPENSATION AND OTHER PERSONNEL
BENEFITS

Subtitle A—Pay and Allowances

Fiscal year 2010 increase in military basic pay (sec. 601)

The House bill contained a provision (sec. 601) that would authorize a pay raise for the members of the uniformed services of 3.4 percent effective January 1, 2010. This across-the-board pay raise is 0.5 percent above the Administration request.

The Senate amendment contained an identical provision (sec. 601).

The conference agreement includes this provision.

Increase in maximum monthly amount of supplemental subsistence allowance for low-income members with dependents (sec. 602)

The Senate amendment contained a provision (sec. 603) that would amend section 402a of title 37, United States Code, to increase the maximum monthly amount of the supplemental subsistence allowance from \$500 to \$1,100 per month. The provision would also require the Secretary of Defense to submit to the congressional defense committees by September 1, 2010, a plan, in consultation with the Secretary of Agriculture, to ensure members of the armed forces and their dependents need not rely on the Supplemental Nutrition Assistance Program (SNAP) under chapter 51 of title 7, United States Code, for nutritional assistance.

The provision would cap the amount of special compensation at the amount authorized for aid and attendance compensation for veterans under section 1114(r) of title 38, United States Code, and would terminate following the separation, death, or recovery of the service member.

The Senate amendment contained a similar provision (sec. 617) that would authorize special monthly compensation for members of the uniformed services whose injury or illness was incurred or aggravated in the line of duty. The provision would cap the amount of special compensation at the amount authorized for aid and attendance compensation for veterans under section 1114(r)(2) of title 38, United States Code.

The House recedes with an amendment that would authorize special compensation for service members with a catastrophic in-

jury or illness incurred or aggravated in the line of duty if, in the absence of such assistance, the member would require hospitalization or other institutional care.

The conferees believe it is imperative that the Department of Defense and the Department of Veterans Affairs ensure the seamless transition of care of all service members retiring for disability. This provision would recognize that family members are making life altering sacrifices in order to care for service members at home. By aligning the authority available under this provision with the authority to provide aid and attendance compensation for veterans under section 1114 of title 38, United States Code, the conferees expect there to be no gaps in coverage and care for catastrophically injured service members transitioning from the Department of Defense to the Department of Veterans Affairs.

The authority would expire 1 year from the date of enactment of this Act.

The Senate amendment contained no similar provision.

Subtitle F—Other Matters

Limitations on collection of overpayments of pay and allowances erroneously paid to members (sec. 661)

The House bill contained a provision (sec. 661) that would reduce the maximum percentage of monthly compensation that may be involuntarily collected to repay overpayments erroneously paid to a service member from 20 percent to 10 percent. The provision would also require the secretaries of the military departments to consult with service members when establishing a repayment plan, delay collection from wounded warriors for 180 days, and consider forgiving the debt when the service member relies on social security benefits or if repayment would impose an undue financial hardship. Finally, the provision would establish a bar on collection activities after 5 years.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would reduce the maximum percentage of monthly compensation that may be involuntarily collected to repay overpayments from 20 percent to 15 percent. The amendment would also require the secretaries of the military departments to provide a reasonable opportunity for members to request a delay in collection and to consider any hardship to the service member or former member caused by the collection efforts.

The conferees believe that the Department of Defense should consider the financial consequences of requiring repayment of erroneous overpayments made to service members including the extent to which a repayment plan would leave service members or former service members with inadequate resources to cover their reasonable monthly expenses. This is especially the case when a former member relies on social security benefits or veterans disability compensation for their living expenses.

Additionally, the Department should consider the length of time that has passed between the time the overpayment occurred and the collection effort. As a general matter, the conferees believe that the secretaries concerned should not collect debts that are identified more than 6 years after they are incurred unless not collecting the debt would amount to an unjust enrichment. The Department should weigh all these factors when considering whether to waive the debt and in determining an appropriate repayment plan for members or former members to ensure a fair and equitable result for a debt that resulted from Department error, through no fault of the member.

Sense of Congress on airfares for members of the Armed Forces (sec. 662)

The Senate amendment contained no similar provision.

The House recesses.

The conferees acknowledge and in principle support the administration's proposal to permanently authorize concurrent receipt of military retired pay and veteran disability compensation for all medical retirees. In its budget submission, however, the administration failed to identify an acceptable and specific funding source to offset the increase in mandatory spending. Under House and Senate budget rules that derive from the Congressional Budget Act, Congress must offset increases in mandatory spending in non-emergency legislation with cuts in other entitlement programs or through increased revenues. Although the House provision included offsets sufficient to authorize concurrent receipt for 9 months, those offsets did not comply with Senate budget rules. Accordingly, the provision could not be included.

The conferees urge the administration to resubmit its proposal next year and to include specific offsets that would allow Congress to permanently authorize concurrent receipt for medical retirees.

The House bill contained a provision (sec. 706) that would extend the eligibility of reserve component members who are issued or covered by a delayed-effective-date active-duty order in support of a contingency operation for TRICARE coverage under section 1074 of title 10, United States Code, from 90 days before the date on which the period of active duty is to commence, to 180 days before that date.

The Senate amendment contained no similar provision.

The Senate recesses with a technical amendment.

Enhancement of transitional dental care for members of the reserve components on active duty for more than 30 days in support of a contingency operation (sec. 703)

The Senate amendment contained a provision (sec. 712) that would modify the transitional health care benefit for reservists who separate after more than 30 days of active duty in support of a contingency operation, giving them the same priority for dental care in a military treatment facility as an active-duty member.

The House bill contained no similar provision.

The House recesses with a technical amendment.

Expansion of survivor eligibility under TRICARE Dental Program (sec. 704)

The House bill contained a provision (sec. 703) that would expand the eligibility of surviving children under the TRICARE Dental Program. Current law allows survivors to keep this dental coverage for a period of 3 years after the service member's death. The provision would increase the eligibility for surviving dependent children from 3 years to the longer of the following periods: (1) 3 years; (2) until they reach age 21; or (3) until age 23 if the dependent is a full-time student at age 21 and is or was dependent on the member for at least half of their support. The provision would make the dental benefit provided to surviving children consistent with the medical benefit for which they are already eligible.

The Senate amendment contained a similar provision (sec. 702).

The Senate recedes with a clarifying amendment.

TRICARE Standard coverage for certain members of the Retired Reserve who are qualified for a non-regular retirement but are not yet age 60 (sec. 705)

The House bill contained a provision (sec. 704) that would extend eligibility for TRICARE Standard to members of the Retired Reserve who are qualified for non-regular retirement but who are not yet age 60, and their dependents. Eligibility would terminate when the member becomes eligible for TRICARE coverage as a retiree at age 60. Members would be responsible for paying a premium equal to the total cost of coverage as determined by the Secretary of Defense, based on actual program costs.

The Senate amendment contained a similar provision (sec. 701).

The Senate recedes with a technical amendment.

Constructive eligibility for TRICARE benefits of certain persons otherwise ineligible under retroactive determination of entitlement to Medicare part A hospital insurance benefits (sec. 706)

The Senate amendment contained a provision (sec. 703) that would exempt TRICARE beneficiaries under the age of 65 who become disabled from the requirement to enroll in Medicare part B for the retroactive months of entitlement to Medicare part A in order to maintain TRICARE coverage.

Eligible beneficiaries would still be required to enroll in Medicare part B in order to maintain TRICARE coverage for future months, but would be considered to have coverage under the TRICARE program for the months retroactive to their entitlement to Medicare part A.

The House bill contained no similar provision.

The House recedes.

Notification of certain individuals regarding options for enrollment under Medicare part B (sec. 707)

The Senate amendment contained a provision (sec. 707) that would require the Secretary of Defense to identify eligible TRICARE beneficiaries who are entitled to benefits under Medicare

part A and who are eligible to enroll in Medicare part B of the options available to them for enrollment in Medicare part B and the potential consequences to TRICARE coverage of waiving enrollment in part B.

The House bill contained no similar provision.

The House recedes with several technical changes.

Mental health assessments for members of the Armed Forces deployed in connection with a contingency operation (sec. 708)

The House bill contained a provision (sec. 709) that would require the Secretary of Defense to conduct a demonstration project to assess the feasibility and efficacy of providing a service member with a post-deployment mental health screening that is conducted in person by a mental health provider.

The Senate amendment contained a provision (sec. 711) that would require the Secretary to issue guidance for the provision of a person-to-person mental health assessment for each service member deployed in connection with a contingency operation during the 60-day period before deployment, between 90 and 180 days after deployment, and not later than 6 months, 12 months, and 24 months after return from deployment. A mental health assessment would not be required by this provision for service members who are not subjected or exposed to operational risk factors during deployment.

The House recedes with a clarifying amendment.

Temporary TRICARE inpatient fee modification (sec. 709)

The Senate amendment contained a provision (sec. 706) that would express the sense of the Senate that in the past, the Department of Defense has proposed fee increases on certain military health care beneficiaries in order to cover the growing cost of health care, that the Department has additional options to constrain the growth of health care spending, and that it should consider such options rather than increasing certain fees.

The House bill contained no similar provision.

The House recedes with an amendment that would extend for 1 year the current limitation on charges for inpatient care in a civilian hospital under TRICARE Standard.

Subtitle B—Health Care Administration

Comprehensive policy on pain management by the military health care system (sec. 711)

The Senate amendment contained a provision (sec. 721) that would require the Secretary of Defense to develop and implement a comprehensive policy on pain management by the military health care system.

The House bill contained no similar provision.

The House recedes with an amendment that would change the date by which the Secretary is required to develop and implement this policy from October 1, 2010 to March 31, 2011.

In developing and implementing this policy, the conferees urge the Department to examine best practices in pain management used by public and private health care institutions, including treat-

ment methods and approaches designed to lessen reliance on multiple medications for the purpose of pain management.

Administration and prescription of psychotropic medications for members of the Armed Forces before and during deployment (sec. 712)

The Senate amendment contained a provision (sec. 724) that would require the Secretary of Defense to submit an annual report to Congress on the prescription of antidepressants and drugs to treat anxiety for troops serving in Iraq and Afghanistan.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to submit a report to the congressional defense committees not later than October 1, 2010, on the implementation of policy guidance dated November 7, 2006, regarding deployment-limiting psychiatric conditions and medications. The amendment would also require the Secretary of Defense to establish and implement by October 1, 2010, a policy for the use of psychotropic medications for deployed members of the armed forces.

Cooperative health care agreements between military installations and non-military health care systems (sec. 713)

The House bill contained a provision (sec. 705) that would authorize the Secretary of Defense to establish cooperative health care agreements between military installations and local or regional health care systems.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Plan to increase the mental health capabilities of the Department of Defense (sec. 714)

The House bill contained a provision (sec. 715) that would require the Secretary of Defense to report on the appropriate number of military mental health providers required to meet the mental health care needs of members of the armed forces, retired members, and dependents. The provision would also require the Secretary to provide a plan on how the Department of Defense (DOD) will achieve the appropriate number of military mental health providers.

The Senate amendment contained a provision (sec. 722) that would require the Secretary to develop and implement a plan to significantly increase the number of DOD military and civilian behavioral health personnel.

The House recedes with an amendment that would: require the Secretary of each military department to increase by a specified amount the number of active-duty mental health personnel authorized for each department; require the Secretary of Defense to report on the appropriate number of mental health personnel required to meet mental health care needs of service members, retired members, and dependents; require the Secretary to develop and implement a plan to significantly increase the number of DOD military and civilian mental health personnel; and require the Secretary to assess the feasibility and advisability of establishing one

or more military mental health specialties for officers or enlisted service members.

Department of Defense study on management of medications for physically and psychologically wounded members of the Armed Forces (sec. 715)

The Senate amendment contained a provision (sec. 723) that would require the Secretary of Defense to conduct a study on the management of medications for physically and psychologically wounded service members.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

Limitation on obligation of funds under defense health program information technology programs (sec. 716)

The House bill contained a provision (sec. 1403) that would authorize \$26.9 billion in fiscal year 2010 funds for the Defense Health Program (DHP) and would recommend a transfer of funds from the DHP to the Office of the Secretary of Defense from several accounts relating to information management, technology, and support, which is reflected in the tables.

The House bill contained a provision (sec. 710) that would require the Secretary of Defense, in coordination with the Secretary of Veterans Affairs, to submit a report to Congress on the progress that has been made on the establishment of a Joint Virtual Lifetime Electronic Record for members of the armed forces.

The Senate amendment contained a provision (sec. 1403) that would authorize \$27.9 billion in fiscal year 2010 to be appropriated for the DHP.

The Senate recedes with an amendment that would limit the obligation of funds under DHP information technology programs so that not more than 50 percent of the amount remaining unobligated from certain accounts may be obligated until 30 days after the Deputy Secretary of Defense, acting in the capacity of the Chief Management Officer of the Department of Defense (DOD), submits a report on improvements to the governance and execution of health information management and information technology programs planned and programmed to electronically support clinical medical care within the military health system. The report would include an assessment of the capabilities of the Office of the Assistant Secretary of Defense for Health Affairs to carry out necessary governance, management, and development functions of such systems, and an analysis of the alternative organizations within DOD with equal or greater management capabilities for health information management and technology.

The conferees are concerned that significant doubts have been raised in relation to both health information systems performance and program integrity, which require attention and resolution at the highest levels of the Department.

The authorization for appropriations for the Defense Health Program is included elsewhere in this act.

Subtitle C—Other Matters

Study and plan to improve military health care (sec. 721)

The House bill contained a provision (sec. 713) that would require the Secretary of Defense to submit a report on the health care needs of military family members, and require the Secretary of the Army to establish a pilot program focused on the needs of military children and adolescents.

The House bill contained a provision (sec. 716) that would require the Secretary of Defense to submit a report on the access to health care of service members and other eligible beneficiaries who live in rural areas.

The Senate amendment contained two provisions (sec. 559 and sec. 560) that would require the Secretary to develop and implement a plan to expand existing Department of Defense initiatives to increase access to mental health care for family members of members of the National Guard and reserve deployed overseas during periods of mobilization, deployment, and demobilization of such members of the reserve component.

The Senate amendment contained a provision (sec. 704) that would require the Department of Defense (DOD) to initiate a process of improvement of the TRICARE health system.

The House recedes with an amendment that would require the Secretary to submit a report on the health care needs of military family members and to undertake actions to enhance the capability of the military health system and improve the TRICARE program, to include addressing access issues for National Guard and reserve members and their families and those beneficiaries living in rural areas. The amendment would also require the Secretary to submit reports on the progress made in undertaking such actions and future plans for improvement of the military health system, to include the submission of a report together with the budget justification materials submitted to Congress in support of the DOD budget for fiscal year 2012.

The conferees note that private sector care, which was originally intended to be and is still described by the DOD as a program to fill gaps in the direct care system, now accounts for nearly 70 percent of DOD health care expenditures. The conferees recognize that several factors have contributed to the unintentional growth in private sector care: staffing shortages, mobilization, and training demands. The conferees are concerned that without appropriate planning, the effect of these factors could be an irreversible trend, placing medical readiness for future contingencies in jeopardy. The conferees believe the Secretary must develop a long-term plan to maximize the capabilities of the direct care system.

In addition, the conferees recognize that improvements to health information technology are a crucial component to improvement of the overall military health system, and note that it is addressed elsewhere in this Act. Finally, the conferees note that the requirement for the Secretary of the Army to establish a pilot program focused on the needs of military children and adolescents is addressed elsewhere in this Act.

Study, plan, and pilot for the mental health care needs of dependent children of members of the Armed Forces (sec. 722)

The House bill contained a provision (sec. 713) that would require the Secretary of Defense to submit a report on the health care needs of military family members, and require the Secretary of the Army to establish a pilot program focused on the needs of military children and adolescents.

The provision would also require the Secretary to conduct a comprehensive review of the mental health care and counseling services available to children of service members.

The Senate recedes with an amendment that would require the Secretary to conduct a comprehensive review of the mental health care and counseling services available to dependent children of members of the armed forces and to develop and implement a plan for improvements in access to quality mental health care and counseling services for such children. The amendment would also require the Secretary of the Army to conduct a pilot program to address the mental health care needs of military children and adolescents.

The conferees note that the requirements for the Secretary to submit a report on the health care needs of military family members and to assess the impacts of military deployment on dependent children of service members are addressed elsewhere in this Act.

Clinical trial on cognitive rehabilitative therapy for members and former members of the Armed Forces (sec. 723)

The Senate amendment contained a provision (sec. 731) that would require the Secretary of Defense to carry out a pilot program under the TRICARE program to determine the feasibility and advisability of expanding coverage for cognitive rehabilitative therapy for members and former members of the armed forces.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to provide for a clinical trial to assess the efficacy of cognitive rehabilitative therapy for members or former members of the armed forces who have been diagnosed with a traumatic brain injury incurred in the line of duty in Operation Iraqi Freedom or Operation Enduring Freedom.

The conferees recognize that the body of scientific knowledge on the efficacy of cognitive rehabilitative therapy is growing and intend that as part of the Department of Defense's expanded research program for wounded warriors the project required by this section will contribute to that knowledge.

Department of Defense Task Force on the Care, Management, and Transition of Recovering Wounded, Ill, and Injured Members of the Armed Forces (sec. 724)

The Senate amendment contained a provision (sec. 732) that would require the Secretary of Defense to establish a task force to assess the effectiveness of the policies and programs developed and

implemented by the Department of Defense and each of the military departments to assist and support the care, management, and transition of recovering wounded, ill, and injured service members.

The House bill contained no similar provision.

The House recedes with an amendment that would change the reporting required under the provision and clarify that the task force is to be an entity separate from the Department of Defense and Department of Veterans Affairs Senior Oversight Committee.

Chiropractic clinical trials (sec. 725)

The House bill contained a provision (sec. 702) that would require the Secretary of Defense to provide chiropractic services and benefits as a permanent part of the Defense Health Program, including the TRICARE program, for all active-duty service members.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to provide for and report on clinical trials to be conducted by the National Institutes of Health or a similar independent academic institution to compare the outcomes of chiropractic treatment, used either exclusively or as an adjunct to other treatments, with conventional treatment, and to assess the effect of chiropractic treatment on certain service member groups.

Independent study on post-traumatic stress disorder efforts (sec. 726)

The House bill contained a provision (sec. 711) that would require the Secretary of Defense and the Secretary of Veterans Affairs, in consultation with the Secretary of Health and Human Services, to submit a report itemizing the current treatments of post-traumatic stress disorder (PTSD), ongoing research, and areas for future exploration.

The Senate amendment contained a provision (sec. 733) that would require the Secretary of Defense and the Secretary of Veterans Affairs to jointly submit a report on research related to PTSD.

The Senate recedes with an amendment that would require the Secretary of Defense, in consultation with the Secretary of Veterans Affairs, to provide for a study on the treatment of PTSD to be conducted by the Institute of Medicine of the National Academy of Sciences or another independent entity, and a clarifying amendment.

Report on implementation of requirements on the relationship between the TRICARE program and employer-sponsored group health plans (sec. 727)

The Senate amendment contained a provision (sec. 705) that would require the Comptroller General to submit a report to the Committees on Armed Services of the Senate and the House of Representatives not later than March 31, 2010, on the implementation of the requirements of section 1097c of title 10, United States Code, relating to the relationship between the TRICARE program and employer-sponsored group health plans.

The House bill contained no similar provision.

The House recesses with an amendment that would require the Secretary of Defense to report on the implementation of section 1097c of title 10, United States Code.

The conferees are concerned that the Secretary of Defense has not yet promulgated implementing regulations for section 1097c of title 10, United States Code, which was effective on January 1, 2008. The conferees believe that implementing regulations are essential for accurate application of the law both to employers and employees, and urge the Secretary of Defense to expedite the publication of these regulations.

Report on stipends for members of reserve components for health care for certain dependents (sec. 728)

The House bill contained a provision (sec. 714) that would require the Secretary of Defense to submit a report on the extent to which the Secretary has exercised the authority provided in section 704 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) to provide a health care stipend for members of the reserve component who are called or ordered to active duty for more than 30 days.

The Senate amendment contained no similar provision.

The Senate recesses.

The House bill contained no similar provision.

The Senate recesses.

The Senate amendment contained a similar provision (sec. 831).

The Senate recesses with an amendment clarifying the scope of the Secretary's authority.

Assessment of improvements in service contracting (sec. 802)

The House bill contained a provision (sec. 802) that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics to contract with a federally funded research and development center to conduct an independent assessment of improvements in the procurement and oversight of contracting for services by the Department of Defense.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) require that the study be conducted by the Defense Science Board; and (2) provide for the study to review additional issues.

Display of annual budget requirements for procurement of contract services and related clarifying technical amendments (sec. 803)

The House bill contained a provision (sec. 803) that would codify and expand the requirement in section 806 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) for the Secretary of Defense to include information on contracts for services in the materials submitted to Congress in support of the President's budget request.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify the reporting requirement and require the Comptroller General to conduct a review of the Department's efforts to compile an annual inventory of contract services in accordance with the requirements of section 2330a of title 10, United States Code.

The conferees note that including in the annual budget submission the total amounts for the procurement of services and the number of full-time equivalents requested by each Department of Defense component, installation or activity should provide greater clarity on amounts proposed to be spent annually on contract services. In addition, specific break-outs of how that money is obligated for each type of service should be reflected in the annual contract inventories compiled by the military departments and defense agencies. The information in the budget submission, together with the detail provided in the annual inventories, should provide the information needed for improved oversight by both the Department and Congress of the procurement of contractor services.

Implementation of new acquisition process for information technology systems (sec. 804)

The House bill contained a provision (sec. 804) that would authorize the Secretary of Defense to designate up to 10 information technology programs annually to be included in a demonstration of an alternative acquisition process for rapidly acquiring information technology capabilities.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would direct the Secretary to develop and implement an alternative acquisition process for the rapid acquisition of information technology systems. The new acquisition process would be designed to include, to the extent determined appropriate by the Secretary, early and continual involvement of the user; multiple, rapidly executed increments or releases of capability; early, successive prototyping to support an evolutionary approach; and a modular, open-systems approach. The Secretary would be required to report to Congress on the new acquisition process, including a schedule for implementation and identification of the categories of information technology acquisitions to which the process will apply.

Life-cycle management and product support (sec. 805)

The House bill contained a provision (sec. 805) that would have prohibited contractors from performing product support integrator functions for a major system.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) require the Secretary of Defense to issue comprehensive guidance on life-cycle management and the development and implementation of product support strategies for major weapon systems; (2) require that each major weapon system be supported by a product support manager; and (3) amend section 802 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) to require that each such position be performed by a properly qualified member of the armed forces or full-time employee of the Department of Defense (DOD).

The conferees understand that product support encompasses all critical functions related to weapon-system readiness, including materiel management, distribution, technical data management, maintenance, training, cataloging, configuration management, engineering support, repair parts management, failure reporting and analyses, and reliability growth. Included within logistics and sustainment functions are the tasks normally performed as part of the logistics support required for a major weapon system that are designed to focus on such metrics as readiness, reliability, availability, mean down time, customer wait time, footprint reduction, and reduced ownership costs.

The conferees note that in implementation of this provision, the positions of product support manager, assistant program manager for logistics, deputy program manager for logistics, and system support manager shall be considered synonymous. However, the conferees emphasize that the product support manager is a separate position from the program manager with distinct responsibilities.

Additionally, the conferees in no way intend to limit DOD from establishing product support managers and comprehensive product support strategies for other acquisition programs that are not designated major weapon systems as defined by section 2302d of title 10, United States Code.

Treatment of non-defense agency procurements under joint programs with intelligence community (sec. 806)

The Senate amendment contained a provision (sec. 814) that would exclude a contract entered into by a non-defense agency for the performance of a joint program conducted to meet the needs of both the Department of Defense and the non-defense agency from the prohibition in section 801(b) of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181).

The House bill contained no similar provision.

