Correction to Chemical Nomenclature for Monomer Acid and Derivatives for TSCA Inventory Purpose

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: An August 2, 1985 letter from EPA erroneously equated monomer acid and its derivatives with Tall Oil Fatty Acid (TOFA) and its corresponding derivatives for Toxic Substances Control Act (TSCA) Inventory purposes when, in fact, they are chemically distinct. As a result, many manufacturers of monomer acid derivatives have not submitted Premanufacture Notices (PMNs) under TSCA section 5, because the letter incorrectly indicated that monomer acid derivatives were covered by TOFA derivatives already on the Inventory. This notice implements a correction to the 1985 letter on nomenclature of monomer acid and derivatives. With this correction, monomer acid derivatives that are not on the Inventory will be considered new chemical substances under section 5 of TSCA. Manufacturers of monomer acid derivatives not on the Inventory have 1 year to complete the PMN process to comply with this nomenclature correction. Today's nomenclature correction finalizes the **Federal Register** notice of October 31, 2000.

DATES: This action will become effective June 27, 2002.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the **SUPPLEMENTARY INFORMATION**. To ensure proper receipt by EPA, it is imperative that you identify docket control number
