Important themes to be addressed in proposals are: How important is the new technology to school safety? How much will the technology cost to purchase and maintain? Are there hidden costs? What are the net savings on labor? How much training is required to use or maintain the technology? And, how will courts view the technology in terms of liability and interference with personal freedoms? Proposals should address these general themes, however, it is not necessary to explicitly answer each question.

Multiple awards totaling \$950,000 will be made available under this solicitation. This solicitation is not intended to fund the purchase and installation of existing commercial systems.
