BILLING CODE 8150-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[FRL-7229-2]

Oregon: Proposed Authorization of State Hazardous Waste Management Program Revision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Oregon has applied to EPA for final authorization of changes to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). EPA has reviewed Oregon's application and made the preliminary decision that these changes satisfy all requirements needed to qualify for final authorization, and is proposing to authorize the State's changes.

DATES: EPA will accept written comments which are received at the address below on or before July 17, 2002.

ADDRESSES: Send written comments to Lynn Williams, U.S. EPA, Region 10, Office of Waste and Chemicals Management, 1200 Sixth Avenue, Mail Stop WCM-122, Seattle, WA 98101, phone, (206) 553-2121. You can examine copies of the materials submitted by Oregon during normal business hours at the following locations: EPA Region 10 Library, 1200 Sixth Avenue, Seattle WA 98101, phone, (206) 553-1289; and at the Oregon Department of Environmental Quality, Land Quality Division, 811 SW Sixth Avenue, Portland, OR 97204. The Oregon contact is Gary Calaba at (503) 229-6534.

FOR FURTHER INFORMATION CONTACT: Lynn Williams, U.S. EPA Region 10, Office of Waste and Chemicals Management, 1200 Sixth Avenue, Mail Stop WCM-122, Seattle, WA, 98101; (206) 553-2121. For general information available on the authorization process, see EPA's Web site at: <http://www.epa.gov/epaoswer/hazwaste/state/rcra>.

SUPPLEMENTARY INFORMATION:

A. Why Are Revisions to State Programs Necessary?

States which have received final authorization from EPA under RCRA section 3006(b), 42 U.S.C. 6926(b), must maintain a hazardous waste program that is equivalent to and consistent with the Federal program. States are required to have enforcement authority which is adequate to enforce compliance with the requirements of the authorized State hazardous waste program. Under RCRA section 3009, States are not allowed to impose any requirements which are less stringent than the Federal program. As the Federal program changes, States must change their programs and ask EPA to authorize the changes. Changes to State programs may be necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, States must change their programs because of changes to EPA's regulations in Title 40 of the Code of Federal Regulations (CFR) parts 124, 260 through 266, 268, 270, 273 and 279.

B. What Decisions Have We Made in This Rule?

EPA has made the preliminary determination that Oregon's authorized hazardous waste program, as revised, meets the statutory and regulatory requirements established by RCRA. Therefore, we are proposing to grant Oregon final authorization to operate its hazardous waste program with the changes described in the authorization application and as described in this proposed rule. Regulatory revisions which are less stringent than Federal program requirements and those regulatory revisions which are broader in scope than Federal program requirements will not be authorized.

Oregon's authorized program will be responsible for carrying out the aspects of the RCRA program described in its revised program application, subject to the limitations of the Hazardous and Solid Waste Amendments of 1984 (HSWA) and the limitations of this authorization. Oregon's authorized program does not extend to Indian country. EPA retains jurisdiction and authority to implement RCRA over Indian country and over trust lands.

New Federal requirements and prohibitions imposed by Federal regulations that EPA promulgates under the authority of HSWA are implementable by EPA and take effect in States with authorized programs before such programs are authorized for the requirements. Thus, EPA will implement those HSWA requirements

and prohibitions in Oregon, including issuing permits or portions of permits, until the State is granted authorization to do so.

C. What Will Be the Effect if Oregon Is Authorized for These Changes?

If Oregon is authorized for these changes, a facility in Oregon subject to RCRA will have to comply with the authorized State program requirements and with the federal HSWA provisions for which the State is not authorized in order to comply with RCRA. Oregon has enforcement responsibilities under its State hazardous waste program for violations of its currently authorized program and will have enforcement responsibilities for the revisions which are the subject of this proposed rule once a final rulemaking becomes effective. EPA continues to have independent enforcement authority under RCRA sections 3007, 3008, 3013, and 7003, which include, among others, authority to:

- Do inspections and require monitoring, tests, analyses, or reports;
- Enforce RCRA requirements, including State program requirements that are authorized by EPA and any applicable Federally-issued statutes and regulations, and suspend or revoke permits; and
- Take enforcement actions regardless of whether the State has taken its own actions.

The action to approve these revisions will not impose additional requirements on the regulated community because the regulations for which Oregon's program will be authorized are already effective under State law.

