

Draft restrictions at three of the marinas would exclude a certain number of the larger vessels from accessing the pumpouts at these three marinas. Montauk Sportsman's Dock has a water depth of 6 feet; it is estimated that 5% of the vessels would be excluded. Captain's Cove Marina has a water depth of 5 feet; it is estimated that 10% of the vessels would be excluded. Gone Fishing Marina has a water depth of 6 feet; it is estimated that 5% of the vessels would be excluded. For these excluded vessels, there are seven other pumpouts and three pumpout boats available for their use.

Vessel waste generated from the pump-out facilities operated by the Town of East Hampton is conveyed to a storage tank at the municipal scavenger waste treatment plant. The waste is hauled from the scavenger plant to the Bergen Point Wastewater Treatment Plant. With two exceptions, the other marinas empty their pumpouts into large storage tanks ranging in size from 500 gallons to 2,376 gallons. A certified hauler collects, transports and disposes of the sewage in accordance with all Federal, State and local laws. The two exceptions are Harbor Marina, which uses an on-site Bio-Robi septic system, and Captain's Cove Marina, which does not have a pumpout facility and instead uses a certified waste hauler to pumpout a vessel on request.

According to the petition, the slip and mooring capacity for each harbor or creek is as follows:

Name of harbor or creek	Number of slips/moorings/docks
Northwest Creek .....	21
Three Mile Harbor .....	1067
Accabonac Harbor .....	56
Hog Creek .....	195
Napeague Harbor .....	20
Lake Montauk .....	1274
Total .....	2577

The New York State Department of State conducted a survey of recreational vessels using aerial photography during August 1995 for the New York State Clean Vessel Act Plan. Analysis of the photographs provided information on the total numbers of vessels by water body. Data indicates the following peak season vessel population in the proposed NDAs in East Hampton:

Name of harbor or creek	Number of vessels
Northwest Creek .....	No data available
Three Mile Harbor .....	734
Accabonac Harbor .....	38
Hog Creek .....	No data available
Napeague Harbor .....	56

Name of harbor or creek	Number of vessels
Lake Montauk .....	883
Total .....	1711

Information regarding vessel population based on length shows that 63% of the boats are less than 40 feet and 37% of the vessels are 40 feet or greater in length. These percentages are based on a survey of overnight and long term occupancy and omitted marinas with recreational small crafts. Based on the number and size of boats, and using various methods to estimate the number of holding tanks, it is estimated that 5 to 8 pumpouts are needed to service the vessel population in the proposed NDAs. Currently, ten pumpouts and three pumpout boats exist in the proposed NDAs.

The EPA hereby makes a *tentative affirmative determination* that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for Northwest Creek, Three Mile Harbor, Hog Creek, Accabonac Harbor, Napeague Harbor and Lake Montauk in the Town of East Hampton, New York. A final determination on this matter will be made following the 30 day period for public comment. A final affirmative determination would result in a New York State prohibition of any sewage discharges from vessels in Northwest Creek, Three Mile Harbor, Hog Creek, Accabonac Harbor, Napeague Harbor and Lake Montauk.

Comments and views regarding this petition and EPA's tentative determination may be filed on or before December 7, 1998.
