SUPPLEMENTARY INFORMATION:

Title: New Source Performance Standards for Portland Cement Plants, OMB Control No. 2060-0025; EPA ICR No. 1051.08; expiring September 30, 2001. This is a request for extension of a currently approved collection.

Abstract: Entities potentially affected by this action are portland cement plants with the following facilities: Kilns, clinker coolers, raw mill systems, raw mill dryers, raw material storage, clinker storage, finished product storage, conveyor transfer points, bagging and bulk loading and unloading systems. The Administrator has judged that PM emissions from portland cement plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Owners/operators of portland cement plants must notify EPA of construction, modification, startups, shut downs, date and results of initial performance test and excess emissions. In order to ensure compliance with the standards promulgated to protect public health, adequate reporting and recordkeeping is necessary. In the absence of such information enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. The

Federal Register document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on February 1, 2001 (66 FR 8588). No comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average approximately 18 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners/Operators of Portland Cement Plants.

Estimated Number of Respondents: 113.

Frequency of Response: Initial and semiannual.

Estimated Total Annual Hour Burden: 7,968 hours.

Estimated Total Annualized Capital and Operating & Maintenance Cost Burden: \$986,700.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1051.08 and OMB Control No. 2060-0025 in any correspondence.