The House recedes with an amendment that would limit the provision to contracts with non-defense agencies that are members of the intelligence community, as defined in section 401a of title 50, United States Code.

Policy and requirements to ensure the safety of facilities, infrastructure, and equipment for military operations (sec. 807)

The Senate amendment contained a provision (sec. 835) that would require the Department of Defense (DOD) to establish appropriate health and safety standards for incorporation into contracts for the construction, installation, repair, maintenance, and operation of expeditionary facilities for use by military or civilian personnel of the Department in current and future military operations overseas.

The House bill contained no similar provision.

The House recedes with an amendment that would ensure that DOD has the flexibility needed to address health and safety issues in a manner that is consistent with the requirements of military operations and the best interests of the Department of Defense.

Subtitle B—Amendments to General Contracting Authorities, Procedures, and Limitation

Justification and approval of sole-source contracts (sec. 811)

The Senate amendment contained a provision (sec. 802) that would require a written justification and approval for Department of Defense contracts in excess of \$20.0 million that are awarded on a sole-source basis.

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) clarify that this section applies specifically to procurements that are exempted by section 2304(f)(2)(D)(ii) of title 10, United States Code, from generally applicable justification and approval requirements; and (2) make the provision applicable government-wide. The conferees intend this provision to ensure that sole-source contracts may be awarded in such procurements only when those awards have been determined to be in the best interest of the Department of Defense or other agency concerned.

Revision of Defense Supplement relating to payment of costs prior to definitization (sec. 812)

The House bill contained a provision (sec. 811) that would require the Secretary of Defense to revise the Department of Defense Supplement to the Federal Acquisition Regulation to ensure that regulatory limitations applicable to undefinitized contract actions apply to all categories of such contract actions.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment clarifying the provision. The conferees agree that the limitations in the Supplement should apply to all categories of undefinitized contract actions, including undefinitized task orders and delivery orders, and undefinitized modifications to contracts, task orders, and delivery orders.

Revisions to definitions relating to contracts in Iraq and Afghanistan (sec. 813)

The House bill contained a provision (sec. 812) that would clarify reporting requirements relating to contracts in Iraq and Afghanistan.

The Senate amendment contained no similar provision.
The Senate recesses.

Amendment to notification requirements for awards of single source task or delivery orders (sec. 814)

The House bill contained a provision (sec. 813) that would clarify the congressional committees required to be notified of the award of a single source task or delivery order under section 2304a(d)(3) of title 10, United States Code.

The Senate amendment contained no similar provision.
The Senate recesses with a clarifying amendment.

Clarification of uniform suspension and debarment requirement (sec. 815)

The House bill contained a provision (sec. 814) that would clarify the applicability of a suspension or debarment decision to the award of subcontracts.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would provide that a decision to suspend or debar a contractor applies to subcontracts at any tier, other than: (1) subcontracts for commercially available off-the-shelf items; and (2) subcontracts (other than first-tier subcontracts) under contracts for commercial items.

The conferees note that contractor representatives have expressed concern about due process and coordination between federal agencies in suspension and debarment decisions. Section 2 of Executive Order 12549 requires federal agencies to follow government-wide criteria and government-wide minimum due process procedures when they act to debar or suspend contractors. The conferees expect the Department of Defense and other affected agencies to review these procedures to ensure that: (1) federal agencies coordinate with other affected federal agencies on suspension or debarment decisions, as appropriate; and (2) contractors are notified of the basis for suspension or debarment decisions and provided an opportunity to respond as early as practicable, consistent with the fundamental purpose of protecting the Federal Government and the taxpayers from unscrupulous contractors.

Extension of authority for use of simplified acquisition procedures for certain commercial items (sec. 816)

The House bill contained a provision (sec. 815) that would extend for 2 years the authority for federal agencies to use simplified acquisition procedures to acquire certain commercial items.

The Senate amendment contained no similar provision.
The Senate recesses.

Reporting requirements for programs that qualify as both major automated information system programs and major defense acquisition programs (sec. 817)

The House bill contained a provision (sec. 816) that would address reporting requirements for programs that qualify as both major automated information system programs under chapter 144A of title 10, United States Code, and major defense acquisition programs under chapter 144 of such title.

The Senate amendment contained a similar provision (sec. 811).

The House recedes.

Small arms production industrial base matters (sec. 818)

The House bill contained a provision (sec. 817) that would define the small arms production base to mean the persons and organizations that are engaged in the production or maintenance of small arms within the United States.

The Senate amendment contained a provision (sec. 832) that would authorize the Secretary to modify the definition of the small arms production industrial base.

House recedes with an amendment that would clarify the Secretary's authority under the provision.

The conferees understand the current small arms production industrial base is defined by an Army Science Board report from 1994 entitled "Preservation of Critical Elements of the Small Arms Industrial Base" and is statutorily limited to three manufacturers. The conferees also note the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417) required the Secretary of Defense to submit a report to the congressional defense committees on the military's requirements for sustaining and managing the small arms industrial base, however this report has yet to be submitted to Congress. The conferees recognize the need to preserve reliable sources for the development, production, and maintenance of small arms, and note the benefits full and open competition could have, particularly in the areas of small arms technological innovation and more competitive pricing in small arms and critical small arms parts manufacturing.

Contract authority for advanced component development or prototype units (sec. 819)

The House bill contained a provision (sec. 819) that would authorize the use of a contract option to extend, subject to certain limitations, a basic research contract awarded on a competitive basis pursuant to a broad agency announcement, as described in section 2302(2)(B) of title 10, United States Code.

The Senate amendment contained a similar provision (sec. 801).

The Senate recedes with an amendment combining the two provisions. Under the conference agreement, a covered contract may be extended for the purpose of providing advanced component development and prototyping, subject to strict limitations on time and cost. The authority to so extend contracts would expire on September 30, 2014.

Publication of notification of bundling of contracts of the Department of Defense (sec. 820)

The House bill contained a provision (sec. 818) that would require the Department of Defense to publish the justification for bundling of contracts at least 30 days prior to the release of a solicitation that requires such bundling.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the publication of a notification that is consistent with existing requirements and includes a brief description of the benefits that are expected as a result of the bundling.

Subtitle C—Contractor Matters

Authority for Government support contractors to have access to technical data belonging to prime contractors (sec. 821)

The Senate amendment contained a provision (sec. 821) that would authorize the Department of Defense (DOD) to provide access to technical data delivered under a DOD contract to a support contractor providing advice and assistance to the government.

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) delete the criminal penalties for disclosure of information; and (2) require the support contractor to agree to enter into a non-disclosure agreement with the contractor to whom the technical data rights belong. This modification would result in civil enforcement, rather than criminal enforcement, for violations of the non-disclosure requirements in the provision.

Extension and enhancement of authorities on the Commission on Wartime Contracting in Iraq and Afghanistan (sec. 822)

The Senate amendment contained a provision (sec. 822) that would extend the life of the Commission on Wartime Contracting in Iraq and Afghanistan and clarify the nature of the support to be provided to the Commission by the Department of Defense and other federal agencies.

The House bill contained no similar provision.

The House bill recedes with a clarifying amendment.

Authority for Secretary of Defense to reduce or deny award fees to companies found to jeopardize health or safety of Government personnel (sec. 823)

The House bill contained a provision (sec. 824) that would prohibit the payment of award and incentive fees to any defense contractor that has been determined to have caused the death or serious bodily injury of Department of Defense personnel.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) require the Secretary of Defense to consider any such contractor misconduct in assessments of contractor performance; and (2) authorize the Secretary to withhold or recover all or part of award fees for the relevant period of time on the basis of the negative impact of such misconduct on contractor performance.

Subtitle D—Acquisition Workforce Matters

Enhancement of expedited hiring authority for defense acquisition workforce positions (sec. 831)

The House bill contained a provision (sec. 821) that would clarify the expedited hiring authority for the defense acquisition workforce in section 1705 of title 10, United States Code.

The Senate amendment contained a similar provision (sec. 813) that would also extend the authority to cover the period of the acquisition workforce build-up announced by the Secretary of Defense.

The House recedes with an amendment combining the two provisions.

The conferees acknowledge that there is intense competition for skilled workers and that the current hiring process is too lengthy and complicated to attract quality candidates to the acquisition workforce. Rather than continually relying on temporary authorities such as the expedited hiring authorities provided by this section, the conferees agree that the Department should undertake a comprehensive effort to redesign its hiring procedures to meet its mission needs and promote competitive job offers, including improvements in recruitment, better assessment of candidates, and timely, merit-based hiring decisions.

Funding of Department of Defense Acquisition Workforce Development Fund (sec. 832)

The House bill contained a provision (sec. 822) that would amend section 1705 of title 10, United States Code, to streamline and clarify the requirements for the Department of Defense Acquisition Workforce Development Fund (the "Fund").

The Senate amendment contained a similar provision (sec. 812).

The House recedes with an amendment combining elements of the two provisions. Under the conference agreement: (1) remissions to the Fund would be made on an annual basis, rather than a quarterly basis; (2) such remissions would be made exclusively from operation and maintenance accounts; (3) the Department could transfer certain unobligated balances to the Fund, as provided in appropriations Acts; and (4) the annual amounts to be deposited in the Fund would be adjusted to reflect the funding requirements of the hiring plan announced by the Secretary of Defense.

The conferees support the Secretary's initiative to increase the size of the Department's acquisition workforce by hiring 9,000 new government personnel and converting 11,000 contractor positions to civilian employee positions by 2015. The Fund, as revised by this section, should provide a critical tool to enable the Department to achieve this objective. The conferees conclude that the Fund must be used as intended, to increase the size of the acquisition workforce and to ensure such workforce has the appropriate skill mix rather than merely to subsidize the military departments and defense agencies in training and maintaining their existing workforces.

Review of post-employment restrictions applicable to the Department of Defense (sec. 833)

The House bill contained a provision (sec. 826) that would require the Department of Defense Panel on Contracting Integrity and the National Academy of Public Administration to review and assess post-employment restrictions applicable to former Department of Defense personnel.

The Senate amendment contained no similar provision.
The Senate recesses with a technical amendment.

Review of federal acquisition workforce training and hiring (sec. 834)

The House bill contained a provision (sec. 833) that would require the Comptroller General to convene a panel of experts to study the ethics, competence, and effectiveness of acquisition personnel in federal agencies.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment requiring that the Comptroller General review and report to Congress on the Acquisition Workforce Development Strategic Plan developed pursuant to Sec. 869 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110–417). The report shall include a review of the methodologies used to formulate the plan and the extent to which the plan identified shortcomings in the acquisition workforce, highlighted strategies needed to recruit appropriately qualified personnel, and considered the specific training and retention tools needed to professionally develop and retain such personnel.

Subtitle E—Other Matters

Reports to Congress on full deployment decisions for major automated information system programs (sec. 841)

The House bill contained a provision (sec. 823) that would amend section 2445b(b)(2) of title 10, United States Code, to replace terms generally used for major defense acquisition programs with terms more appropriate to the major automated information system programs covered by the provision.

The Senate amendment contained no similar provision.

The Senate recesses with a clarifying amendment.

Authorization to take actions to correct the industrial resource shortfall for high-purity beryllium metal (sec. 842)

The House bill contained a provision (sec. 825) that would correct the industrial resource shortfall for high-purity beryllium with a limitation of \$85.0 million.

The Senate amendment contained a similar provision (sec. 1412).

The Senate recesses with a technical amendment.

Report on rare earth materials in the defense supply chain (sec. 843)

The House bill contained a provision (sec. 828) that would require a report on the usage of rare earth materials in the supply chain of the Department of Defense.

The Senate amendment contained a similar provision (sec. 837).

The House recesses with an amendment combining the requirements of the two provisions.

Comptroller General report on structure and management of subcontractors under contracts for major weapon systems (sec. 844)

The House bill contained a provision (sec. 831) that would require the Secretary of Defense to conduct a study on the management of subcontractors on Department of Defense contracts for major weapon systems.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the study to be conducted by the Comptroller General and clarify the issues to be addressed.

Study of the use of factors other than cost or price as the predominate factors in evaluating competitive proposals for defense procurement contracts (sec. 845)

The House bill contained a provision (sec. 836) that would require the Department of Defense to justify each contract solicitation that gives greater weight to factors relating to performance than to cost or price.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Comptroller General to review Department of Defense procurements in which performance-related factors are given greater weight than cost or price and to assess the extent to which the use of such weights is likely to be in the best interest of the Department.

Repeal of requirements relating to the military system essential item breakout list (sec. 846)

The Senate amendment contained a provision (sec. 836) that would repeal section 813 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136), which requires the Secretary of Defense to prepare an annual list of essential items, assemblies, and components of each military system.

The House bill contained no similar provision.

The House recedes.

Extension of SBIR and STTR programs of the Department of Defense (sec. 847)

The Senate amendment contained a provision (sec. 833) that would reauthorize the Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs of the Department of Defense (DOD) through fiscal year 2023.

The House bill contained no similar provision.

The House recedes with an amendment that would reduce the period of reauthorization of the programs to 1 year.

The conferees believe that this limited reauthorization will provide time for the passage of a more complete reauthorization of the government-wide SBIR/STTR program. The conferees note that the House and Senate committees of jurisdiction are working towards such a reauthorization. The conferees further expect that the DOD SBIR/STTR programs and the authorities for those programs will be modified by that reauthorization, including potentially changing the reauthorization period for the DOD programs established by this conference agreement. The conferees note that the Department

of Defense has indicated that a 2-year reauthorization of the SBIR/STTR is not appropriate since it does not cover the length of consecutive Phase I and Phase II awards, and would compromise SBIR/STTR program planning, execution, and evaluation, and will make the program difficult to align within the broader context of the DOD program, planning, budgeting, and execution process. The conferees believe that any reauthorization of the SBIR/STTR program should reflect these DOD concerns.

The conferees further note that DOD represents, by far, the largest SBIR/STTR program in the federal government. The conferees expect that any reauthorization of the program should strongly take into advisement concerns related to the practical executability of the authorizing statutes, the burdens they may place on limited staff and management resources, and their impact on technology development and deployment of new technologies to support the missions of the Department of Defense. The conferees expect to work closely with the committees of jurisdiction as they work towards a complete reauthorization of the government-wide SBIR/STTR program.

Extension of authority for Small Business Innovation Research Commercialization Pilot Program (sec. 848)

The Senate amendment contained a provision (sec. 834) that would make permanent the Small Business Innovation Research Commercialization Pilot Program and extend the authority to include projects under the Small Business Technology Transfer (STTR) program, as requested by the Department of Defense (DOD).

The House bill contained no similar provision.

The House recesses with an amendment that would limit the period of reauthorization to 1 year and not authorize the expansion of the successful program to include projects under the STTR program.

The conferees note that DOD has viewed this program as a success, and from the limited data available the conferees have seen no evidence to indicate otherwise. Further, the conferees understand that the National Research Council has indicated that “case studies . . . support the view that small businesses, especially less experienced small businesses, value commercialization assistance programs as a forum to present their technologies and gain information on government procurement needs.” The conferees intend to continue to review progress on this pilot program and, if appropriate, expand and reauthorize it in the future.

LEGISLATIVE PROVISIONS NOT ADOPTED

Additional reporting requirements for inventory relating to contracts for services

The House bill contained a provision (sec. 835) that would amend section 2330a of title 10, United States Code, to add certain additional reporting requirements.

The Senate amendment contained no similar provision.

The House recesses.

The conferees agree that it would be premature to add new reporting requirements to section 2330a when the Department of Defense (DOD) has not yet submitted an inventory meeting the existing requirements. Once such an inventory has been completed, Congress will have an opportunity to review the inventory to determine whether additional reporting requirements would be appropriate to facilitate DOD management or congressional oversight functions.

Comptroller General report on defense contract cost overruns

The House bill contained a provision (sec. 832) that would require the Comptroller General to conduct a study of cost overruns in the performance of Department of Defense contracts.

The Senate amendment contained no similar provision.

The House recesses.

The conferees agree that the Government Accountability Office (GAO) has performed, and continues to perform, substantial work on cost overruns in the performance of defense contracts. This work includes GAO's annual assessment of the performance of the Department's major defense acquisition programs.

Follow-on contracts for certain items acquired for special operations forces

The House bill contained a provision (sec. 830) that would have authorized the Commander of U.S. Special Operations Command (SOCOM) to award sole-source contracts in certain cases where other contract approaches would unduly delay the fielding of an item to forces preparing for or participating in overseas contingency operations or for other deployments undertaken in response to a request from a combatant commander.

The Senate amendment contained no similar provision.

The House recesses.

Furniture standards

The House bill contained a provision (sec. 829) that would require that all Department of Defense purchases of furniture meet quality standards established by the General Services Administration.

The Senate amendment contained no similar provision.

The House recesses.

Modifications to requirement for database of information regarding the integrity and performance of persons awarded federal contracts and grants

The House bill contained a provision (sec. 834) that would amend the contractor database requirement in section 872 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417).

The Senate amendment contained a provision (sec. 824) that would make unrelated changes to the same provision.

The conference report does not contain either provision.

The conferees agree that it would be premature to amend section 872 before the required database has been operational for a sufficient period to determine its effectiveness.

Requirement to buy military decorations, ribbons, badges, medals, insignia, and other uniform accouterments produced in the United States

The House bill contained a provision (sec. 827) that would require that all military decorations, ribbons, badges, medals, insignia, and other uniform accouterments be produced in the United States.

The Senate amendment contained no similar provision.

The House recesses.

The conferees are aware of allegations that substandard medals and decorations, produced in foreign countries, may have been sold to some service members or their families. The conferees note that the production and sale of such medals and decorations would be criminal violations under existing law. Title 32, Part 507 of the Code of Regulations prohibits the manufacture or sale of heraldic items unless they are “manufactured in accordance with Government specifications using government furnished tools” by a company that has received a certificate of authority to manufacture the articles by the Institute of Heraldry. Each certified manufacturer is assigned a hallmark, which must be placed on all insignia that it manufactures. Section 704 of title 18, United States Code, establishes criminal penalties for anybody who knowingly “sells, attempts to sell, [or] advertises for sale” any medals or decorations that fail to comply with these regulations.

The conferees direct the Inspector General of the Department of Defense to investigate allegations of the sale of substandard medals and decorations and to refer any potential violations of the applicable laws and regulations to the appropriate criminal enforcement agencies.

Small business contracting programs parity

The Senate amendment contained a provision (sec. 838) that would amend section 31(b)(2)(B) of the Small Business Act (15 U.S.C. Section 657a(b)(2)(B)), relating to the HUBZone small business program, to clarify that when a contract could be awarded pursuant to more than one small business program, the Department of Defense and other federal agencies have discretion as to which program to apply.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that the Department of Justice has concluded that no change to the Small Business Act is required to ensure that contracting officers of the Department of Defense and other federal agencies have the discretion whether or not to award contracts pursuant to the HUBZone program. The conferees direct the Secretary of Defense to continue to administer the HUBZone program in a manner consistent with the Department of Justice opinion.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND
MANAGEMENT

Subtitle A—Department of Defense Management

*Authority to allow private sector civilians to receive instruction at
Defense Cyber Investigations Training Academy of the Defense
Cyber Crime Center (sec. 901)*

The House bill contained a provision (sec. 904) that would permit private sector employees to receive instruction at the Defense Cyber Investigations Training Academy operating under the direction of the Defense Cyber Crime Center.

The Senate amendment contained a similar provision (sec. 932).

The Senate recesses.

*Organizational structure of the Office of the Assistant Secretary of
Defense for Health Affairs and the TRICARE Management Ac-
tivity (sec. 902)*

The House bill contained a provision (sec. 905) that would require the Secretary of Defense to submit, not later than 180 days after the date of enactment of this Act, a report on the organizational structure of the Office of the Assistant Secretary of Defense for Health Affairs and the TRICARE Management Activity. The provision would also require an assessment of whether the senior personnel of the Office of the Assistant Secretary of Defense for Health Affairs and the TRICARE Management Activity, as currently organized, are able to appropriately perform the discrete functions of policy formulation, policy and program execution, and program oversight.

The Senate amendment contained no similar provision.

The Senate recesses with a clarifying amendment.

The conferees are concerned that in the area of health care, as with other elements of the Department of Defense (DOD) civilian workforce, the Department lacks plans and programs to ensure that employees possess or are able to obtain critical skills needed for the most effective administration of the Department's \$45.0 billion military health care program. The conferees expect the Secretary, in the development of the Strategic Workforce Plan required elsewhere in this Act, to assess the skills and competencies that will be needed in the future in health care policy and administration, health economics, contracting, health information management and health information technology, and to ensure that gaps in such skills in the DOD workforce are addressed as part of the Strategic Workforce Plan.

*Sense of Congress regarding the Director of Operational Energy
Plans and Programs (sec. 903)*

The House bill contained a provision (sec. 906) that would amend section 139b(c) of title 10, United States Code, to have the Director of Operational Energy Plans and Programs report directly to the Secretary of Defense.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would express the sense of Congress that the Director of Operational Energy Plans and Programs should report directly to the Secretary of Defense on certain issues and be included in the Deputy's Advisory Working Group.

Increased flexibility for combatant commander initiative fund (sec. 904)

The House bill contained a provision (sec. 907) that would amend section 166a of title 10, United States Code, to provide the Chairman of the Joint Chiefs of Staff increased flexibility in the use of funds available under the Combatant Commander Initiative Fund (CCIF). The provision would increase the limit, from \$10.0 million to \$20.0 million, on the amount of CCIF funds in a fiscal year that may be used to purchase items. The provision would also increase the limit on the per unit cost of items that may be purchased using CCIF funds from \$15,000 to the investment unit cost threshold in effect under section 2245a of title 10, United States Code, currently \$250,000. The provision would also require the Chairman to coordinate with the Secretary of State in approving the use of CCIF funds for humanitarian and civic assistance, to include urgent and unanticipated humanitarian relief and reconstruction assistance.

The Senate amendment contained a similar provision that would raise the per unit cost of items that may be purchased using CCIF funds from \$15,000 to the investment unit cost threshold in effect under section 2245a of title 10, United States Code, currently \$250,000.

The Senate recedes with an amendment that would require the Chairman to coordinate with the relevant chief of mission to the extent practicable in the use of CCIF funds for humanitarian and civic assistance, to include urgent and unanticipated humanitarian relief and reconstruction assistance.

Repeal of requirement for a Deputy Under Secretary of Defense for Technology Security Policy within the Office of the Under Secretary of Defense for Policy (sec. 905)

The House bill contained a provision (sec. 908) that would repeal section 134b of title 10, United States Code, which establishes the position of Deputy Under Secretary of Defense for Technology Security Policy within the Office of the Under Secretary of Defense for Policy.

The Senate amendment contained no similar provision.

The Senate recedes.

Deputy Under Secretaries of Defense and Assistant Secretaries of Defense (sec. 906)

The Senate amendment contained a provision (sec. 901) that would establish five Principal Deputy Under Secretaries of Defense (DUSDs), each of whom would serve as the first assistant to an Under Secretary of Defense, and each of whom would be subject to confirmation by the Senate; abolish all other DUSD provisions in the Department; and establish six new Assistant Secretary of Defense positions, subject to Senate confirmation.

The House bill contained no similar provision.

The House recedes with an amendment that would establish the new Principal DUSD positions, but delay the effective date for the abolition of other DUSD positions until January 1, 2011, to provide the Secretary of Defense with an opportunity to plan for the realignment and replacement of these positions. The amendment would also authorize individuals currently serving in Principal DUSD positions to continue to serve for up to 4 years after the date of the enactment of this Act without Senate confirmation.

