NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-348 and 50-364]

Southern Nuclear Operating Company, Inc.; Joseph M. Farley Nuclear Plant, Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption

from the requirements of 10 CFR Part 50, Section 50.71(e)(4), for Facility Operating License Nos. NPF-2 and NPF-8 issued to Southern Nuclear Operating Company, Inc., et al. (the licensee) for operation of the Joseph M. Farley Nuclear Plant (FNP), Units 1 and 2, located in Houston County, Alabama.

Environmental Assessment*Identification of the Proposed Action*

The proposed action would allow an exemption from the requirements of 10 CFR 50.71(e)(4) regarding submission of revisions to the FNP, Units 1 and 2, Updated Final Safety Analysis Report (UFSAR). Under the proposed exemption, the licensee would submit UFSAR updates to the single, unified Farley UFSAR for the two units within 6 months following the FNP Unit 1 refueling outage, not to exceed 24 months from the last submittal.

The proposed action is in accordance with the licensee's application for exemption dated January 19, 1998.

The Need for the Proposed Action

The proposed action would provide an exemption to the requirements of 10 CFR 50.71(e)(4), which requires licensees to submit updates to their UFSAR within 6 months after each refueling outage providing that the interval between successive updates does not exceed 24 months. Since FNP, Units 1 and 2, share a common UFSAR, the licensee must update the same document within 6 months after a refueling outage for either unit. Allowing the exemption would maintain the UFSAR current within 24 months of the last revision and still would not exceed a 24-month interval from submission of the 10 CFR 50.59 design change report for either unit.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed action and concludes that issuance of the proposed exemption to 10 CFR 50.71(e)(4) is an administrative change unrelated to plant operation.

The proposed action will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the occupational or offsite radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed
