

that, pursuant to 43 CFR 10.2 (d)(2), the 133 objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Louisiana State University Museum of Natural Science have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between these Native American human remains and associated funerary objects and the Caddo Indian Tribe of Oklahoma.

This notice has been sent to officials of the Caddo Indian Tribe of Oklahoma. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these human remains and associated funerary objects should contact Dr. Rebecca Saunders, Assistant Curator of Anthropology, Louisiana State University Museum of Natural Science, 119 Foster Hall, Baton Rouge, LA 70803, telephone (225) 578-6562, before January 12, 2001. Repatriation of the human remains and associated funerary objects to the Caddo Indian Tribe of Oklahoma may begin after that date if no additional claimants come forward.

Dated: November 30, 2000.

John Robbins,

Assistant Director, Cultural Resources, Stewardship, and Partnerships.

BILLING CODE 4310-70-F

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects in the Possession of the Louisiana State University Museum of Natural Science, Baton Rouge, LA

AGENCY: National Park Service.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 43 CFR 10.9, of the completion of an inventory of human remains and associated funerary objects in the possession of the Louisiana State University Museum of Natural Science, Baton Rouge, LA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43 CFR 10.2 (c). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has control of these Native

American human remains and associated funerary objects. The National Park Service is not responsible for the determinations within this notice.

A detailed assessment of the human remains was made by Louisiana State University Museum of Natural Science professional staff in consultation with representatives of the Tunica-Biloxi Indian Tribe of Louisiana; the Choctaw Nation of Oklahoma; the Jena Band of Choctaw Indians; and the Mississippi Band of Choctaw Indians, Mississippi.

In 1941, human remains representing six individuals were removed during excavations at Nick's Place (16AV004), Avoyelles Parish, LA, by Robert S. Nietzel. Mr. Nietzel donated the remains and objects to the Louisiana State University Museum of Natural Science in 1941. No known individuals were identified. The 363 associated funerary objects are Euroamerican bracelets, rings, glass beads, textiles, shell fragments, gun flints, lead shot, iron nails, and iron nail fragments. Unassociated funerary objects also were removed during these excavations.

Nick's Place consists of a conical mound near the eastern escarpment of the Marksville prairie, about a mile south of Marksville, LA. The human remains and funerary objects described here were removed from intrusive historic-age burials into the mound. The associated funerary objects date the burials to the late 18th or early 19th centuries. Archeological evidence and characteristics of the mortuary program culturally affiliate the remains with the Choctaw. Oral history evidence indicates that the Choctaw population occupying Nick's Place during the 18th and 19th centuries were absorbed into the Tunica-Biloxi Tribe.

In 1934-1935, human remains representing one individual were removed from the Angola Farm Site (16WF002), West Feliciana Parish, LA, by James Ford. The Angola Farm Site is currently on the grounds of the Louisiana State Penitentiary. The remains and objects were removed from "Burial 7." Dr. Ford donated these remains and objects to the Louisiana State University Museum of Natural Science in 1935 and 1939. No known individual was identified. The 11 associated funerary objects are an aboriginal pot, an iron spike, gun parts, gun flints, and iron nails. Funerary objects interred with individuals whose remains are not present in Louisiana State University Museum of Natural Science collections also were removed during these excavations.

The Angola Farm Site is an historic cemetery located below the bluffs on the

eastern side of the Mississippi River. The burial was removed from a filled stream channel at the site. Archeological and historic evidence indicate that the site was a small Tunica village and cemetery occupied 1706-1731.

Based on archeological evidence, the human remains and objects from the two sites described above date to the post-European contact period in the late 17th-early 19th centuries. Historical documentation and oral history indicate that the sites were occupied either by Tunica groups or by groups that were absorbed into the Tunica-Biloxi Indian Tribe of Louisiana. The geographical location of these sites during this time period is consistent with the known traditional territory of the Tunica-Biloxi people.

Based on the above-mentioned information, Louisiana State University Museum of Natural Science officials have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of seven individuals of Native American ancestry. Officials of the Louisiana State University Museum of Natural Science also have determined that, pursuant to 43 CFR 10.2 (d)(2), the 374 objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Louisiana State University Museum of Natural Science have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between these Native American human remains and associated funerary objects and the Tunica-Biloxi Indian Tribe of Louisiana; the Choctaw Nation of Oklahoma; the Jena Band of Choctaw Indians; and the Mississippi Band of Choctaw Indians, Mississippi.

This notice has been sent to officials of the Tunica-Biloxi Indian Tribe of Louisiana; the Choctaw Nation of Oklahoma; the Jena Band of Choctaw Indians; and the Mississippi Band of Choctaw Indians, Mississippi. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these human remains and associated funerary objects should contact Dr. Rebecca Saunders, Assistant Curator of Anthropology, Louisiana State University Museum of Natural Science, 119 Foster Hall, Baton Rouge, LA 70803, telephone (225) 578-6562, before January 12, 2001. Repatriation of the human remains and associated funerary objects to the Tunica-Biloxi Indian Tribe of Louisiana; the Choctaw Nation of Oklahoma; the Jena Band of Choctaw Indians; and the Mississippi Band of

Choctaw Indians, Mississippi may begin after that date if no additional claimants come forward.