Subtitle B—Space Activities

Submission and review of space science and technology strategy (sec. 911)

The House bill contained a provision (sec. 911) that would amend section 2271(a) of title 10, United States Code, to require that the space science and technology strategy submitted by the Secretary of Defense be modified to an annual reporting requirement and include a transition plan for new space technologies. In addition, the provision would direct the Comptroller General to review the first strategy within 90 days of the date the strategy is submitted to the congressional defense committees.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the space science and technology strategy to be developed and submitted jointly by the Secretary of Defense and the Director of National Intelligence. In addition, the amendment would require the strategy to be submitted biennially, in odd-numbered years, with the first strategy to be submitted in 2011 for fiscal year 2012. The first strategy would be submitted with the budget request for fiscal year 2012.

The Comptroller General review would be due 90 days after the first strategy is submitted to the congressional defense committees.

Both the strategy and Comptroller General review should also be submitted to the Senate Select Committee on Intelligence and House Permanent Select Committee on Intelligence.

Provision of space situational awareness services and information to non-United States Government entities (sec. 912)

The Senate amendment contained a provision (sec. 911) that would modify section 2274 of title 10, United States Code, to make the program known as the commercial and foreign entities (CFE) program a permanent program. The provision included an exemption from the Freedom of Information Act (FOIA) to exclude from disclosure any data or analyses provided pursuant to a space situational awareness (SSA) agreement, as well as the SSA agreement itself.

The House bill contained a similar provision (sec. 912).

The House recedes with an amendment that would delete the exemption from the FOIA. In addition, the amendment would require that the Secretary of Defense notify the congressional defense committees if any commercial or foreign entity has declined or is

reluctant to provide SSA data or information due to concerns about potential disclosure.

The CFE program was originally started as a pilot program to allow the Department of Defense (DOD), working through the Air Force, to provide non-United States Government entities, including commercial entities, State and local governments, and foreign governments and entities, SSA data to among other things, avoid damage to satellites in space. This provision will expand the CFE program to allow the DOD to receive SSA data and information from commercial and foreign entities if the Secretary of Defense determines that it is in the national security interest to do so. Any data provided would be provided pursuant to SSA agreements.

The commercial and foreign entities, including satellite owners and operators, are under no obligation to provide any data to the DOD under SSA agreements. Not only would the information be voluntarily provided, but in many instances, the SSA data or information could be proprietary, business sensitive, or trade secrets. In evaluating whether an agency may protect certain kinds of financial or commercial information from public release under the FOIA, the courts have looked at whether the information was provided to the government voluntarily or under compulsion.

The conferees believe that the current exemptions in law pertaining to the FOIA are adequate to protect the SSA data and information, related analysis, and the agreements under which the data and information are provided from disclosure.

Management and funding strategy and implementation plan for the National Polar-Orbiting Operational Environmental Satellite System Program (sec. 913)

The Senate amendment contained a provision (sec. 912) that would direct the Secretaries of Defense and Commerce, and the Administrator of the National Aeronautics and Space Administration (NASA) to jointly develop a plan for the management and funding of the National Polar-Orbiting Operational Environmental Satellite System (NPOESS). The plan would include the NPOESS requirements, the management structure, and the funding profile for each participating agency.

The provision would also prohibit the obligation and expenditure of more than 50 percent of the Air Force funds available for the NPOESS program until the plan has been submitted to the relevant congressional committees.

The provision would also set forth an extensive sense of the Senate with respect to the NPOESS program including that the NPOESS program should be maintained as an operational satellite.

The House bill contained no similar provision, although the report accompanying the House bill did include language directing the Executive Agent for Space at the Department of Defense (DOD) to develop options for restructuring the program. These options, with an accompanying evaluation of such options, would be due to the congressional defense committees by October 1, 2009.

The House recedes with an amendment that would direct the President to develop a strategy for the management and funding of the NPOESS program that would include a funding profile for each year of the program by department or agency. The President

would also be required to develop an implementing plan to carry out the management and funding strategy.

The amendment would prohibit the Air Force from spending more than 50 percent of the funds available for NPOESS until the management and funding strategy is submitted to the relevant congressional committees. When the strategy is submitted the Air Force would be prohibited from spending more than 75 percent of the funds available to it for NPOESS until the implementation plan is submitted to the relevant congressional committees.

The conferees believe that this two step process of a management and funding strategy followed by an implementing plan is consistent with the direction provided to the NPOESS agencies by the Executive Office of the President.

The conferees are deeply concerned about the current status of the NPOESS program, a technically complex, expensive program that is behind schedule and over budget, with a complicated management structure and the funding split between two agencies, DOD and the Department of Commerce. Although the approach to resolving the NPOESS issues adopted by the Executive Office of the President will take longer than the conferees would like to see, the conferees acknowledge that there are many issues to be resolved.

The conferees also want to express their strongly held view that this program has suffered greatly from the past management approach and that once a path forward is developed, all involved departments and agencies should stick with the plan. The conferees are very concerned that if the disagreements amongst the departments and agencies continue, the NPOESS program runs the risk of being truncated into several different programs that will cost more in the long run and potentially damage all the communities NPOESS serves.

The conferees agree that this provision would obviate the NPOESS reporting requirement included in the House report accompanying the House bill.

Subtitle C—Intelligence-Related Matters

Inclusion of Defense Intelligence Agency in authority to use proceeds from counterintelligence operations (sec. 921)

The Senate amendment contained a provision (sec. 921) that would provide the same authority accorded the military departments to use proceeds from counterintelligence operations to offset necessary and reasonable expenses incurred in such operations under section 423 of title 10, United States Code.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

Plan to address foreign ballistic missile intelligence analysis (sec. 922)

The House bill contained a provision (sec. 921) that would require the Secretary of Defense, in consultation with the Director of National Intelligence, to conduct an assessment of foreign ballistic missile intelligence gaps and shortfalls, and to develop a plan to ensure that the appropriate intelligence centers have sufficient an-

alytical capabilities to address such gaps and shortfalls. The provision would also require the Secretary to submit a report on the assessment and plan, including a description of the resources needed to implement the plan.

The Senate amendment contained no similar provision.

The Senate recesses with a clarifying amendment.

Subtitle D—Other Matters

Implementation strategy for developing leap-ahead cyber operations capabilities (sec. 931)

The House bill contained a provision (sec. 931) that would establish a joint program office for cyber operations capabilities to assist the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) in improving the development of leap-ahead capabilities for offensive and defensive cyber operations.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require the USD(AT&L) to report on a strategy for organizing the research and development bodies of the Department of Defense to develop leap-ahead cyber operations capabilities.

Defense integrated military human resources system development and transition (sec. 932)

The House bill contained a provision (sec. 932) that would establish a Defense Integrated Military Human Resources System (DIMHRS) transition council and require an annual report on DIMHRS transition activities.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would modify the composition, meeting frequency, and duties of the transition council.

The conferees note that the Department of Defense (DOD) has invested nearly \$1.0 billion in the development of DIMHRS, which was intended to be a single integrated pay and personnel information system for the Department. To this point, the DIMHRS program has not yet been successfully developed or deployed due to a number of technical and organizational difficulties. The conferees believe that the transition council required by the provision will help ease the development and transition issues that face the program, by creating a senior level body to adjudicate the funding, architectural, process, and other technical issues that plague enterprise information systems programs. The conferees believe that the council can be easily integrated into the DIMHRS governance system that is being developed currently by DOD.

The conferees direct that the report required under this section should specifically address: implementation status of integrated pay and personnel systems in defense organizations, description of developmental and operational testing activities for the systems, plans and progress in terminating the use and support of legacy pay and personnel information systems, and identification of resources to be invested by all organizations involved in the development of integrated pay and personnel systems.

Report on special operations command organization, manning, and management (sec. 933)

The House bill contained a provision (sec. 934) that would require the Commander of the U.S. Special Operations Command to submit to the congressional defense committees a report and recommendations on the Commander's efforts to provide increased special operations capability through organization, manning, and management of special operations forces.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that requires the Commander of the U.S. Special Operations Command to submit the report and recommendations to the Secretary of Defense within 120 days of enactment of this Act. The amendment further requires that the Secretary forward to the congressional defense committees the report and recommendations with any appropriate comments within 30 days of receipt.

Study on the recruitment, retention, and career progression of uniformed and civilian military cyber operations personnel (sec. 934)

The House bill contained a provision (sec. 935) that would require a report from the Secretary of Defense assessing the challenges to recruitment, retention, and professional development of cyber operations personnel.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the report to describe efforts to establish public-private partnerships to meet the cyber operations personnel needs of the Department, to assess the required levels of experience and training of cyber operations personnel, and to include recommendations for legislative changes.

Plan on access to national airspace for unmanned aircraft systems (sec. 935)

The Senate amendment contained a provision (sec. 933) that would require that the Secretary of Defense and Secretary of Transportation, after consultation with the Secretary of Homeland Security, to jointly develop a plan for providing expanded access to the national airspace for unmanned aircraft systems of the Department of Defense.

The House bill contained no similar provision.

The House recedes with a technical amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Recognition of and support for state defense forces

The House bill contained a provision (sec. 936) that would amend section 109 of title 32, United States Code, to recognize state defense forces as integral military components of the homeland security effort of the United States, while reaffirming that those forces would remain entirely state regulated, organized and equipped exclusively for the purposes of homeland security at the local level.

The Senate amendment contained no similar provision.

The House recesses.

Recommendations to Congress by members of the Joint Chiefs of Staff

The House bill contained a provision (sec. 909) that would amend section 151(f) of title 10, United States Code, to require the members of the Joint Chiefs of Staff, individually or collectively, in their capacity as military advisors, to provide advice to Congress on a particular matter when Congress requests such advice.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that the Department of Defense has repeatedly failed to provide information and documents to Congress in a timely manner as required by law. In order to exercise its legislative and oversight responsibilities, it is important that congressional defense committees and other appropriate committees of Congress receive testimony, briefings, and other communications of information. The conferees remind those uniformed military officers subject to confirmation by the Senate of their obligations as a result of confirmation. In particular, the conferees remind these officers of their affirmative answers to the following questions: Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents? Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Redesignation of the Department of the Navy as the Department of the Navy and Marine Corps

The House bill contained a provision (sec. 903) that would redesignate the Department of the Navy as the Department of the Navy and the Marine Corps and change the title of its secretary to the Secretary of the Navy and Marine Corps.

The Senate amendment contained no similar provision.

The House recesses.

Reestablishment of position of Vice Chief of the National Guard Bureau

The Senate amendment contained a provision (sec. 904) that would amend chapter 1011 of title 10, United States Code, to reestablish the position of the Vice Chief of the National Guard Bureau.

The House bill contained no similar provision.

The Senate recesses.

A separate provision in this Act would require the Secretary of Defense to include an assessment of this provision in a report on general and flag officers.

Role of the Commander of U.S. Special Operations Command regarding personnel management policy and plans affecting special operations forces

The House bill contained a provision (sec. 901) that would modify section 167 of title 10, United States Code, to require the

secretaries of the military services to coordinate certain personnel management policy and plans affecting special operations personnel with the Commander of the U.S. Special Operations Command.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that the Department of Defense is in the process of finalizing a revised Department of Defense Directive which will establish a means by which the service secretaries and the Commander of the U.S. Special Operations Command can coordinate on personnel management policy and plans as they relate to accessions, assignments, compensation, promotions, professional development, readiness, retention, sustainment, and training of all special operations personnel.

The conferees appreciate this approach, but remain concerned that the intent of the Department's policy revision may not be fully realized without strong implementation procedures. The conferees direct the Secretary of Defense, in consultation with the service secretaries, to establish procedures to implement the revised policy and report the implementation plans to the congressional defense committees not later than 90 days after the date of enactment of this Act.

Special operations activities

The House bill contained a provision (sec. 902) that would revise section 167 of title 10, United States Code, defining the activities of special operations forces.

The Senate amendment contained no similar provision.

The House recesses.

The conferees understand that the Department recently updated its policy related to special operations activities to better reflect the current mission requirements of the U.S. Special Operations Command. Given this change, the conferees expect the Department to submit a legislative proposal in the next budgetary cycle recommending any appropriate legislative changes to the special operations activities defined in section 167 of title 10, United States Code.

United States Military Cancer Institute

The Senate amendment contained a provision (sec. 931) that would amend chapter 104 of title 10, United States Code, to require the Secretary of Defense to establish a United States Military Cancer Institute in the Uniformed Services University of the Health Sciences.

TITLE X—GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

Fiscal year 2011 congressional budget justification documents for drug interdiction and counter-drug activities

The conferees direct the Secretary of Defense to provide a report documenting the total amount of counterdrug assistance that foreign countries have received in fiscal years (FY) 2009 and 2010 under section 1004 of the National Defense Authorization Act (NDAA) for FY 1991 (Public Law 101–510), as amended, and section 1033 of the NDAA for FY 1998 (Public Law 105–85), as amended, on a per country basis and organized by the location of that country within a combatant command's area of responsibility. At a minimum, the conferees believe this report should include: recipient partner nation and recipient within the partner nation's government (i.e. national police, border patrol, customs enforcement, etc.); type and level of support provided; expected duration; and entity (i.e. Department of Defense, Department of State, Drug Enforcement Administration, contractor, etc.) executing said support.

The conferees encourage the Secretary of Defense to provide the same type of information but for the proposed budget for FY 2011. The FY 2011 information should be provided in a report that should be presented to the congressional defense committees on the same date as the budget justification materials for the FY 2011 are presented to Congress.

Information operations and strategic communications programs

The conferees note that the Department of Defense's (DOD) funding for strategic communication and information operations (IO) programs has steadily increased over the past 8 years. Since the September 11, 2001, terrorist attacks, the U.S. Government, according to the Government Accountability Office, has spent at least \$10.0 billion on these communications efforts designed to advance the interests of the United States. The DOD's funding for these programs has grown from approximately \$103.3 million in fiscal year 2006 to approximately \$626.0 million in fiscal year 2010. The conferees note that much of this funding is for IO and psychological operations in Afghanistan and Iraq, but a growing portion is for broader purposes or is focused on other geographic regions.

The conferees also note that the congressional defense committees have all raised similar concerns about the Department's strategic communications and IO activities. These concerns include the fact that the Department's policy oversight mechanisms have not kept pace with the growth in the funding, scope, and variety of IO and strategic communications activities. For example, the disestablishment of the Office of the Deputy Assistant Secretary of Defense for Military Support to Public Diplomacy has left a void within the Department and potentially across the interagency inhibiting the comprehensive, enterprise-wide oversight and coordination of these programs.

The conferees believe IO and strategic communications programs are important activities and are aware of numerous suc-

cesses in the Iraq and Afghanistan theaters of operations from tactical IO and psychological operations. The conferees doubt, however, that DOD's IO and strategic communications activities outside of those theaters are adequately integrated and considered carefully enough within broader strategic and operational planning across the whole of government. Further, the conferees remind the Department that such activities executed outside of Iraq and Afghanistan should be coordinated closely with the respective chiefs of mission.

Given the consistent level of concern and interest in these programs by Congress and military leadership, the conferees direct the Under Secretary of Defense (Comptroller) and Chief Financial Officer to develop separate budget documentation materials to accompany the fiscal year 2011 budget request and any future supplemental budget requests for IO and strategic communications programs.

While Congress awaits delivery of the report on strategic communication and public diplomacy activities of the Federal Government required under section 1055 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417), the conferees further direct the Under Secretary of Defense for Policy to report to the congressional defense committees 90 days after the enactment of this Act with a reassessment of the Department's efforts to develop an enterprise-wide oversight and coordination mechanism, including strategic objectives and metrics for IO and strategic communications programs.

Subtitle A—Financial Matters

General transfer authority (sec. 1001)

The House bill contained a provision (sec. 1001) that would allow the Secretary of Defense to make transfers between any amounts of authorizations for fiscal year 2010 in Division A of this Act. This section would limit the total amount transferred under this authority to \$5.0 billion with an exception that a transfer of funds between military personnel authorizations under title IV shall not be counted against the dollar limitation. This section would also require prompt notification to Congress of each transfer made.

The Senate amendment contained a similar provision (sec. 1001) that would provide \$4.0 billion in transfer authority.

The House recedes.

Relationship of the Quadrennial Defense Review and the annual budget request (sec. 1002)

The House bill contained a provision (sec. 1033) that would express the sense of Congress that the Quadrennial Defense Review (QDR) should not be budget constrained and would also amend section 118(a) of title 10, United States Code, stipulating that the existence of an ongoing QDR does not exempt the Department of Defense from submitting annual budget materials as required by law.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would strike the sense of Congress and would add a subsection (h) to section 118 of

title 10, United States Code, clarifying that the development of the QDR should not interfere with or delay delivery of budget materials and congressional reporting requirements tied to section 1105(a) of title 31, United States Code.

Audit readiness of financial statements of the Department of Defense (sec. 1003)

The House bill contained a provision (sec. 1052) that would require the Secretary of Defense to develop a plan to achieve a full, unqualified audit of the Department of Defense by September 30, 2013.

The Senate amendment contained a provision (sec. 1002) that would require the Secretary to develop a plan to ensure that the financial statements of the Department are validated as ready for audit by not later than September 30, 2017.

The House recedes with an amendment that would require the Secretary to ensure that the financial statements of the Department of Defense are validated as ready for audit by not later than September 30, 2017, and to establish interim objectives, including objectives for the audit readiness of each of the military departments and a schedule of milestones for elements of the military departments and financial statements of the military departments to be made ready for audit.

The Senate amendment contained an identical provision (sec. 1023).

The conference agreement includes this provision.

The Senate amendment contained a similar provision (sec. 1022) that would extend the authority as well and require the Secretary of Defense to submit to Congress a report evaluating the effect on counterdrug and counterterrorism activities and objectives

of using counterdrug funds of a joint task force to provide counterterrorism support, a description of the type of support and recipient(s) of support provided, and a list of current joint task forces conducting counterdrug operations.

The House recedes with a technical amendment to the Senate amendment.

Reporting requirement on expenditures to support foreign counterdrug activities (sec. 1013)

The House bill contained a provision (sec. 1011(a)) that would extend, by 1 year, the reporting requirement on expenditures to support foreign counterdrug activities under section 1022(a) of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398), as most recently amended by section 1021 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417).

The Senate amendment contained a similar provision (sec. 1023) that would also extend this authority. The provision would also increase the funding limitation under section 1033 from \$75.0 million to \$100.0 million for fiscal year 2010; and would require more regular reports to the congressional defense committees.

The conference agreement includes the 1-year extension of the authority.

The House recedes with an amendment that would incorporate the enhanced reporting requirements from the Senate amendment.

Border coordination centers in Afghanistan and Pakistan (sec. 1015)

The House bill contained a provision (sec. 1013) that would prohibit the use of drug interdiction and counterdrug funds of the Department of Defense for the construction, expansion, repair, or operation and maintenance of any existing or proposed border coordination center. The House bill also prohibited the construction of a third Border Coordination Center in the area of operations for Regional Command East, Afghanistan, until a Border Coordination Center is, at least, under construction in Baluchistan, Pakistan, or the area of operations of Regional Command South, Afghanistan.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would permit the Secretary of Defense to waive the first limitation of the provision should he determine it to be vital for the national security interests of the United States.

The House bill contained a provision (sec. 1014) that would require the Comptroller General to present a report to the appropriate defense committees within 180 days after the date of enactment of this Act, which would: describe the performance evaluation system of the Department of Defense for measuring the effectiveness of the Department of Defense's counterdrug activities; assess the ability of this system to measure such activities effectively; and recommend improvements to such a system.

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) make the provision a sense of Congress; and (2) state that the Navy should meet its current requirement for a 313-ship fleet until such time that modifications to the Navy's surface fleet force structure are warranted, and the Secretary of the Navy provides Congress with a justification of any proposed modifications, supported by rigorous and sufficient analysis.

The House bill contained a provision (sec. 1022) that would provide a temporary waiver in the requirement in section 5306(b) of title 10, United States Code, that the Navy maintain at least 11 operational aircraft carriers. The provision also would require that the Secretary of Defense provide a report on additional risks, as assessed by the commanders of the combatant commands, resulting from that reduction.

The Senate amendment contained a similar provision (sec. 1011) that would provide a temporary waiver, but not require any report.

The Senate recedes.

The Senate recesses with an amendment that would establish February 1, 2010, as the required date for submission of the report and would clarify the requirement to address the NRO role in the requirements process. The conferees agree that the NRO, as the agency responsible for acquisition of space reconnaissance systems for the intelligence community, should not develop or define operational requirements. The conferees agree that the NRO should provide technical and cost-estimating support to the requirements process, and must translate approved system performance requirements into design requirements and engineering specifications.

The Senate amendment contained a provision (sec. 1052) that would direct the President to develop a strategic plan for improving over a 5-year period the nuclear forensic and attribution capability of the United States and the methods, capabilities and capacity for nuclear materials forensics and attribution.

The House bill contained no similar provision.

The House recesses.

The managers note that the Department of Homeland Security is the agency tasked with responsibility to coordinate the actions of the federal agencies. As such, the Secretary of Homeland Security should be the lead secretary in preparing the plan with the approval and participation of the Secretaries of Defense, Energy, and State, the Attorney General, the Director of National Intelligence, and other such officials as the President considers appropriate. The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require the head of a military service or department that has custody or effective control of the BTIF, or of any individual detained at that facility, to notify the ICRC of the detention of an individual at the BTIF as soon as practicable. The amendment would also require that the ICRC be provided prompt access to any individual detained at the BTIF upon receipt of an ICRC request. If, however, access to the individual is temporarily denied due to reasons of imperative military necessity, consistent with Article 126 of the Geneva Convention Relative to the Treatment of Prisoners of War, the ICRC would be granted access as soon thereafter as practicable, normally no later than the next regularly scheduled ICRC visit. The conferees take no position on whether the provisions of the Geneva Convention Relative to the Treatment of Prisoners of War apply to detainees at the BTIF.

No Miranda warnings for al Qaeda terrorists (sec. 1040)

The House bill contained a provision (sec. 1036) that would require the Secretary of Defense to report to the congressional defense committees on the impact of the reading of rights under *Miranda v. Arizona* (384 U.S. 436 (1966)) to detainees in Afghanistan on United States military and intelligence operations in that country.

The Senate recedes with an amendment that would combine the two provisions.

Limitation on use of funds for the transfer or release of individuals detained at United States Naval Station, Guantanamo Bay, Cuba (sec. 1041)

The House bill contained a provision (sec. 1023) that would prohibit the Secretary of Defense from using Department of Defense (DOD) funds to transfer or release any detainee at United States Naval Station, Guantanamo Bay, Cuba, to the United States until 120 days after the President submits a disposition plan for any such detainee. The provision would specify elements of that plan, including a proposal for disposition; an assessment of the risks posed to U.S. national security; a plan for mitigating those risks; and the results of required consultations with the chief executives of the state, District of Columbia, territory or possession to which a detainee is to be transferred or released.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would prohibit the use of funds available to DOD from October 1, 2009, until December 31, 2010, to release any Guantanamo detainee into the United States, its territories, or possessions. The amendment would also prohibit the use of funds available to DOD from October 1, 2009, until December 31, 2010, for the transfer of any Guantanamo detainee into the United States until 45 days after the President submits a comprehensive plan for the disposition of any such detainee. In addition to the elements of the plan required under the House bill, the amendment would require that the plan also include: a certification by the Attorney General that the detainee poses little or no security risk to the United States given the mitigation that the plan provides; the location or locations at which the detainee would be held, including should the detainee be convicted, the place of incarceration; and the costs associated with executing the risk mitigation plan, including any technical and financial assistance to state and local law enforcement necessary to carry out that plan.

The provision would require that the secretary of each military department submit a report detailing the development of the required guidance within 12 months of the date of enactment of the Act.

Additionally, the House provision would authorize the Secretary of the Navy to transfer to Piasecki Aircraft Corporation of Essington, Pennsylvania, all rights, title, and interest to Navy aircraft N40VT (Bureau Number 163283) under certain conditions.

The Senate amendment contained a similar provision (sec. 1081) that would merely authorize the Secretary to transfer to Navy aircraft N40VT to Piasecki Aircraft Corporation, also under certain conditions.