D. What Happens if EPA Receives Comments That Oppose This Action?

If the EPA receives significant written comments on this authorization, we will address those comments in a later final rule. You may not have another opportunity to comment. If you want to comment on this authorization, you must do so at this time.

E. What Has Oregon Previously Been Authorized for?

Oregon initially received final authorization on January 30, 1986, effective January 31, 1986 (51 FR 3779), to implement the State's hazardous waste management program. EPA granted authorization for changes to Oregon's program on March 30, 1990, effective on May 29, 1990 (55 FR 11909); August 5, 1994, effective October 4, 1994 (59 FR 39967); June 16, 1995, effective August 15, 1995 (60 FR 31642); and October 10, 1995, effective December 7, 1995 (60 FR 52629).

F. What Changes Are We Proposing to Oregon's Authorized Program?

EPA is proposing to authorize revisions to Oregon's authorized program described in Oregon's official program revision application, submitted to EPA on February 4, 2002, and deemed complete by EPA on March 7, 2002. We have made a preliminary determination that Oregon's hazardous waste program revisions, as described in this proposed rule, satisfy the

requirements necessary to qualify for final authorization. Regulatory revisions which are less stringent than Federal program requirements and those regulatory revisions which are broader in scope than Federal program requirements will not be authorized. The Oregon Hazardous Waste Management Program, which was administered by the Oregon Department of Environmental Quality (DEQ), Waste Prevention and Management Division, reorganized effective October 1, 2001

and is now administered by the DEQ Land Quality Division. This rule proposes to authorize this reorganization.

The following table, Table 1, identifies equivalent and more stringent State regulatory analogues to the Federal regulations for those regulatory revisions Oregon is seeking authorization for. All of the referenced analogous State authorities were legally adopted and effective as of July 21, 2000.

TABLE 1.—EQUIVALENT AND MORE STRINGENT ANALOGUES TO THE FEDERAL REGULATIONS¹

Description of Federal requirements (CL# ²)	Federal Register	Analogous State authority (OAR 340-***)
Availability of Information	-100-0003(2), -100-0005(a)-(5), 105-0012.
User Oil Filter Exclusion, Technical Corrections (CL 107).	57 FR 29220, 7/1/92	-100-0002; -101-0001.
Testing and Monitoring Activities (CL 126)	58 FR 46040, 8/31/93	-100-0002; -101-0001; -104-0001; -1005-0001.
Boilers & Industrial Furnaces, Administrative Stay & Interim Standards for Beville Residues (CL 127).	58 FR 59598, 11/9/93	-100-0002.
Wastes From the Use of Chlorophenolic Formulations in Wood Surface Protection (CL 128).	59 FR 458, 1/4/94	-100-0002; -101-0001.
Revision of Conditional Exemption for Small Scale Treatability Studies (CL 129).	59 FR 8362, 2/18/94	-100-0002; -101-0001.
Recycled Used Oil Management Standards; Technical Amendments and Corrections II (CL 130).	59 FR 10550, 3/4/94	-100-0002; -111-0000(2), -111-0010.
Recordkeeping Instructions, Technical Amendment (CL 131).	59 FR 13891, 3/24/94	-100-0002; -104-0001.
Letter of Credit Revision (CL 133)	59 FR 29958, 6/10/94	-100-0002; -104-0001, 104-0151.
Corrections of Beryllium Powder (P015) Listing (CL 134).	59 FR 31551, 6/20/94	-100-0002; -101-0001, -101-0033.
Recovered Oil Exclusion (CL 135)	59 FR 38536, 7/28/94	-100-0002; -101-0001.
Removal of the Conditional Exemption for Certain Slag Residues (CL 136).	59 FR 43496, 8/24/94	-100-0002; -101-0001.
Carbamate Production Identification and Listing of Hazardous Waste (CL 140).	60 FR 7824, 2/9/95; as amended at 60 FR 19165, 4/17/95, and at 60 FR 25619, 5/12/95.	-100-0002; -101-0033.
Universal Waste Rule: General Provisions (CL 142A) ³ .	60 FR 25492, 5/11/95	-100-0002; -102-0011(e); -113-0000, -113,0020, 113-0020(1)-(2), -113,0030, -113-0030(3)(a), -113-0040, -113-0040(2), -113-0040(2)(b), -113-0040(2)(b)(v), -113-0040(3)(a)-(b), -113-0040(4), -113-0050.
Universal Waste Rule: Specific Provisions for Batteries (CL 142B).	60 FR 25492, 5/11/95	-100-0002; -113-0000, -113-0020, -113-0030, -113-0040.
Universal Waste Rule: Specific Provisions for Pesticides (CL 142C).	60 FR 25492, 5/11/95	-100-0000; -113-0020, -113-0000, -113-0070, -113-0030, -113-0040.

