informed FDA in June 1993 that its entire product line had been recalled following a change in management, and the agency has found no information that would lead it to conclude otherwise. Finally, FDA has also independently evaluated relevant literature and data for possible postmarketing adverse event reports, but has found no information that would indicate this product was withdrawn from sale for reasons of safety or effectiveness.

After considering the citizen petition and reviewing its records, FDA determines that, for the reasons outlined above, Lannett Co.'s dextroamphetamine sulfate tablets, 15 mg, were not withdrawn from sale for reasons of safety or effectiveness. Accordingly, the agency will continue to list dextroamphetamine sulfate tablets, 15 mg, in the ''Discontinued Drug Product List'' section of the Orange Book. The ''Discontinued Drug Product List'' identifies, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness. ANDAs that refer to dextroamphetamine sulfate tablets, 15 mg, may be approved by the agency.