The Senate recedes with technical amendments.

Subtitle E—Studies and Reports

Report on statutory compliance of the report on the 2009 Quadrennial Defense Review (sec. 1051)

The House bill contained a provision (sec. 1031) that would require the Comptroller General to issue a report on the degree to which the report of the Quadrennial Defense Review (QDR) complies with the requirements found in section 118(d) of title 10, United States Code, as amended. It would also require the Secretary of Defense to issue a report addressing the elements of the report of the QDR that the Comptroller General determined were insufficiently addressed.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment. The conferees intend that in the required report the Comptroller General should determine whether the Secretary's report of the 2009 Quadrennial Defense Review directly addresses, indirectly addresses, or does not address each of the items identified in section 118(d) of title 10, United States Code, as amended.

For purposes of this report, the conferees intend for "directly addresses" to mean that the required element is easily identified and the report of the QDR clearly articulates the position of the Department of Defense (DOD). "Indirectly addresses" is meant to convey that the required element is present in one or more places within the report of the QDR, but the DOD position is not easily

inferred. “Does not address” means that there is no mention of the required element.

If the Comptroller General’s report required by this section does determine that the report of the QDR did fail to directly address a required element, the conferees expect that the Secretary will directly address those elements in the second report required by this section.

Report on the force structure findings of the 2009 Quadrennial Defense Review (sec. 1052)

The House bill contained a provision (sec. 1032) that would require the Secretary of Defense to submit a report concurrently with the report on the 2009 Quadrennial Defense Review (QDR) containing the analyses used to determine and support the findings on force structure in the QDR.

The Senate amendment contained no similar provision.

The Senate recesses.

Annual report on the electronic warfare strategy of the Department of Defense (sec. 1053)

The House bill contained a provision (sec. 1037) that would require an annual report on various aspects of the Defense Department’s strategy for electronic warfare.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would sunset the requirement for an annual report after 5 years.

Study on a system for career development and management of interagency national security professionals (sec. 1054)

The House bill contained a provision (sec. 1040) that would require an independent study to address the design and implementation of an interagency system for the career development and support of national security professionals.

The Senate amendment contained no similar provision.

The Senate recesses with a clarifying amendment.

Report on nuclear aspirations of non-state entities, nuclear weapons and related programs in non-nuclear weapons states and countries not parties to the Nuclear Non-Proliferation Treaty, and certain foreign persons (sec. 1055)

The Senate amendment contained a provision (sec. 1071) that would direct the Director of National Intelligence (DNI) to prepare a national intelligence estimate (NIE) on nuclear weapons and related programs of non-nuclear weapons state parties to the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) and the weapons aspirations of such non-state actors as the DNI considers appropriate to include in the estimate. The NIE would be due on September 1, 2010. If the DNI determines that it is not possible to complete the NIE by such date then the DNI shall provide notification not later than August 1 2010, that the NIE will be late and the date that the NIE will be submitted. The completed NIE would be submitted to the congressional defense committees and the intelligence committees of the Senate and the House of Representatives.

The House bill contained no similar provision.

The House recesses with an amendment that would direct the DNI to complete a biennial report on the nuclear weapons programs and any related programs of countries that are non-state parties to the NPT and countries that are not parties to the NPT.

Because the conferees recognize that elements of the required report may be included in other reports prepared by the intelligence community for this particular report only, the conferees have agreed to allow the DNI to incorporate by reference other reports. The conferees expect that when this option is exercised the DNI will include in the report required by this provision a summary of the report included by reference and an update if needed. In addition, a copy of the referenced report should be included when the required report is submitted. The conferees direct that this report be coordinated amongst the member agencies of the intelligence community.

Comptroller General review of Department of Defense spending in final fiscal quarters (sec. 1056)

The Senate amendment contained a provision (sec. 1074) that would require the Comptroller General to review the Department of Defense (DOD) in the final quarter of fiscal year 2009 to determine whether DOD policies contributed to hastened year-end spending and poor use or waste of taxpayer dollars.

The House bill contained no similar provision.

The House recesses with an amendment clarifying the issues to be addressed in the review.

The conferees note that in 1979 and 1980, the Senate Committee on Governmental Affairs, Subcommittee on Oversight of Government Management, held hearings and issued a report, "Hurry-Up Spending", in which it found that "the rush to obligate expiring funds before the end of the fiscal year frequently resulted in lack of competition, poorly defined statements of work, inadequately negotiated contracts, and the procurement of low-priority items or services." The subcommittee's work contributed to the enactment of the Competition in Contracting Act of 1984 (P.L. 98-369, Div B., title VIII). A follow-up review conducted by the Government Accountability Office (GAO) in 1998 concluded that "systemic procurement reforms addressed most of the issues raised in the Subcommittee's report," but that some problems persisted. The conferees conclude that, with the passage of 10 more years, another GAO follow-up review is justified.

Report on Air America (sec. 1057)

The Senate amendment contained a provision (sec. 1075) that would require a report from the Director of National Intelligence within 180 days of enactment of this Act on the advisability of providing Federal retirement benefits to United States citizens who were employed by Air America prior to 1977.

The House bill contained no similar provision.

The House recesses.

Report on defense travel simplification (sec. 1058)

The Senate amendment contained a provision (sec. 1077) that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives a report setting forth a comprehensive plan to simplify defense travel procedures.

The House bill contained no similar provision.

The House recesses with an amendment that would add to the reporting requirements a discussion of any actions underway to incorporate permanent duty travel into the automated Web-based Defense Travel System (DTS), a plan to gather data on the number of temporary duty vouchers being processed manually by the Department of Defense, and options to leverage industry capabilities and technologies that could enhance management responsiveness to changing markets.

The conferees believe that these amendments will provide the Department a foundation to improve and simplify defense travel procedures in a way that will benefit service members and reduce travel-related costs. The conferees note that the House report accompanying H.R. 2647 (H. Rept. 111–166) requires a report from the Secretary of Defense on the Department’s progress in making DTS the single online system for arranging defense travel. The conferees believe that the information in this report will assist the Department’s reform efforts by providing an assessment of DTS, a single system that can be further simplified and streamlined.

Report on modeling and simulation industrial base (sec. 1059)

The Senate amendment contained a provision (sec. 1078) that would require a report on modeling and simulation industrial base.

The House bill contained no similar provision.

The House recesses with a technical amendment.

Report on enabling capabilities for special operations forces (sec. 1060)

The Senate amendment contained a provision (sec. 1079) that would require the Commander of U.S. Special Operations Command, jointly with the commanders of the combatant commands and the chiefs of the services, to submit to the Secretary of Defense and the Chairman of the Joint Chiefs of Staff a report on the availability of enabling capabilities to support the requirements of special operations forces. The Secretary would then be required to forward the report to the congressional defense committees with any additional comments the Secretary considers appropriate.

The House bill contained no similar provision.

The House recesses with a clarifying amendment.

Additional members and duties for the independent panel to assess the Quadrennial Defense Review (sec. 1061)

The House bill contained a provision (sec. 1035) that would create a separate 12-member, bipartisan National Defense Panel to review the work of the Department of Defense on the 2009 Quadrennial Defense Review (QDR). It would further require the panel to provide its recommendations and findings in interim and final reports to Congress and the Secretary of Defense.

The Senate amendment contained a similar provision (sec. 1089) that would add eight congressionally appointed members to the Independent Panel required by section 118(f) of title 10, United States Code, and would expand the duties of that panel.

The House recedes with an amendment that would strike the findings and sense of Congress, clarify and expand the tasks of the Independent Panel, and change the Panel's reporting requirements and timeline for the 2009 QDR.

The conferees agree that an independent review of the Quadrennial Defense Review is a useful part of this important strategic assessment and that such a review by a bipartisan independent panel of experts should build confidence in the objectivity and comprehensiveness of the Department's analytical processes, findings, and recommendations. Conferees acknowledge, however, that there is not enough time to create a separate National Defense Panel without risking the availability of such a panel's report in time for full and careful consideration during Congress's fiscal year 2011 defense authorization bill legislative cycle. The conferees do note that the Department of Defense's charter for the independent panel commits to providing the funds, staff, access to information, and analytical support necessary to assure the independence of the panel and timely completion.

The conferees believe that an analysis of different force structure options suitable to meet the national security challenges identified in the review is essential for Congress to make informed decisions as it raises and sustains the Nation's military forces. An important input into that decision-making process is an understanding of the cost comparison between options. The conferees understand that a fully formed budget proposal for each of the options the panel may consider is well beyond the panel's capabilities, given its resources. Nevertheless, the conferees expect that the panel could provide a cost comparison of the force structure options to the force structure recommended in the review in a general way. A graduated scale that ranges from "considerably less expensive" to "considerably more expensive" is one example of how the panel might make such a comparison.

The conferees agree that the Committees on Armed Services of the Senate and the House of Representatives will study the processes, outcomes, and lessons from the conduct of the 2009 QDR and Independent Panel and consider options for potential changes to future QDRs and their independent review, to include the possibility of the formation of a National Defense Panel in lieu of the independent panel currently provided in statute. The conferees note that elsewhere in this bill the Comptroller General is tasked to report on the degree to which the 2009 QDR addresses statutorily required assessments and recommendations which will contribute significantly to Congress's consideration of any change to current QDR law.

Congressional earmarks relating to the Department of Defense (sec. 1062)

The House bill contained a provision (sec. 1039) that would require the Secretary of Defense to report to the congressional defense committees on the extent to which competitive or merit-based

procedures were used to award contracts based on congressional earmarks and if not, why not.

The Senate amendment contained a similar provision (sec. 1051) that would also require a report by the Department of Defense Inspector General on compliance with restrictions on lobbying with appropriated funds by recipients of congressional earmarks.

The House recedes with an amendment combining the requirements of the two provisions.

Report on basing plans for certain United States geographic combatant commands (sec. 1063)

The House bill contained a provision (sec. 1034) that requires the Secretary of Defense to submit a report concurrently with the report on the 2009 Quadrennial Defense Review (QDR) required by section 118 of title 10, United States Code, which describes the plan for basing forces in Europe. The report would be required to be submitted to the congressional defense committees, the Senate Committee on Foreign Relations, and the House Committee on Foreign Affairs. This section also requires that the Secretary of Defense notify Congress at least 30 days prior to permanently relocating a unit stationed outside the United States.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that makes this reporting requirement applicable to all geographic combatant commands.

Subtitle F—Other Matters

Extension of certain authority for making rewards for combating terrorism (sec. 1071)

The House bill contained a provision (sec. 1042) that would extend for 1 year the authority provided in section 127b(c)(3)(C) of title 10, United States Code, to offer and make rewards through government personnel of allied forces to persons who provide information or nonlethal assistance that is beneficial to operations against international terrorism conducted by U.S. Armed Forces or allied forces operating in combination with U.S. Armed Forces, or is beneficial to force protection.

The House bill contained a provision (sec. 1045) that would extend the Congressional Commission on the Strategic Posture of the United States (Commission) for 1 year and require the Commission to submit a follow-on report to their original report.

The Senate amendment contained a similar provision (sec. 1088) that would also extend the Commission for 1 year and that would allow the Commission to conduct public outreach. The Senate provision would not require a follow-on report.

The conferees agree to include a provision that would extend the Commission for 3 months until December 31, 2009. This extension is to allow the Commission to discuss the findings and conclusions in its final report with officials in the Department of Defense (DOD) as the DOD prepares its Nuclear Posture Review and Quadrennial Defense Review.

The conferees would like to thank the commissioners for their hard work in examining the many contentious issues, striving to achieve consensus where possible and explaining the nature of the differences where consensus was not possible.

Combat air forces restructuring (sec. 1075)

The House bill contained a provision (sec. 1047) that would prohibit the Secretary of the Air Force from retiring additional legacy fighter aircraft, announced in the Combat Air Forces restructuring plan on May 18, 2009, until the Secretary: (1) submits a report to the Committees on Armed Services of the Senate and the House of Representatives; and (2) waits 90 days. The provision would also include requirements for continued funding of aircraft operations for the aircraft identified in the restructuring plan.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) shorten the waiting period to 30 days; and (2) eliminate the requirements for continued funding.

Sense of Congress regarding carrier air wing force structure (sec. 1076)

The House bill contained a provision (sec. 1051) that would express the sense of Congress that the Navy should achieve and maintain the goal of having a 10 carrier air wings with 44 strike-fighter aircraft.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify the provision to state that the Navy should meet its current requirement for 10 carrier air wings with 44 strike-fighter aircraft until such time that modifications to the carrier air wing force structure are warranted, and the Secretary of the Navy provides Congress

with a justification of any proposed modifications, supported by rigorous and sufficient analysis.

Department of Veterans Affairs use of service dogs for the treatment or rehabilitation of veterans with physical or mental injuries or disabilities (sec. 1077)

The Senate amendment contained a provision (sec. 1084) that would require the Secretary of Veterans Affairs to conduct a 3-year pilot program to assess the benefits, feasibility, and advisability of using service dogs for the treatment or rehabilitation of veterans with physical or mental injuries or disabilities, including post-traumatic stress disorder.

The House bill contained no similar provision.

The House recedes with an amendment that would change the pilot program to a study and clarify that the Secretary shall partner with organizations that would not charge veterans participating in the study for the dogs, services, and lodging that they provide.

Plan for sustainment of land-based solid rocket motor industrial base (sec. 1078)

The Senate amendment contained a provision (sec. 1083) that would direct the Secretary of Defense to review and establish a plan to sustain the solid rocket motor industrial base to maintain and sustain currently deployed strategic and missile defense systems and to maintain an intellectual and engineering capacity to support next-generation rocket motors as needed. The report would be required no later than March 1, 2010, and would include an expenditure plan for how the fiscal year 2010 funds will be used to support the plan.

The House bill contained no similar provision, although the House report accompanying the House bill did include a requirement that the Secretary of Defense submit a plan to Congress to sustain the strategic solid rocket motor industrial base no later than February 1, 2010. This plan would also include an expenditure plan for the fiscal year 2010 funds.

The House recedes with an amendment that would direct the Secretary of Defense to review and establish a plan to sustain the solid rocket motor industrial base, including both strategic and missile defense rockets, and to maintain an intellectual and engineering capacity to support next-generation rocket motors as needed. The plan should also identify capability requirements and production capacity to support such requirements. The plan would be due no later than June 1, 2010.

In preparing the plan, the conferees direct the Secretary to review the solid rocket motor plans and programs of other agencies, including the National Aeronautics and Space Administration, to determine how or if the programs and plans of other agencies assist the Department of Defense in maintaining a solid rocket motor industrial base.

The conferees also direct the Secretary to provide the expenditure plan for fiscal year 2010 to sustain the solid rocket motor industrial base in fiscal year 2010. This plan should be submitted by February 1, 2010.

The conferees agree that the reports required in this provision and in this statement of managers obviate the need for the reports on the solid rocket motor industrial base required in the House report accompanying the House bill.

Justice for victims of torture and terrorism (sec. 1079)

The House bill contained a provision (sec. 1053) that makes a number of findings related to American victims of torture and kidnapping by the former regime in the Islamic Republic of Iraq and states that it is the sense of Congress that the claims of these individuals should be resolved.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that states that it is the sense of Congress that the claims of American victims of torture and kidnapping by the former regime in the Islamic Republic of Iraq should be resolved by a prompt and fair settlement negotiated between the Government of the United States and the Government of the Islamic Republic of Iraq.

Requirement for videotaping or otherwise electronically recording strategic intelligence interrogations of persons in the custody of or under the effective control of the Department of Defense (sec. 1080)

The House bill contained a provision (sec. 1058) that would require the Secretary of Defense to ensure that each strategic intelligence interrogation of any person in the custody or under the effective control of the Department of Defense (DOD) or under detention in a DOD facility is videotaped or otherwise electronically recorded. The Secretary of Defense would also be required to provide for the appropriate classification of videotapes or other electronic recordings to protect U.S. national security and address safety and privacy concerns. The requirements of this section would not apply to any member of the armed forces engaged in direct combat operations or to tactical questioning. The provision would also require the Secretary of Defense to develop, and report to Congress on, uniform guidelines for the videotaping or other electronic recording required under this section, including guidelines to ensure that videotapes and recordings are maintained for a length of time that serves the interests of justice in cases for which trials are being or may be conducted.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would allow the Secretary of Defense to waive the requirements of this section with regard to a specific interrogation plan for a specific individual for up to 30 days, if he determines that such a waiver is necessary for U.S. national security interests and notifies the relevant committees of Congress of that determination within 5 days. The amendment would also allow the Secretary of Defense to suspend the requirements of this section at a specific theater-level detention facility for up to 30 days, if he determines that such a waiver is vital for U.S. national security interests and notifies the relevant committees of Congress of that determination within 5 days. Each such waiver or suspension could be extended for one additional 30-day period.

The amendment would also clarify that the use of classified videotapes or other electronic recordings in administrative or judicial proceedings would be governed by applicable rules, regulations, and laws that protect classified information from public disclosure, including the exemptions under section 552 of title 5, United States Code.

Modification of pilot program on commercial fee-for-service air refueling support for the Air Force (sec. 1081)

The House bill contained a provision (sec. 1044) that would repeal section 1081 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181), which directed the Secretary of the Air Force to undertake a pilot program to determine the feasibility and advisability of utilizing commercial fee-for-service aerial refueling support for the Air Force.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of the Air Force to conduct the pilot program, unless the Secretary of Defense were to notify the congressional defense committees in writing that pursuing such a pilot program is not in the national interest.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require the Secretary of Defense to release the full name of the students and instructors at WHINSEC for FY 2009 and FY 2010. The provision, however, would permit the Secretary to waive this provision should it be deemed to be in the national interest.

Sense of Congress regarding the Western Hemisphere Institute for Security Cooperation (sec. 1084)

The Senate amendment contained a provision (sec. 903) that would express the sense of Senate that the Western Hemisphere Institute for Security Cooperation (WHINSEC), among other things, is an essential tool to educate future leaders of the Western Hemisphere and improve relationships with partner nations that are working with the United States to promote democracy, prosperity, and stability in the Western Hemisphere.

The House bill contained no similar provision.

The House recesses with an amendment that would remove the findings of the Senate amendment and retains the resolved clauses and changes it to a sense of Congress.

The conferees direct the DOD IG to report to the Committees on Armed Services of the Senate and the House of Representatives by no later than 6 months after the date of the enactment of

this Act on the steps that the DOD IG has taken to implement the recommendations of the DOJ IG report.

Guam World War II Loyalty Recognition Act

The House bill included provisions (secs. 1601–1606) that would recognize the suffering and loyalty of the people of Guam during World War II. The provisions would authorize payments to people of Guam for World War II claims involving death, personal injury, forced labor, forced march and internment, and would provide for the adjudication of associated claims. Criminal penalties for false statements would apply to claims. The provisions would authorize \$126.0 million in appropriations for the payment and adjudication of claims, and would authorize \$5.0 million for a grants program to memorialize the occupation of Guam during World War II.

The Senate amendment contained no similar provisions.

The House recesses.

The conferees emphasize that the issues involved in the House provisions are important and complex and deserve to be considered fully by Congress. The conferees also acknowledge the findings of the Guam War Claims Review Commission, which was established to examine these issues in accordance with Public Law 107–333, and believe further deliberations on the Commission's recommendations are needed. This matter falls within the jurisdiction

of committees other than the Committees on Armed Services of the Senate and the House of Representatives. Nevertheless, the Committees on Armed Services of the Senate and the House of Representatives are willing to hold hearings on these issues in the coming year and, in the absence of resolution of these matters elsewhere, are willing to consider them in the National Defense Authorization Act for Fiscal Year 2011.

Repeal of certain laws pertaining to the joint committee for the review of counterproliferation programs of the United States

The House bill contained a provision (sec. 1054) that would repeal section 1605 of the National Defense Authorization Act for Fiscal Year 1994 (Public Law 103–160), as amended, and section 1503 of the National Defense Authorization Act for Fiscal Year 1995 (Public Law 103–337) as amended.

The Senate amendment contained no similar provision.

The House recedes.

Since September 11, 2001, many changes have occurred in the organization and management of Executive Branch agencies, as well as many new governing statutes to deal with increasing threats from proliferation of weapons of mass destruction (WMD) and associated materials and technologies, to include the recently implemented Office of the United States Coordinator for Prevention of Weapons of Mass Destruction Proliferation and Terrorism.

The conferees continue to believe that there is value in an interagency coordinating function and a biennial report that brings together the actions of the government to address these programs. Until such time as the roles of the new Coordinator and the Counterproliferation Program Review Committee (CPRC) have been reconciled, the conferees believe that it is premature to repeal the various provisions governing the CPRC.

The conferees direct the agencies involved with the CPRC to work with the Coordinator to determine and propose legislative recommendations that will ensure interagency coordination and a single coordinated report on the activities to prevent the proliferation of WMD and associated materials and technologies.

Report on criteria for selection of strategic embarkation ports and ship layberthing locations

The Senate amendment contained a provision (sec. 1076) that would require the Commander of the United States Transportation Command to develop criteria for selection of strategic embarkation ports and ship layberth locations and report on those criteria to the congressional defense committees within 180 days of enactment of this Act.

The Senate recedes.

The conferees agree to direct the Commander of the U.S. Transportation Command to: (1) develop criteria for the selection of strategic embarkation ports and ship layberth locations; and (2) submit the report to the congressional defense committees within 180 days of enactment of this Act.

The Senate recesses.

The conferees agree that the Secretary should coordinate requirements for such weapon systems with the military services, including the reserve components.

Transfer of Big Crow aircraft

The Senate amendment included a provision (sec. 1082) that would provide permissive authority to the Secretary of the Air Force to sell the Big Crow aircraft to a private sector entity, at a cost determined by the Air Force, and with no liability to the government.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that the Big Crow test aircraft represent another example of the underfunding of “orphan” test assets. These assets have significant joint use for research, development, test and evaluation activities, but not enough support within any one service or agency to warrant priority for funding for sustainment within that service or agency’s budget. The conferees note that many of the new technologies that are currently being deployed to support current operations were not tied to formal requirements, programmed activities, or programs of record and required specialized research or testing to accelerate their transition into operational use. The test and research assets used to support these types of programs need to be preserved despite the lack of formal “requirements”.

Therefore, the conferees direct the Under Secretary of Defense for Acquisition, Logistics, and Technology, through the Director of the Test Resource Management Center, and in conjunction with the Director of Operational Test and Evaluation to review issues related to “orphan” test assets, including their funding for sustainment and operations, and make recommendations on methods for ensuring that appropriate assets are preserved for DOD use in the absence of resource support by any single service or agency, including direct management by the Office of the Secretary of Defense or other joint entity, or potentially acquiring test services from private sector organizations. The conferees direct that the Under Secretary of Defense for Acquisition, Logistics, and Technology provide a report on the review and recommendations no later than 1 year after the date of enactment of this Act.

Trial by military commission of alien unprivileged belligerents for violations of the law of war

The Senate amendment contained a provision (sec. 1032) that would express the sense of Congress that the preferred forum for the trial of alien unprivileged enemy belligerents for violations of the law of war is trial by military commission.

The House bill contained no similar provision.

The Senate recesses.

Repeal of policy relating to the major combatant vessels of the United States Navy

The Senate amendment contained a provision (sec. 1012) that would repeal section 1012 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181). Section 1012, as amended, would require that all new classes of surface combatants and all new amphibious assault ships larger than 15,000 deadweight ton light ship displacement have integrated nuclear power systems, unless the Secretary of Defense determines that the inclusion of an integrated nuclear power system in such vessel is not in the national interest.

The House bill contained no similar provision.

The Senate recesses.