¹ For further discussion on where the revised State rules differ from the Federal rules refer to Section G. below, the authorization revision application, and the administrative record for this proposed rule.

² CL # (Checklist) generally reflects changes made to the Federal regulations pursuant to a particular FEDERAL REGISTER notice and EPA publishes these checklists as aids for States to use for the development of their authorization application. See EPA’s RCRA State Authorization Web page at <http://www.epa.gov/epaoswer/hazwaste/state/>.

³ State rule contains some more stringent provisions. For identification of more stringent State provisions refer to the authorization revision application and the Attorney General’s statement for this proposed rule.

G. Where Are the Revised State Rules Different From the Federal Rules?

This section discusses some of the differences between the revisions Oregon proposed to its authorized program and the Federal regulations. Not all program differences are discussed in this section because, although Oregon incorporates many Federal rules by reference, the State also writes its own version of many of the federal hazardous waste rules. This section discusses certain rules where EPA is making a preliminary determination that the State program is more stringent and will be authorized, rules where the State program is broader in scope, and rules where the State program is less stringent than the federal requirements. The State will not be authorized for the less stringent rules or broader in scope rules. Less stringent State rules and broader in scope rules do not supplant federal regulations. Persons should consult the table referenced above for the specific State regulations which EPA proposes to authorize.

Certain portions of the federal program are not delegable/authorizable to the States because of the Federal government’s special role in foreign policy matters and because of national concerns that arise with certain decisions. One such matter pertains to import/export functions. EPA does not delegate/authorize import/export functions. Under the RCRA regulations found in 40 CFR part 262, Standards for Generators, EPA will continue to implement requirements for import/export functions. EPA does not delegate/authorize certain of the Federal Land Disposal Restriction requirements, 40 CFR Part 268, because of the national concerns that must be examined when decisions are made under the following federal regulations; these include: 40 CFR 268.5—Procedures for case-by-case

effective date extensions; 40 CFR 268.6—“No migration” petitions; 40 CFR 268.42(b)—applications for alternate treatment methods; and 40 CFR 268.44(a)–(g)—general treatment standard variances. Oregon’s program does not include these requirements. EPA will continue to implement these requirements under EPA’s HSWA authority.

Areas Where the State Program Is More Stringent

States are allowed to seek authorization for State requirements that are more stringent than federal requirements. EPA has authority to authorize and enforce those parts of a State’s program EPA finds to be more stringent than the federal program. This section does not discuss each more stringent preliminary finding made by EPA, but persons can locate such sections by consulting the Table, referenced above, as well as by reviewing the authorization application.

Oregon has enacted several requirements under its hazardous waste management program for which EPA has made the preliminary determination that the requirements are more stringent than the standards of the Federal RCRA program set forth in 40 CFR parts 260–279.

States sometimes make changes to their previously authorized programs for which they need to seek reauthorization. Oregon made such a change to its rules for availability of information. The State program requirement at OAR 340–100–0003, which replaces the federal requirements at 40 CFR 260.2 for availability of information, is preliminarily determined to be more stringent than the federal program because State regulations require additional justification for trade secret claims and establish a time frame of 15 to 30 days

for clarifying claims. OAR 340–105–0012 was revised to require identical trade secret claims substantiation for permits as required by OAR 340–100–0003.

The State program regulation at OAR 340–101–0004(3) is preliminarily determined to be more stringent than the federal program at 40 CFR 261.4(g), Dredged Materials, in that the State program deletes 40 CFR 261.4(g) from its incorporation of the federal regulations by reference. Consequently, the State program does not exclude dredged material from regulation as a solid waste subject to a hazardous waste determination. Because the dredged materials exclusion at 40 CFR 261.4(g) replaced existing regulations that subjected such materials to a hazardous waste determinations, State programs were allowed the option of choosing to change their regulations to include the dredged materials exclusion or not. Those that selected not to include the exclusion would be more stringent than the federal program because EPA promulgated the dredged materials exclusion as a less stringent requirement.

