BILLING CODE 4160-17-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[Program Announcement 01041]

Exposure to Tremolite Asbestos in Vermiculite Ore Site-Specific Health Activities; Notice of Availability of Funds

A. Purpose

The Agency for Toxic Substances and
 Disease Registry (ATSDR) announces

the availability of fiscal year (FY) 2001
 funds for a cooperative agreement
 program to conduct site-specific health
 activities related to human exposure to
 contaminated vermiculite ore at sites
 around the United States that received
 and/or processed ore from the mine in
 Libby, Montana.

This program addresses the "Healthy
 People 2010" focus area of
 Environmental Health. The purpose of
 the program is to assist public health
 agencies in conducting site-specific
 health activities related to human
 exposure to contaminated vermiculite
 ore at sites identified by the
 Environmental Protection Agency (EPA)
 as receiving and/or processing ore.

B. Eligible Applicants

Assistance will be provided only to
 public health agencies of States or their
 bona fide agents or instrumentalities.
 State organizations, including State
 universities, must establish that they
 meet their respective State legislature's
 definition of a State entity or political
 subdivision to be considered an eligible
 applicant.

Note: Public Law 104-65 states that an
 organization described in section 501(c)(4) of
 the Internal Revenue Code of 1986 that
 engages in lobbying activities is not eligible
 to receive Federal funds constituting an
 award, grant, cooperative agreement,
 contract, loan, or any other form.

C. Availability of Funds

Approximately \$1,000,000 is available
 in FY 2001 to fund approximately 10
 awards. It is expected that the average
 award will range from a maximum of
 \$10,000 for the conduct of health
 statistics reviews to a maximum of
 \$500,000 for epidemiologic
 investigations. It is expected that the
 awards will begin on or about either
 July 1, 2001 and will be made for a 12-
 month budget period within a project
 period of up to 3 years. Funding
 estimates may change.

Continuation awards within an
 approved project period will be made
 on the basis of satisfactory progress as
 evidenced by required reports and the
 availability of funds.

Use of Funds

Funds may be expended for
 reasonable program purposes, such as
 personnel, travel, supplies, and services.
 Funds for contractual services may be
 requested; however, the grantee, as the
 direct and primary recipient of PHS
 grant funds, must perform a substantive
 role in carrying out project activities
 and not merely serve as a conduit for an
 award to another party or provide funds

to an ineligible party. Funds may not be
 used to purchase equipment.

D. Program Requirements

In conducting activities to achieve the
 purpose of this program, the recipient
 will be responsible for activities under
 1. Recipient Activities, and ATSDR will
 be responsible for the activities listed
 under 2. ATSDR Activities.

1. Recipient Activities

a. For health statistics reviews:
 Analyze existing health outcome data of
 select asbestos-related diseases.
 Mortality data will be the most readily
 available data for asbestos-related
 diseases such as mesothelioma, lung
 cancer, and asbestosis, although cancer
 registry data should be utilized where
 available.

b. For epidemiologic investigations:
 Develop a protocol and conduct the
 recommended investigation. This
 protocol will undergo scientific peer
 review as required by ATSDR.

c. Provide proof by citing a State code
 or regulation or other State
 pronouncement under authority of law,
 that medical information obtained
 pursuant to the agreement will be
 protected from disclosure when the
 consent of the individual to release
 identifying information is not obtained.

d. Develop a mechanism for ongoing
 interaction with, and education of
 affected community.

2. ATSDR Activities

a. For the health statistics review:
 Make available to states both technical
 assistance and a standard protocol to
 use to analyze existing health outcome
 data of select asbestos-related diseases.

b. For epidemiologic investigations:
 Provide consultation and assist in
 monitoring the data; participate if
 requested in the study analysis and
 collaborate, if requested, in interpreting
 the study findings.

c. Conduct technical and peer review.

E. Application Content

In a narrative form, the application
 should include a discussion of areas
 under the "Evaluation Criteria" section
 of this announcement as they relate to
 the proposed program. These criteria
 serve as the basis for evaluating the
 application; therefore, omissions or
 incomplete information may affect the
 rating of the application. This program
 does not require in-kind support or
 matching funds, however, the applicant
 should describe any in-kind support in
 the application.

The narrative should be no more than
 30 pages, double-spaced, printed on
 one-side, with 1" margins, and