TITLE XI—CIVILIAN PERSONNEL MATTERS

Subtitle A—Personnel

Authority to employ individuals completing the National Security Education Program (sec. 1101)

The House bill contained a provision (sec. 1101) that would authorize the Secretary of Defense and other agencies and organizations with national security responsibilities to appoint individuals who have successfully completed the National Security Education Program to a position in the excepted service.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Authority for employment by Department of Defense of individuals who have successfully completed the requirements of the Science, Mathematics, and Research for Transformation (SMART) defense scholarship program (sec. 1102)

The House bill contained a provision (sec. 1102) that would authorize the direct hire of graduates of the Science, Mathematics, and Research for Transformation Defense Scholarship Program.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Authority for the employment of individuals who have successfully completed the Department of Defense information assurance scholarship program (sec. 1103)

The House bill contained a provision (sec. 1103) that would authorize direct hire authority of graduates of the Information Assurance Scholarship Program.

Extension and modification of experimental personnel management program for scientific and technical personnel (sec. 1104)

The Senate amendment contained a provision (sec. 1102) that would extend and modify the authorities of an experimental personnel management program for scientific and technical personnel.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Modification to Department of Defense laboratory personnel authority (sec. 1105)

The House bill contained a provision (sec. 1110) that would modify the Department of Defense laboratory personnel demonstration system by authorizing additional laboratories to participate in the program and extend the exclusion of demonstration program laboratories from inclusion into the National Security Personnel System (NSPS).

The Senate amendment contained a provision (sec. 1106) that would require the Department of Defense (DOD) to study the possibility of including additional laboratories into the laboratory demonstration program.

The Senate recedes with an amendment.

The conferees agree to a provision that requires the inclusion of a number of additional laboratories into the laboratory personnel demonstration programs and would require congressional approval before DOD could move these laboratories into any other personnel system.

The conferees are concerned that DOD is not expeditiously moving to implement legislated authorities that are intended to improve the quality of the science and engineering workforce. The conferees note that DOD has been slow in implementing the authorities provided by section 1107 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) relating to sharing of successfully demonstrated personnel management initiatives between demonstration laboratories, and section 1108 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110–417) which grants select direct hiring authorities at the demonstration laboratories. Given the widely accepted assessment that the quality of DOD laboratories has declined over the years, and recent claims by DOD that the Department is working to reinvigorate its in-house technical expertise as part of acquisition reform, the conferees believe the utilization of these authorities is necessary to revitalize DOD laboratory mission performance.

One-year extension of authority to waive annual limitation on premium pay and aggregate limitation on pay for Federal civilian employees working overseas (sec. 1106)

The House bill contained a provision (sec. 1105) that would extend for 1 year the authority of the head of an executive agency to waive the limitations on the amount of premium pay that may be paid to a civilian employee who performs work in an overseas location that is in the area of responsibility of the Commander, United States Central Command (USCENTCOM), or an overseas location that was formerly in the area of responsibility of the Commander, USCENTCOM but has been moved to the area of responsibility of the Commander, United States Africa Command, in support of a contingency operation or an operation in response to a declared emergency.

The Senate amendment contained a similar provision (sec. 1103).

The House recedes with a technical amendment.

Extension of certain benefits to Federal civilian employees on official duty in Pakistan (sec. 1107)

The House bill contained a provision (sec. 1106) that would extend to Department of Defense (DOD) civilian employees working in the Islamic Republic of Pakistan the same benefits that are currently provided to DOD civilians on official duty in a specified combat zone.

The Senate amendment contained no similar provision.

The Senate recedes.

Requirement for Department of Defense strategic workforce plans (sec. 1108)

The House bill contained a provision (sec. 1108) that would codify the requirement for the Secretary of Defense to develop and submit to the congressional defense committees an annual plan for shaping and improving the civilian employee workforce of the Department of Defense.

The Senate amendment contained a provision (sec. 815) that would require the Comptroller General to assess the efficacy of Department of Defense (DOD) training for acquisition and audit personnel.

The Senate recedes with an amendment that would include both the requirement for an annual strategic workforce plan and the requirement for a report on DOD training for acquisition and audit personnel.

Adjustments to limitations on personnel and requirement for annual manpower reporting (sec. 1109)

The House bill contained a provision (sec. 1109) that would amend section 1111 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (P.L. 110–417) to clarify the authority of the Secretary of Defense to waive annual limitations on major headquarters personnel.

The Senate amendment contained a provision (sec. 902) that would repeal the annual limitations.

The Senate recedes with an amendment that would remove the sunset date on the Secretary's waiver authority, making that authority permanent.

Pilot program for the temporary exchange of information technology personnel (sec. 1110)

The House bill contained a provision (sec. 1111) that would authorize the Secretary of Defense to carry out a pilot program for the temporary assignment of Department of Defense (DOD) employees to private sector organizations and of private sector employees to DOD.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would specify legal and ethical requirements applicable to an employee of a private sector organization who is assigned to DOD under the pilot program.

In 2006, the DOD Chief Information Officer published the "DOD ITEP Toolkit" in connection with a predecessor program, known as the Information Technology Exchange Program (ITEP). That document required a three-way agreement between the appropriate federal agency, the participating private sector organization, and the individual program participant spelling out the rights and responsibilities—including statutory and regulatory requirements—applicable to each of the parties to an exchange. The conferees direct DOD to use the DOD ITEP Toolkit, including the three-party agreements prescribed by that document, as a model for carrying out the program authorized by this section.

Availability of funds for compensation of certain civilian employees of the Department of Defense (sec. 1111)

The Senate amendment contained a provision (sec. 1104) that would authorize the Department of Defense to use funds available for the purchase of contract services to instead provide compensation for civilian employees to meet the same requirement.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

Department of Defense Civilian Leadership Program (sec. 1112)

The Senate amendment contained a provision (sec. 1105) that would authorize the Secretary of Defense to establish a Department of Defense Civilian Leadership Program (DCLP) to recruit and develop individuals with the academic merit, work experience, and leadership skills needed for the civilian employee workforce of the Department of Defense.

The House bill contained no similar provision.

The House recedes with an amendment limiting the participation of any individual in the DCLP to a 3-year period.

Provisions relating to the National Security Personnel System (sec. 1113)

The House bill contained a provision (sec. 1112) that would require the Secretary of Defense to transition all employees in the National Security Personnel System (NSPS) back to previously existing civilian compensation systems within 1 year of the date of the enactment of this Act.

The Senate amendment contained a provision (sec. 1101) that would freeze the expansion of NSPS and terminate the program unless the Secretary of Defense certifies that termination is not in the best interest of the Department and provides a specific schedule of changes that will be made to improve the fairness, credibility, and transparency of the system.

The Senate recedes with an amendment that would repeal the authority for NSPS and require the transition of NSPS employees to previously existing civilian personnel systems by January 1, 2012.

The amendment would also provide the Secretary of Defense with new personnel flexibilities, which would apply across the civilian workforce of the Department. In particular, the amendment would authorize the Secretary, in coordination with the Director of the Office of Personnel Management, to develop new regulations for the civilian workforce which include fair, credible, and transparent methods for hiring and assigning personnel, and for appraising employee performance. The conferees agree that these flexibilities can be exercised consistent with the existing General Schedule pay system, without the need for any legislative change to that system. In addition, the amendment would direct the Secretary to develop special training programs for managers to implement the authorities granted.

Finally, the amendment would authorize the Secretary, upon a determination that it is in the best interest of the Department of Defense, to request additional personnel authorities within the context of the General Schedule pay system, or to develop a proposal

for the use of personnel authorities that would require exemption from the application of the General Schedule pay system. If approved by Congress in the National Defense Authorization Act for Fiscal Year 2011, the Secretary would be permitted to implement the latter proposal in lieu of making the transition to the General Schedule pay system that would otherwise be required by the provision. Any proposal submitted by the Secretary would be required to guarantee collective bargaining rights and would not be permitted to cover prevailing wage employees.

The conferees note that section 9902 of title 5, United States Code, as amended by this section, would not include an exemption for the defense laboratories, because such an exemption is unnecessary in light of the continuing authority for the laboratories to conduct personnel demonstration projects in accordance with section 342(b) of the National Defense Authorization Act for Fiscal Year 1995 (P.L. 103–337), as amended by section 1114 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (P.L. 106–398). The conferees expect the Department to fully utilize the authority to carry out demonstration projects for such laboratories, as required by section 1105 of this Act.

Provisions relating to the Defense Civilian Intelligence Personnel System (sec. 1114)

The House bill contained a provision (sec. 1113) that would require the termination of the pay system under the Defense Civilian Intelligence Personnel System (DCIPS) and require the transfer of individuals covered by DCIPS to other pay systems.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would suspend the implementation of the DCIPS pay system until January 1, 2011, and require an independent study and review of the system.

Subtitle B—Provisions Relating to Reemployment of Annuitants

Authority to expand scope of provisions relating to unreduced compensation for certain reemployed annuitants (sec. 1121)

The House bill contained a provision (sec. 1107) that would allow former federal employees who receive a federal annuity from other than the Civil Service Retirement and Disability Fund to retain their annuity if reemployed by the Department of Defense.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

Part-time reemployment (sec. 1122)

The Senate amendment contained a provision (sec. 1162) that would provide temporary authority to federal agencies to reemploy retired federal civilian employees under limited conditions, without offset of annuity against salary, for certain specified purposes.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Government Accountability Office report (sec. 1123)

The Senate amendment contained a provision (sec. 1163) that would require the Comptroller General to submit a report regard-

ing the use of the authority provided elsewhere in this Act, which would authorize federal agencies to reemploy retired federal civilian employees under limited conditions, without offset of annuity against salary, for certain specified purposes.

The House bill contained no similar provision.

The House recesses.

LEGISLATIVE PROVISIONS NOT ADOPTED

Additional personnel authorities for the Special Inspector General for Afghanistan Reconstruction

The House bill contained a provision (sec. 1104) that would provide the Special Inspector General for Afghanistan Reconstruction additional personnel authorities similar to those provided to the Special Inspector General for Iraq Reconstruction.

The Senate amendment contained no similar provision.

The House recesses. The authority provided to the Special Inspector General for Afghanistan Reconstruction was enacted in separate legislation and signed into law (Public Law 111–38) on June 30, 2009.

Sense of Congress on pay parity for Federal employees service at Joint Base McGuire/Dix/Lakehurst

The House bill contained a provision (sec. 1114) that would express the sense of Congress that the pay schedules and rates for federal employees serving at the Joint Base McGuire/Dix/Lakehurst should be the same, and that the Office of Personnel Management (OPM) should develop regulations ensuring pay parity among civilian employees employed by different military services at joint bases.

The Senate amendment contained no similar provision.

The House recesses.

The conferees have been informed that OPM is developing regulations to address the issue of pay parity at this joint base.

Short title

The Senate amendment contained a provision (sec. 1161) that would allow a subtitle of this Act to be cited as the “Part-Time Reemployment of Annuitants Act of 2009”.

The House bill contained no similar provision.

The Senate recesses.

TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

Subtitle A—Assistance and Training

One-year extension of authority for security and stabilization assistance (sec. 1201)

The House bill contained a provision (sec. 1201) that would extend through September 30, 2010, the authority provided in section 1207 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163), as amended by section 1207(b) of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110–417), for the Secretary of Defense to provide support to Department of State programs of security and stabiliza-

tion assistance. The provision would reduce the amount authorized for these purposes to \$25.0 million.

The Senate amendment contained a provision (sec. 1207) that would extend through September 30, 2010, the authority provided under section 1207 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163), as amended by section 1210 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181) and section 1207 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417). The provision makes no change to \$100.0 million limitation on the amount authorized for these purposes.

The House recedes.

While the conferees believe that the increased coordination between the Department of Defense and Department of State resulting from the joint formulation and implementation of security and stabilization projects under the section 1207 authority has value, the conferees reaffirm that Congress has always intended for this transfer authority to be temporary and are disappointed that the Department of State has not yet achieved the capacity to fulfill its statutory requirements. The conferees urge the administration to work toward this goal as rapidly as possible. They further recommend that the administration examine ways to maintain this coordination in the absence of this authority.

Expansion of authority and modification of notification and reporting requirements for use of authority for support of special operations to combat terrorism (sec. 1202)

The House bill contained a provision (sec. 1202) that would increase the amount of funds available to provide assistance to foreign forces, irregular forces, groups, or individuals supporting or facilitating military operations by U.S. special operations forces to combat terrorism, as authorized by section 1208 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by section 1208 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417), from \$35.0 million to \$50.0 million during any fiscal year.

The Senate amendment contained a provision (sec. 1204) that would require the Secretary of Defense to notify the congressional defense committees at least 72 hours prior to the Department's providing assistance, under this authority, to irregular forces, groups, or individuals. This provision would also require the Department to notify the congressional defense committees should there be any change in the scope or level of funding for such assistance. The Senate provision would also enhance the notification and annual reporting requirements.

The Senate recedes with an amendment that would increase the amount of funds available from \$35.0 million to \$40.0 million during any fiscal year.

The House recedes with an amendment that would require notification to the congressional defense committees upon the use of this authority to support an approved military operation or change in scope or funding level for any support to such an operation.

The conferees agree that, to date, the Department's notifications and annual report have been insufficient and that some of the projects entered into by U.S. Special Operations Command (USSOCOM) under this authority have appeared to be focused on long-term engagement with foreign forces, irregular forces, groups, or individuals, rather than exclusively for support of or facilitating of ongoing military operations by U.S. special operations forces to combat terrorism. The conferees urge USSOCOM to review the current programs to ensure they are being executed in a manner consistent with the intent of this authority and that enduring programs continue to provide an appropriate payback for the command. Until such a review is complete, the conferees would be reluctant to approve any additional increases to the maximum amount that can be expended under this authority in any given fiscal year.

Modification of report on foreign-assistance related programs carried out by the Department of Defense (sec. 1203)

The House bill contained a provision (sec. 1203) that would amend section 1209 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) to require a permanent, annual report on certain foreign-assistance related programs carried out by the Department of Defense. The provision also added the humanitarian and civil assistance provided through the Combatant Commander's Initiative Fund as an authority subject to this reporting requirement.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would provide for the annual reporting requirement contained in the House bill through February 1, 2013.

Report on authorities to build the capacity of foreign military forces and related matters (sec. 1204)

The House bill contained a provision (sec. 1204) that would require a report from the President by March 1, 2010, on the relationship between security cooperation authorities of the Department of Defense and security assistance authorities of the Department of State and other agencies to train and equip, or otherwise build the capacity of, foreign military forces, and the distinctions, if any, between those authorities. The provision would also require information regarding the strengths and weaknesses of current laws governing and relating to the provision of this type of assistance; recommended changes, if any, to those laws; any organizational and procedural changes that should be made in the Department of Defense and Department of State to improve their ability to conduct such programs; and the funding and resources mechanisms required to assure adequate funding for such programs.

The Senate amendment contained no similar provision.

The Senate recedes.

Authority to provide administrative services and support to coalition liaison officers of certain foreign nations assigned to United States Joint Forces Command (sec. 1205)

The Senate amendment contained a provision (sec. 1202) that would modify the authority provided under section 1051a of title 10, United States Code, to permit the Secretary of Defense to provide administrative services and support to, as well as to pay travel and subsistence expenses of, certain coalition liaison officers while they are temporarily assigned to U.S. Joint Forces Command.

The House bill contained no similar provision.

The House recesses.

Modification of authorities relating to program to build the capacity of foreign military forces (sec. 1206)

The Senate amendment contained a provision (sec. 1203) that would allow that, of the funds authorized annually for fiscal years 2010 and 2011 for capacity building programs under section 1206 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364; 120 Stat. 2418), as amended, no more than \$75.0 million may be used for programs to build the capacity of foreign military forces to participate in or support military or stability operations in which the United States Armed Forces are a participant.

The House bill contained no similar provision.

The House recesses.

The conferees note the legislative proposals of the Department for new authorities to build the capacity of foreign military general purpose forces and special operations forces to support ongoing coalition operations in the Republic of Iraq and the Islamic Republic of Afghanistan. The conferees agree that the existing authority of section 1206 of Public Law 109–364, as amended, is sufficient to permit these activities and would be open to consider programs to build the capacity of North Atlantic Treaty Organization and other coalition partners whose ability to contribute to ongoing operations in Iraq and Afghanistan would otherwise be limited. The conferees believe that one appropriate use of this authority would be to build the capacity of foreign military's Operational and Mentoring Liaison Teams for deployment to Afghanistan.

Authority for non-reciprocal exchanges of defense personnel between the United States and foreign countries (sec. 1207)

The Senate amendment contained a provision (sec. 1208) that would permit the Department of Defense to accept, on a non-reciprocal basis, defense personnel of the defense ministry of an ally or friendly foreign government.

The House bill contained no similar provision.

The House recesses with a series of amendments that would: (1) permit the Department of Defense to pay for the cost of temporary duty of the exchanged personnel when it is directed by the United States Government; (2) require the Secretary of Defense to report to the appropriate congressional committees annually on the use of this authority; and (3) adjust the expiration of the authority to align with the end of the fiscal year vice the calendar year.

The conferees agree that the authority is not to be used as a mechanism to require the Department of Defense to fund visits and training of military and civilian personnel from allied and other foreign countries. Further, the conferees caution the Department that this authority should be used to accept personnel where the duties contemplated either necessitate or would be enhanced by the presence of foreign defense personnel. The authority should not be used to provide training or educational opportunities that are more properly conducted under the International Military Education and Training or Counterterrorism Fellowship programs. Additionally, the authority should not be used as an alternative to existing engagement programs, including those activities conducted pursuant to section 168 of title 10, United States Code. Temporary duty authorized under this exchange program should be directly related to the duties and responsibilities of the position to which the individual is assigned.

Report on alternatives to use of acquisition and cross-servicing agreements to lend military equipment for personnel protection and survivability (sec. 1208)

The Senate amendment contained a provision (sec. 1210) that would require the Secretary of Defense to assess and report on possible alternatives to the temporary authority provided under section 1202 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364; 120 Stat. 2412), as amended, which allows for the lending or leasing under acquisition and cross-servicing agreements of certain significant military equipment to military forces of countries participating in combined operations with the United States in Iraq or Afghanistan, or as part of peacekeeping operations under the United Nations Charter or another international agreement.

The House bill contained no similar provision.

The House recesses.

Enhancing Iraqi security through defense cooperation between the United States and Iraq (sec. 1209)

The Senate amendment contained a provision (sec. 1211) that would permit the President to treat an undertaking by the Government of Iraq, made between the date of the enactment of this Act and December 31, 2011, as a dependable undertaking described in section 22(a) of the Arms Export Control Act (22 U.S.C. 2762(a)) for the purposes of entering into contracts for the procurement of defense articles and defense services as provided for in that section.

The House bill contained no similar provision.

The House recesses with an amendment that would require the Secretary of Defense, in consultation with the Secretary of State, to provide a report on the role of Foreign Military Sales in meeting the requirements of the military and security forces of Iraq for restoring and maintaining peace and security in Iraq.

It also includes a sense of Congress that encourages the Secretary of Defense, in consultation with the Secretary of State, to increase the number of positions available in professional military education courses available annually to personnel of the security forces of the Government of Iraq.

Availability of appropriated funds for the State Partnership Program (sec. 1210)

The Senate amendment contained a provision (sec. 1212) that would allow the Secretary of Defense, under regulations prescribed by the Secretary, to use Department of Defense (DOD) funds for fiscal year 2010 to pay costs associated with the National Guard's State Partnership Program, in support of the objectives of the combatant commanders or to build international civil-military partnerships and capacity on matters relating to defense and security.

The House bill contained no similar provision.

The House recedes with an amendment that would require, not later than 90 days after the date of the enactment of this Act, that the Secretary of Defense, in consultation with the Secretary of State, prescribe regulations regarding the use of DOD funds to pay the costs of the National Guard in conducting activities under the State Partnership Program. The Secretary of Defense will transmit a copy of these regulations to the Committee on Armed Services and the Committee on Foreign Relations of the Senate, and the Committee on Armed Services and the Committee on Foreign Affairs of the House of Representatives.

The conferees believe that the security cooperation activities of the State Partnership Program of the National Guard have made a valuable contribution to global security through building relationships between State National Guard units and over 60 partner nations throughout the world.

Subtitle B—Matters Relating to Iraq, Afghanistan, and Pakistan

Limitation on availability of funds for certain purposes relating to Iraq (sec. 1221)

The House bill contained a provision (sec. 1211) that would prohibit the use of funds authorized by this Act to establish permanent U.S. military installations or bases in Iraq or to exercise U.S. control of Iraqi oil resources.

The Senate amendment contained no similar provision.

The Senate recedes.

One-year extension and expansion of Commanders' Emergency Response Program (sec. 1222)

The House bill contained a provision (sec. 1212) that would amend section 1202 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 106-163), as amended, to authorize \$1.3 billion in fiscal year 2010 for the Commanders' Emergency Response Program (CERP).

The Senate amendment contained a provision (sec. 1206) that would authorize \$1.4 billion in fiscal year 2010 for CERP. The provision of the Senate amendment would also authorize the Secretary of Defense to transfer up to \$100.0 million of CERP funds to the Department of State to support the Afghanistan National Solidarity Program (NSP) if the Secretary of Defense determines that doing so would enhance counterinsurgency or stability operations in Afghanistan.

The House recedes with an amendment that would authorize \$1.3 billion in fiscal year 2010 for CERP and provide the Secretary

of Defense the authority to transfer to the Department of State up to \$50.0 million of CERP funds to support the NSP.

The amendment would also provide the Secretary of Defense with the authority, in concurrence with the Secretary of State, to use funds provided for CERP to support the reintegration of those who have renounced violence against the Government of Afghanistan. The conferees note that the authority to use CERP funds for this purpose has been provided for 1 year only. The conferees expect that the administration will submit a request for any required legal authority and funding to carry out a reintegration program separate from the CERP program with the President's budget request.

In addition, the amendment would require the Secretary of Defense to conduct, not later than 180 days after the date of enactment of this Act, a thorough review of CERP and report to Congress on the results of that review. The conferees direct the Secretary of Defense to include as part of this review an assessment of the following: the process for generating and justifying CERP budget; the existing management and oversight of CERP funds and contracts; personnel requirements specifically in support of CERP and the number of personnel deployed to meet those requirements in Afghanistan, including with the Joint Contracting Command and U.S. Forces—Afghanistan; the extent and effectiveness of coordination of projects with other U.S. Government agencies, international organizations, and Non-Governmental Organizations carrying out projects in Iraq and Afghanistan; and coordination with the host government on CERP projects, including procedures for ensuring the sustainment of those projects by the host government over the long run.

Modification of authority for reimbursement of certain coalition nations for support provided to United States military operations (sec. 1223)

The House bill contained a provision (sec. 1213) that would authorize the Secretary of Defense to reimburse any key cooperating nation for logistical and military support provided by that nation to or in connection with U.S. military operations in Operation Iraqi Freedom (OIF) or Operation Enduring Freedom (OEF), also known as Coalition Support Fund reimbursements. Total reimbursements under this authority during fiscal year 2010 are limited to \$1.6 billion.

The Senate amendment contained a similar provision (sec. 1205) that would extend through fiscal year 2010 the authority provided in section 1233 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181; 122 Stat. 393) for the Secretary of Defense to pay Coalition Support Fund reimbursements. In addition, this provision would modify section 1233 of Public Law 110–181 to allow funds under that section to be used to provide key cooperating nations with specialized training and supplies, or to loan them specialized equipment. The provision in the Senate amendment would also limit reimbursements under this authority during fiscal year 2010 to \$1.6 billion.

The House recedes with clarifying and technical amendments.

Prior to making any reimbursement to Pakistan in fiscal year 2010 under the authority provided in this section, the conferees direct the Secretary of Defense, with the concurrence of the Secretary of State, to make a determination based on reasonably available information as to whether such reimbursement is consistent with the national security interest of the United States and will not adversely impact the balance of power in the region. The conferees direct the Secretary to include any such determination in the relevant quarterly report to Congress required under this section.