The State program regulation at OAR 340–102–0011(3) is preliminarily determined to be more stringent than the federal program regulation at 40 CFR 262.11 because generators of hazardous waste in Oregon must keep documentation of “knowledge of process” hazardous waste determinations for at least three years.

The State program at OAR 340–102–0034(2) is preliminarily determined to be more stringent than the federal regulation at 40 CFR 262.34 as an additional requirement, which does not replace or supersede the requirement to have a permit in the event a generator fails to satisfy the 40 CFR 262.34 conditions.

The State program at OAR 340-102-0040, replacing the requirements of 40 CFR 262.40(b), is preliminarily determined to be more stringent than the federal program because the State program requires small quantity generators both to report waste generated (OAR 340-102-0041) and to maintain copies of all reports on waste generated for three years.

The State program is preliminarily determined to be more stringent at OAR 340-104-0001(6) than the federal program with respect to facilities receiving hazardous waste from offsite because the State program requires that facilities receive a final waste permit before managing offsite hazardous wastes. The federal program allows facilities with interim status to receive offsite hazardous waste.

The State program is preliminarily determined to be more stringent than the federal program with respect to the federal HWIR media rule because the State regulations do not allow for the use of Remedial Action Plans (RAPs) as found in the federal requirements at 40 CFR part 270, subpart H. The State regulations at OAR 340-105-0003 delete from their incorporation by reference of the federal regulations those regulations allowing for RAPs. Oregon inadvertently incorporated 40 CFR 270.230(e)(1) by reference but does not seek authorization for the provision.

The State program is preliminarily determined to be more stringent than the federal program with respect to the federal Post Closure (PC) rule (63 FR 56710) because the State program specifically excluded the PC rule from its incorporation by reference of the federal regulations at OAR 340-100-0002.

The State program is preliminarily determined to be more stringent in certain places than the federal regulations promulgated in EPA's Military Munitions Rule (62 FR 6622). With respect to the hazardous waste management system in Oregon, the State hazardous waste program added definitions for "demilitarization" and "demilitarization residue" at OAR 340-100-0010(2)(f) and (g) in Oregon's analog to 40 CFR 260.10. These definitions are specific to the processes and activities at the Umatilla Chemical Depot and are preliminarily determined to be more stringent than the federal program.

With respect to chemical agent munitions and chemical agent bulk items in storage, the State program identifies such chemical agent munitions and chemical agent bulk items in storage as characteristic and/or listed hazardous waste at OAR 340-

101-0030, referencing listings for blister agents and nerve agents at OAR 340-102-0011(c)(A) and (B). In the Military Munitions Rule, at 62 FR 6633, EPA said that States could be more stringent than the federal program for chemical agents and munitions.

Oregon's analog to 40 CFR 264.1201, OAR 340-104-1201, design and operating standards for munitions storage, is preliminarily determined to be more stringent than the federal program because OAR 340-104-1201 adds additional requirements to munitions storage, including requirements for: storage unit operations and management plans; vapor containment mechanisms for nerve agent storage units; a requirement to not allow storage of munitions in an open area; and the State definition of "no migration" to mean no detectable concentration of chemical agent outside the storage unit. EPA's regulations defer the "no migration" criteria to Army management procedures which allow some detectable migration.

The State is preliminarily determined to be more stringent than the federal program because the State program defines, for purposes of reportable quantities, chemical agents (such as, for example, nerve agents GB, VX, and blister agent HD) to be hazardous materials at OAR 340-108-0002(9)(c), and at OAR 340-108-0010(1)(e) reportable quantity is defined to mean any quantity of chemical agent.

The State is preliminarily determined to be more stringent than the federal program in its incorporation by reference of the federal regulations at OAR 340-105-0041(3) because the State program deleted a cross-reference to the federal regulation at 40 CFR 270.42(h) and replaced the cross-reference with a citation to OAR 340-105-0041(4) which for the Umatilla Chemical Depot does not allow the acceptance of off-site shipments of munitions. The federal program does not restrict acceptance of such off-site shipments at the Umatilla Chemical Depot.

EPA has made the preliminary determination that certain of the State program regulations for universal waste are more stringent than the federal regulations.

