Final NPDES General Permit for New and Existing Sources and New Dischargers in the Offshore Subcategory of the Oil and Gas Extraction Category for the Western Portion of the Outer Continental Shelf of the Gulf of Mexico (GMG290000) and Notice of a Proposed Modification to That Permit

A modification to the permit is also proposed in this **Federal Register** Notice which will authorize the discharge of drill cuttings generated using non-aqueous based drilling fluids. EPA is also considering authorizing the new discharge of chemically treated seawater or freshwater which has been used to hydrostatically test existing pipelines and would like to solicit information on authorizing that new discharge under the permit. The public comment period for the drill cuttings modification and consideration of the new discharges of hydrostatic test water from existing
