Regulatory History

The Coast Guard published a notice of proposed rulemaking in the Federal Register (64 FR 17134) on April 8, 1999. The Coast Guard received no letters on the notice of proposed rulemaking. No public hearing was requested and none was held.

Background and Purpose

The purpose of the temporary change to the operation regulations for the dual Interstate 5 drawbridges (33 CFR 117.869) is to permit the bridge owner to paint the lift span of the northbound bridge. According to the Oregon Department of Transportation, the entire structure is badly in need of painting to prevent further loss of steel through corrosion. The adjacent southbound bridge on I-5 is a newer structure and is not included in this painting project. Its draw span, however, operates in unison with the southbound draw span and therefore will be affected by this rule.

Current containment requirements to prevent pollution from the lead paint removal make it necessary to install an envelope around the towers which support the movable span and to isolate
