

the opinion of the Federal Circuit in *Creswell VI*.

On September 29, 1998, the CIT affirmed the Department's redetermination. *Creswell Trading Co. v. United States*, Slip Op. No. 98-139. No comments were received by the CIT contesting the Department's redetermination. Therefore, in accordance with the results of remand affirmed by the CIT, we are amending the final results of administrative review. The final countervailing duty rates for the 1985 period of review are the following:

Carnation Enterprise Pvt. Ltd.—13.83%
Crescent Foundry Co. Pvt. Ltd.—30.09%
Govind Steel—51.39%
Kejriwal Iron & Steel Works—14.09%
R.B. Agarwalla & Co.—7.96%
R.S.I.—8.22%
Serampore Industries Pvt. Ltd.—22.09%
Uma Iron & Steel Co.—15.64%
Kajaria Castings Ltd.—44.84%
Super Castings Ltd.—29.40%
Country-wide Rate—22.09%

The Department will instruct the Customs Service to assess countervailing duties on all appropriate entries. The Department will issue liquidation instructions directly to the Customs Service. The above rate will not affect the cash deposit requirements currently in effect, which will continue to be based on the rates found to exist in the most recently completed review.

This amendment to the final results of countervailing duty administrative review notice is in accordance with section 751(a)(1) of the Tariff Act, as amended, (19 U.S.C. 1675(a)(1)) and § 355.22 of the Department's regulations (19 CFR 355.22 (1989)).

Dated: December 1, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Notice of Government Owned Inventions Available for Licensing

AGENCY: National Institute of Standards and Technology Commerce.

ACTION: Notice of government owned inventions available for licensing.

SUMMARY: The inventions listed below are owned in whole or in part by the U.S. Government, as represented by the Department of Commerce. The Department of Commerce's ownership interest in the invention is available for licensing in accordance with 35 U.S.C. 207 and 37 CFR Part 404 to achieve expeditious commercialization of results of Federally funded research and development.

FOR FURTHER INFORMATION CONTACT:

Technical and licensing information on this invention may be obtained by writing to: National Institute of Standards and Technology, Office of Technology Partnerships, 100 Bureau Drive, Stop 2200, Gaithersburg, MD 20899-2200; Fax 301-869-2751. Any request for information should include the NIST Docket No. and Title for the relevant invention as indicated below.

SUPPLEMENTARY INFORMATION: NIST may enter into a Cooperative Research and Development Agreement ("CRADA") with the licensee to perform further research on the invention for purposes of commercialization. The inventions available for licensing are:

NIST Docket Number: 96-002US.

Title: True Time Delay Generation Utilizing Broadband Light Source With Fiber Chirp Grating Array and Acousto-Optic Beam Steering And 2-D Architecture.

Abstract: System and method for rapidly reconfigurable two-dimensional true time delay generation for phased array antennas is described. The system utilizes a broadband light source, an array of fiber chirp gratings in a single fiber, and an acousto-optic spectrometer to generate a time-delayed linear grating. The grating is subsequently rotated to the desired angle utilizing an acousto-optic device having no moving parts.

NIST Docket Number: 97-049US.

Title: Method And Apparatus For Compression Of A Polarized Gas.

Abstract: A polarized 3He gas source has been developed which is capable of producing one standard liter of 10-15% polarized 3He gas in 2-3 hours. The gas source comprises an apparatus which compresses 3He gas produced by metastability-exchange optical pumping (at a pressure of a few mbar) to an output pressure of about 1 bar with up

to 70% preservation of the polarization. By cooling the storage cell to liquid nitrogen temperature during filling by the compressor, a final room temperature pressure of 4 bar has been obtained. The invention is a compact and relatively inexpensive device which is the result of extensive modifications to a standard diaphragm pump and appears to be ideally suited for use in a clinical setting where space is at a premium. The use of the polarized gas allows MRI studies of lungs and other air spaces, using conventional MRI systems or much smaller magnetic field levels.

Robert E. Hebner,

Acting Deputy Director.

COMMODITY FUTURES TRADING COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

AGENCY: Commodity Futures Trading Commission.

ACTION: Request for three-year extension of OMB control #3038-0013—Exemptions from Speculative Limits.

SUMMARY: The Commodity Futures Trading Commission has submitted information collection 3038-0013, Exemptions from Speculative Limits to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. The information collected pursuant to this rule is in the public interest and is necessary for market surveillance.

ADDRESSES: Persons wishing to comment on this information collection should contact the Desk Officer, CFTC, Office of Management and Budget, Room 3228, NEOB, Washington, D.C. 20502, (202) 395-3897. Copies of the submission are available from the CFTC Clearance Officer, (202) 418-5160.

Title: Exemptions from Speculative Limits.

Control Number: 3038-0013.

Action: Extension.

Respondents: Businesses (excluding small business).

Estimated Annual Burden: 36 total hours.