The State regulations at OAR 340-113-0040(2)(b), (2)(b)(B), (3)(a) and (b), are preliminarily determined to be more stringent than the federal regulations at 40 CFR 273.12 and 273.32(b)(5), because the State requires owners or operators of off-site universal waste collection sites accumulating more than 1,000 kg of universal waste and non-pesticide universal waste to meet the notification requirements for large quantity

generators and to submit additional information with the notification. The more stringent requirements of OAR 340-113-0040(2) and (3) are not applicable under the State regulation at OAR 340-113-0040(1)(b) to persons who collect, store or transport universal waste batteries.

The State regulations at OAR 340-113-0040(3)(a) and (b) are preliminarily determined to be more stringent than the federal regulations at 40 CFR 273.15(a) and (b) and 273.35(a) and (b), because the State regulations require owners and operators of off-site collection sites accumulating more than 1,000 kg of universal waste to limit the accumulation time to a six month period or to receive written approval from ODEQ to extend the accumulation period.

The State regulation at OAR 340-113-0040(4) is preliminarily determined to be more stringent than the federal regulation at 40 CFR 273.19 for tracking universal waste shipments because the State regulation applies to small quantity handlers accumulating more than 1,000 kg of universal waste.

The State regulation at OAR 340-113-0040(4)(b) is preliminarily determined to be more stringent than the federal regulation at 40 CFR 273.39(a) because the State regulation requires an off-site collection site to record the date the off-site universal waste was received.

The State regulation at OAR 340-113-0050(2) is preliminarily determined to be more stringent than the federal regulation at 40 CFR 273.60 because the State requires annual reporting of universal waste for all destination facilities.

The State regulation at OAR 340-113-0060(2)(b) is preliminarily determined to be more stringent than the federal regulation at 40 CFR 273.81(c) in listing additional factors to be considered when reviewing a petition to remove a universal waste from the universal waste rule. However, the use of such factors cannot result in the universal waste not remaining subject to the hazardous waste regulations.

The State program is preliminarily determined to be more stringent than the federal requirements at 40 CFR 279.22, Used Oil Storage, because the State regulation OAR 340-111-0032 requires generators to store used oil in accordance with applicable State and local Fire Marshal regulations and to keep rainwater from coming in contact with used oil during storage. The State program is preliminarily determined to be more stringent than the federal program at 40 CFR 279.45(h), 279.54(g), and 279.64(g), because the State program at OAR 340-111-0050 requires

handlers to respond to spills and releases according to more specific State requirements of OAR 340 Division 108 and requires used oil handlers to take immediate action to mitigate, report and clean up threatened spills and releases of used oil as required in OAR 340 Division 108.

Areas Where the State Program Is Broader in Scope

States are not allowed to seek authorization for State requirements that are broader in scope than the federal requirements. EPA does not have authority to authorize and enforce those parts of a State's program which are broader in scope than the federal program. Because the State program at OAR 340-101-0004 deleted from its incorporation by reference of the federal regulations the provisions of 40 CFR 261.4(b)(7)(ii), a list of 20 wastes from the extraction, beneficiation and processing of ores and minerals (Bevill wastes) which under the federal program are solid wastes that are not hazardous wastes, EPA has made the preliminary determination that the State program is broader in scope than the federal program with respect to these solid wastes.

The State program incorporated by reference rules that classified mineral processing characteristic sludges and byproducts being reclaimed as solid wastes and subjected manufactured gas plant waste to characterization under the toxicity characteristic regulations. The Federal regulations, 40 CFR 261.2(c)(3) parenthetical, 40 CFR 261.4(a)(17) as it referenced secondary materials rather than spent materials, and 40 CFR 261.24 as it applied to manufactured gas plant waste, were subsequently revised (67 FR 11251, March 13, 2002) because of a court vacatur of certain provisions of the regulations. Because of the vacatur, EPA cannot authorize the rules; thus EPA has made the preliminary determination that the State is broader in scope because the State program regulations at OAR 340-100-0002 incorporated the federal rules by reference as those rules existed before the vacatur.

The State incorporated by reference at OAR 340-224-0220 the federal regulation at 40 CFR 63.1210(b) which was vacated on July 24, 2001. EPA has made the preliminary determination that the State hazardous waste program is broader in scope to the extent, if at all, the State hazardous waste regulations reference or cross-reference the vacated federal rule.