Pakistan Counterinsurgency Fund (sec. 1224)

The House bill contained a provision (sec. 1214) that would provide that the Pakistan Counterinsurgency Fund (PCF) would consist of amounts appropriated to the PCF for fiscal year 2009 and amounts transferred to the PCF by the Secretary of State, with the concurrence of the Secretary of Defense. The Secretary of Defense, with the concurrence of the Secretary of State, may use amounts in the PCF to improve the counterinsurgency capabilities of the security forces of the Islamic Republic of Pakistan (including Pakistan's military, Frontier Corps, and other security forces), and to provide limited humanitarian assistance to the people of Pakistan as part of civil-military training exercises for Pakistani security forces receiving assistance under the PCF.

The Senate amendment contained a similar provision (sec. 1517) specifying that funds in the PCF pursuant to a transfer by the Secretary of State to the Secretary of Defense during fiscal year 2010 will be available to the Secretary of Defense to provide assistance to the security forces of Pakistan to build the counterinsurgency capability of the Pakistan military forces and the Pakistan Frontier Corps. The provision would require prior to the expenditure of PCF funds that the Secretary of Defense provide an assessment as to whether the Government of Pakistan is committed to confronting the threat posed by al Qaeda, the Taliban, and other militant extremists based on a determination by the Government of Pakistan that confronting these extremist groups is critical to Pakistan's own national interest.

The Senate recedes with an amendment that would require that concurrent with the initial use of funds available under this section, the Secretary of Defense will provide an assessment as to whether the Government of Pakistan is making concerted efforts to confront the threat posed by al Qaeda, the Taliban, and other militant extremists based on Pakistan's national security interests. The amendment also requires quarterly reports summarizing, on a project-by-project basis, any transfer of funds from the PCF during the fiscal quarter. Section (d)(2) of the amendment regarding any restriction relating to payments for Letters of Offer and Acceptance refers to section 203(d) of S. 1707, as enrolled, regarding limitations on certain assistance.

the registration and end-use monitoring of defense articles and defense services transferred to Afghanistan and Pakistan.

The Senate amendment contained no similar provision.

The Senate recesses with clarifying and technical amendments.

The conferees expect that the registration and end-use monitoring programs established pursuant to this section will be implemented so as to minimize both the risks to U.S. personnel carrying out these programs and the impact on ongoing military operations, including ongoing Pakistani military operations against terrorists and militants in Pakistan.

Reports on campaign plans for Iraq and Afghanistan (sec. 1226)

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require the Secretary of Defense to report, not later than 120 days after the date of enactment of this Act, on the APPP and other similar programs for community-based security forces in Afghanistan. The Senate amendment contained a provision (sec. 1236) that would require the Secretary of Defense to submit a report to Congress on the feasibility of establishing general uniform procedures and guidelines for the United States to provide monetary assistance to civilian foreign nationals for losses, injuries, or death incident to combat activities of the United States Armed Forces during contingency operations.

The House recesses with a clarifying amendment.

Assessment and report on United States-Pakistan military relations and cooperation (sec. 1231)

The Senate amendment contained no similar provision.
The Senate recesses.

Report on progress toward security and stability in Pakistan (sec. 1232)

The provision would also require the President to establish goals, objectives, and timelines for achieving progress in the areas specified in this provision to be assessed, and metrics to measure such progress. The provision would also require the President to report to Congress on the assessment and how it was conducted.

Authority to transfer defense articles and provide defense services to the military and security forces of Iraq and Afghanistan (sec. 1234)

The House bill contained a provision (sec. 1225) that would require the Secretary of Defense to develop a plan for the disposition of major end items and tactical equipment in the Republic of Iraq and address a number of specified elements as part of that plan. The provision would also require the Secretary of Defense to report to Congress on the plan required by this section no later than the time of the President's budget submission for fiscal year 2011. The provision did not provide any additional authority to transfer U.S. equipment to Iraq or any other entity outside the Department of Defense.

The Senate amendment contained a provision (sec. 1213) that would authorize the President to transfer defense articles in Iraq, and provide defense services in connection with the transfer of those defense articles, to the military and security forces of Iraq or the military and security forces of Afghanistan to support their efforts to restore and maintain peace and security internally. The aggregate replacement value of defense articles transferred and defense services provided would be limited to \$500,000,000. The provision would also require that the President may not exercise the authority under this section until 30 days after the Secretary of Defense, with the concurrence of the Secretary of State, submits a report on a plan for the disposition of equipment and other property of the Department of Defense in Iraq.

The House recesses with an amendment that would authorize the Secretary of Defense, with the concurrence of the Secretary of State, to transfer defense articles, without reimbursement from the Government of Iraq or the Government of Afghanistan, and to provide defense services in connection with those transfers, to the military and security forces of Iraq and the military and security forces of Afghanistan. The amendment would clarify that defense articles that may be transferred under this authority include equipment that was used in support of operations in Iraq but at the time of enactment of this Act is present in Kuwait. The conferees expect that any equipment located in Kuwait that is transferred under this authority will not have been transferred to Kuwait from a location other than Iraq for the purpose of being transferred under this authority.

The amendment would increase the limit on the aggregate replacement value of defense articles transferred and defense services provided to \$750,000,000.

The amendment would provide that the report required prior to the exercise of this authority will also include a description of the types of defense articles the Department of Defense intends to transfer to the military and security forces of Afghanistan. The conferees urge the Secretary of Defense to develop a plan to reimburse the military departments for non excess defense articles transferred to Iraq and Afghanistan under this authority.

The amendment would also provide that the report to be provided quarterly on the implementation of the authority under this section may be included in the report required under section 9204 of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 122 Stat. 2410). The conferees direct the Secretary of Defense to ensure that, if the quarterly report required under this section is included in the section 9204 report, that report will be provided to the committees designated to receive the quarterly report under this section.

Modification of report on progress toward security and stability in Afghanistan (sec. 1236)

The Senate amendment contained no similar provision.

The Senate recedes with an amendment clarifying certain matters to be included in the report and requiring additional information on: the progress in ending the ability of the insurgency to establish control over the population of Afghanistan and establish safe havens within Afghanistan; and the coordination of reconstruction and development activities in Afghanistan.

The House bill contained no similar provision.
The House recesses with a series of technical amendments.

Annual counterterrorism status reports (sec. 1242)

The Senate amendment contained a provision (sec. 1225) that would require the President to provide a report annually to Congress on the status of U.S. efforts and the level of progress achieved to defeat al Qaeda and its affiliates. More specifically, the report would require: (1) an assessment of the scope, status, and progress of U.S. counterterrorism efforts in fighting al Qaeda and its affiliates abroad; (2) a description of U.S. counterterrorism activities (political, economic, military, intelligence, etc.) including a description of efforts to counter terrorist recruitment and financing and support public diplomacy efforts; (3) an analysis of the budgets of all Federal Government agencies as they relate to counterterrorism funding; and (4) an analysis of the extent to which specific federal appropriations have provided a return on investment on efforts to combat and defeat al Qaeda.

The House bill contained no similar provision.

The House recesses with an amendment that would: (1) sunset the annual reporting requirement in 2012; (2) require the administration to delineate the boundaries between the strategic operational planning mission assigned to the National Counterterrorism Center (NCTC) by the Intelligence Reform and Terrorism Prevention Act of 2004 (Public Law 108-458) and the broad military and diplomatic planning missions of the Defense Department, the State Department, and other agencies; and (3) strengthen reporting requirements on joint, interagency operations.

The conferees agree that, 8 years after the terrorist attacks of September 11, 2001, the terrorist threat remains formidable, and that despite the amount of news coverage and public analyses of the evolving threat and counterterrorist operations, objective measures of progress are inadequate. Existing executive branch reporting on various aspects of the national struggle against terrorism is piecemeal and does not address the full scope of U.S. activities or assess overall effectiveness. The conferees note that this fragmentation of assessment and reporting is itself a reflection of the fact that, while many Federal departments and agencies have critical roles in countering terrorism, interagency coordination and in-

tegration remains elusive and difficult. It is now understood that success in countering terrorism requires the mobilization and effective integration of all elements of national power. It is also widely perceived that the Nation has yet to achieve a “whole-of-government” effort.

The annual reporting requirement required by this provision is intended to help multiple congressional committees, and Congress as a whole, to conduct oversight. It is also intended to enable the public to gain a better understanding of how well the government is performing in this vital mission. The reporting requirement is also intended to assist the new administration in identifying and overcoming challenges in harnessing all the Nation’s capabilities.

Report on United States contributions to the United Nations (sec. 1243)

The Senate amendment contained a provision (sec. 1227) that would amend and extend permanently an existing reporting requirement relating to contributions by the United States to the United Nations (section 1225 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364). The provision would also direct the Director of the Office of Management and Budget to post a public version of each report on its website.

The House bill contained no similar provision.

The House recesses with an amendment that would extend the reporting requirement until September 30, 2011.

NATO Special Operations Coordination Center (sec. 1244)

The House bill contained a provision (sec. 1231) that would authorize the Secretary of Defense to allocate up to \$30.0 million to improve the capacity and capabilities of the North Atlantic Treaty Organization (NATO) Special Operations Coordination Center. Funds under this section would be available for the purposes of:

- (1) improving coordination and cooperation among the special operations forces of NATO nations;
- (2) facilitating joint operations by the special operations forces of NATO nations;
- (3) supporting special operations-peculiar command, control, and communications capabilities;
- (4) promoting special operations forces’ intelligence and informational requirements within the NATO structure; and
- (5) promoting interoperability.

This section would further require the Secretary of Defense, within 180 days after the enactment of this Act, to certify to the Committees on Armed Services of the Senate and the House of Representatives that the Department of Defense (DOD) has assigned executive agent responsibility for the NATO Special Operations Coordination Center to an appropriate DOD organization.

The conference report includes this provision with a series of conforming and technical amendments.

Annual report on military and security developments involving the People's Republic of China (sec. 1246)

The House bill contained a provision (sec. 1233) that would amend section 1202 of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106-65) by changing the title of the report to “Annual Report on Military and Security Developments Involving the People’s Republic of China” and by making certain clarifying and technical changes. The provision would also expand the scope of the report to include information regarding U.S. engagement and cooperation with China on security matters, and information on additional developments involving China that the Secretary of Defense considers relevant to national security. In addition, the provision would repeal the reporting requirements on military-to-military contacts under sections 1201(e) and (f) of the National Defense Authorization Act for Fiscal Year 2000 and add these requirements to the reporting requirements under section 1202 of that Act. Details of the provision’s reporting requirements are set forth in the report accompanying the House bill (House Report 111-166).

The Senate amendment contained no similar provision.

The Senate recesses.

The conferees encourage the Secretary to further examine the implications of China’s concepts of psychological warfare, media warfare, and legal warfare on U.S. military affairs in the region and include additional detail on each of these concepts, including examples and trends, in the fiscal year 2010 report to Congress required under this section.

A report on the assessment would be due 180 days after the date of enactment of this Act.

The Senate amendment contained no similar provision.

The Senate recesses.

The conferees believe that the time has come for an analysis of the risks and benefits of satellites and related components remaining on the USML. While clearly the conferees want to protect national security interests, it is also in the national security interest of the United States to maintain a robust satellite industrial base. Over the past several years it has become clear that satellite manufacturers in other countries have used the USML status as a competitive tool against U.S. satellite manufacturers and U.S. satellite manufacturers have been hampered in their manufacturing and marketing efforts as a result of the USML status. The conferees hope that this risk assessment and report will serve as the basis for future discussion about possible revisions to U.S. export policy.

Patriot air and missile defense battery in Poland (sec. 1249)

The House bill contained a provision (sec. 1236) that would direct the Secretary of Defense, subject to the availability of appropriations, to seek to deploy a United States Army Patriot air and missile defense battery, and the personnel required to operate and maintain such battery, to Poland by 2012.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would express the sense of Congress that the United States and Poland should seek to implement the terms of their Declaration on Strategic Cooperation, dated August 20, 2008, including cooperation on the deployment of a U.S. Army Patriot air and missile defense battery in Poland. The amendment would also require the Secretary of Defense to report to the congressional defense committees on the status of cooperation on the deployment of the Patriot battery.

Report on the plan for the nuclear weapons stockpile, nuclear weapons complex, and delivery platforms and sense of Congress on follow-on negotiations to START Treaty (sec. 1251)

The House bill contained a provision (sec. 1239) that would prohibit fiscal year 2010 funds from being used to implement reductions in the strategic nuclear forces of the United States pursuant to a treaty or other agreement entered into between the United States and the Russian Federation on strategic nuclear forces, after the date of enactment of this Act, until the President makes certain certifications. The certifications would include: that the treaty or agreement was verifiable; that the treaty or agreement does not place any restrictions on U.S. ballistic missile, space, or advanced conventional weapons capabilities; and that the fiscal year 2011 budget request for the Department of Energy (DOE) National Nuclear Security Administration (NNSA) was sufficiently funded to maintain the reliability, safety and security of the remaining strategic nuclear forces, and modernize and refurbish the nuclear weapons complex. In addition, the provision would require the President to submit a report to the congressional defense committees on the stockpiles of the strategic and nonstrategic weapons of the United States and the Russian Federation.

The Senate amendment contained a similar provision (sec. 1234) that would require the President to submit a report to the congressional defense and foreign relations committees on the plan to enhance the safety, security and reliability of the U.S. nuclear weapons stockpile, to modernize the nuclear weapons complex, and to maintain the delivery platforms for nuclear weapons. This report would be due with the submission of any follow-on to the Strategic Arms Reduction (START) Treaty or 30 days after enactment of this Act, whichever is earlier.

The provision would also set forth the sense of the Senate urging the President to maintain his stated position to not include any limitations on the ballistic missile defense systems, space capabilities, or advanced conventional weapons systems of the United States in any follow-on to the START Treaty.

The House recesses with an amendment that requires the report to be submitted 30 days after the date of enactment of this Act or when any follow-on to the START Treaty is submitted to the Senate, whichever is later. The amendment would also change the sense of the Senate to a sense of Congress and expand the sense of Congress to include two additional items. The first item is that enhanced safety, security, and reliability of the nuclear weapons stockpile, the modernization of the nuclear weapons complex, and the maintenance of the nuclear delivery systems are key to enabling further reductions in our nuclear forces. The second item is that the President should submit a budget request for fiscal year 2011 for the NNSA that is adequate to sustain the needed capabilities to support the long-term maintenance of the U.S. nuclear weapon stockpile.

The House bill contained no similar provision.

The House recedes with a series of technical amendments.

Report and sense of Congress on North Korea (sec. 1255)

The Senate amendment contained a provision (sec. 1233) that would require the President to submit to Congress a report examining the conduct of the Government of North Korea to determine whether North Korea meets the statutory criteria for listing as a state sponsor of terrorism. The provision also expresses the sense of the Senate that the United States should enforce United Nations Security Council Resolution 1718 and 1874, urge other member states of the United Nations to fully implement those sanctions, and explore imposition of additional sanctions. It also expresses the sense that North Korea should be immediately relisted as a state sponsor of terrorism if it is determined that the Government of North Korea has provided assistance to terrorists or engaged in terrorism, or if it failed to fulfill the pledges it made in its statement of June 10, 2008.

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) narrow the sense of the Congress; and (2) modify an element of the report to require an examination of whether relisting North Korea as a state sponsor of terrorism, if North Korea does not meet the statutory criteria for listing, would undermine the effectiveness of the state sponsor of terrorism designation in general and undermine United States efforts regarding existing state sponsors of terrorism.

The provision would also direct the Secretary of Defense to submit an annual report for each fiscal year in which funds are accepted describing the contributions received in that fiscal year. Any funds received would be maintained in a separate account in the Treasury, but would be available for obligation and expenditure without further appropriation. Any funds not used within 3 years from receipt would be returned to the original donor. The authority to accept contributions would expire on December 31, 2015.

The House recedes with an amendment that would broaden the authority of the Secretary of Defense to receive funds for any CTR activity. In addition, the amendment would require the Secretary of Defense to submit an implementation plan prior to obligating or expending any funds received by any entity. The amendment would also require that the notifications and reports be sub-

mitted to the Senate Committee on Foreign Relations and the House Committee on Foreign Affairs.

Metrics for the Cooperative Threat Reduction Program (sec. 1304)

The House bill contained a provision (sec. 1304) that would require the Secretary of Defense to enter into an arrangement with the National Academy of Sciences (NAS) to carry out a study to identify metrics to measure the impact and effectiveness of activities under the Cooperative Threat Reduction (CTR) program at the Department of Defense.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would direct the Secretary of Defense to develop metrics for the CTR program. Not later than 270 days after enactment of this Act, the Secretary of Defense is directed to submit a report to the appropriate congressional committees describing the metrics developed and implemented.

Not later than 30 days after the Secretary of Defense submits the metrics report, the Secretary shall enter into an agreement for the NAS to review and assess the metrics report. The NAS shall submit the results of its assessment of the metrics report to the Secretary of Defense and the appropriate congressional committees.

No later than 90 days after receiving the NAS report the Secretary shall submit a report to the appropriate congressional committees on the assessment carried by the NAS and shall include actions, if any, to be taken by the Secretary to implement any recommendation in the NAS assessment.

The House bill contained a provision (sec. 1305) that would authorize the Secretary of Defense, in consultation with the Secretary of State, to expend not more than 10 percent of the funds available for the Cooperative Threat Reduction (CTR) program, notwithstanding any other provision of law, for CTR activities to address urgent threats from chemical, nuclear or biological weapons, or weapons-related materials, technologies and expertise, subject to certain conditions. These conditions would include a series of determinations and written notification 15 days in advance of the use of the authority.

The Senate amendment contained a similar provision (sec. 1304) that would authorize the Secretary of Defense to obligate not more than 10 percent of the funds authorized to be appropriated for the Cooperative Threat Reduction (CTR) program for any bilateral or multilateral activities relating to nonproliferation or disarmament, notwithstanding any other provision of law, subject to a certification by the President that the action is necessary to support national security objectives.

The Senate recedes with an amendment that would require the Secretary of Defense to exercise the authority only with the concurrence of the Secretaries of State and Energy. The amendment would also include technical changes to the determinations and the notification.

Cooperative Threat Reduction Defense and Military Contacts Program (sec. 1306)

The House bill contained a provision (sec. 1306) that would require the Secretary of Defense to ensure that the defense and military contacts program under the Department of Defense Cooperative Threat Reduction (CTR) program be administered by the CTR program office and be used to support and advance the mission of the CTR program, as well as be coordinated with relevant combatant commanders.

TITLE XV—AUTHORIZATION OF ADDITIONAL APPROPRIATIONS FOR OVERSEAS CONTINGENCY OPERATIONS

BUDGET ITEM

Joint Improvised Explosive Device Defeat Organization

The budget request for Overseas Contingency Operations (OCO) includes \$1,535.0 million for the Joint Improvised Explosive Device Defeat Fund (JIEDDF), and \$564.9 million in the base budget request, reflecting the administration’s decision to make the Joint Improvised Explosive Device Defeat Organization (JIEDDO) a permanent institution.

The House bill would have reorganized the JIEDDF base budget request to reflect better the enduring costs of the JIEDDO. Additionally, the House bill would have transferred from the JIEDDF to Research, Development, Test, and Evaluation, Army (RDTEA) for JIEDDO RDTEA and to Operation and Maintenance, Army for JIEDDO operations and information fusion support, for the Joint Center of Excellence, and for staff and infrastructure. The House bill would also have transferred \$100.0 million from the JIEDDF OCO request to help accelerate the Irregular Warfare Support (IWS) program.

The Senate amendment would have transferred the \$564.9 million requested in the base budget to the OCO account because the Senate views JIEDDO as a temporary organization created to support U.S. forces in the theaters of operation in Iraq and Afghanistan.

The conferees agree to transfer the JIEDDO funds requested in title I to the title XV JIEDDF OCO account and endorse the concerns and direction noted in the Senate amendment.

The conference agreement includes the JIEDDO funding authorization. The funding authorization levels are reflected in title XV tables.

The Senate recesses to the House bill's transfer authority extension.

The conferees are concerned by JIEDDO's inability to provide the required monthly obligation and expenditure reports on a timely basis. The conferees believe that JIEDDO has become a sufficiently mature organization to allow it to plan and program in advance for continuing and enduring costs. Further, in order for the congressional defense committees to conduct adequate oversight of JIEDDO and its efforts to accomplish its mandate, the conferees believe JIEDDO must submit timely detailed budgetary and programmatic information.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would increase the total authorization for the MRAP Vehicle Fund to \$6.7 billion—\$6.1 billion in title XV of this Act and \$600.0 million in title I of this Act.

The conferees are aware that MRAP vehicles continue to be high priority assets in Operation Enduring Freedom (OEF) and Operation Iraqi Freedom and save lives in combat. The committee notes the extraordinary effort to produce over 16,000 MRAP vehicles in 2 years and commends the Secretary of Defense for acknowledging the importance of this program by making it a top priority.

The conferees understand that in response to a joint, urgent operational needs statement from OEF, the MRAP joint program office is now procuring an MRAP all-terrain variant (M-ATV) that is a smaller, lighter-weight version of the original MRAP vehicle. The conferees are aware the M-ATV requirement has increased from 2,080 to 6,466. The conferees expect the Secretary of Defense to use the funds provided to fund fully this new requirement in fiscal year 2010.

The conferees also believe troops in pre-mobilization training should have training on the same types of equipment they will operate while deployed in combat. The committee understands MRAP vehicles are currently in short supply for home-station training at joint national training centers, and at combined training centers. The conferees urge the Secretary of Defense to address these shortfalls and facilitate the fielding of MRAP vehicles for pre-mobilization training.

LEGISLATIVE PROVISION NOT ADOPTED

Short title

The Senate amendment contained a provision (sec. 1041) that would cite this subtitle as the “Captain James A. Lovell Federal Health Care Center Act of 2009”.

The House bill contained no similar provision.

The Senate recedes.

TITLE XVIII—MILITARY COMMISSIONS

Military commissions (secs. 1801–1807)

The Senate amendment contained a provision (sec. 1031) that would amend chapter 47A of title 10, United States Code, addressing the trial by military commission of certain detainees for violations of the law of war.

The House bill contained no similar provision.

The House recedes with an amendment that would break up the provision into seven sections and provide it with a new short title: the Military Commissions Act of 2009. The amendment would also modify language addressing the qualifications of defense counsel and the resources available to such counsel, standards precluding the use of coerced testimony, standards applicable to the use of hearsay evidence, the protection of classified information, the appellate process, implementing regulations, and reports to Congress, and make other clarifying changes.

Section 948a(7) of title 10, United States Code, as amended by section 1802, would define the term “unprivileged enemy belligerent.” This definition is included for the purpose of establishing persons subject to trial by military commission in accordance with section 948c, of title 10, United States Code, and is not intended to address the scope of the authority of the United States to detain

individuals in accordance with the laws of war or for any other purpose.

The conferees note that section 948k(c)(2) of title 10, United States Code, as amended by section 1802, would require the Secretary of Defense to prescribe regulations for the appointment and performance of defense counsel in capital cases. The conferees are aware that the Chief Defense Counsel for the Office of Military Commissions has expressed concern about what he and his office perceive to be systemic under-resourcing of the defense needs of capital and other cases brought before military commissions. Witnesses testifying on behalf of the administration before the Committees on Armed Services of the Senate and the House of Representatives have indicated that they share many of these concerns. Accordingly, the conferees strongly encourage the Secretary of Defense to take appropriate steps to ensure the adequacy of representation for detainees, particularly in capital cases. The conferees further expect the Secretary, in prescribing regulations under section 948k(c)(2), of title 10, United States Code, to give appropriate consideration to the American Bar Association's Guidelines for the Appointment and Performance of Defense Counsel in Death Penalty Cases (February 2003) and other comparable guidelines.

