

Proc. 7219

Title 3—The President

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-seventh day of August, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

WILLIAM J. CLINTON

Proclamation 7219 of September 2, 1999

Contiguous Zone of the United States

By the President of the United States of America

A Proclamation

International law recognizes that coastal nations may establish zones contiguous to their territorial seas, known as contiguous zones.

The contiguous zone of the United States is a zone contiguous to the territorial sea of the United States, in which the United States may exercise the control necessary to prevent infringement of its customs, fiscal, immigration, or sanitary laws and regulations within its territory or territorial sea, and to punish infringement of the above laws and regulations committed within its territory or territorial sea.

Extension of the contiguous zone of the United States to the limits permitted by international law will advance the law enforcement and public health interests of the United States. Moreover, this extension is an important step in preventing the removal of cultural heritage found within 24 nautical miles of the baseline.

NOW, THEREFORE, I, WILLIAM J. CLINTON, by the authority vested in me as President by the Constitution of the United States, and in accordance with international law, do hereby proclaim the extension of the contiguous zone of the United States of America, including the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Mariana Islands, and any other territory or possession over which the United States exercises sovereignty, as follows:

The contiguous zone of the United States extends to 24 nautical miles from the baselines of the United States determined in accordance with international law, but in no case within the territorial sea of another nation.

In accordance with international law, reflected in the applicable provisions of the 1982 Convention on the Law of the Sea, within the contiguous zone of the United States the ships and aircraft of all countries enjoy the high seas freedoms of navigation and overflight and the laying of submarine cables and pipelines, and other internationally lawful uses of the sea related to those freedoms, such as those associated with the operation of ships, aircraft, and submarine cables and pipelines, and compatible with the other provisions of international law reflected in the 1982 Convention on the Law of the Sea.

Nothing in this proclamation:

- (a) amends existing Federal or State law;

Proclamations

Proc. 7220

- (b) amends or otherwise alters the rights and duties of the United States or other nations in the Exclusive Economic Zone of the United States established by Proclamation 5030 of March 10, 1983; or
- (c) impairs the determination, in accordance with international law, of any maritime boundary of the United States with a foreign jurisdiction.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of September, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

WILLIAM J. CLINTON

Proclamation 7220 of September 14, 1999

National Hispanic Heritage Month, 1999

*By the President of the United States of America
A Proclamation*

During National Hispanic Heritage Month, we reflect on the history of a people who were part of this land long before the birth of the United States. Hispanics were among the earliest European settlers in the New World, and Hispanics as a people—like their many cultures—share a rich history and great diversity. Hispanic Americans have roots in Europe, Africa, and South and Central America and close cultural ties to Mexico, the Caribbean, Central America, South America, and Spain. This diversity has brought variety and richness to the mosaic that is America and has strengthened our national character with invaluable perspective, experiences, and values.

Through the years, Hispanic Americans have played an integral role in our Nation's success in science, the arts, business, government, and every other field of endeavor, and their talent, creativity, and achievements continue to energize our national life. For example, Hispanic Americans serve as NASA astronauts, including Dr. Ellen Ochoa, the first Hispanic woman in space. Mario Molina of the Massachusetts Institute of Technology shared a Nobel Prize in chemistry for research that raised awareness of the threat that chlorofluorocarbons pose to the earth's protective ozone layer. Cuban-American writer Oscar Hijuelos earned a Pulitzer Prize for fiction.

The achievements of today's Hispanic Americans build upon a long tradition of contributions by Hispanics in many varied fields. Before Dr. Ochoa and other Hispanic Americans began to explore the frontiers of space, Hernando de Soto and Francisco Vasquez de Coronado ventured into the vast uncharted land of the New World. A thousand years before Mario Molina calculated the effects of human actions on the atmosphere, Mayan priests accurately predicted solar and lunar eclipses. And before Oscar Hijuelos described a Cuban family's emigration to 1940s America, Miguel de Cervantes Saavedra gave us the classic adventures of Don Quixote and Sancho Panza.
