

ecological damage than if the contaminated site was left undisturbed.

Whenever site cleanup does not result in the site's release for unrestricted use, DOE anticipates that long-term stewardship will be necessary.

Related Information

DOE is developing a background document, From Cleanup to Stewardship, A Companion Report to 'Paths to Closure' and Background Information to Support the Scoping Process Required for the 1999 PEIS Settlement Study that provides the best available information on DOE's long-term stewardship obligations, activities, and related issues. This background document may assist persons interested in submitting scoping comments by providing a basis for more informed discussion of stewardship needs, and the potential links between existing and future cleanup decisions (such as risks, costs, technologies, and future land use) and the level of effort required to conduct long-term stewardship activities. The primary source of information and assumptions about DOE sites is the data set used to develop the 1998 Accelerating Cleanup: Paths to Closure report. DOE is using this information to identify sites where contaminated facilities, water, soil, and/or engineered units would likely remain after cleanup is complete, and to estimate the scope of long-term stewardship activities needed. The background document is anticipated to be available this month. When available, copies of the background document or other related information can be obtained by contacting:

- The Internet Web Site at www.em.doe.gov/lts, which contains information on long-term stewardship related issues produced by DOE and outside sources.
- The Center for Environmental Management Information, 955 L'Enfant Plaza, North, SW, Suite 8200, Washington, DC 20024, 1-800-736-3282 ("1-800-7EM-DATA"), in DC, 202-863-5084.
- DOE Reading Rooms (for locations of the DOE Reading Rooms or other public information repositories containing background information, please contact the Center for Environmental Management Information at the above address and telephone).

Signed in Washington DC, this 30th day of September, 1999.

James D. Werner,

Director, Office of Strategic Planning and Analysis, Office of Environmental Management.