The State regulations define "pesticide residue" at OAR 340-100-0010. The State interprets "pesticide

residue" to include state-only pesticides which are state-only hazardous wastes and outside the scope of the federal regulations. A generator of state-only pesticide residues may designate such residues as "waste pesticide" and manage the residues in a manner consistent with the universal waste management standards of OAR Division 113, under a state water pollution control facility permit, at a Subpart C facility as allowed by OAR 340-109-0010(4)(a) or in a Subpart D facility provided land disposal restrictions were met. Portions of the State definition for universal waste, OAR 340-113-0020(4) are preliminarily determined to be broader in scope than the federal regulations at 40 CFR 260.10 and 273.9 by the addition of "waste pesticides," which as defined by the State at OAR 340-109-0001(2)(a), are those not subject to regulation as hazardous waste under the federal regulations at 40 CFR Parts 260 to 270. Portions of the State definition of "universal waste," OAR 340-113-0020(4), are also preliminarily determined to be broader in scope where the definition includes "pesticide residues" that are not part of the federal program.

The State regulation at OAR 340-113-0010(1)(a), in addition to wastes covered by 40 CFR 273.3, adds waste pesticides and pesticide residues to the applicability section of the universal waste rules. This addition is preliminarily determined to be broader in scope where such waste pesticides or pesticide residues would not be part of the federal program.

H. Who Handles Permits After This Authorization Takes Effect?

Oregon will issue permits for all the provisions for which it is authorized and will administer the permits it issues. All permits, or portions of permits, issued by EPA Region 10 prior to final authorization of this revision will continue to be administered by EPA Region 10 until the issuance or re-issuance after modification of a State RCRA permit and until EPA takes action on its permit or portion of permit. HSWA provisions for which the State is not authorized will continue in effect under the EPA-issued permit or portion of permit. EPA will continue to issue permits, or portions of permits, for HSWA requirements for which the State program in Oregon is not yet authorized.

I. How Does Today's Action Affect Indian Country (18 U.S.C. 1151) in Oregon?

EPA's decision to authorize the hazardous waste program does not include any land that is, or becomes

after the date of this authorization, "Indian Country," as defined in 18 U.S.C. 1151. This includes: (1) All lands within the exterior boundaries of Indian reservations within or abutting the State of Oregon; (2) any land held in trust by the U.S. for an Indian tribe; and (3) any other land, whether on or off an Indian reservation that qualifies as Indian country. Therefore, this action has no effect on Indian country. EPA retains jurisdiction over "Indian Country" as defined in 18 U.S.C. 1151 and will continue to implement and administer the RCRA program in Indian country.

J. Administrative Requirements

The Office of Management and Budget has exempted this action from the requirements of Executive Order 12866 (58 FR 51735, October 4, 1993), and therefore this action is not subject to review by OMB. This action authorizes State requirements for the purpose of RCRA 3006 and imposes no additional requirements beyond those imposed by State law. Accordingly, I certify that this action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this action authorizes pre-existing requirements under State law and does not impose any additional enforceable duty beyond that required by State law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104-4). For the same reason, this action also does not have Tribal implications within the meaning of Executive Order 13175 (65 FR 67249, November 6, 2000). This action does not have substantial direct effects on tribal governments, on the relationships between the Federal government and the Indian Tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175.

This action will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely authorizes State requirements as part of the State RCRA hazardous waste program without altering the relationship or the distribution of power and responsibilities established by RCRA. This action also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not

economically significant and it does not make decisions based on environmental health or safety risks. This action is not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply Distribution or Use" (66 FR 28344, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866. The proposed rule does not include environmental justice issues that require consideration under Executive Order 12898 (59 FR 7629, February 16, 1994).

Under RCRA 3006(b), EPA grants a State's application for authorization as long as the State meets the criteria required by RCRA. It would thus be inconsistent with applicable law for EPA, when it reviews a State authorization application, to require the use of any particular voluntary consensus standard in place of another

standard that otherwise satisfies the requirements of RCRA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This proposed rule does not impose an information collection burden under the provisions

of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 40 CFR Part 271

Environmental protection, Administrative practice and procedure, Confidential business information, Hazardous waste, Hazardous waste transportation, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements.

Authority: This action is issued under the authority of sections 2002(a), 3006 and 7004(b) of the Solid Waste Disposal Act as amended 42 U.S.C. 6912(a), 6926, 6974(b).

Dated: June 3, 2002.

L. John Iani,

Regional Administrator, Region 10.