The conferees also note that section 949a(b)(2), of title 10, United States Code, as amended by section 1802, would require that defendants in capital cases be represented, to the greatest extent practicable, by counsel who is "learned in applicable law related to capital cases." The conferees understand this phrase to have the same meaning that is commonly attributed to the same words in section 3005 of title 18, United States Code.

The conference agreement would permit the admission of a statement by the accused if, among other criteria, the military judge finds that the statement is reliable, probative, was made incident to lawful conduct during military operations at the point of capture or during closely related active combat engagement, and the interests of justice would best be served by its admission. The conferees expect the phrase "closely related active combat engagement," to be interpreted in the context of testimony before the Committees on Armed Services of the Senate and the House of Representatives addressing the unique circumstances applicable to statements that are made during a force-protection, tactical, or intelligence-related interrogation which occurs within a reasonable proximity in time and location to the point of capture given the unique circumstance of active combat operations.

The conferees note the Supreme Court's opinion in *Roper v. Simmons*, 543 U.S. 551 (2005), in which a majority of the court determined that the Eighth and Fourteenth Amendments of the United States Constitution did not permit the imposition of the death penalty on offenders who were under the age of 18 at the time of their offense. The conferees take no position as to the applicability of this decision to the detainees at the United States Naval Station, Guantanamo Bay, Cuba, or any other detainee who may be tried by a military commission established pursuant to chapter 47A, of title 10, United States Code, as amended by section 1802. However, the conferees encourage the Secretary of Defense to give

appropriate consideration to this decision in light of Common Article 3 of the Geneva Conventions, which requires that military commissions afford “all of the judicial guarantees which are recognized as indispensable by civilized peoples.”

Lastly, the conferees are aware that pending prosecutions before military commissions have been delayed on several occasions during the consideration of this legislation. The conferees believe that it would be in the interest of justice to minimize any further delay in such cases. While section 1805 would provide up to 90 days for the Secretary of Defense to revise rules to be consistent with the requirements of chapter 47A of title 10, United States Code, as amended by this provision, the conferees urge the Secretary of Defense to promulgate such rules sooner.

AUTHORIZATIONS***Short title (sec. 2001)*

The House bill contained a provision (sec. 2001) that would designate Division B of this Act as the Military Construction Authorization Act for Fiscal Year 2010.

The Senate amendment contained an identical provision (sec. 2001).

The conference agreement includes this provision.

Expiration of authorizations and amounts required to be specified by law (sec. 2002)

The House bill contained a provision (sec. 2002) that would establish the expiration date for authorizations in this Act for military construction projects, land acquisition, family housing projects, and contributions to the North Atlantic Treaty Organization infrastructure program, as October 1, 2012, or the date of enactment of an act authorizing funds for military construction for fiscal year 2013, whichever is later.

The Senate amendment contained a similar provision (sec. 2002).

The Senate recesses.

Relation to funding tables (sec. 2003)

The Senate amendment contained a provision (sec. 2004) that directs the funding authorized for appropriations in sections 2104, 2204, 2304, 2404, 2411, 2502, 2606, and 2703 shall be available, in accordance with the requirements of these sections for projects, programs, and activities, and in the amounts specified in sections 4501, 4502, 4503, and 4504.

The House bill contained no similar provision.

The House recesses with an amendment which eliminates section 4504.

General reduction across division (sec. 2004)

The conference agreement includes a provision (sec. 2005) that reduces the amount authorized for appropriations in Division B by \$529.1 million. The provision requires a report from the Secretary of Defense not later than 90 days after enactment of this Act describing how the reduction will be applied. The conferees note that because of a favorable construction climate, the Department is currently averaging savings of about 8 percent in fiscal year 2009 military construction contract awards. The conferees are also aware that the Department has budgeted an additional 4.4 percent for inflation, across the board, in the fiscal year 2010 military construction budget request. Therefore, the projected savings for military construction projects are substantial and are growing. This general reduction is in anticipation of continued substantial contract savings in fiscal year 2010, and is not intended to reduce or eliminate any individual construction projects authorized for appropriations in this Act.

LEGISLATIVE PROVISIONS NOT ADOPTED

Effective date

The House bill contained a provision (sec. 2003) that would provide that titles XXI, XXII, XXIII, XXIV, XXV, XXVI, XXVII, and XXIX of this Act take effect on October 1, 2009, or the date of enactment of this Act, whichever is later.

The Senate amendment contained a similar provision (sec. 2003).

Because the conference report was not adopted prior to October 1, 2009, this provision is no longer required.

Technical corrections regarding certain military construction projects, New Mexico

The Senate amendment contained a provision (sec. 2005) that would make technical corrections to two military construction projects in New Mexico. Those changes were incorporated into the military construction tables and at the other appropriate places in the bill.

The House bill contained no similar provision.

The Senate recedes.

TITLE XXI—ARMY

BUDGET ITEMS

Summary

The budget request included authorization of appropriations of \$3.66 billion for military construction and \$796.65 million for family housing for the Army for fiscal year 2010. The conference agreement includes authorization of appropriations of \$3.72 billion for military construction and \$796.65 million for family housing for fiscal year 2010.

The conferees note that in December 2007, the Army announced its specific force structure and stationing strategy to accommodate active end strength growth of 65,000 personnel. As part of that strategy the Army indicated that it would increase its number of brigade combat teams (BCTs) by six, from 42 to 48. In fiscal year 2009 the Army was authorized and had appropriated more than \$1.1 billion in military construction funding and \$333.0 million in Army Family Housing for BCTs 46, 47, and 48 at Fort Stewart, Georgia, Fort Carson, Colorado, and Fort Bliss, Texas. The fiscal year 2010 budget request included a proposal to reduce the total number of BCTs from 48 to 45.

As a consequence, the conference agreement reduces or eliminates specific authorizations for military construction projects included in the budget request for fiscal year 2010 that the Army's "gap analysis" has determined to be excess of requirements. The conference agreement also includes a general reduction of \$166.0 million for the Army and requests that the Department apply those reductions after a thorough review of military requirements affected by the reduction of three BCT's.

Additionally, the conference agreement includes a reduction of \$150.0 million in authorization of appropriations contained in the Military Construction Authorization Act for Fiscal Year 2009 (Division B of Public Law 110-417) for Army Family Housing at Fort Carson and Ft Stewart, to account for a reduction in requirements. The Army has indicated to the conferees that because of the elimination of one BCT from each installation, there exists adequate family housing without the fiscal year 2009 appropriations.

The conference agreement includes \$350.0 million to be applied by the Department of the Army to requirements for the construction of trainee troop barracks to meet critical shortfalls in housing for trainees. The conferees expect the Army to utilize this funding to reduce the need for relocatable facilities that are in use at all installations where basic and advance individual training is con-

ducted. The conference agreement includes a legislative provision (sec. 2104) that requires the funds be available only after the Secretary of the Army provides a list of projects to the congressional defense committees along with a certification that the projects can be executed in fiscal year 2010, have a valid DD form 1391, and are in the Defense Department's current future-years defense program (FYDP).

The conference agreement includes a reduction in the authorization of appropriations without prejudice of \$20.0 million requested to prepare a site for the eventual construction of the National Museum of the U.S. Army at Fort Belvoir, Virginia. The conferees note that the construction of the museum is contingent on the availability of certain levels of private donations, which to date, have not been raised. The conferees are concerned that a delay in museum construction may result in a military construction project that is not complete and useable. Therefore, the conferees encourage the Department to include authorization of this project in a future budget request when donated funds will permit the construction of the museum to commence. The conferees do not intend for this deferment in the authorization of appropriations to indicate any concern about the site for the National Museum of the United States Army.

Finally, the conference agreement includes a reduction in the authorization of the appropriation of \$25.0 million for the Warrior Transition Complex at Landstuhl, Germany, pending a decision on the final location of a hospital replacement facility for the Landstuhl Regional Medical Center.

TITLE XXII—NAVY

BUDGET ITEM

Summary

The budget request included authorization of appropriations of \$3.76 billion for military construction and \$515.11 million for family housing for the Department of the Navy for fiscal year 2010. The conferees recommend authorization of appropriations of \$3.77 billion for military construction and \$515.11 million for family housing for fiscal year 2010.

The budget request contains the first substantial increment of funding for the relocation of Marines from Okinawa to Guam. The conferees are concerned about the lack of a Guam Master Plan with budget level detail as well as firm commitments to funding as

reflected in a future-years defense program for the Department of Defense. Because a long range master plan has not been submitted to Congress, the projects included in the fiscal year 2010 budget request seem disjointed and premature. For example, the acquisition of real estate to complete the Finegayan site for both the stationing and training of Marine forces would appear to be the highest priority for the use of military construction funds, along with a reliable road network and supporting utilities infrastructure. The conferees are also concerned that the Andersen Air Force Base north ramp and utilities projects intended to support the redeployment of Marine Corps aviation did not represent complete and usable facilities as required by section 2801 of title 10, United States Code. Therefore, the conference agreement includes an authorization for a military construction project that results in a complete and useable facility. The conference report also authorizes incremental appropriations conditioned on receipt of the final Guam master plan from the Department of Defense.

The conference agreement also includes a reduction of the authorization for a Marine Corps Military Working Dog facility on Guam, based on the conferee assessment that the supporting construction costs for the facility were overstated.

The conference agreement includes an authorization for the Ship Repair Pier Replacement Facility at Norfolk, Virginia, the Apra Harbor Wharves Improvement project on Guam, and the North Region Tertiary Treatment Plant at Camp Pendleton, California, that will result in complete and useable facilities. The conference agreement includes an authorization of incremental appropriations required to carry out construction activities in fiscal year 2010, as the conferees note that these large projects are projected for late fiscal year 2010 award, and will take several years to complete construction.

The conference agreement includes authorization for \$46.3 million for channel and turning basin dredging at Naval Station (NS) Mayport, Florida. The Navy requested this project in order to allow a nuclear aircraft carrier to enter Naval Station Mayport on a temporary basis with an embarked air wing, full stores, and under any tidal conditions. The conferees authorize funding for this project based on the Secretary of the Navy and Chief of Naval Operations' assurances that the dredging is needed for current operational considerations to permit the use of Mayport as a transient dock and is "required irrespective of the final decision on aircraft carrier homeporting at Mayport."

The conferees emphasize that the inclusion of an authorization for dredging at NS Mayport is not an indication of conferee support for the establishment of an additional homeport for nuclear aircraft carriers on the east coast, or intended to influence the ongoing Quadrennial Defense Review, which may include a recommendation on the establishment of a second east coast homeport for nuclear aircraft carriers. Furthermore, the conferees note that this funding is provided solely to permit use of Mayport as a transient port, and that any potential designation of Mayport as a nuclear carrier homeport will require future authorizations from the Committees on Armed Services of the Senate and the House of Representatives.

TITLE XXIII—AIR FORCE

BUDGET ITEM

Summary

The budget request included authorization of appropriations of \$1.15 billion for military construction and \$569.04 million for family housing for the Air Force in fiscal year 2010. The committee recommends authorization of appropriations of \$1.42 billion for military construction, and \$569.04 million for family housing for fiscal year 2010.

The conferees do not recommend authorization of appropriations at this time for the War Reserve Material Compound and the Airlift Ramp and Fuel Facilities at Al Musannah Air Base in Oman. The projects were proposed as a result of a Government of Oman request to U.S. Central Command to relocate existing U.S. military facilities from Seeb International Airport, Oman, in order to facilitate commercial development. The conferees are concerned that projects have been requested for Al Musannah Air Base, without a base master plan, without the appropriate long-term agreements in place with the Omani Government, and without consideration of contributions from the host nation. Furthermore, an additional \$350.0 million would need to be included in U.S. defense future budgets in order to ensure these projects could be used for their intended purpose. The conferees recommend that the Department of Defense confirm the existence of an updated host nation agreement that will detail the terms of the United States' presence at Al Musannah Air Base, before considering this project for inclusion in a President's budget request.

The conferees are aware that future Department of Defense and North Atlantic Treaty Organization plans may result in the construction of separate facilities supporting the Global Hawk aircraft at Naval Station Sigonella, Sicily. Therefore, the conferees encourage the Department of Defense to explore options for the use of existing facilities and the consolidation of facility requirements for the stationing and operation of Global Hawk before carrying out the project to construct the hangar authorized in this Act.

At the request of the Department of the Air Force, the conferees have included an authorization of \$37.5 million for a project for the bed down of the Unmanned Aerial Systems Field Training Unit squadron at Holloman Air Force Base, New Mexico. The conferees also rescinded the fiscal year 2009 authorization of \$37.5 million for this same project which had been included under Worldwide Unspecified Locations. This was necessary because the fiscal year 2009 project was generic in nature. Once a bed down location was determined, the scope of the project changed and required a new authorization.

TITLE XXIV—DEFENSE AGENCIES

BUDGET ITEMS

Summary

The budget request included authorization of appropriations of \$3.1 billion for military construction for the defense agencies, \$146.54 million for chemical demilitarization construction, and \$75.04 million for family housing for the defense agencies, the Family Housing Improvement Fund, and the Homeowners Assistance Program for fiscal year 2010.

The conferees recommend authorization of appropriations of \$2.82 billion (including fiscal year 2009 reductions) for military construction, \$151.54 million for chemical demilitarization construction, and \$354.67 million for family housing programs for fiscal year 2010, including an increase of \$276.8 million for the Homeowners Assistance Program.

The conference agreement includes a reduction to the budget request of \$200.0 million for the second increment of the National Security Agency's Data Center at Camp Williams, Utah. This \$1.59 billion facility was fully authorized as a military construction project in the Supplemental Appropriations Act, 2009 (P.L. 111–

32). The conferees believe that the amount provided for the second increment for this project in this Act is adequate to maintain the construction schedule provided to the conferees through fiscal year 2010 with no delays.

The conference agreement includes a full authorization and incremental funding for hospital replacement projects in Guam and Fort Bliss, Texas, in order to permit the Department of Defense to proceed with design and construction of complete facilities fully satisfying the military requirement. The Department has estimated that these full authorizations will save over \$300.0 million through the construction period and will ensure complete and useable facilities as required by law. The conferees strongly encourage the Department of Defense to take into consideration the potential costs, delays in project completion schedules, and impact to military operations before including phased military construction projects in future budget requests.

The conference agreement also includes reductions in funding for Health and Dental Clinics at Fort Carson, Colorado, Fort Stewart, Georgia, and Fort Bliss, Texas, in order to adjust requirements to account for the elimination of a brigade combat team from the Army at each of those installations.

The conference agreement includes a reduction of \$22.5 million for one of two elementary schools requested for Fort Stewart, Georgia, which the Department of Defense Educational Activity has indicated is no longer required given the current plan for assigned soldiers and dependents.

The conference agreement includes an increase of \$50.0 million for construction of an elementary school at Boeblingen, Germany. The current facility is located in a converted World War II era troop barracks and has significant life, health, and safety concerns.

As a result of the administration's recently announced decision to restructure the European missile defense architecture, the conference agreement includes a reduction of \$151.2 million to the authorization of appropriations provided in the Military Construction Authorization Act for Fiscal Year 2009 (Division D of Public Law 110-417) for the interceptor site in Poland and the mid course radar site in the Czech Republic without prejudice. Although, the new architecture will likely require new military construction projects in the future, those projects must be requested individually in the year of anticipated construction.

The conference agreement includes a transfer to the Defense-wide account from the North Atlantic Treaty Organization (NATO) Security Investment Program of \$41.4 million to account for the United States contribution to the construction of the new NATO headquarters.

TITLE XXVI—GUARD AND RESERVE FORCES FACILITIES

BUDGET ITEMS

Summary

The conferees recommend a total of \$1.61 billion for military construction for the reserve components. The conferees have included a legislative provision (sec. 2606) that requires that prior to an award using certain authorized amounts, the secretary of the military department concerned provides a list of projects to the congressional defense committees along with a certification that the projects can be executed in fiscal year 2010, have a valid DD form 1391, and are included in the future-years defense program of the involved reserve component.

Sense of Congress on ensuring joint basing recommendations do not adversely affect operational readiness (sec. 2713)

the operational employment of units at the joint base are not adversely impacted.

The Senate amendment contained no similar provision.
The Senate recesses.

Requirements related to providing world class military medical facilities in the National Capital Region (sec. 2714)

The House bill contained a provision (sec. 2723) that expressed a sense of the Congress that the Department of Defense should use all available methods to implement the defense access road program to mitigate traffic congestion in and around the National Naval Medical Center, Bethesda, Maryland.

The Senate amendment contained a provision (sec. 2708) that would require a master plan from the Secretary of Defense for the development of world class medical facilities and an integrated system of health care delivery for the National Capital Region. The provision provides a specific list of issues to be addressed from wounded warrior care, to information technology integration, to ancillary and support facilities.

The House recesses with an amendment that integrates the sense of the Congress on traffic management into the requirement for a master plan for the National Capital Region. The conferees are concerned that the Department lacks a plan for the entirety of facilities at the Walter Reed National Military Medical Center and that there may be differing standards and levels of construction and funding that could result in a facility that is not in totality a world class medical facility. The conferees believe that the quality of patient care should be at the foundation of all decisions regarding the development of these facilities and the closure of facilities at the current Walter Reed Army Medical Center.

Use of economic development conveyances to implement base closure and realignment property recommendations (sec. 2715)

The House bill contained a provision (sec. 2711) that would amend section 2905 of the Defense Base Closure and Realignment (BRAC) Act of 1990 (part A of title XXIX of Public Law 101-510) redefining the role of economic development conveyances. Furthermore, the provision would eliminate fair market value negotiations between eligible parties and the Department of Defense prior to a conveyance, instead relying on actual market returns realized at the completion of the development. Finally, the Secretary of Defense would be required to complete implementing regulations within 60 days after the date of enactment of this Act and be required to submit a report to Congress within 180 days after the date of enactment of this Act regarding the status of ongoing economic development conveyances.

The Senate amendment contained a provision (sec. 2705) that would express the sense of the Senate that, as the Federal Government implements base closures and realignments, global repositioning, and initiatives to increase the end strength of the Army and the Marine Corps, it is necessary to assist local communities coping with these programs and to comprehensively assess the needs and degree of assistance to communities to effectively implement the various initiatives of the Department of Defense while

aiding communities to either recover quickly from closures or to accommodate growth associated with troop influxes.

The Senate recedes with an amendment that would amend section 2905 of the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101–510) that would replace the requirement for the Secretary to seek fair market value as consideration for the conveyance of properties disposed as a result of the 2005 BRAC round with an authority that grants the Secretary the discretion to account for the local economic conditions of affected communities and the cost of public infrastructure when determining the amount of consideration to be requested for properties affected by all BRAC rounds. The amendment would also authorize the Secretary to receive as consideration a range of resources including in-kind services or goods, or a share of revenues that the local redevelopment authority receives from third party buyers or from lessees from sales and long-term leases of the conveyed property.

The conferees note that negotiations between the Department of Defense and local redevelopment authorities at many locations over the value of property to be disposed under an economic development conveyance (EDC) have stalled over the past 2 years due to difficulties in the nation's financial markets, the deterioration of local economic conditions, and the potential of legislative changes. The conferees are concerned that these stalled negotiations are detrimental to both local communities, which are denied an expansion of their tax revenue base and the opportunity for jobs generation and economic redevelopment, and to the Department of Defense, which must maintain the properties, some dating back to the 1993 BRAC round, with scarce resources. The conferees intend for the Department to use the language contained in this conference agreement to conclude negotiations and expedite the transfer of properties in order to allow for affected communities to proceed with economic redevelopment initiatives. The conferees have included a specific authorization to the Secretary to accept consideration in the form of revenues received from third-party buyers, or lessees from sales and long-term leases. This "back end" funding is also intended to speed the process without putting undue burden on local communities to provide large initial contributions, or to burden taxpayers to provide public contributions as a condition of property conveyance.

The conferees agree that the Secretary of Defense should have the discretion to receive consideration up to and including fair market value for a property when warranted by the proposed economic redevelopment plan submitted by the local redevelopment authority. The conferees note that proceeds gained from consideration received as a result of a property disposed under BRAC authorities are used to supplement appropriated funds to accelerate environmental clean-up, remediation, and compliance actions for other BRAC property. Therefore, funds received as a result of BRAC conveyances have a direct impact on the Department's timing and ability to dispose of additional properties. However, the conferees also note that the cost avoidance realized as a result of quickly disposing of property and not maintaining the required repair and

overhead associated with BRAC properties needs to be equally valued.

The conference agreement provides broad permissive authorities aimed at balancing the requirements of the Department with the needs of the local communities. The conferees believe that by providing sufficient authorities to the Department without mandating courses of action for the transfer of the property, and by permitting a range of considerations and funding methods for proposal by local redevelopment authorities, property transfers negotiations can, within a reasonable time, conclude with an agreement that serves the best interests of both parties.

Furthermore, the Secretary of Defense report would assess the training expectations associated with the Marine Corps realignment to Guam and the overall training requirements in the Northern Mariana Islands. This section also would express the sense of Congress that the Marine Corps training expansion should be completed as soon as possible and should not impact the overall rebasing of Marines from Okinawa to Guam. This supports a two-tiered approach to reviewing training requirements for the Marine Forces Pacific. The upper tier would include a comprehensive strategy that includes transient forces that train Marine Corps elements up to and including a Marine Air-Ground Task Force. The lower tier would include elements associated with current Marine Corps training capabilities available in Japan.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would remove reference to any potential National Environmental Policy Act timing or other activities and would broaden the reporting requirement. The new reporting requirement should address training, readiness, and movement requirements for all Marine Corps forces in the Pacific.

The House bill contained a provision (sec. 2841) that would create section 2867 of title 10, United States Code, and require the Department of Defense to adopt a single specification for an energy management and monitoring system for use in military construction projects. The Secretary concerned would be able to waive the requirements to adopt a single specification if the Secretary determines that the inclusion in a military construction project is not cost effective over the life cycle of the project. This section also would require the Secretary of Defense to submit a report to the congressional defense committees within 180 days after the date of enactment of this Act on the items associated with the adoption of a single specification for an energy management and monitoring system.

The Senate amendment contained no similar provision.

This change applies to the Department of Defense goal to produce or procure renewable energy equivalent to 25 percent of the total quantity of electric energy it consumes within its facilities and in its activities during fiscal year 2025 and each fiscal year thereafter.

The conferees note that the military services still have leasing agreements for military housing units on base but operated by private entities such as those known as Section 801 Housing which by contract are scheduled to transition to outlease periods in which the military departments are required to permit the owner-operator to lease these units inside the military installation to unvetted civilians. Upon transfer to the outlease period of the contract, certain responsibilities for security, land/utility management, education, emergency services, and other civic functions are shared

with the military department or fully assumed by the local and State governments.

The conferees note that in specific cases, such as the proposed public occupancy the Laurelwood housing complex inside Naval Weapons Station Earle, New Jersey, local communities have raised concerns about the anticipated costs of governance and the ability of the Navy to provide added security since public occupants will have to have unfettered access to the housing complex inside the base.

Therefore, the conferees direct the Comptroller General to prepare a report to the congressional defense committees that examines and provides full cost estimates for the impact on local communities (including but not limited to impact costs in the areas of security, education, transportation, environment) resulting from the transfer of responsibilities inherent in the change of occupancy from military to civilian residents as defined in Section 801 lease agreements. The report shall study the specific situation of the Laurelwood housing complex as one example to determine accurate costs for civic service and the sufficiency and costs of proposed security measures to the Department of Defense (DOD) for housing units that remain on DOD land. The report shall also provide a review of the Department's plans for military housing disposals or lease terminations in the United States and the Department's plan for community interaction to ensure a smooth transition of civic responsibilities.

