FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 et seq.) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or

bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 5, 2001.

Clearance Officer, (301) 594-3132.

SUPPLEMENTARY INFORMATION:
Proposed Project: "Medical
Expenditure Panel Survey Household
Component (MEPS-HC)-2001 through
2004".

The AHRQ intends to conduct an
annual panel survey of U.S. households
to collect information on a variety of
measures related to health status, health
insurance coverage, health care use and
expenditures, and sources of payment
for health services. Each panel consists
of a nationally representative sample of
U.S. households who remain in MEPS
for two consecutive years of data
collection. The first panel of MEPS
began in 1996 and has continued
annually thereafter. The MEPS-HC is
jointly sponsored by the AHRQ and the
National Center for Health Statistics
(NCHS).

It will be conducted using a sample of
households selected from households
which responded to the National Health
Interview Survey (NHIS) sponsored by
NCHS. The NHIS is a household survey
which collects health related data from
approximately 50,000 households and
110,000 people. The NHIS is used as the
sampling frame for the MEPS and
several other surveys as part of efforts
by the Department of Health and Human
Services (HHS) to integrate survey data
collection activities.

Data to be collected from each
household include detailed information
on demographics, health conditions,
current health status, utilization of
health care providers, charges and
payments for health care services,
quality of care received, medications,
employment and health insurance.

In accordance with AHRQ and NCHS
confidentiality statutes, statistical and
nonidentifying data will be made
available through publications, articles
in major journals as well as public use

data files. The data are intended to be
used for purposes such as:

- Generating national estimates of individual and family health care use and expenditures, private and public health insurance coverage, and the availability, costs and scope of private health insurance benefits among Americans;
- Examining the effects of changes in how chronic care and disability are managed and financed;
- Evaluating the growing impact of managed care and of enrollment in different types of managed care plans; and,
- Examining access to and costs of health care for common diseases and conditions, health care quality, prescription drug use, and other health issues.

Statisticians and researchers will use these data to make important generalizations on the civilian non-institutionalized population of the United States, as well as to conduct research in which the family is the unit of analysis.

Method of Collection: The data will be collected using a combination of modes. For example, the AHRQ intends to introduce study participants to the survey through advance mailings. The first contact will provide the household with information regarding the importance and uses of the information obtained. The AHRQ will then conduct five (in-person) interviews with each household to obtain health care use and expense data. Data will be collected using a computer-assisted personal interviewing method (CAPI). In certain cases, AHRQ will conduct interviews over the telephone, if necessary. Burden estimates follow:

Estimated Annual Respondent Burden Per Year: Each MEPS participant is asked to complete 5 interviews over two and one half years. Each interview averages 1.8 hours in length. Total burden is estimated in the following chart:

Survey period	Number of completes	Burden per complete (hours)	Total burden (hours)
Feb-July 2001	19,380	1.8	34,884
Aug-Dec 2001	13,280	1.8	23,904
Feb-July 2002	21,248	1.8	38,246
Aug-Dec 2002	16,239	1.8	29,230
Feb-July 2003	24,187	1.8	43,537
Total	148,291
