Fish and Wildlife Service

Migratory Bird Hunting; Application for Approval of HEVI-METAL™ as a Nontoxic Shot Material for Waterfowl Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of review.

SUMMARY: We have reviewed Standard Resources Corporation's (Standard) application for approval of HEVI-METAL™ shot as nontoxic for waterfowl hunting in the United States. We have found that the information provided in the application is inconclusive and we are requiring additional information from the manufacturer before further consideration is given.

ADDRESSES: Standard's application may be reviewed in Room 634 at the Fish and Wildlife Service, Office of Migratory Bird Management, 4401 N. Fairfax Drive, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Jon Andrew, Chief, Office of Migratory Bird Management, (703) 358-1714, or James R. Kelley, Jr., Wildlife Biologist, Office of Migratory Bird Management, (703) 358-1964.

SUPPLEMENTARY INFORMATION: We continue to provide opportunity for submission for approval of alternative types of shot for waterfowling that, when spent, does not pose a significant toxic hazard to migratory birds and other wildlife when ingested. Currently, only bismuth-tin and steel shot are unconditionally approved by the Service for use in waterfowling. Tungsten-iron (published October 7, 1998; 63 FR 54016), tungsten-polymer (published October 7, 1998; 63 FR 54022), and tungsten-matrix (published October 19, 1998; 63 FR 55840) shot

types received temporary conditional approval for the 1998-99 waterfowl hunting season. We are currently reviewing applications for approval for shot types other than those previously referenced in this notice. We anticipate that approval of additional suitable candidate shot materials as nontoxic is feasible in the near future.

On April 9, 1999 (64 FR 17308), we announced our intention to review Standard's Tier 1 application for approval of HEVI-METAL™ under the revised test procedures for shot and shot coatings that we published in 50 CFR 20.134 (December 1, 1997; 62 FR 63608). A toxicologist from the U.S. Geological Survey, Patuxent Wildlife Research Center, assisted in review of the application. Part A of the application contained a statement of proposed use, a chemical and physical description of the shot material, information on expected variability of shot during production, an estimate of yearly production, and a 5-pound sample of the fabricated shot. Part B of the application contained a discussion of the acute toxicities of HEVI-METAL™ components to mammals and to birds, information on the fate of ingested shot on a small sample of captive-reared mallard ducks, and a summary of the known toxicities of HEVI-METAL™ components for vertebrates. Part C of the application considered the effects of firing on the shot, the half-life of components of breakdown products, the estimated environmental concentration in soil and water, and other environmental impacts of components of the shot.

We have determined that the Tier 1 information provided for HEVI-METAL™ does not provide sufficient information to allow us to conclude that it does not impose a significant danger to migratory birds, other wildlife, and their habitats. Specific toxicological concerns have been provided to the applicant. In light of our concerns, the applicant is advised to proceed with the additional testing described for Tier 2 before further consideration is given to the candidate shot. Tier 2 test requirements are outlined in 50 CFR 20.134.

Authorship: The primary author of this document is James R. Kelley, Jr., Wildlife Biologist, Office of Migratory Bird Management.

AGENCY: Bureau of Land Management, DOI.

ACTION: Notice of plan amendment process. The Bureau of Land Management (BLM) is designating a 30 day period for public submittal of proposed amendments to the Las Vegas Resource Management Plan.

SUMMARY: An integral step in ensuring a Resource Management Plan remains current is by amendment. The following criteria must be met before a plan amendment will be considered: (1) The proposed amendment is based on new data not considered when the plan was developed. (2) The information represents a change in legal or regulatory mandate. (3) The supporting detail is sufficient and the problem is clearly stated to allow consideration of the request. (4) The information represents a formal change in State or local government or agency plans.

If the proposed amendment cannot be considered due to legal or regulatory constraints or to improper submission, or if the situation can be resolved without a plan amendment, the amendment process will end at this point.

If a determination is made by the Las Vegas BLM Field Office Manager to proceed with the amendment process, the proposed plan amendments will be presented to the Resource Advisory Council for discussion and recommendations. The Council will serve only in an advisory capacity and their recommendations will not be binding on the District Manager.

The recommendations of the District Manager and the Resource Advisory Council will be forwarded to the State Director, who will decide to either: (1) Reject the proposed plan amendment, in which case the requestor will be notified of the decision and its rationale. (2) Further consider the proposed plan amendment, in which case the Director will determine the category of the

amendment with regard to the level of environmental analysis.

DATES: A 30 day period starting September 1, 1999, and ending September 30, 1999, is identified as the designated time period for plan amendment submission to the BLM Las Vegas Field Office Manager.