Dated: November 30, 2000.

Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects in the Possession of the Louisiana State University Museum of Natural Science, Baton Rouge, LA

AGENCY: National Park Service.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 43 CFR 10.9, of the completion of an inventory of human remains and associated funerary objects in the possession of the Louisiana State University Museum of Natural Science, Baton Rouge, LA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43 CFR 10.2 (c). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has control of these Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations within this notice.

A detailed assessment of the human remains was made by Louisiana State University Museum of Natural Science professional staff in consultation with representatives of the Chitimacha Tribe of Louisiana.

In 1929-1930, human remains representing seven individuals were removed during excavations conducted at the Fatherland Site (22AD001), Adams County, MS, by Moreau B. Chambers. Mr. Chambers donated these remains to the Louisiana State University Museum of Natural Science in 1930. Museum records indicate that these remains were found in Burial 7, and Burial 13C. No known individuals were identified. The 85 associated funerary objects are textile fragments, shell fragments, wood fragments, trunk parts, and iron nails. One hundred and seven

unassociated funerary objects also were removed during these excavations.

The Fatherland Site is located on the west side of St. Catherine Creek, about three miles south of Natchez, MS. The material culture excavated from the Fatherland Site dates to A.D. 1682-1729. Historical and archeological evidence demonstrate that the Fatherland Site is the Grand Village of the Natchez. This settlement was occupied until 1729, when the Natchez lost a war with the French and were forced to flee. The majority resided for some time with the Chickasaw, though some moved to live with the Upper Creek and the Cherokee. Each of these groups were removed with their hosts to Indian Territory in the 19th century.

Based on the archeological, ethnohistorical, and historical evidence, the human remains and objects from the Fatherland Site are determined to be affiliated with the Chitimacha Tribe of Louisiana. The Chitimacha Tribe of Louisiana is the sole remaining Federally recognized tribe that share cultural attributes with the late prehistoric Delta-Natchezan complex from which both the Natchez and the Chitimacha derived. On the basis of linguistic and sociocultural evidence, the Chitimacha Tribe of Louisiana is considered to be the most closely related of the Federally recognized Native American groups.

Based on the above-mentioned information, Louisiana State University Museum of Natural Science officials have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of seven individuals of Native American ancestry. Officials of the Louisiana State University Museum of Natural Science also have determined that, pursuant to 43 CFR 10.2 (d)(2), the 85 objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Louisiana State University Museum of Natural Science have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between these Native American human remains and associated funerary objects and the Chitimacha Tribe of Louisiana.

This notice has been sent to officials of the Chitimacha Tribe of Louisiana; the Cherokee Nation of Oklahoma; the United Keetoowah Band of Cherokee Indians of Oklahoma; the Muskogee Creek; and the Chickasaw Nation, Oklahoma. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these human

remains and associated funerary objects should contact Dr. Rebecca Saunders, Assistant Curator of Anthropology, Louisiana State Museum of Natural Science, 119 Foster Hall, Baton Rouge, LA 70803, telephone (225) 578-6562, before January 12, 2001. Repatriation of the human remains and associated funerary objects to the Chitimacha Tribe of Louisiana may begin after that date if no additional claimants come forward.

Dated: November 30, 2000.

DEPARTMENT OF THE INTERIOR

National Park Service.

Notice of Intent to Repatriate Cultural Items in the Possession of the Louisiana State University Museum of Natural Science, Baton Rouge, LA

AGENCY: National Park Service.

ACTION: Notice.

Notice is hereby given under the Native American Graves Protection and Repatriation Act, 43 CFR 10.10(a)(3), of the intent to repatriate cultural items in the possession of the Louisiana State University Museum of Natural Science that meet the definition of "unassociated funerary objects" under Section 2 of the Act.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43 CFR 10.2(c). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has control of these cultural items. The National Park Service is not responsible for the determinations within this notice.

Between 1936-1954, 18 unassociated funerary objects were removed during excavations at the Belcher Mounds Site (LSUMNS Site Number 16CD013), Caddo Parish, LA, by Clarence H. Webb. Dr. Webb donated these objects as part of a larger collection to the Louisiana State University Museum of Natural Science in 1974. The unassociated objects include earthenware pottery, a decorated conch shell cup and other shell artifacts, a zoomorphic shell pendant, and a decorated platform pipe.

The Belcher Site is a dual mound and habitation site that functioned as a ceremonial center and cemetery between circa A.D. 900-1700. Twenty-four individuals were buried between circa A.D. 900 and 1400, and 22
