

(11) *Buy American-Made Equipment and Products*. Applicants are hereby notified that they will be encouraged, to the greatest extent practicable, to purchase American-made equipment and products with funding provided under this program.

(12) *Fly America Act*. All award recipients must comply with the provisions of the Fly America Act 49 U.S.C. 40118.

Classification: This notice has been determined to be not significant for purposes of Executive Order 12866. The standard forms referenced in this notice are cleared under OMB Control No. 0348-0043, 0348-0044, 0348-0040, and 0348-0046 pursuant to the Paperwork Reduction Act. Notwithstanding any other provision of law, no person is required to respond nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number.

Dated: April 28, 1999.

Jerome S. Morse,

Director, Resource Management and Planning Staff, Office of Planning, Coordination and Resource Management Trade Development, International Trade Administration, Department of Commerce.

BILLING CODE 3510-DR-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

AGENCY: National Institute of Standards and Technology Commerce.

ACTION: Notice of government owned invention available for licensing.

SUMMARY: The invention listed below is owned in whole or in part by the U.S. Government, as represented by the Department of Commerce. The Department of Commerce's ownership interest in the invention is available for licensing in accordance with 35 U.S.C. 207 and 37 CFR Part 404 to achieve expeditious commercialization of results of Federally funded research and development.

FOR FURTHER INFORMATION CONTACT: Technical and licensing information on this invention may be obtained by writing to: National Institute of Standards and Technology, Technology Partnerships Program, Stop 2200, Gaithersburg, MD 20899-2200; Fax 301-869-2751. Any request for information should include the NIST Docket No. and

Title for the relevant invention as indicated below.

SUPPLEMENTARY INFORMATION: NIST may enter into a Cooperative Research and Development Agreement ("CRADA") with the licensee to perform further research on the invention for purposes of commercialization. The invention available for licensing is:

NIST Docket Number: 97-044US.

Title: Multi-Wavelength Cross-Correlator For Ultrashort Radiation Pulses.

Abstract: This invention is jointly owned by the U.S. Government, as represented by the Secretary of Commerce, and the University of Colorado. The measurement of cross correlations and time delays between ultrashort laser pulses of widely different tunable wavelengths has been demonstrated in a greatly simplified device employing semiconductor photodiode materials. Two-color, two-photon induced photoconductivity in a commercial GaAsP photodiode is used for the first time to obtain femtosecond cross-correlation functions for different wavelength pairs. The invention requires no non-linear crystals, no phase matching and no separate detector, as is the case for conventional optical cross-correlation measurements. In the invention, zero time delays and accurate cross correlations were measured for 100 femtosecond laser pulses of dramatically different wavelengths, e.g. 775 nm and 1300 nm. The only restriction for applicable wavelengths is that the sum of the photon energies of the two incident laser beams is above the band gap energy of the semiconductor.

Karen H. Brown,

Deputy Director.

Incidental Take of Marine Mammals; Bottlenose Dolphins and Spotted Dolphins

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of issuance of letters of authorization.

SUMMARY: In accordance with the Marine Mammal Protection Act

(MMPA), as amended, and implementing regulations, notification is hereby given that 1-year letters of authorization to take bottlenose and spotted dolphins incidental to oil and gas structure removal activities were issued on December 29, 1998, to Amerada Hess Corporation, of Houston, TX; on January 27, 1999, to Taylor Energy Company, of New Orleans, LA; on March 1, 1999, to Vastar Resources, Inc., and to Sonat Exploration Co., both of Houston, TX; and on April 27, 1999, to Samedan Oil Corporation, of Houston, TX and Chevron U.S.A. Production Company, of New Orleans, LA.

ADDRESSES: The applications and letters are available for review in the following offices: Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910, and the Southeast Region, NMFS, 9721 Executive Center Drive N, St. Petersburg, FL 33702.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Hollingshead, Office of Protected Resources, NMFS, (301) 713-2055 or David Bernhart, Southeast Region (813) 570-5312.

SUPPLEMENTARY INFORMATION: Section 101(a)(5)(A) of the MMPA (16 U.S.C. 1361 *et seq.*) directs NMFS to allow, on request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region, if certain findings are made and regulations are issued. Under the MMPA, the term "taking" means to harass, hunt, capture, or kill or to attempt to harass, hunt, capture or kill marine mammals.

Permission may be granted for periods up to 5 years if NMFS finds, after notification and opportunity for public comment, that the taking will have a negligible impact on the species or stock(s) of marine mammals and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses. In addition, NMFS must prescribe regulations that include permissible methods of taking and other means effecting the least practicable adverse impact on the species and its habitat, and on the availability of the species for subsistence uses, paying particular attention to rookeries, mating grounds, and areas of similar significance. The regulations must include requirements pertaining to the monitoring and reporting of such taking. Regulations governing the taking of bottlenose and spotted dolphins incidental to oil and gas structure removal activities in the Gulf of Mexico were published on