The House bill contained a provision (sec. 2903) that would waive section 2801 of title 10, United States Code, and would authorize to be appropriated, up to \$25.0 million for the planning, design, and construction of facilities on the United States Embassy Compound in Islamabad, Islamic Republic of Pakistan, for use by the Office of Defense Representative-Pakistan (ODRP). This section would also require the Secretary of Defense to report to the Committees on Armed Services of the Senate and the House of Representatives, the Senate Committee on Foreign Relations, and the House Committee on Foreign Affairs on the number of personnel and the activities of the ODRP beginning with a report 90 days after the date of the enactment of this Act, and continuing semi-annually thereafter. DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

Subtitle A—National Security Programs Authorizations

Overview

Title XXXI authorizes appropriations for atomic energy defense activities of the Department of Energy for fiscal year 2010, including: the purchase, construction, and acquisition of plant and capital equipment; research and development; nuclear weapons activities; nuclear nonproliferation activities; naval nuclear propulsion; environmental cleanup; operating expenses; and other expenses necessary to carry out the purposes of the Department of Energy Or-

ganization Act (Public Law 95–91). This title authorizes appropriations in five categories: (1) National Nuclear Security Administration (NNSA); (2) defense environmental cleanup; (3) other defense activities; (4) defense nuclear waste disposal; and (5) energy security and assurance.

The budget request for atomic energy defense activities at the Department of Energy included \$16.4 billion for atomic energy defense activities, a 1 percent increase above the fiscal year 2009 appropriated level. Of the total amount requested:

- (1) \$9.9 billion is for NNSA, of which:
 - (a) \$6.4 billion is for weapons activities;
 - (b) \$2.1 billion is for defense nuclear nonproliferation activities;
 - (c) \$1.0 billion is for naval reactors; and
 - (d) \$420.7 million is for the Office of the Administrator;
- (2) \$5.5 billion is for defense environmental cleanup;
- (3) \$852.5 million is for other defense activities; and
- (4) \$98.4 million is for defense nuclear waste disposal.

The budget request also included \$6.2 million for energy security and assurance within energy supply.

The conferees agree to authorize \$16.5 billion for atomic energy defense activities, an increase of \$88.4 million above the budget request.

Of this amount, the conferees agree to authorize:

- (1) \$10.1 billion for NNSA, of which:
 - (a) \$6.4 billion would be for weapons activities, an increase of \$48.7 million above the budget request,
 - (b) \$2.2 billion would be for defense nuclear nonproliferation, an increase of \$39.7 million above the budget request;
 - (c) \$1.0 billion would be for naval reactors, the amount of the budget request; and
 - (d) \$420.7 million would be for the Office of the Administrator, the amount of the budget request;
- (2) \$5.5 billion would be for defense environmental cleanup activities, the amount of the budget request;
- (3) \$852.5 million would be for other defense activities, the amount of the budget request; and
- (4) \$98.4 million would be for defense nuclear waste disposal, the amount of the budget request.

The conferees agree to authorize \$6.2 million for energy security and assurance, the amount of the budget request.

ITEMS OF SPECIAL INTEREST

Reports

The conferees direct that all reports requested by this or any other act and that address the programs and activities funded by the fiscal year 2010 Atomic Energy Defense funds, should be provided to the congressional defense committees in addition to any committees specifically specified in the provision or requirement directing such report.

Department of Energy protective forces

In section 3124 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181), the Comptroller General was directed to submit to Committees on Armed Services of the Senate and the House of Representatives a report on the management of the protective forces at the Department of Energy (DOE). Section 3124 also directed the Secretary of Energy to review the Comptroller General report, and submit no later than 90 days after receiving the Comptroller General report, the results of that review including any additional options, to the Committees on Armed Services of the Senate and the House of Representatives.

The report was completed in August 2009, and will be formally published shortly. The report identified a series of issues and concerns with the management of the DOE protective forces. These issues include rigid physical fitness and other requirements and the relationship these requirements have to recruitment, hiring, training, retirement, retention, and health care. In addition the report found significant differences amongst the sites as to how the forces were managed, trained, and compensated. Other issues were identified, including varying hot pursuit policies and varying law enforcement authorities.

After September 11, 2001, the requirements for security at the DOE facilities with Category I nuclear materials were increased significantly. The conferees note that the effect of the new requirements has placed many of the members of the DOE protective force in a situation where they will not meet the physical and other requirements long before they reach retirement age.

Of the many issues identified in the Comptroller General's report that should be addressed by the DOE, the disconnect between the physical demands and requirements of the protective forces on the one hand, and the retirement program on the other is the most problematic. Each of the relevant sites has seen increased injury and attrition rates. Because recruiting, hiring, training, and obtaining clearances for the protective forces is a time consuming and costly process, increased attrition rates will drive up the overall security costs. The conferees are concerned that the attrition rate is connected to the changes in the requirements and the lack of a career path that reflects these requirements.

DOE is aware of the problem and earlier this year assembled a group with representatives from each of the relevant DOE offices to examine "realistic and reasonable options for improving the career opportunities and retirement prospects of protective force members while maintaining, within current and anticipated budgetary constraints a robust and effective security posture." This study group made 29 recommendations to address the issues in the protective forces.

The conferees believe that DOE needs to take seriously the concerns raised in the Government Accountability Office report and the recommendations of the study committee to ensure that the protective forces are able to carry out reliably their responsibilities to prevent nuclear material and nuclear weapons from being stolen or worse. To that end, the conferees direct the Secretary of Energy and the Administrator of the National Nuclear Security Administration to develop a comprehensive, DOE-wide plan to identify and

implement the recommendations of the study group. This implementation plan should be submitted with the plan required to be submitted by section 3124, as discussed above.

The conferees recognize that the protective forces fall under a wide array of contractual mechanisms. The conferees do not believe, however, that the different contractual mechanisms are the problem; rather it is the lack of clear, uniform, and realistic guidance and policy from DOE to the various contractors who manage the protective forces that is at the root of the problems.

LEGISLATIVE PROVISIONS ADOPTED

National Nuclear Security Administration (sec. 3101)

The House bill contained a provision (sec. 3101) that would authorize \$10.5 billion for the National Nuclear Security Administration (NNSA), an increase of \$534.6 million above the budget request.

The Senate amendment contained a similar provision (sec. 3101) that would authorize \$10.1 billion for the NNSA, an increase of \$106.2 million above the budget request.

The conferees agree to include a provision (sec. 3101) that would authorize \$10.0 billion, an increase of \$88.4 million above the budget request.

Within NNSA, the provision would authorize \$6.4 billion for weapons activities, an increase of \$48.7 million above the budget request; \$2.2 billion for defense nuclear nonproliferation, an increase of \$39.8 million above the budget request; \$1.0 billion for naval reactors, the amount of the budget request; and \$420.8 million for the Office of the Administrator, the amount of the request. This includes an offset of \$42.0 million for prior year balances in weapons activities.

The budget request included \$6.4 billion for weapons activities. The provision would authorize \$6.4 billion, an increase of \$48.7 million above the budget request. Within directed stockpile work the provision would authorize \$1.5 billion, an increase of \$20.0 million above the budget request, including an increase of \$10.0 million for dynamic plutonium experimentation at the Nevada Test Site, and an increase of \$10.0 million for weapons dismantlement and disposition. Within campaigns, the provision would authorize \$1.6 billion, an increase of \$23.7 million above the budget request, including \$5.0 million for enhanced surety, and an increase of \$18.7 million above the budget request for inertial confinement fusion, including an increase of \$1.0 million for National Ignition Facility diagnostics, cryogenics, and experimental support, an increase of \$6.5 million for Omega operations and an increase of \$11.2 million for the national ignition campaign. Within readiness in the technical base and facilities, the provision would authorize \$1.4 billion for operations of facilities, an increase of \$18.0 million above the budget request, including an increase of \$8.0 million for the Pantex Plant and \$10.0 million for the Y-12 National Security Complex, and \$232.4 million for construction, an increase of \$29.0 million including, \$24.0 million for the LANSCE refurbishment at Los Alamos National Laboratory, project number 09-D-007, and

\$5.0 million for test capabilities revitalization at Sandia National Laboratories, project number 09–D–104.

The budget request included \$2.1 billion for defense nuclear nonproliferation. The provision would authorize \$2.2 billion for defense nuclear nonproliferation, an increase of \$39.8 million. The provision would include an increase of \$40.0 million above the budget request for the Nonproliferation and Verification Research and Development program to support international safeguards technologies, advanced nuclear detection technologies, and to support the joint Department of Energy Air Force space situational awareness activities. The provision would authorize a reduction of \$20.0 million below the budget request for the Nonproliferation and International Security program. The provision would authorize an increase of \$39.8 million above the budget request for the International Nuclear Materials and Cooperation program to secure nuclear weapons and weapons materials outside the United States and to deploy radiation detection equipment and related capabilities at high-threat border crossings and ports of transit. Funding for the fissile materials disposition program is authorized at the budget request. The conferees continue to believe that the NNSA is the responsible entity within the Department of Energy to manage nonproliferation programs and have included funding for fissile materials disposition in the NNSA. The provision would authorize a decrease of \$20.0 million below the budget request for the Global Threat Reduction Initiative.

The conferees note, regretfully, that no funds are provided for nonproliferation work in North Korea. If the North Koreans return to the Six-Party Talks and real progress is possible to disable and dismantle the North Korean nuclear weapons program, the conferees would consider a reprogramming or other request for funds to address the North Korean nuclear weapons program at such time.

The budget request included \$1.0 billion for naval reactors. The provision would authorize the amount of the budget request.

The budget request included \$420.8 million for the Office of the Administrator. The provision would authorize the amount of the budget request.

Defense environmental cleanup (sec. 3102)

The House bill contained a provision (sec. 3102) that would authorize \$5.1 billion for defense environmental cleanup, a decrease of \$471.3 million below the amount of the budget request.

The Senate amendment contained a similar provision (sec. 3102) that would authorize \$5.4 billion for defense environmental cleanup, a decrease of \$100.0 million below the amount of the budget request.

The conferees agree to include a provision (sec. 3102) that would authorize \$5.5 billion, the amount of the budget request.

Other defense activities (sec. 3103)

The House bill contained a provision (sec. 3103) that would authorize \$872.4 million for other defense activities including \$357.8 million for health, safety, and security, an increase of \$20.0 million above the budget request.

The Senate amendment contained a similar provision (sec. 3103) that would authorize \$852.5 for other defense activities, the amount of the budget request.

The conferees agree to include a provision (sec. 3101) that would authorize \$852.5 million the amount of the budget request.

Defense nuclear waste disposal (sec. 3104)

The House bill contained a provision (sec. 3104) that would authorize \$98.4 million for the defense nuclear waste disposal payment to the Nuclear Waste Fund.

The Senate amendment contained an identical provision (sec. 3104).

The conference agreement includes this provision.

Subtitle B—Program Authorizations, Restrictions, and Limitations

Stockpile stewardship program (sec. 3111)

The House bill contained a provision (sec. 3111) that would amend section 4201 of the Atomic Energy Defense Act (50 U.S.C. 2521) to update the goals and objectives of the stockpile stewardship program (SSP) carried out by the Administrator of the National Nuclear Security Administration (NNSA) at the Department of Energy. The provision would restate a current objective of the SSP to preserve core intellectual and technical competencies and establish a second broad objective to assure that the nuclear weapons stockpile remains safe, secure, and reliable without underground testing. In addition, the provision would expand the goals of the advanced computing and simulation capabilities to include improved understanding of the performance over time of nuclear weapons. The provision would also add new requirements for the SSP to support the laboratories and manufacturing facilities needed to support the U.S. nuclear weapons stockpile.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would expand and clarify the facilities and experimental tools that should be maintained and supported under the SSP to include the experimental facilities at the Nevada Test Site (NTS) and the production and manufacturing capabilities of the national security laboratories.

The conferees note that the NTS, the national security laboratories, and the production and manufacturing facilities also support the nonproliferation programs and other nuclear security activities of the NNSA. While this provision includes supporting these facilities in support of the weapons activities, the conferees also believe that it is equally important to support the NNSA facilities in support of the nonproliferation programs and additional nuclear security programs of the NNSA.

Report on stockpile stewardship criteria and assessment of stockpile stewardship program (sec. 3112)

The House bill contained a provision (sec. 3113) that would modify existing requirements for annual plans to support execution of the stockpile stewardship and management programs, including a new requirement for an assessment of the stockpile stewardship program by the directors of the national laboratories.

The Senate amendment contained a provision (sec. 3133) that would require an update of the stockpile stewardship criteria and direct the Secretary of Energy to include, in the annual stockpile stewardship plan for fiscal year 2010, an update on the stewardship criteria used to assess the safety, security, and reliability of the nuclear weapons stockpile. The 2010 plan would also include a review of each science-based tool, such as experimental facilities, developed or modified in the last 5 years.

The House recedes with an amendment that would amend section 4202 of the Atomic Energy Defense Act (50 U.S.C. 2522) to include in the annual stockpile stewardship plan for each odd-numbered year the information needed to determine that the nuclear weapons are safe, secure and reliable, an update of the stockpile stewardship criteria used to determine the information needed, the relationship of the science-based tools to the collection of that information, and an update to the criteria used for assessing the effectiveness of each science based-stockpile tool.

In addition, the provision would require an assessment of any key technical challenges to the stockpile stewardship program and strategies to address such challenges. The provision would also require development of a strategy for using each science-based tool and to determine what future science-based tools are needed and how they would be used. Finally the assessment would include the core scientific and technical competencies needed to achieve the objectives of the stockpile stewardship program. The assessment would be conducted in consultation with each of the directors of the national security laboratories.

Stockpile management program (sec. 3113)

The House bill contained a provision (sec. 3112) that would amend section 4204 of the Atomic Energy Defense Act (50 U.S.C. 2524) to direct the Secretary of Energy acting through the Administrator of the National Nuclear Security Administration (NNSA) to carry out a new stockpile management program (SMP) and establish objectives for the program. The provision would also establish program limitations for the SMP and repeal section 4204A of the Atomic Energy Defense Act, (50 U.S.C. 2524a) which established a requirement for a reliable replacement warhead (RRW).

The Senate amendment contained a provision (sec. 3113) that would also repeal section 4204A of the Atomic Energy Defense Act.

The Senate amendment also contained a provision (sec. 3111) that would amend section 4204 of the Atomic Energy Defense Act to expand and update the goals and objectives of the stockpile life extension program, to develop a life extension plan, to direct the manner in which funds for the life extension plan are requested, and to ensure that the life extension plan is updated as needed. The Senate provision would also set forth the sense of Congress that the President should include in each fiscal year budget request for the NNSA sufficient funds to carry the activities under the life extension plan for that fiscal year.

The Senate recedes with an amendment to clarify that the SMP is part of the stockpile stewardship program and that the SMP includes stockpile life extension activities. The provision would also direct the Secretary of Energy to develop a long-term SMP plan to extend the effective life of the weapons in the nuclear weapons stockpile without the use of nuclear weapons testing. The plan would be updated annually as needed, and any updates would be included in the annual stockpile stewardship plan required under section 4203(c) of the Atomic Energy Defense Act. The provision would also direct that each budget submitted by the President that includes funds for the SMP should clearly identify the funds requested for the SMP.

Dual validation of annual weapons assessment and certification (sec. 3114)

The House bill contained a provision (sec. 3114) that would amend section 4205 of the Atomic Energy Defense Act (50 U.S.C. 2525) to modify existing requirements for annual assessments and reports to the President and Congress on the condition of the United States' nuclear weapons stockpile to require the Administrator of the National Nuclear Security Administration (NNSA) to establish a dual validation process.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would permit the Administrator of NNSA to establish dual validation teams.

The conferees believe that a rigorous surveillance, and annual assessment and certification process is essential to sustain the United States' nuclear weapons stockpile. Reluctantly, the conferees have agreed to provide the Administrator with discretionary authority to conduct a dual validation process and to not make dual validation mandatory. Without an understanding of the complexity and cost of dual revalidation the conferees believe that it is premature to mandate dual validation for fiscal year 2010. Nevertheless, the conferees believe that a dual validation process should be instituted in the future and have directed the Administrator to submit a report to the congressional defense committees no later than March 1, 2010, to carry out a dual validation program. This report should include a plan to implement dual validation beginning in fiscal year 2011.

Elimination of nuclear weapons life extension program from exception to requirement to request funds in budget of the President (sec. 3115)

The Senate amendment contained a provision (sec. 3112) that would amend section 4209 of the Atomic Energy Defense Act (50 U.S.C. 2529) to eliminate the nuclear weapons life extension program exception in the budget request.

The House bill contained no similar provision.

The House recesses.

Long-term plan for the modernization and refurbishment of the nuclear security complex (sec. 3116)

The House bill contained a provision (sec. 3115) that would establish the policy of the United States that sustainment, modernization and refurbishment of the nuclear security complex is mandatory for any reductions in the nuclear weapons stockpile. In addition, the provision would require the development of an annual plan for the modernization and refurbishment of the nuclear complex, an annual determination as to the adequacy of the budget request to support the plan, and an assessment as to the risks and implications to the stockpile if the budget request is inadequate.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would direct the Administrator of the National Nuclear Security Administration (NNSA) to develop a biennial plan for the modernization and refurbishment of the nuclear security complex. The plan should be submitted in each odd-numbered fiscal year beginning in 2011. The provision would also require an assessment by the Administrator of the budget for such fiscal year and the future-years nuclear security program as to whether the funding is adequate to support the modernization and refurbishment plan. If the Administrator determines that the budget request is insufficient for the modernization and refurbishment of the nuclear security complex as provided in the plan, the Administrator shall include with the budget materials for that fiscal year a further assessment that describes and discusses the risks and implications associated with the ability of the nuclear security complex to support the annual certification of the nuclear stockpile. This assessment is to be coordinated with the Secretary of Defense and the Commander of U.S. Strategic Command.

Repeal of prohibition on funding activities associated with international cooperative stockpile stewardship (sec. 3117)

The Senate amendment contained a provision (sec. 3115) that would repeal section 4301 of the Atomic Energy Defense Act (50 U.S.C. 2561).

The House bill contained no similar provision.

The House recesses.

Modification of minor construction threshold for plant projects (sec. 3118)

The Senate amendment contained a provision (sec. 3116) that would amend section 4701(3) of the Atomic Energy Defense Act (50

U.S.C. 2741(3)) to modify permanently the threshold for general plant projects (GPP) from \$5.0 million to \$7.0 million.

The House bill contained no similar provision.

The House recedes with an amendment that would temporarily increase the threshold for general plant projects to \$10.0 million for fiscal year 2010. The amendment would also prohibit the Secretary of Energy from initiating any GPP that is in excess of \$5.0 million until 15 days after submitting a notification to the congressional defense committees setting forth the total estimated cost of the GPP. For fiscal year 2011 and beyond the threshold would revert back to \$5.0 million.

The conferees remind the Secretary of the obligation to submit an annual report briefly describing the GPPs for the preceding fiscal year. The conferees expect this report to be submitted in the first quarter of the fiscal year following the fiscal year covered by the report.

Two-year extension of authority for appointment of certain scientific, engineering, and technical personnel (sec. 3119)

The Senate amendment contained a provision (sec. 3117) that would extend until September 30, 2011, the authority for the Secretary of Energy to hire, establish, and set rates of pay for not more than 200 positions in the Department of Energy for scientific, engineering, and technical personnel whose duties will relate to safety at defense nuclear facilities.

The House bill contained no similar provision.

The House recedes.

National Nuclear Security Administration authority for urgent nonproliferation activities (sec. 3120)

The Senate amendment contained a provision (sec. 3114) that would authorize the Secretary of Energy to obligate not more than 10 percent of the funds for the international nuclear materials protection and cooperation program in the National Nuclear Security Administration (NNSA) for any bilateral or multilateral activities relating to nonproliferation or disarmament, notwithstanding any other provision of law. The authority could be exercised by the Secretary after notifying the congressional defense committees 15 days in advance of the intent to exercise this authority and if the President certifies the action is necessary to support the national security objectives of the United States.

The House amendment contained no similar provision.

The House recedes with an amendment that would authorize the Secretary to utilize 10 percent of the funds available for the NNSA nonproliferation programs to address certain urgent nonproliferation threats and require that the Secretary of Energy obtain the concurrence of the Secretaries of State and Defense prior to exercising the authority. The amendment would also clarify that the activities carried out to address the urgent threats would be the nonproliferation activities of the NNSA nonproliferation program.

Prior to utilizing the authority the Secretary of Energy would be required to make a series of determinations, and submit written

notification to the appropriate congressional committees, 15 days before using the authority.

Repeal of sunset date for consolidation of counterintelligence programs of the Department of Energy and National Nuclear Security Administration (sec. 3121)

The Senate amendment contained a provision (sec. 3118) that would repeal section 3117 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364), which established a sunset date for the authority to consolidate the offices of intelligence and counterintelligence at the Department of Energy.

The House bill contained no similar provision.

The House recedes.

Subtitle C—Reports

National Academy of Sciences review of national security laboratories (sec. 3131)

The House bill contained a provision (sec. 3121) that would require the Comptroller General to assess the costs associated with the transition to new management and operations (M&O) contracts, which took place at Los Alamos National Laboratory (LANL) in 2006 and at Lawrence Livermore National Laboratory (LLNL) in 2007. A report on the results of the assessment would be due to the congressional defense committees on March 1, 2010.

The Senate amendment contained a provision (sec. 3132) that would direct the Secretary of Energy, in consultation with the Committees on Armed Services of the Senate and the House of Representatives, to appoint an independent panel of experts to conduct a review of the management and operation of the Lawrence Livermore National Laboratory, the Los Alamos National Laboratory, and the Sandia National Laboratories (SNL).

The conferees agree to include a provision that would direct the Secretary of Energy to enter into a contract with the National Academy of Sciences to conduct a study of the three laboratories, LANL, LLNL, and SNL.

The study would include an evaluation for each of the laboratories of the quality of the scientific research and engineering conducted at each lab; the criteria used to assess the quality of the scientific research and engineering; the relationship between the quality of the work and the contract for managing and operating the laboratory; and the management of the work that the laboratories perform for other entities.

There is a growing concern about the ability of the Department of Energy to maintain the overall quality of the scientific research and engineering capability at the three laboratories. This concern was most recently highlighted in the report of the Congressional Commission on the Strategic Posture of the United States. The conferees believe that an even handed, unbiased assessment of the quality of the scientific research and engineering at each of the three laboratories, with a clear understanding of the criteria used to measure quality and what factors influence quality would be useful in long-term planning for the operations of the laboratories.

Plan to ensure capability to monitor, analyze, and evaluate foreign nuclear weapons activities (sec. 3132)

The House bill contained a provision (sec. 3122) that would direct the Secretary of Energy, in consultation with the Director of National Intelligence and the Secretary of Defense, to prepare a plan to ensure that the national laboratories overseen by the Department of Energy maintain a robust technical capability to monitor, analyze, and evaluate foreign nuclear weapons and related activities.

The review would occur in three phases. The first phase is an initial review focused on the criteria used for project selection and the process to develop cost and schedules for the projects. The second phase is an ongoing review of the project implementation with quarterly reports on the ongoing work. The third and final phase of the review is a recap of the entire effort that would look at areas such as cost and schedule compliance and how the overall effort has led to an accelerated cleanup schedule.

The House bill contained no similar provision.

The House recesses.

The conferees note that the EEOICPA ombudsman has been helpful to claimants under part E of EEOICPA program in navigating the claims process and could provide the same assistance to claimants under part B of the program.

The conferees note that nothing in this expanded authority for the EEOICPA ombudsman is intended to provide authority for the EEOICPA ombudsman to participate directly in the NIOSH process to determine exposures. On the other hand, the conferees recognize a need for the two offices to work cooperatively in assisting claimants process their claims.

Identification in budget materials of amounts for certain Department of Energy pension obligations (sec. 3143)

The Senate amendment contained a provision (sec. 3135) that would require the funding needed to meet pension obligations of contractor employees at each Department of Energy (DOE) facility operated using funds authorized in the National Defense Authorization Acts be included and specifically identified in the DOE budget materials in support of each DOE budget request for each fiscal year for which funds are requested.
