

Information—NHTSA estimates that each respondent in the sample would require an average of 10 minutes to complete the telephone interview. Thus, the number of estimated reporting burden hours a year on the general public (3,000 respondents multiplied by 1 interview multiplied by 10 minutes) would be 500 for the proposed survey. The respondents would not incur any reporting cost from the information collection. The respondents also would not incur any record keeping burden or record keeping cost from the information collection.
