SUPPLEMENTARY INFORMATION:

Authority

This action is authorized under the Omnibus Crime Control and Safe Streets Act of 1968, sections 201-03, as amended, 42 U.S.C. 3721-23 (1994).

Background

The intent of this solicitation is to stimulate all areas of research or development that can enhance or increase the capacity, capability, applicability, and/or reliability of DNA for forensic uses. Proposals that build or improve upon existing technologies, methods, or approaches as well as proposals based on new or novel technologies, methods, or approaches are encouraged to meet the goal of maximizing the value of DNA evidence to the criminal justice system.

In order to most effectively and efficiently use DNA to its maximum value for the criminal justice system, the forensic DNA community, now comprised of more than 150 public and private crime laboratories, will need faster, less costly, and fundamentally reliable technical tools and innovations that can be appropriately validated, quality-controlled, and quality-assured for forensic use.

Research demonstrating the reliability of existing, impending or future methods is also encouraged. Emphasis is placed on developing methods or

technologies that address the needs of databasing for CODIS application and/or methods that can be used for the analysis of crime scene samples, which are often limited in quality and quantity.

Interested organizations should call the National Criminal Justice Reference Service (NCJRS) at 1-800-851-3420 to obtain a copy of "Solicitation for Forensic DNA Research & Development" (refer to document No. SL000369).
