

where our differences no longer make us targets of hatred and intolerance. Let us also remember in our prayers the people of Littleton, Colorado. While it is still too early to determine the specific circumstances that led to this week's tragic events, it is never too soon to teach our children that violence and hatred are wrong and have no place in our schools or in our society.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim April 25 through May 1, 1999, as National Crime Victims' Rights Week. I urge all Americans to remember crime victims and their families by working to reduce violence, to assist those harmed by crime, and to make our homes and communities safer places in which to live and raise our families.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of April, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-third.

WILLIAM J. CLINTON

Proclamation 7188 of April 23, 1999

National Science and Technology Week, 1999

*By the President of the United States of America
A Proclamation*

The American experience is deeply rooted in the desire to expand our frontiers and increase our knowledge about ourselves and our world. We stand at the end of a century marked by wondrous advances in science and technology—advances that have immeasurably improved the lives of our citizens. As recently as 100 years ago, space travel, genetic engineering, and telecommunications existed only in the realms of imagination and science fiction. Today, the nascent International Space Station, the nearly complete Human Genome Project, and the flourishing Internet attest to the great strides our civilization and our Nation have made. The scope and speed of our discoveries are truly breathtaking, and each day new applications of science and technology enrich our lives in fields as diverse as medicine, communications, engineering, and the arts.

Recognizing the importance of maintaining America's scientific and technological leadership, my Administration is seeking increased funding in areas like biomedical research and in earth and space sciences. My fiscal year 2000 budget also proposes a 28 percent increase in information technology research to finance a new initiative—Information Technology for the Twenty-First Century (IT²). This initiative will support long-term information technology research that will lead to fundamental advances in communications and improvements in computing.

During National Science and Technology Week, in communities large and small, engineers, scientists, educators, business people, and community leaders will lead observances to help their fellow citizens appreciate the

world's scientific and technological wonders. I encourage all Americans—and especially our young people—to participate in the many educational activities taking place across our Nation. The more we understand and appreciate the extraordinary tools that science and technology place at our fingertips, the more we can accomplish in our efforts to create a cleaner environment, healthier families, better schools, and a brighter future. The only limit on our achievements is our imagination.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim April 25 to May 1, 1999, as National Science and Technology Week. I call upon educators and students, the business community, and all the people of the United States to work this week and throughout the year to learn more about the contributions science and technology make to our lives and our future.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of April, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-third.

WILLIAM J. CLINTON

Proclamation 7189 of April 30, 1999

Asian/Pacific American Heritage Month, 1999

By the President of the United States of America

A Proclamation

Seeking America's bright promise of freedom and fairness, millions of men and women of Asian and Pacific descent have immigrated to our Nation through the past 2 centuries to participate in our great experiment in democracy. Although they left behind their native lands and many of their loved ones, they carried in their hearts a rich and ancient history and a proud heritage.

Throughout the decades, the principles and cherished traditions of Asian and Pacific Americans have infused our way of life, and their diligence and determination have helped build and sustain our Nation. Asian immigrants and indigenous U.S. Pacific Islanders have made contributions to every facet of American life. Yet all too often, Asian immigrants and Pacific Islanders had to endure discrimination as our society struggled with its growing diversity. Overcoming prejudice and other hardships, these determined men and women have strengthened our society, our economy, and our national character in the process.

Asian and Pacific Americans today continue to make substantial contributions to our country and our culture, and this year's theme, "Celebrating Our Legacy," calls on us to recognize our common human spirit. Scientists and researchers like David Ho untangle the mysteries of human biology; astronauts like Kalpana Chawla explore the heavens; human rights activists like Dith Pran inspire us with their courage and conviction; athletes like Michele Kwan dazzle us with their grace and endurance; and inspiring
