SUPPLEMENTARY INFORMATION

I. Abstract

The Census Bureau plans to request a three-year extension of the Office of Management and Budget approval for the Quarterly Survey of the Finances of Public-Employee Retirement Systems. This quarterly survey was initiated by the Census Bureau in 1968 at the request of both the Council of Economic Advisers and the Federal Reserve Board. It gathers data on the assets of the 100 largest state and local government public-employee retirement systems. These systems hold over \$2 trillion in assets, which represent approximately 90 percent of all state and local government public-employee retirement system assets.

These important data are used by the Federal Reserve Board to track the public sector portion of the flow of funds accounts. The Bureau of Economic Analysis uses the data on corporate stock holdings to estimate dividends received by State and local government public-employee retirement systems. These estimates, in turn, are used as a component in developing the national income and product accounts.

II. Method of Collection

Canvass methodology consists of a mail out/mail back questionnaire. Responses are screened manually, then put into an electronic format. No statistical methods are used to calculate the data. In those instances when we are not able to obtain a response, estimates are made for nonrespondents by using historical data for the same system or the latest available annual data.
