BILLING CODE 6717-01-M

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****[Docket No. CP98-645-000]****Trunkline Gas Company; Notice of Application**

August 3, 1998.

Take notice that on June 30, 1998, Trunkline Gas Company (Trunkline), 5400 Westheimer Court, Houston, Texas 77056, filed an application with the Commission in Docket No. CP98-645-000 pursuant to Section 7 of the Natural Gas Act (NGA) for permission and approval to abandon by transfer approximately 720 miles of mainline transmission pipeline facilities to its affiliate, Trunkline A.P. Pipeline Company (TAPPC), all as more fully set forth in the request which is open to the public for inspection.

Trunkline proposes to abandon by transfer approximately 720 miles of 26-inch diameter pipeline (Line 100-1) and to reduce its certificated mainline capacity from the current level of 1,810 MDt equivalent of natural gas per day to 1,555 MDt equivalent of natural gas per day. Line 100-1 extends from the Longville compressor station in Grant Parish, Louisiana, to the Bourbon measuring station in Douglas County, Illinois. Trunkline states that TAPPC would convert Line 100-1 to the transportation of hydrocarbon vapor, such as ethane and related hydrocarbon vapors. Trunkline also states that TAPPC would use Line 100-1 in conjunction with new Illinois processing facilities to be built by Aux Sable Liquid L.P. TAPPC would use the acquired pipeline to transport hydrocarbon vapors from Illinois to the Louisiana Gulf Coast region.

Trunkline states that it proposes to abandon Line 100-1 in response to the under-utilization of Trunkline's system that exists on an annual basis and the excess capacity which exists in the Midwest region. Trunkline also states
