Abstract: All data in this ICR that is recorded and reported is required by 40 CFR Part 60 Subpart BBB. The monitoring and recordkeeping requirements include: maintain records of startups, shutdowns, malfunctions, periods where the continuous monitoring system is inoperative (60.7(b)), and of all measurements including performance test measurements, operating parameters of monitoring device results for catalytic or thermal incinerator, or carbon absorber (60.545 (a), (b) and (c)); monthly VOCs use, number of days in compliance period, and of other information needed to verify results of all monthly tests (60.545 (d) and (e)); of formulation data or results of Method 24 analysis of water-based sprays containing less than 1.0 percent of VOC (60.545(f)); and of all other information required by this part recorded in a permanent file suitable for

inspection. The file shall be retained for at least two years.

Following notification of startup, the reviewing authority might inspect the source to check if the pollution control devices are properly installed and operated. Performance test reports are used by the Agency to discern a source's initial capability to comply with the emission standard, and note the operating conditions specified above under which compliance was achieved. Data obtained during periodic visits by Agency personnel from records maintained by the respondents are tabulated and published for internal Agency use in compliance and enforcement programs. The semiannual reports are used for problem identification, as a check on source operation and maintenance, and for compliance determinations.

The required information consisting of emissions data and other information have been determined not to be private. However, any information submitted to the agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies.
