OMB Control Number: 3145-0020.

Summary of Collection: The Bureau of the Census will conduct this study again for NSF in 2001. The Bureau conducted the 1999 survey. National Research Council (NRC) conducted the survey from 1973 through 1995, and the National Opinion Research Center (NORC) conducted the 1997 survey. Questionnaires will be mailed in April 16, 2001 and nonrespondents to the mail questionnaire will receive computer assisted telephone interviewing. The survey will be collected in conformance with the Privacy Act of 1974 and the individual's response to the survey is voluntary. The first Federal Register notice for this survey was 65 FR 55056, published September 12, 2000, and no comments were received.

Need and Use of the Information: The purpose of this longitudinal study is to provide national estimates of the doctorate level science and engineering workforce and changes in employment, education and demographic characteristics. The study is one of the three components of the Scientists and Engineers Statistical Data System (SESTAT). NSF uses this information to prepare Congressionally mandated reports such as Science and Engineering Indicators and Women, Minorities and Persons with Disabilities in Science and Engineering. A public release file of collected data, edited to protect respondent confidentiality, will be made available to researchers on CD-ROM and on the World Wide Web.
