II. Background

In response to OMB's guidelines (67 FR 8452, February 22, 2002), EPA has developed *Draft Guidelines for Ensuring and Maximizing the Quality, Objectivity, Utility, and Integrity of Information Disseminated by the Environmental Protection Agency* (Draft EPA Information Quality Guidelines; 67 FR 21234, April 30, 2002). The Draft EPA Information Quality Guidelines are available at EPA's site, <http://www.epa.gov/oei/qualityguidelines>. The Draft EPA Information Quality Guidelines address the various sources of information submitted to or obtained by the Agency for use in making decisions, and, in particular, discuss one category of information that includes information voluntarily submitted to the Agency or information that the Agency obtains from external third party sources. During development of these guidelines, EPA requested comments and held a public meeting. Subsequently, EPA developed a document, "Assessment Factors for

Evaluating the Quality of Information from External Sources," that specifically addresses assessment factors and considerations relevant to evaluating and using external sources of data and information. EPA is holding a public meeting on September 20, 2002 to obtain public input on factors and considerations they feel are useful to assess the quality of information voluntarily provided by external sources to the Agency or obtained by EPA for specific purposes. In addition, EPA is seeking comments from the public on the document, "Assessment Factors for Evaluating the Quality of Information from External Sources."

II. What Action is the Agency Taking

This notice announces receipt by the Agency of a request from Hi-Yield Chemical Company to cancel its pesticide product registered under sections 3 and 24(c) of FIFRA. This registration is listed in Table 1.

A. Background Information

Benomyl is a benzimidazole carbamate and systemic foliar fungicide that was registered for use on a variety of crops. All registered sources of benomyl have been canceled and all tolerances have been revoked.

The technical registrant, E.I. du Pont de Nemours and Company met with the Agency on April 18, 2001, and requested a voluntary cancellation of all their registrations for products containing benomyl. The cancellation order was published in the **Federal Register** of August 8, 2001 (66 FR 41589) (FRL-6794-9).

In addition to Hi-Yield Chemical Company, the Agency has previously received letters from the following registrants requesting voluntary cancellation of all their products containing benomyl: American Mushroom Institute, Amvac, Pursell Industries, Inc., the Scotts Company, Value Garden Supply, and Voluntary Purchasing Groups, Inc. The cancellation order for these products was published in the **Federal Register** of January 15, 2002 (67 FR 1976) (FRL-6817-7).

In their letter dated July 31, 2002, Hi-Yield (represented by their agent, Brazos

Associates Inc.) stated that they no longer manufacture or distribute the end use product that contained benomyl and there are no inventories of remaining stocks.

B. Requests for Voluntary Cancellation

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA

must provide a 30-day public comment period on the request for voluntary cancellation. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180-day comment period on a request for voluntary termination of any minor agricultural use before granting the request, unless: (1) The registrants request a waiver of the comment period, or (2) the Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on

the environment. The registrant has requested that EPA waive the 180-day comment period. EPA is granting the registrant's request to waive the 180-day comment period. Therefore, EPA will provide a 30-day comment period on the proposed request. EPA anticipates granting the cancellation request shortly after the end of the 30-day comment period for this notice. The registration for which the cancellation was requested is identified below in Table 1.

TABLE 1.—REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION

Company	Registration No.	Product
Hi-Yield Chemical Company	34911-27	Hi-Yield Benomyl

III. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled. FIFRA section 6(f)(1) further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**, make reasonable efforts to inform persons who rely on the pesticide for minor agricultural uses, and provide a 30-day period in which the public may comment. Thereafter, the Administrator may approve such a request.

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

Notice of Availability of National Management Measures to Control Nonpoint Source Pollution From Urban Areas and Request for Comments

AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice of availability and request for comment.

SUMMARY: EPA is requesting comment on draft guidance for the prevention and control of urban runoff. This technical guidance was written to provide technical assistance to State and local elected officials and agencies, landowners, developers, environmental and conservation groups, and watershed practitioners on the best available, most economically achievable means of reducing nonpoint source pollution from urban sources. The guidance is not a regulation and it does not impose legally binding requirements on EPA, States, Territories, authorized Tribes, or the public.

The guidance is organized from a watershed perspective and was written to cover all phases of runoff management from planning and development to program evaluation. The guidance provides up-to-date effectiveness and cost information on management practices, literature

citations, internet links to additional information and case studies from across the country. Reviewers should note that the draft technical guidance is consistent with the Guidance Specifying Management Measures for Sources of Nonpoint Pollution in Coastal Waters (EPA 840-B-92-002), which EPA published in January 1993 under the authority of section 6217(g) of the Coastal Zone Act Reauthorization Amendments of 1990 (CZARA). The draft document does not supplant or replace the 1993 document, but provides an expanded framework for addressing urban runoff. The guidance was written to apply to both coastal and inland areas and contains updated technical information that has become available since the 1993 guidance was published. The guidance is not intended to be used as a basis to review and approve either CZARA section 6217 or Clean Water Act section 319 State nonpoint source management programs. However, EPA and the National Oceanic and Atmospheric Administration (NOAA) encourage use of the revised guidance in the development and revision of Tribal, State and local programs to address urban runoff/storm water. The draft guidance revises several of the management measures published in 1993 due to the availability of new information and evolving management approaches. In addition, four new management measures have been added to provide information on developing and implementing a comprehensive runoff management program.

EPA will consider comments on this draft guidance and will then issue final guidance.

DATES: Written comments should be submitted to the person listed below by December 9, 2002.
